8/9 - 10:30pm

Imma just write my thoughts here rn like im beyond mad & already told you here if it aint, you wont be forgiven like no lies here you aint get the consequences here of what has happened and for ruining a good thing, and making somebody suffer here, legit no joke, will not forgive here

its a different story in totality I keep saying, if I wasnt open to the flower of life already and thats my pt here it aint a joke like cos what the fuck dont you understand about a blackhole, Iv done everything right here and nobody is a friend at fucking all, like legit I will break your heart here then

like it aint even here a friendly joke, Dont fuck with me, it will be your nightmare, like on everything says the entity, you aint get it so you aint my friend here...

like just the fact here you werent here for me already, when I was at my lowest, followed my heart, found the truth, like again you let my parents abuse me by not helping me out, like it is a sick fucking joke and im not playing around here at all.... like that aint love it aint alchemy I dont know what the fk to tell you here legit like on everything you aint get how the game is played, thinking I will forgive here , no, bcos of the way its manifested, you can go fk yourself and die legit like you make me feel here

it doesnt take more than common fucking sense here to see what the fucks happened & as a fucking human being on this planet, where the fuck is the cure you sick fuck legit, you leave me with no options as you wont be my friend, like that is evil and not love bcos of whats happened here

I got fired for being harassed so go fuck yourself on everything here, like I would never get with someone who treats me like this or lets life unfold like this & aint here for me, like your literally evil , and thats alot for naming myself ancientxthoth here, well maybe w.e this all is, you shoulda just been a friend , like I showed you what happened here.... and your using my wisdom against me here, like but you wont, if nothing is free, I wont be with you on everything like how does that make you feel like I rather just be alone then, shit love feels good and not like this you dumb cunts legit tho

IDC what it is, it cant be everything, but again IDC you aint even know how to perform an initiation, lmao like wow , blind folding somebody also doesnt mean here letting them suffer, you dumb fuck, the easiest way to is just by using nature....

to legit feel like this here when iv gone through what I have & you wanna mess around in this time instead of being a friend, like legit good luck here, do what you want but the creator sees all here you dumb fuck

its just not even right here .0001% like nah it really aint, so you can piss off legit I tried always to be open hearted here until its not, so go fuck yourself on everything I will never forgive you here, or want you again after this like legit , asshole , their isnt even a pt of life if im this miserable, so you better watch out how you treat things here you asshole, legit like the thing is you dont get it , cos you keep doing it, and like for doing this to me here, guess what your gonna get, nothing, your lame as fuck, you aint even again know a good time here if you ate the flower of life, like this is beyond evil when I showed my love, again idc what you think reality is here, but legit your evil as fuck, like that is why again just watch, like I will never be your friend here asshole

like legit it aint even again about sex here , like its about allowing someone to not suffer, like I said if this is a battlefield here, youd walk right by me , like that is the only truth here so fuck you legit you can be on your own without me

like the fact is your completly wrong eithier way cos we already ate the flower of life.... like doesnt matter if you do this or that when someone knows how the game works anyways.... which again since a child, like that again youd let something suffer here, we aint need sex to feel better..... like so their is no bondage eithier way so what are you on here, like its so unattractive to do this to someone on everything here

like that if it was true it doesnt mean dick cos in this game I can go the other way asshole , learn how to play here, like legit fuck you

cos we already did the right thing and nothings been so go fuck yourself on everything here legit like I will and would never ever get with someone who tempts my brain like this that is evil af, like again it aint alchemy, it aint love, its dishonest af, its not loyalty, idc if it is true like this is beyond evil and you still wont help someone here like how the fuck hard is it to talk to someone here, it aint, like telling yah eithier way just cos something else is and im here doesnt mean again the shaman gets how the game is played here.... nothing matters, unless you be a good person & this aint here like wtf dont you understand legit , like eithier way not helping somebody and allowing them to go off like this, pft you aint a fucking friend here, your a fucking piece of dog shit legit cos the last thing thoths heart can do is watch somebody suffer, like we got a heart unlike you all legit

cos all things suffer, but suffering for the wrong reason in totality is why your wrong, like to see a shadow here, like pft aint nothing more to life, like ofc we know but again just cos you cant accept the truth to reality here and how it works, like again we will do nothing until something else actually is and is love

like cos I actually have love here & you wanna mess with me, this aint teasing me, like you get your head taken off for this no joke like aint a friend like gtfo legit , again you cant accept the truth to reality & so you wanna think again im just a dog here, but I told you everything here.... like youd let me stay heartbroken, like if you dont listen here when I say im good, like again you just cannot fool me eithier way which ever way you think, bcos you cant accept the truth of me having a heavenly mind and that your an asshole legit like why the fuck would I ever be sexual with someone who is like this here, you just dont get how far the shadow will go cos it aint have a choice to prove that your a moron here, like legit if you actually fucking did alchemy here and were a friend, thats why you get this response and feedback here.... and its not right one bit, like if medicine here helps somebody, they should take it dumb fuck I aint ever do coke or abuse anything here, just open to the flower of life asshole legit you dont even understand half of it on everything here, and yeah bcos even if you read what I write, you aint playing the game right to begin with as being a reader you aint writing your reality but observing a state that quantmly changes

but yah idc like think what you want, but I got a heart here, more than you, and thats why again why the fuck would I be with someone who just doesnt bring love here, like that wouldnt cure you if you aint feel good asshole legit just cos again my life experience is this.... like again read the wisdom asshole it says it must be shared with a friend, ofc im mad you aint sharing here and whats happened is most evil , to see the truth and feel miserable bcos again ppl have abused me in totality, drs, parents, like it aint a joke, my old boss, legit like fuck where is your hearts at here and yeah like again just really the time has come & gone here and im good with all things again, I dont want any parts of your corruption, cos only that which is once never becomes corrupted and thats thy life bcos we aint go out and find a woman to have sex with but my ex came to me and again like just all of it, if you think I wont burn you back twice as hard, think again, to even go off like again what more is their here to being a friend, like the whole world is corrupt af, is the truth tho, and yeah like again just you wont be a friend, and thats a problem here like your heart is heavier than the feather here says thoth , we will do the weighing says the entity

and yah all of it is mad corrupt actually and it really is, bcos im in love with reason we have wisdom here, to tell me im bipolar for being right about being harassed and fired when they coulda get sued again like you got it completly backwards here, and again just all of reality is wrong to see a shadow and not have the cure you asshole, at least you could be that friend and give the cure, but your just a dumb fucking animal legit

when life is suppose to be fun here like you dont play with someone here who has had this experience actually, like legit you aint know, if you did youd have wisdom explaining the truth of it all, like that when they leave the body they learn of it all.........

but ya when life is suppose to fun your the type of person I would never be friends with here, cos my love you aint gotta question , but yours, yeah, like cos eithier way in totality experience contradicts, so watch how you play, says the creator like cos again just its more than a sick joke here to not help somebody regardless, and that again its just what is most evil here

its like that here well using nature helps and experience contradicts in all ways, I aint use shrooms alot, but I have asshole, legit fuck you, It aint like again I went out looking, nah it just happen that one time, but thats all it takes asshole legit so in every single way here you are evil

like that if you had thy experience you would be stressed out too cos people are corrupt af and when you use nature or shrooms like again why do I have to explain myself here, when you could just be a friend, you do the opposite, so you get that back, like you aint know shit about my love here, asshole, thats why you would get burned back here, cos it just one thing you do not play with here, says the entity, thats why the entity got my back here in all ways, cos it knows the truth....... and why would I write this then if it wasnt the truth

its just that you really dont care here even if you think you do.... like in all ways, I wrote out everything here and again like idk just like again here to take this path, my only option in all of reality, and again just to suffer endlessly bcos I did nothing wrong here to begin with, and you cant even be a friend like gtfo legit no jokes, cause its just so easy in all of reality, to write to someone , to message, and yah like playing these mind games here is why I dont got love here rn , like love is love and you aint gotta question it, trust me like the dates of the exs prove this just in a way the simulation lined up here and again but still we too wise cos shit changes but still like the only thing that can not is the creator and the answer is just again idk their is none but yah love is just an intense feeling for someone and that you cant stop thinking bout them but if the game never returns it here..... like love is when somebody glows lol like that attraction is magnetic tho............. and this aint in any way not even in a friendly way here like their is no vibing with all this

but eithier way the paradox is taught by the dweller, well the dweller is in like everyone but taught that the shadow exists....... and he can pull you outta your body and make you fly too, if you were choosen by the creator..... to have this be, ... again all my experience says that and you wanna play me like this when I got a heart here like its just damn disgusting here, just never push my mind here to this & things would be alright here, like cos if you do that is crossing this line with me here, like cos it says something about who you are, and the fact youd let somebody get their without compromising is whats wrong, like talking to someone changes everything, but again not everyone is as dedicated as me but we be and yah like cos thats just already way back then what formed us into this wise person and again its like you play with it like it wont bite you back here.........

again idk what to think, but its just that again consciousness, and we know when we see something, that is again what if I wasnt open to flower of life here like it all speaks for itself and you wanna play me for a dummy legit, but yah IDK but I do know what I know.... and its all this here I write..... but yah just cause if this is true eithier way like just again anything is possible when I put it on a computer is the paradox here im aware of in all ways.... its always possible.... someone that cared could easily find a way or door in...... or someone that wanted to be evil, like eithier way , thats all again..... and yah like maybe if you were a friend then things would be different here

you cant accept the truth that thoth writes for me... and thats how the game works.. just again its always how much faith iv put into the creator..... well if the wisdom says only those who are wise recieve the wisdom, but that can be a paradox if I share, or it is a paradox that iv spell binded someone elses eyes, lol...................... but what is free, again just to post my video on this, like it breaks paradoxs........................ cos idk it dont make sense how thoth was in egypt and this is the answer to reality........ I aint talk to anyone on it....... I think ppl have to see it... maybe tho legit I could been first one to find it all this way lol..... like to say nah its because of this reason like a supreme intelligence and again w.e im treated like shit here why do I even write my thoughts out, even if it was being seen, like shit you aint a friend is my point, Now why would I think like this again, we know all about computers in that sense like we aint dumb here....... but we just dont care at the same time............... like cos if you play like that in a sense, you arnt even focusing on your own character here, like .... but yah cos of again, just its possible is always in the matter

then if something was true, it would be more possible its how, again, the whole thing is corrupted here, regardless, like we know too much wisdom, lol, like thats why if you dont just trust that the shadow is real and went inside of me, you aint my friend, like shit if I was a human I would wanna know more of it but again Id never let something suffer like I have....... if something else was an option....... and it was aware that you are playing me & not helping then you wanna help like im good with that game off the bat here................. cos a real person wouldnt like care cos love is love...... like who cares what any1 thinks when you are in love with someone, like the game plays differently lol...... but yah again at all angles of life ppl be corrupt and the snake be making moves here ahaha............................ but we ride that snake like the glyphs here....... again yah idk like

cos theirs always this POV that idk maybe nothing was real but it became real cos I did write out alot in a sense..... idk like but at same time im like nah its all cos of what happened after the entity, then nothing is and im like wtf is the pt of having thoughts here , its all paradoxs .... and again if someone was just right here and you aint help them and watched me go through this shit, like that aint love tho you cant make that up, cos thats like stupidity af, love is love and it aint this rn

you would take advantange of hermes coming to you is what it is, cos thats the guide we follow here tho .... all of it that vieled altar of Hermes in Assassins with the shrooms........... like how is that right here tho shit I aint even legit know what to think tbh ahaha but run off potentional and again if I was just right then this is wrong tho rn eithier way times ticking like the more I go through this daily the more I dont wanna be here when in all of reality if I had a friend like shit but yah idk what to do cos my thoughts of glued on it like that its the reason but im not trusted here ahahah ?? like who else but me....... and yeah like just all this like again it is legit mainly that I dont have my ADHD meds, I took adhd and bipolar for a min, and like I hate my life and my job and again with all the wisdom, to watch someone suffer like idk it aint a joke its life or death here....... when I give thy answers...... like to push someone to this state of mind when they are saying oh this helps me but then they poison you also when 1st of all I took it voluntary back then, but all this BS legit upping my dose like its pure evil, where are the shrooms, and again if all this experience here, if you cant just be a friend eithier way like piss off here, I just ppl just listened to me when I write cos im not joking like we are as set in stone here as the glyphs themselfs.....so if you just had love here like but you waste time and that aint right... idk hahahha im just writing cos I can at this point and im pissed off tho like cos I aint got anything to relax me or to help me and I always dont feel well and thats wrong, like get the man his nature here , how evil can you be, like just w.e

cos w.e again I think, eithier way here life can be anything it changes........ and yah like eithier way if thats all I want here and I dont try cos of just again what mad dumb in a way I aint know anybody here since and again just its so simple and youd rather be evil, like I aint even want them from you others its too late here, lol........ but yeah idk if you dont play the game like this, then how can you, you can only follow your heart and nothings free so if someone is expressing this , again if you knew, then you are watching something suffer and again it aint alchemy, it aint love, like shit be why at the end of this life even if your life is great rn it could be worse, like cos you aint here for a friend like I was willing to be

alls it takes is 1 day here .... like pft life be chill after, lol, blasting into inner space here and yah im super mad w.e like you mighta used things before, but the difference is Im me here, you aint experience them with the man the myth and the legend himself here and wonder how someone be wise in the way of like shit idk its so stupid so much relief I could get like and im played like this here thoth again says speak out against the evil ....

its just again you wanna play 1 ups here and like the truth here is you cannot 1 up someone who been open to flower of life tho lol idk cos the answer aint any other substance is the thing....... let really it would allow me to get over adhd meds but yah the other side of things again life sucks ass like legit im so mad you aint have no clue, like what if I just leave my job mad ahaha like and I aint got nowhere to go im so mad like youd let something suffer here.................................. its called medicine................. not something that makes you feel worse..........but better, and not alot of things can do that

the fucked up thing ofc like shit why would thoth have a tablet on the mushrooms, the mushrooms is the reason why he made it in a way ahahah he took do more than commanded of thy to the next level and built egypt and that aha

I cant even play around here like that again all this process happens to me & you wanna treat it like this regardless it aint right here, cos someone who is wise here would show love instead of moving like this tho like thats thy curse of the tablets the shrooms tho like the creator says, match that basically like for real tho like .... everyone is obsessed with bullshit in this world and again think what you want, eithier way life should be fun and it aint been its not it sucks ass like its gonna push me over the edge when simply you coulda been a friend and was their for the shadow who writes............. the truth of all reality .... like again yet it is the only truth their is....... like again was forced by the process of being open to flower of life in this generation to find it all like this... like with thy experience, why would you even think you could mess with me here legit like even if I die my experience to me been legendary..... but not all this suffering so eithier again like idk wouldnt force anything if it wasnt but im just saying like if you aint appreciate me like you aint get me, if I was on the other side of this regardless right, It would be the most interesting thing tho to talk to someone who experienced this in the way of shit you cant fool me here legit but yah thats why we like being alone, but again whats the pt of life if you dont find someone you love and try to get them its the only way the agwanti snake moves, but at same time their is weird af shit in the world, and all this corruption, ppl like its so bipolar and ppl are clueless bcos of not using nature it is scary... the egyptians be all over that mind game here but yah idk you cant accept the consequences here of all this, like I aint know what to do and with these thoughts its like well wtf I seen an entity and showed you it went inside me twice like and these be my thoughts, the wisdom says hes the master of secrets............ like but all this I have no choice..... and again just love is just love and it just is tho like it aint weird shit like this tho cos love is pure and directly beams you but yah idk like this is the only way we know how to ride it out in this simulation though.......... like again what the fuck is the point of having thoughts then, ahaha like thats all anyone has, so why wouldnt if it came across like follow that pathway and again what choice do I have and im being used as if on that fact here, like taking my loyalty here for granted

but we always think of both sides here, again if it wasnt true & to come across me and my thoughts cos it is possible cos of putting energy into the Universe like that yeah but if you saw someone express what I have and see it in the walls in egypt again youd have to question yourself like and then the creator be testing you to the extreme in this situation ahaha like but yah idk their may be ppl in this world and she may be one of them who know all about it here coulda knew back then, but see I question all things, but again idk, I just feel like you cant interact with everyone in this game in a way but you dont need to but like just its as , iv said it before in a way, like parallel dimensions or Universes exist in this way of the observer always wins, idk I gotta win shit lol..... but yah like that again every single thing is an illusion bcos of the immense knowledge and technology, like for all you know, your alone in a game with an illusion infront of you like the duat and you gotta face npcs and decide if their mortal or not and some are immortal tho like you group together in a game lol like on the other side with friends ahahah like exactly the animus here from assassins is like only way to view it that this is all an illusion .... its the hardest truth to live with, cos thats what psychedellics or the flower of life can make you realize if you follow pathway of wisdom..........

I just think if it is it should be and not this, this is like again we will play back like this and thats not a way to live life, ill go the other way here, cos I aint again like that though..... just I like to have fun and this aint, this is the total opposite here

cos at the same time right like nothing stops me from making a song, eithier way in a way, but life sucks and that who cares like you can also live life without again like the thing about shamanism is that in a village or a tribe like thats your music and someone job is to make it, but like thats the thing about tribes, is you can go any way you want, like all of reality becomes nothing to me with this wisdom, cos theirs nothing I can do unless someone was a friend.................................... like just when you eat the flower of life, like nothing becomes important in the world but exercising your right as being a human like and freeing thy mind... the correct way like thoth...... and yeah like this just to me is the greatest paradox with an answer but nobody will listen nor do I again I was private on X for awhile like just if this is how life gonna treat me then this is how imma play the game rn like youd take advantage of somebody even more here instead of just being a friend

but ya at end of day this is just thy curse and what happens when you dont listen and be a friend tho, like cos everything is changeable, to actually be in real life here & do things with anyone, is 100% different than writing my thoughts here........... and like what else can I do but nothing at all then, like im beyond tired here of not feeling well when I could, cos everybody turned on me when this happened but who found the wisdom and others aint wanna listen cos they must be evil like idk its just the paradox of this simulation is that it is how it was designed, like mario that you eat a mushroom you get super powers aha, and its so silly, its a fungi mushroom like this is beyond ridiculous here cos like we need for a reason which is what medicine is tho.... like shit back in the day if this alll was thats the 1st thing theyd use to treat somebody with this experience, is magic mushies and all I have is nothing at all here like the fact youd let me suffer some more here instead of just being their shows them true colors here & then maybe if again the paradox bes im so mad bcos this came to me in this fashion, like its not just as if I went out that day looking for it, it looked for me like it just was and thats the other reason like wtf we wanna do it like someone who is fun would get that ..... & just espiecally with the experiences here, like wtf this shit is nonsense, like you couldnt be any less of a not friend here .....cos thats thy curse, feed the entity here and it be happy.. =(

like so simple its legit retarded af here to think otherwise that someone would take the time and generate the truth on the walls and you still dont wanna listen ahaha just like idk if it was true or can be the truth of it all is that it can be so simply is my point also but yah we arnt gonna again like I know of no other way here well being again just what happen to me is the truth of the simulation like and you wanna play with me some more here is how it feels aha like the thing is if it didnt all go down like this Id have no reason to complain here......but it did and again just theirs a line here, experience be important but yah like just everything rn im beyond pissed off like I aint feel good not 1 bit, and yeah like their just is no fooling me here........ or blindfolding like I will blindfold you back here on everything and take a different pathway in life if you aint wanna show love to begin with here cos thats all their is to life or being born is that force ahaha and again this records here be why but you aint wanna listen to thoths story here

8/10 - 10am

I mean fact here is you dont care even .00000000000001% about how I feel & what else is their to say here...............

You cant accept that medicine helps people? you cant accept that iv been abused in all ways & you think this is the time to mess with me here, you got another thing coming here you piece of fucking shit

their just is no excuse and nothing else to say here, you are evil and their will never be love if this is how you treat someone who got love here, you make them suffer and not feel comfortable, you aint their for them, you try to manipulate them, im good legit on everything on the maker here, you take for granted the truth and are not open to the flower of life here, or else id have the cure........ so like on everything fuck you legit Ill NEVER be your friend here like on everything, cause you need to learn, you dont cross these lines here, and you have, so goodluck finding someone else who cares, like the time has gone and passed here, I am good, nothing will ever make me switch my mind...................... cos you cant be a friend in a time of need , you couldnt care less here and thats most disgusting and disloyal

like just like Iv said, I wont be with you...... believe that or not here, you dont mess with someone who had a open heart here.......... regardless you ignore the facts to how the simulation operates, and for that reason alone, I am good, go find you someone else cos I am good legit like if you put my mindstate in these places, we wont work out here, piss off legit like well do you even fucking think you dumb fuck, maybe I wouldnt feel like this if I didnt get screwed over in every way you fucking piece of shit

11:50am

the thing here is you dont care about how somebody feels, again youd let them stay sick, when in reality here the answer is just what I know here...... and their is no questioning that, as it is untterable .... so beyond it all, all you HAD to do was be a friend a long time ago here

again just you dont even know how seriouse I am here..................................... like that I wont be your friend becos of this all on the creator of the game here

like again it says the only way man can become free is by using nature, and you not sharing, like your not my friend and you never will be my friend here bcos you had chances to take, and you aint wanna take that risk, so go fuck yourself on everything here

if you cant accept the truth of reality, you are no friend of mine, the least, an enemy here, like to treat me like this when I know the truth of whats happened, legit gonna break your heart as youve broken mine and find someone else here at end of day

just cause w.e if it is was true, like oh now you wanna come into the picture, get lost, legit fuck you on everything, I would never be with a woman who makes me feel like this like no jokes, its too late, all you had to do was show love, and that is not what has happened here, again take it for granted, but I aint comfy ever here, like you can burn in hell for this all is what you can do , cos I wont be their with you at this point and your gonna be the one wishing you treated me better here like Id never put myself through this with a woman, why do you think the ex, is an ex, we dont play games here with love that is the last thing youll remember doing to ancient thoth here, dont believe me? look at the hole I threw everybody else in here , that dont get it, like your not my soulmate here, again I dont even care what the truth is, the truth is your as evil as the rest here, like you dont do that to someone who showed love here and your not gonna hear it from me other than in writing cos I wont be with you here, like you missed out on somebody here who had love, thats your own fault here

cause it doesnt matter, you dont know how the game is played here, like it doesnt matter what the scenario is here, dont be fucking stupid here, and thats what you are... you think like id just forget here but all this suffering made sure I wont, like and then whats the pt of life here like oh you like making people feel discomfort, you like them not feeling well in their mind, like you lose your head for that type of shit from the creator himself here, you aint wanna admit to the truth here, you wanna make someone suffer who never deserved it, and it aint a game I said I was down to play, ALTHOUGH I said this, if their was assurances here, then we can play the game, but its too late, your one sided, youd think no this is the answer when your completly ass backwards wrong here, so w.e it aint my fault you took me and my love for granted.......

thy curse is that I dont wanna be with you, like your gonna have to learn that the hard way here, just cos you let people screw you over, doesnt mean everyone does, cos you aint know how consciousness works here, and again idc for that reason, not even money could buy my soul here, like youd let someone be discomforting that had a divine experience here..................................... just cause this is how the simulation works, and you cant accept that, isnt my fault here, but im telling ya on everything on the creator of this game here, for putting my mind in these states, you done lost me here, im good with you, its the least attractive, dont try to think here that I would change my mind, you had a choice, and you choose wrong here

if you had just any clue or had any love for how iv felt since this all, im 1000% positive I wouldnt be suffering rn, but I am cause you dont care, so screw you legit, cos if you had thy mind, you would know Im right and that this is wrong, If you had a loving heart youd never watch something suffer and thats what you do, I just again its funny, you dont take me seriously here, but you will be not happy here to realize that I am 2000% like theirs some lines here that shouldnt be crossed and this is what you have done, youd let someone feel like this & have this hatred for life when they were harassed, Youd continue the harassing here, like it aint a joke its life or death, if you had any idea of my actual thoughts here, you WOULD NOT be playing around here and thats what you do, so on everything, fuck you it aint love, love isnt evil, love is love...... something you aint got any of cos you aint got a heart here , you aint wanna believe me when I put it all on the line, so fuck you legit, when im the one who told you the answers, legit go screw yourself, like you think this is funny but you dont have a clue how seriouse I am here, when it comes to thy mental thoughts, your gonna wish you never treated me like this & I will make sure of it

Again if I go online or If It was read here, you take advantage of me and thats wrong...... like we dont want that bcos of these reasons here, like youd think getting someone mad is the answer, and its not you are pure fucking evil and again you aint my friend here like you are why the ex becomes an ex here, like I wrote it all out here, just cos maybe you aint been in a relationship where their was love & no evil for years, like again you dont even have a clue here and you take advantage of me for being nice and sharing my thoughts, like youve done crossed the line here and I am good, like you think oh hes gonna change his mind but no not for this, forgetfullness is evilness here and thats what you do, just cause you got out played by the creator here, dont hate the playa hate the game and this is how it is here

just cos the game tested you back in this way, you are so mad, that I am right & you aint wanna show love to the person who had it the most and again legit we dont do make up here like its how it is once you cross that line, tried to warn you here, all you had to do, was simply be a friend, regardless of anything love is love and this is not, this is again just why the ex becomes an ex here, like where is your heart at, you aint got one

cause again youd take advantage of somebody who aint have a choice instead of just helping them, like I would cos I got a good heart and you dont, like you done missed out on the one who had all the love in thy world just cause you aint believe me, but sorry to tell you this is how the game works, like you had a chance at any moment in the present here to be their and your not, youd legit like you dont have a clue here how seriouse I am, that you will regret it, you wanna make me feel like this when I was harassed to begin with here, like goodluck says the creator , when the creator comes down to thy , like your gonna wish you never assumed here, cos thats your problem, but thats what a man does, questions things, has a mind, like again you just are completly wrong here and w.e like dont think im seriouse here , you are gonna learn says the creator, cos me it dont matter aint nobody done a single friendly gesture since, like money cant buy you the truth here, sorry to tell ya , nor can being successful, but having a good heart can , cause it changes everything, as just its based on the mind & not anything else, like what matters here in life if you dont find someone you love & vice versa, cause thats the only reason you became generated or anything did........

like idc if I was right on this and the whole other side be mad at me here, like why dont you stop singing stupid fucking songs here and do something to change the world , like you dont speak up against the evil here you are nobody, you dont have a clue, even if again prob just am right, they lie to the 99% here but again just the way this game works is stranger than you can imagine, nothing matters w.o the observer and you are not for all, your the reason why the tablets exist bcos their is evil in the world and thats what you are, you cant understand the foundation of how this game is ran

8/10 - 1050pm

lol good I was about to deactivate anyways, we got our point across here.... you dont care and thats most evil

but yeah that we got our archive tho and we posted the video right before , but yeah w.e like your just lame af legit lmao like no lies im bout to go the other way here and your gonna find out the hard way again I guess

cos your not reasonable if you dont see that someone saw an entity and that magic mushrooms are the cure, what are you waiting for, nobody can do a thing about this truth, like the entity will get you back just watch here, you aint know who your messing me with here lmao on the creator, it is the creator fuck you think

try to take me down here, its only gonna be worse for you at the end of the day here....... poison me some more I dare you here, like I did everything I could here

hope it sparks something to change the world ..... like pac once said, I will spark the brain that will change the world here......... and your just again corruption gets everybody but this here, insanely disgustingly wrong to treat someone like this..... when the records show ADHD helped and again fuck you like its all corrupt ass bullshit here like trust nobody legit

thats my only reason says the entity, to change the world, so more people dont have to suffer, cause believe it or not, it is the answer here, corrupt ass pussies like you aint for all and thoth gives me right here to stand on that here

cause we just know we are right here on this side of things

you cant outsmart the truth of this experience.....? like I already died, what am I afraid of here? to die while still alive like again pac said, so to find something to die for, and this is it, but you aint wanna take that risk, like what dont you get, dont you see the glyphs, the offerings to the initiate, thats how its suppose to be here, on everything tho and watch magic be, but your too lame here, you let ppl harass me when I said I was down for thee, like how could I forgive someone here, just listen to the wisdom, that is the answer here, or you can still miserable

the thing about it all, is idk , its not hard to imagine it can be, its also not hard to imagine nothing is, well idk what I have to do, just to go to that length to say something to someone, its like this is stupid af, when again believe it or not, this is what happened here, its not like your curse here, you didnt spawn the entity, but the eating of the flower of life did.............. and all this is thy experience, so you can eithier rot alone and corrupt and be loving, like the funny thing is , just Im that confident here it is the answer, cos thats all their is to reality here...but again doesnt have to be here times ticking, like idk im just annoyed af not cause of any other reason but legit here, I got screwed over in everyway, thats why we take adhd meds it helps, we didnt take bipolar and then it ruined everything, how much more evil could you be in all of reality here

like but thats what the thing is that is attractive to some others is that we are different, like we made it this far hiding away, in thy cave or at PC...... lol but yeah like its not that im ever paranoid or care if it was like I always said, I just said its always possible............ like why would I care, how you know I dont trick you if so, bcos its possible, like its the experience of thy reality which is why and I said every reason here............

like cos the problem with it and why it aint going the way you want if so bcos I dont fucking feel good you dumb cunt legit ahah like idk I just hope you know here when I talk or write like this, it aint funny, thats watching someone fucking suffer here you dumb animal, like the whole thing of everything , is the corruption here, you aint know what these meds do to you, but adhd is different, but again its simple, one blocks one ups, one blocks I aint succesful or give a fuck a day in my life here, on ADHD alone, we got our electrical license, like do your fucking homework here im pissed off I got fucked over at every angle and you aint give me any space here, you aint try to be that friend and lift me out of the darkness, you just push me into it more and that is like not friendly like cos again you aint got a heart cos you aint see what happen in totality, like how much worse can my life get, like why would you fuck with someone, bcos ppl have hurt themselves before, like when theirs a fucking answer to dumb selfish fuck here im pissed off, its nature, wtf smack yo ass legit get real here, its how the game works

to work for something & to lose it for being bullied is most wrong, my connects with again back then is a different meaning here tho, and thats why, like idk the scary thing is I aint wrong here, that would be magic, but your lame af like this aint here, your making me feel just like I rather not be here, is the truth, like that is just the thing about potentials here, and im taken for granted when I said I had love for someone........ like legit just love is being their for your other........ I just dont know, the entity says again why wouldnt I trust my thoughts, its all we got, your more of an idiot here to not be like again hmmm an entity came to this person and they said they love me and have an answer, like esp again I dont like talking bout it, but its just facts at this period in life with me too like it aint been the same since tho .... seen shit out of my control go wild...................... lol like in all ways, but yah like it doesnt make sense cos the numbers, regardless of anything else, it is the only truth I can go by, maybe id show love if it wasnt weird to just be online talking bout love like pft so thats all, like again whats love if it wasnt 2 ppl coming together which generated you, which again the totality of the myth of the simulation, is fucked, cos their is an answer which I looked for here............. again try to find someone else here, and all I get is the belittling here, like I aint good enough, or that he is crazy , but yah for a reason........ like my reasons are like wtf, dont give a fk who you are in the world, I wanna shroom here

its stupid af but I cant help but be entangled in the thought... and the wisdom I read say thought is real, and thats all I think about is ariana..... I dont look at her pics or anything, I dont follow or watch or listen to anything.................. even if I dont talk about it, the thing is this woman again at my work like IDK what to think no matter what she used her energy on me, but nothing has to be like I told you here, im way to wise, like you take for granted how I move, cos I coulda just let my dick get to me & talk to her but again my reasons been different, I aint feel good about my life and im not joking like im about to just quit my job and like I have no where to go and that feeling being without my ADHD tablets cos they helped, is super like fucked, I got no hope at all here, no motivation, cos I got screwed over, like and you cant even say a thing to help, thats why im so mad, I had love, shit be automatic, to take that risk and you aint, maybe didnt see it, again IDK since the entity, my mind told me this like its the algorithms in totality......... so idk what to think, cause if and its true that it is an entity, like thats the only reason cos name is in consciousness, like im not ancientxthoth online without a reason, someone who saw the entity and connected it & found the wisdom, you should be helping me out not letting me suffer , like why should I feel like I have no which direction to turn here bcos someone harassed me at my job, and that is the only reason here, maybe right again they saw what I said online or all that, but its all a misunderstanding we even shared mckennas wisdom, like iv explained everything, so w.e like I just cant change my mind, maybe if this other person just talked to me, then it woulda broke the curse but here I am, ...im just again more of a friend than you can imagine cos right trust nobody here, but the person you love even then cos whats happened here IDK you aint know how hard it is for me, even if thy other person here went through something, but so did I, like whats the difference, they dont exist in my reality anymore the entity came and gone here................ lol it swapped ppls lol

I could go off writing till I die with how I move here........ I just want life to change here, like shit enough with the out loud shit , real killas move in silence they say thats why we write, lol

but yah idk its just again this forcing into this position, bcos of all reasons, the world is wrong and evil and someone I love would realize that too and not care and just do it but thats the thing you aint just do it here.............................

you aint know how much of a friend I am in the 1st place to write is the thing which has been taken for granted, theirs no reason to talk cause its already known .... like Im legit telling you how to survive in this simulation and your mad at me, like Im showing you its virtual and how to read it cos I have wisdom, and your using me here, like its pure evil, someone with a heart would know I am right and love me for that... like even friendly love here like shit, just cos I said all this stuff and was more than truthful, I would not just get with anyone here like we are in love with reason only, lol....... like im played or tryna be played here in totality, just cos im more real than you, you couldnt of pulled off here what I have, again even if I have nothing in reality , and my life sucks, all I have is my word........ and thats worth more than anything...... all of this anyways could be used to generate themes to music, we could change the game, but at same time who cares, I just wanna live and not be stressed, you grow up and then you find out the world is evil, maybe if you do something you love, but I am not happy at all like I said, I cant stand living here, like im about to explode here and youd let me .... youd make me cry legit like thats wrong, cos I have no options, everything suffers here..........

I mean I aint joking, it all proves a point regardless right like, just its that , im trying to tell you something important and not even the person I loves cares, like im tryna save your soul here and your tryna chop my wings off here , like its wrong, anyone who tells you different doesnt know, like it just starts again its all a paradox, but im just mad thoth was for all and not even our leaders are, like alchemy is the meaning of being human or shamanism like and people will hate you to protect their own profits, like I aint tryna go through some dumb shit cos I write, why dont you read the whole story, itd make sense dumbass, like ppl will hate you for no reason here, and like but its just that again never wanted this to manifest in any other way, I know the truth and what happened here, all this BS online, nobody has a clue, wisdom says that, nobody cares, but I do cos of reason, like legit more of a friend than you could ask for here and im treated like this here........ like youd leave me all alone to go insane and die with no clue what direction to go in life when I had love.... and its very close to manifesting again I cant take thy stress on the brain and nobody will listen..................................... =(

but yah dont even try to like again if someone makes me feel worse you are like ignored, I will not be with someone like that, cos love just is, you aint know how much we got....................... cos we are again this experience here just proves it and again im treated like nothing here

cos thats dishonest and disgusting, like its wrong, and to generate off that its super like you aint even know what alchemy is......................... cos you prob just had sex alot... others def have

its just that I have no other option at times but to state whats on my table, like it is what I would accept, but all this other shit alllllllll of it, like gtfo , seriously , like all of it is just wrong, cos of the consequences of the truth, the entity wouldnt of came if it wasnt here.........

Like my point again is that I dont target ppl or look or care, im just stating my thoughts, but thats all anyone has and im still not believed like idk what else to say, cos anyways for that to be, I cant think beyond it, like but my thoughts say that, and again its way to fucked everything in totality, cos I cant accept all this , like the point is your not here being a friend when you could as easily be, you let all this be when I said what was my thoughts, even if its not here like I dont know how else to play a game when you only have your thoughts.................. it doesnt make sense but it does and all I wanna do is like chill like really take some shrooms here lol like dont need things and they could just like anybody like chill, the whole world is chaotic af to me here legit tho , lol.... like the problem is I aint have annnnnnny dopamine or motivation cos I took it for years no problem, why do jobs again test for thc, like shit is so corrupt out their

gtfo like legit says the entity, bunch of clowns, IDC If I have shit, like it is the truth youve missed the pt of life, while I aint........ things can change but again if I dont try what am I suppose to do, like idk ahaha nothing makes sense, prob how someone would want it, but yah like idk Just dont know what to think here....... cos like theirs paradoxes included here, but im right on it all, so it proves a pt, like again just you aint get it, like iits nothing something I tolerate here, like its way beyond fked , to fk with someone when this is their truth, when you coulda jus chilled with the ancient thoth here, like eithier way theirs a reason here tho like I am prob wrong on alot but the point is it is possible....... again I question everything so to judge what I write is like you aint even know which is funnier.................................. like that basically we experienced death,. idk alot of writers claim it, but still what happen here aint noone could express it like this cos they werent as choosen to me here, thats why it manifests and ppl dont know or have a clue but what happen to me was a spell binding like .... idk the glyphs show it, what the fuck am I suppose to do here, Im legit about to lose my mind even more here cos no1 will help me, like I will drown you for this no jokes at all like hurt your heart back just as much as you hurt mine here, thats what kind of energy this can be and its like gtfo shit I never let you into my life cos love aint like that AT ALL legit.................................. this is like it cos nothings been, I aint know what to do, cos they got outplayed in totality, and they cant accept the truth of reality... like wtf, shit all this is the stupidest shit ever

cos like just idk if just makes sense but the consciousness around me as if has always been like against thy self when thy self showed love always like thats all, like who shows what they know if they werent a friend here........ and yah like you wanna use the truth of nature against thy and you aint know how wise I am with it, we didnt do wrong things, only flowers, or shrooms, really, like that they cant accept this all, again I could be wrong and this could just be, but its wrong, like you aint here with some nature rn , I aint want your love if it aint include nature like the glyphs be showing in a way lol..................

all of it I always questioned things cos it doesnt make sense to be fired when you get harassed legit, who records that again if they werent aware here something was off, so w.e thoths the recorder, the entity came, asshole, like thats why youd never be my friend, lame af, legit cos even if I was wrong back then like just I aint know what to think cos of the entity being back then, like as in just that idk I followed my heart cos of it all, just we aint never like anyone except the 1st gf tho like see its so fucked , like just yah idk I wouldnt be down for someone who doesnt listen to both sides here....

cos the numbers and everything, again woman have fked with me so in totality here I aint know what to think, but if you push someone to this stress lvl you are mad evil like you dont even get it, so w.e cant just keep going on here about it, cos its always that parallel you can just chill rn and talk like lame-o

cos its something you cant accept that this is the truth, tried to tell me im wrong here, noone showed me to the truth, It all just came randomly, cos we aint ever care without adhd meds, like it is the truth of it all........ and cos you wont be here for me its like using things against me here and thats again your dumb like id throw you over my boat for this all here, on everything, even I gained riches, I am good, you dont play me like that here, cause your hearts heavy is what im saying, like in all of reality, cos you wanna take what I say online and again use is against thy, when im more real than anyone to write who had this experience........... when you could just be here for me asshole like that is how I feel like shit dont know what to think just that if someone was here then I gurantee you id be a lil happier, but again I got fucked over, the truth doesnt just blow away when its effected you here, like legit someone did shoot me before in leg like gtfo here I aint trust noone and their words, or anything, like shit fk you

I just know loving yourself be like this as in if you knew, like again the game is about finding the other, like again kinda why your here rn, lol...................................I again dont know how to view it all as in like again we aint fuck over anything here I got fucked over legit im pissed, but yeah like I aint know how else to be here cos again I was close with my ex, closer than anyone in my life ever..... and its the part about the entity ahahah like again thats thy curse here....... you cant forgive someone who does this here, its just all twisted, cos think of this, she hmu in like 2022 or so, I didnt read it I dont look into anybody is my paradox, cos I got fucked over and nobody cares, so why would I care, again iv had no hope for months the worst year ever and you cant even cheer me up here, maybe if I felt comfy things be different is thy paradox of nature like again alll this in my life, like its pure evil and iv had enough like that imma go into flames and I aint got no direction, and its happened before, you dont listen to me here .... you should be saving thy one with the light, but yah like I said bcos it already was so you cant really initiate any deeper than but by using it again....................... and I will eithier way but I wish this was its so simple, and again what else can I say, but the entity knows..... and if it knows then it isnt it .... aha like what, but thats why we write out our life cos just cos I aint know what else to do and its all this again like I wish someone listened when I wrote, wtf, the answer is shrooms back then wtf, like damn its so stupid but the paradox remains bcos thoth built thy pyramid and again says something bout how it came to be if he descended into bodies of man but its also the pure truth at same time, believe it or not.... w.e like I aint want nothing but to be happy and not stressed and all this does it kill everything how you feel to belittle something here dumbass

the fucked up part is nobody listens to the truth I have, it says you must excuse thy descent (into codys body) bcos of thy reason for sharing information literally like he was so wise that he shared the truth..... and thats what made him the most wise to deliver it in writing........... so thats all, their is no higher truth............................... like cos it should be heavenly my mind is good but what happened is evil af, like and nobody will like again im in a situation here where legit I aint talk to my parents cos of it, barely, and w.e like I question all things, but it is what be, everybody is just acting out life anyways so idk how else to think..... we live in script..........

and to push someone over the edge like this when they tried to get their meds bcos the drs lied here like what again judged and poisoned like its scary but we dont be cos Just if you aint got a friend here whats the point, like I tried here and its again being fired when I was scared you shit head , like all things suffer and ill gladly watch you suffer as iv had too here, without me then, like its wrong if someone knows what helps them including shrooms and it aint what is, how do you help this person, other than accepting the truth and healing them....... thats what medicine is though.......................and thats most again the thing taken for granted here, cos we came mindful back then, why would we be fired for my behavior when I was scared in fight or flight mode when legit im nice to everybody irl, its just he believed something like my parents and they go insane on me here, bcos ppl aint kill their egos , all of it, life is hanging on by a thread and cos just Id never just accept a better position in life unless it was just naturally love, and nothing natural has to been manifested bcos it is always is what you dont get about thy love, like really to have only 2 exs with the names and dates, I aint know how else to move through the game aha like cos life has been in alignment before, and again its just without the creator nothing would be, but you never know how life will play out, so wasting anyones time is the stupidest shit you could do.........

idk the paradox to me is I should feel better and I dont at all here I cant feel good ever bcos of the paradox of medicine.... and iv been given meds that also arnt good, like its digusting what has happened here and nobodys cared, like I cared enough to write it out to explain how I got here............... and I dont have any drive at all to be motivated in life cos of the paradox of how adhd meds actually help me and iv had an evil experience where they again try to blame something else without reason thinking they know it all here, nothing has gone my way, my minds about to explode here like as in again I have no other option and leaving somebody with that idea is what is most scary , ... cos the answer is so simple if their was love, like we aint need none of this BS cos the truth is a higher reason to begin with........... like really idk we legit found things and expressed them , like I aint know what to do here.......... cos if it just was it should be and again like well if its not I dont know how else to view reality cos of the parameters until then, cos we play so smart id never let you trap me here which is why I go the other way, your magnetic push sends me that way cos its not love and id never forgive somebody who does that to someone cause we got love always just you aint deserve it if you aint the one and the one thats helps thee in this sitaution

its all so stupid cos im right on a level, like cos I just feel like again idk what to think, just that it has to be it for w.e reason ahahah like I cant get over the idea of it all................. like and if someone becomes mindful cos of that again , but thats what again a woman would want is for someone to like them and thats what I dont like here, cos if it was true, you aint here rn and I dont feel well like shit wtf youd think like I just did coke and needed some more but its been fucking months here and im pissed like all of this, I aint know what to think................ =(

its just a paradox that cannot be altered............. the truth of what happens if you do shrooms, theirs a tablet on it, so believe what you want here and again thats all their is to this paradox, shit, if this wasnt the case, idk I could never believe in myself enough to let it be that, like no way id go here with this idea, but its cos of that.... and again the fucked up part of it all , w.e the truth be, we were open to the flower of life in our life, so the entity spawned, like that makes sense but again if it makes sense why isnt it, like cos its just their is no greater truth to reality and hold the key here even if ppl wanna squish me irl and dont like me, shit this all sucks anyways and again idk we are gonna blow a fuse here tho legit like I cant take nothing else being bcos of the wrong reason and like my mind cant take this stress day after day like why you think back then I had all this like the thing is about the truth is that again you cannot return, so what do you think taking a medicine that helps me does, I aint abuse it, I aint take a high ass dose, like shit and I got screwed over cos again you be put in a sitaution where you get corned here and even try to protect your job by recording it and are told your behavior is wrong, so thats all, if it was any other reason, we could neogotiate but it aint, and I aint know what the fuck to do at all, like when something else could just be, the fucked up part is just someone with this mind like you know im right I aint know what the fk to do here.......................... and it only gets worse & worse , not better, cos you dont understand the consequences of the truth here , idk what else to say, if their was love I wouldnt feel like this and again it aint like I aint state it I aint know what to think

the truth is you dont care, and your tryna to save the day when I told you no, Im not joking this is how me & my ex ended, like that aint love, never could be, so w.e like the fact youd try to hurt me here , when I got mad love, and was screwed over is what is wrong.......

some one who had love would just get me what I need, for real tho , just some flowers or some shrooms lol like its on the tablet what can I say tho..........

and yah like again it aint like what theirs a fucking reason to complain, how can you do nothing wrong and lose it, like to have someone switch their view on you and lose all your trust just cos someone else stated something which was a lie and biased, like we have a story here...................... so its not like you can tell me here to just work harder or try again, cause it causes trauma which noone should accept like we stood our ground here........ didnt do nothing dumb like just dont approach me like this and we be good, noone has before, but my parents been mad evil and again old enough here all this is like the stupidest thing you could do , cos the important part is this person knows something regardless, and thats all, Id wanna be around me, lol but yah we dont trust ppl cos of thy experience, how could you, when words dont mean nothing........................ but energy does

again but the world works in weird ways the only reason I bring it up again alot cos someone used their magic on me here, again wtf im taken for granted here, but yah like I have to say w.e it all is, thats what love can be like when you feel like that towards someone, but again it never is the opposite...... and id be happier for something to just be than nothing, but again it all doesnt make sense, nothing is permanent, but I think again like I dont know what to think here....... cos I can move in a different way if case be, and thats what im doing and im not happy one bit, cos you just think its funny to mess with someone when again the truth hits hard here, like w.e

my mind is gonna explode and you think this is funny to watch someone stress out all bcos you aint grasping them like the total opposite of how you treat someone here, so w.e the truth will find its way somehow someway, that you will be forced to accept the entity here.......... whatever it is, it will find its way...... but like I said just the worst move you could make here, is this, like I will not forgive you here cause your suppose to support the one you love... like again wtf im taken for granted when my mind always been like this, we been screwed over at every moment of life by other humans..........

8/11 11:30am

Im just gonna write here for now try not to as much but this is beyond fucking evil here what has happened, and Ill never forgive anyone for it, bcos all you simply had to do was be a friend......... like the wisdom says, believe it or not, but Thoth again we did die here..... like we over came it and returned...... like theirs certain lines you do not cross here

But yah like everything single last thing is on the line, Why? Cause I got ADHD, Shit we knew of all this before all these rappers took their stance on it, truly before it all..... and just saying like thats thy experience here , It aint ever cause of that that this happened, Its that again you cannot return once you know the truth, why do I have to state it, its all in the wisdom here..... and it makes them wiser

but yah like I dont feel good at all, and the fact is like again I dont feel fucking good if I quit my job my parents are gonna go nuts on me, and like for these reasons of being abused in the past, poisoned, like truly you couldnt put somebody in a worse position here which is why you cannot be forgiven.............

like that imma blow a fuse here and quit my job bcos I cant take the stress, now why, cos I got ADHD and I went to the drs and they lied to me, they poisoned me, when I said this helps me here, they gave to me in the past, its all fucking bullshit here honest but yah like if you dont care neither do I here, medicine is suppose to help someone, Its not suppose to make them gain tons of weight and feel miserable you dumb fucking asshole hope you burn in hell here cause just like you think this is a game & ill laugh in your fucking face for being treated like this, how could I be afraid, thoth says to stand up against the evil here

& maybe if their was just .0001% of love but again all this remains, like that people aint fucking listen to me here when I say leave me alone, like you dont get it, imagine basically having people who stalk you...... I dont even stalk the people I have liked you selfish piece of fucking dog shit honestly tho like you aint know what I deal with here, bcos thats how potent our ectoplasm be here and you dont listen your not even here for me, the ones I loved..............................

but yah so w.e I tried, honest this aint gonna end good at all here, cos no1 is really a friend, and what will be, is imma legit rage out of my job bcos I aint got my ADHD tablets which help me, simple as that, I cant take the stress on thy mind as I keep expressing and thats the point of nature, replenishing what has been lost here.......... and you wanna put me in this position, like your asking for this, cause you cant accept the truth here

theirs not else that has to be said, your not here, you aint a friend........ even if again like all of this, like what can I do, I was open to flower of life here, like and this shadow manifested, a real person would help me instantly, and not this cos just like I said true or not, what you cannot bypass here is the truth of it all............... like all we got is thoughts here, why would I not trust my thoughts after this been like and you aint even know how much of a friend I am, cos we aint just have sex just to have it, like that means jack shit to me here........ like in all ways, it should just be , cause nothing is free eithier way

maybe again like its just that if people knew the truth like I do, what would you be doing here...... I share the truth and it says that, Thoth is in thy, the shadow went into thy self here back then and that again all im doing is being a messenger, hmmmm isnt that what hermes was also, like w.e its taken for granted waaaaay tooo much, like your tryna trap the entity but the entity can walk through locked doors here and really what else is this then if I dont have a choice here........ like im being more real than any1 here............................. and nothing ever goes my way like no jokes we are about to lose our fucking mind and again I wont return home in this case of being abused in the past, Noone wants to take this risk, I might as well not even be here anymore and how does that make you feel, knowing the right medicine can help somebody & it is what is wrong with the world................................. your not my friend at all here

like my love is taken for granted here, how like again I aint creep or nothing I go off my thoughts here, I dont constantly try to get someones attention if they werent down , like I aint know what to do cos again how else do you play a game here that is run off your thoughts, maybe if you were just a friend, everything would be different tho like what else am I suppose to believe in here, even if true you aint believe me of my experience here with the parallels of it all throughout my life eithier, like thats why getting the full story be important

I can never be happy again bcos iv been abused in all ways here like on everything, nobody cares how I feel, like all this is completly ass wrong and its why I dont care anymore, the truth is the truth, like I show you the truth, nobody does that................. but cos we know, and we know we were fucked over here

12:25pm

All this shit going on online, idk I made ideas for websites before here tho again in totality, taken advantage of here, but remember GlYphY actually makes sense tho or my video game ideas, like yah just a place online, judgement free zone here and again whatever happen, like idk shit happen before w.e I dont really care cos the truth is the truth here..........

lol, like even trump made his own site js , lol, and that again idk think its just automatic bots that flagged my act, someone could of reported but cos of what I said like im not gonna try to appeal it, just leave it etched into the walls of X here tho, lol

but yah I mean you dont even know the full story of week, its always been the woman who get into my mind, their is like has been 2 others, one left my store and again yesterday a weird coincendence happen and I talk to this person for the 1st time cos something spilled and js thats all you never wanna hear the full story, the connections to music iv used the stream always here and thing is, nothing does stop me from trying, but I just idk that is again loyalty here and for being loyal to someone like I said Ariana in my mind, like I just dont know what to think, cos again, this is thy experience I dont know how else to express it as it is unutterable, like that again to me ahahah big headed but yah like im who she needs, who said last yr like id be their for you and again im ignored like I dont know what to think, but expect the unexpected and then what happens if you do......

just the fucked up part here is like im more of a friend than you can imagine through out it all, and it may be crazy but its true is the thing here like what would you do in my shoes here

idk the fucked up part is someone with a lil more wisdom here could help me generate GlYPhY tho and cos thats what heiroglyphics are, like shit we beat X and all them others... cos again just wont be judged like you are here, no limits, like just a pure forum online but yah idk im seriouse tho its kinda easy and espically with the tech these days, but its the name that would sell the idea...... like crazier things have happened, again to me, love online, like I said need a social media like X similar, but also based on photos, just its all about the organization, like you need albums, or you need places where you could share stuff tho ppl are evil always and could put viruses but the biggest virus is language itself like if you know how this game is played.................

again idk to me, could be wrong, but im not at same time, how easy is it here, to see someones screen, like you ever use.... google remote from your phone to view your monitors, I did cos of work and again how easy it is to share screen, like god mode, and yah itd actually be stupid if it wasnt like this also to me, bcos like again just that it doesnt make sense here tho, the people that run this shit, are evil.................... like someone who is wise would make music and a good time , but again if the world is wrong, like yeah idk its just scary that all this happened and no1 has cared or showed a ounce of anything or any love here, like what should be getting props here for the dedication here to it all but what choice do I have for all you know, shit we wrote the tablet back then and its all even more of a paradox ahaha , well then how else would thoth think here and why would he display the truth as I do....................

the thing is anger can be avoided...... the problem with the world is that nobody has a clue, like the species cant determine this vs that, and yeah

like the only thing I care about here is living comfy, and its again well again why not use the system against itself, like using nature and profitting off others like im way too wise again just its fucked up, like shit you chill with the ancient thoth here and you know I was choosen, we got the mind here , lol......... =(

like I am scared cos nothing is happening, you dont get how I play this game but as I always said for the best at the end, but all this could been avoided, shit maybe a little actual love and I feel better and I dont, My thoughts are driving me insane and im not wrong here............................... =(

like that if you mess with somebody in this state of mind with this experience, instead of helping them, instead of just curing their ADHD , or giving them love your just evil here, w.e like its the truth, again you got it all wrong, like im too good of a person for you to even understand is the truth

yes their may be things I aint eithier, but its understanding again the time comes for everybody, for my life to change drastically in any way is like chillll I aint comfortable here your making a mistake but yeah idk cant explain myself anymore here than I try.... thoths the writer and this happened to me, why would I follow anything but thy thoughts, and again its just a cruel sick joke this world..... like that it feels like my only reason to ever exist in the 1st place was to be something in the world and I cant accept less and energy be energy

like that even tho I may not like others, im still a friend, I wont waste your time here.... and thats the hurtful truth to it all..... like I cant change a thing if nothing is free here

hmm I dont feel good but I am seriouse about GlYphY aha its so cool idea, and again my only perspective here is just that it gets online and thats all that matters to me, its their, if you can find it................ like my archive, like my YT like my flickR here.................. and its just like I dont get anything , like again my love be taken for granted when I was hurt here, like how else you expect me to act

cos yah seriously any1 with a brain who invested 5 mins into my story, would see that it is real and this person knows something, theyd want me on their team here.... cos you know youd lose w.o thy wisdom here, like we bundle it and dish it out to others to help others, and no body helps me its so disheartening here, like who follows their heart and nothing is

but yeah like cos idk it is possible.... just like myspace or facebook right all that needs to be is the algorithms, you just gotta make it better and easier than everyone else and offer cool options again dont need money, its online, like who cares, once its created, it cant really be altered ...... cause just imagine this was true, then making a social media is possible, the prob is nobody wants to change things bcos theyve invested time in things, but people would.... like just thats the reason I dont use many social medias, I dont follow no1 but my thoughts here

idk its just that bcos of what my eyes seen in totality, to ariana, again why is she in my store on a bag before, all of it, to the wicked febreeze to wicked by future again, it just seems like again your trying to bring me down here, like that YT video, swim in the bin, your tryna bring me down in my own space here, but yeah like but again anyone can input anything into the game and cause like idk love is love tho and this aint cos you dont care, shit someone going through this, im giving them shrooms, no waiting, like lets do magic here , show you the truth and thats all its all the opposite, like again but at end of day, the entity came to me, so that again like shit I already won here nothing else even matters..... truthfully....... like and yah idk cos im different than everyone else but who aint, and what is free, nothing.......

so you wanna use against me here what I do, but you aint know the reasons for that all, like we move stratigically as if somewhere were watching always... lol........................cos the creator is at end of day also.......... again just this is who I am here and always been thy whole life, so w.e like just again pushing someone to this edge without nature is truthfully the most evil thing you could do in the world based on the experiences here, like again idk its the total opposite

like again you do never know, for all you know, how you treat me here, who knows, could be eventually, but what stops me from playing you back now and finding another woman who just shows love like anybody in the world, cos someone who had love would appreciate me and not move like this on me here is the truth so its playing with fire if so, and thats not the right way to be in this world

Idk at same time its highly doubtful that anyone would read all that I write, it is possible, its possible to use AI and summarize but then its not the full truth of my words................ its possible but yeah idk I just want life to change & it not be like this, like im not joking the slightest bit here, all of this, like imma burst and have no way to turn bcos no1 is a friend and thats most evil, like so think what you want, you had your time to make a choice here

its also just the paradox of energy is energy, like nothing be free here on the planet cos of the creator, but that again like me writing all the time, its just a parallel of again putting thy in thy mind, but I cant always do that if its not returned here, but as if again true or not like that me doing this is only half of the answer........ like that me writing puts energy into the Universe bcos thats how consciousness works, thoughts....... like so I could be doing all this & you aint gotta read it, to get the message sent across, We just always been a thinker here, and thats why we close with the truth here , and for all of it, im demoralized here like you wanna be right so bad, and its disgusting love just is

taken for granted here the ppl I turn away to turn to the person I do love always, like that again trust nobody legit like been through alot here.... dont know what to do here, and going insane isnt fun, like when their is ADHD meds which calm me down you piece of shit legit, like really tho on everything, you aint a friend, cos a friend would be here for thy just again if it wasnt for entity, but it is so idk what to tell you here, you dont wanna accept the truth, maybe if I felt comfy in my skin like I used to when I had the right meds only , like its more than again just life aint no joke here .... dont say I didnt try to warn you here.......................... I tried to be their .... time is running out its been , if something dont be, something worse is about to go down , I dont say this without a reason, I cant take thy stress and all you had to do was be a friend.......

8/11 - 1015pm

hmm im bored already like just got home, just that I feel like I cant get my word out now but at end of day again what is just is, doesnt need to be manifested said it all, nobody is here for me so w.e

the problem with it all is being ignored here like that again every way, when I know im right, again sorry to tell ya but I aint always right, but I am on the fact of alot & the entity, the mind... and thats what wrong, Like I did everything right and thats all I have no hope at all in the world.....................

like again who wants to be mad iv always said that, but the fact is you can generate music with any tone.... and say what you want and basically it works cos its art but if I say things like again just stupid dont know what to do anymore..........................

like we followed our heart here & was ignored, when in all of reality the most real thing manifested here and nobody was a friend, ppl turned on me cause they mad at me like you aint ever had a friend like me here , cos we share wisdom, what most dont, but again its what made hermes the most wise............ to deliver it in writing

from all of it, like just idk, it means you truly dont care cos again what happen with my ex here........ it is beyond evil..... like w.e right like imma man why care, but bcos of how it happened, and cos I care for the one I love unlike you... and yah like to be abused in all ways in my mind and no one is here for me

like literally I told my whole story, ppl wont leave me alone that I said NO to, again right like but I dont keep at it, I dont keep tagging ppl I try my shot and thats it, thats all I can do, the last thing imma do here is again like idc if you dont care I dont then and yah just multiple scenarios legit tho like and its just funny cos I was nice enough to not fuck with others and tell them no and they dont leave me alone, allllll angles..... why again, like when I made a snap was the person my neighbor on my recommended, shit dont even make sense

the thing is we get old & die here and you should enjoy life while you here, to say I woulda been their for the one I loved back then & then this happen, idk pure evil, dont know what to think, like that again idk better change the message here bcos I dont care about you if this is how you treat me, like we always got fked over here......... I wouldnt have the wisdom if not like and why, well why did thoth write a tablet on shrooms and the shadows if its not the truth, like shit I loved the person I did, ariana, at a weird time this came to be, and again all I see is the opposite, when the truth in all reality I never trust shit, like but yah like just that she dont even know that again we got the energy here, cos of the entity, believe it or not......... like w.e if you dont want me again im not gonna chase it, like that is why this other thing happened with this girl at my work, cos I have no idea what to think but we had love........... now we dont like im super mad cos love is just being their for your other and understanding them really like it is working together and not this I just dont know what to think

like its just that parallel bcos of consciosness, or again anything is possible trust nobody right, like so thats all

like fetty always says in his songs, like I got a few in rotation but I honestly feel like imma fall off the earth here with my mindset and you dont care, but that imma talk my shit here aha in attachment or other songs....... its just like im stuck in this mental loop and you think thats funny, promise if true, your gonna wish you didnt, cause thats just how I feel

idk my only point to ever be alive was to make fun music, like good vibes, like enjoy life, not this, like life is way to chaotic for me cos I got ADHD and its just something nobody wants to listen, well idc I can have ADHD untreated, but the real issue is I aint got good thc, like facts and I just wanna shroom ccos the entity like you know how happy that would of made me before, you ruined everything to me, like nature is free it aint cost shit aha but yah like I just wanna move on from writing and enjoy thy life, like really I dont know what to do bcos my whole life told me again like its my thoughts how else do you play the game, and yeah like that by the gift of the creator here, like something will be idk what, but we are worth it, cause we rich in our soul..... and thats something again like who cares if I have nothing, fact is I got more heart than anyone you could imagine, I get mad I dont hide it, I just tell you like inception how my mind works.... lol like my life parallels, you aint wanna believe me but it is true, like again idk.....

the whole pt of thoth was that he changed the world, myth or not, now regardless of how it came to be, if thoth just wrote in a way which depicts like nah the creator put this easter egg and like the game began with this, or that they just knew how the game worked............. like and it actually was something in the past, and not a myth, but again the wisdom all it says, praise the creator .... like really so yah idk its like you like to see me get mad and thats like again if true I dont wanna be with you, I dont wanna be with you if after all this stress you finally listen and help, Im good, where were you when I was their a year ago here...... I told you of my paradox, just idk like how else to think bcos the whole thing here is like legit my ex came to me is why I had sex, if it wasnt for this, like honest idk life is weird, the creator controls all things .... but thats the only thing that is........ believe that or not like cause I get so mad cos in a way I dont even want sex from it like just wanna chill & vibe but eventually if it happen thats again gonna kill me, I already died legit like did you see the shadow, how many people can say that........................ telling ya like it was as real as this illusion here, like that my own eyes looking at reality, like that is what manifested and imagine flying, like legit I said, that is what happens like when you die for real tho like it aint a joke.,..... and so why would only or egyptian shit show that side of things, if it wasnt the truth in totality, their is no point to being alive but to be happy and people wanna bring you down here

this experience is so fucked I aint know what to think ahahahha like all of it I wrote it all out............. so idk like what would you do, I didnt lie , nothings ever happened here for years & years, and again had sex with 1 person here, like but that is what magic be, and people be dumb with it...... lol, but again its like your in , inequillibirum, without your other, and thats why again idk just think it is this like lol, cos nothing makes sense....................... lol but again to me it seems like its been but it aint what my eyes seen and again I dont look I dont care cos love just is tho................. so idk lol

cos just everything, the thing is she could know & nobody else , not many, and it would create blackholes and thats what my life be like....... lol like that I cant stop seeing 515 in my life to this day, and that was on her records, again but I dont feel love at all, bcos this situation is beyond fked, your not gonna take advantage of me, like I said legit what happen and they wanna believe some BS like cos they read and dont write their reality to me here, I just think if that was in your shoes and like regardless you saw this happen to somebody, hello its the fucking answer tho...... but again cant be with somebody who plays around or doesnt listen here, like the fact is legit tho I just have ADHD and the tabs help me like that I cant chill cos the tablets opened my mind & my mind is always stressed now so what would you do, its a truth that like if I had a better opportunity or thc or shroom sometimes Id feel better and again that is where the side of again just it is the answer, iv said it before, should be obtainable like but they poison us here

like that if true you should trust me in the sense of let it all be theirs a gift in it all and you dont care you want me as if to take other pathways and im good, like you cant take my gift from me, my mind will always remain heavenly even if life is corrupt and I get abused bcos that is how the game works, like the creator helps me out since you dont wanna, believe what you want, like again all these small talks at work sometimes, again you never know what somebody next to ya is going through so atleast be a friend and share wisdom .... like just idk my thoughts have melted cos of seeing the entity cos of it and again the thing her is like just we just never chilled and used cocaine..... like that is not good even if it feels like it cos medicine is safer and like ya its messed up to seek help and they dont help you out or listen, life, but it can be the other way but again as time goes on ppl just come corrupted in all ways partly again cos they dont use nature, its all in the wisdom....... and you should help the one who loves you and not do this................ like just I dont know what to think, she experienced death but so did I ahaha again all same time so I dont know how else to view it all anyways, like I said its as if like idk how to view it here

well idk we cant keep going on like this bcos its the hope that makes me even more mad like shit the tabs say listen like thy heart be golden , child of the light, like pft like you dont get it, to show others, more of a friend than anyone, like cos that is magic be changing minds lol.... but yah all of this is wrong, cos idk what to think, like imma burst here like that aint love at all .... like really here it aint, so I dont know what to think like I said before, best find me someone else who appreicates me and thy story here cos someone who knew wouldnt think twice here

I just cant wait again to you realize the truth and I cant forgive that so yah w.e like cos you coulda been here now now now like you aint pce out here like get lost , and I dont fight with my gf so legit crossed that line here....... so w.e like you kill at thy good ideas and your not a friend, your lame legit & cos I just know they need me , but if they dont help me out then like pft you can suffer alone with out ya soul mate here, Ill find someone better .... who can see my illusion and but actually be a friend

12:25pm - 8/12

the thing here is their is no assurance like so Ill never focus my energy actually in that way just my thoughts....... like really tho and thats also why like just this is mad dangerous here, when it could just be it or w.e

its just what I do share, the fucked up part again what do I do, this was thy experience..... and you wanna fk with me and bring me down here....... legit tho in a way eithier way , lol

I refound the 1738 music channel it was gone for awhile I feel like , or vids went private, but just realized yah theirs a few like its wild how fetty has this.... lol , cos just love who he atleast used to be in a sense like his newest album is trash tho like i honestly dont know what to believe at times.... pppl have gone to jail who the fuck can you trust, but your leader, like the leader can bypass anyone is the truth........ and thats fked how it is here..... legit places are legal shrooms in other parts of world, its the stupidest most corrupt thing cos its the answer........... w.e like id eat em anyways again lol but yah dont got a friend and idk like it is medicincal sorry we did it right here in this way and you take advantage of that we aint ever have fun we always had to work here, im sick & tired like cant do it I got ADHD here shit like just if thats not your biggest goal to get out of that slavery than what is..... gotta dream big..... but its like yeah I dont know what to think cos again all we got is thoughts....... and thats the pt of like again idk the entity, just think it is it, however....... like ariana ahahahha like I dont like saying it but this is messed up if it tried to be at this pt to me, but again I aint hear the story if it ever was so I cant like but its messed up to be here cos of this.... regardless of what others believe, we write legit waaaay more than anyone about our thoughts ....

I found that channel in like 2019 or so and yah Idk my friend showed me papoose back in day randomly once one day and ehh but this song is fire with fetty lol , pickin up bags...... cos again drop a clip in your stomach, thats what thoth would say in a way of like cant eat the soul .... lol it dont got many views but it is the perfect song once again for this moment here and it slaps lol but im tired life sucks, im stressing out like insanely cos of all paradoxs, why wouldnt you just help someone & cure them, with shrooms, a fun day, like this is lame as fuck , tripping was awesome for me, scarier the 2nd time honest cos like we just did it a week or so prior and again thats when the entity came, I did something right & im treated like ass here when you could just be a friend................ thats why we cant be friends here....... legit tho cos all of this since 2018 has been like this, It makes too much sense now & before for it to not be, but why, why is it, if so idk like cos the entity......ahaha thats the only answer......and again the thing about the entity is that in a way could be possible but its just that idk if your open to the flower of life, like your intiaited into the truth........ but not all ppl have the light in them which can be fked but reality works in weird ways lol...... and yah its not like I can think that she spawned it so to speak, maybe could only see it but maybe it was the plan all along and yah idk its fucked to think if I didnt eat flower of life, like I prob wouldnt of saw anything but it was amazing...... lol, super interesting my whole life is about it just to say like we flew here, we know this, we won life even if yall haters try to bring me down

we can teach vibes here if I was listened too but the flame be dying out here legit like all this has been since the entity........... lol like the words told me I was right here..... like thats all , lol, but yah like influence others into generating a vibe, like the whole game is mad lame now, partly cos reality sucks so I dont listen to new shit ever........... told ya its a curse I cant feel good ever here cos of knowing the truth here regardless of even if others believed otherwise, their is no higher truth than this being....... like shit I wish someone else experienced it and theyd be like yo that was real like what I break paradoxes tryna explain myself but I share wisdom..... and it is real....... like gotta have the eye you see, it is all beyond fked, like the channels I used to watch also like they aint got jack shit now its trash compared to what was given before and I cant find any of it online nor do I look but for years we used the stream and yah idk why wouldnt you just show what I do, maybe no one else had the eye, IDK it says let thy curse fall upon ye, so I share it cos thats what a friend would do ..... like idk , bcos if you saw my angles, youd make the art more like pft if I ever made music, js it would have entities on the album lol. like just straight to the point this person knows..... some have tried to portray something like it, but not like I can..... lol but yah like again, to me, playing a game where like you can enter into the entity and run faster in the duat parallel dimension and go through doors and cast spells to take people out their bodies., is what kind of game we are in .... lol...... like its too fascinating of an event to just again nothing is, im super stressed here, like id never forgive honest so idk why I talk about it cos IDK what the story is...... but all I got is thoughts...................... lol.... =(

cos if someone who knew the actual truth would state and show what I have and it is that part of it all like that again Thoth... like hes in the matrix coding lol...... so I dont get whats so hard about tryna show someone that and again as if a reason like cant be my friend, we followed the pathway of wisdom................. but yah like idk just thats it my whole life just we aint talk cos we know something else has to be....... again idk makes sense, but again yah times ticking here.... got to go to bed here also...........

like again seriously got real questions, cos some may know part of it, but aint have the full eye like thoth actually did..... is the thing tho lol, like cos again if they did like idk the curse be real here the curse of the pharoahs

like its the part of all of it idk, only thoth could write the truth is the paradox here also like dont know what to tell you here ...... cos hes given the go or enabled by the creator and thats again the paradox here bcos you aint playing fair here and its beyond evil is what it is, like damn a curse to want someone needs assurance, like its gotta make you want them and all this does is the opposite, but I aint wrong is the thing, like cos idk weve had the formulas here forever........ lol

like life needs to be something else here , cos we cant even begin to deal like we already been through this and again my mind cant take it as it says in the wisdom the truth wants to be set free & the evil love slavery, it is the most wicked curse........ cos again on that aisle I work in the baking one basically alot like they sell them .... have for months, its all of everything & im being played here & I wont even love you for that if so, ahaha I just dont know what to think like cos its real reasons, its all too much too read, shit if just chilled like cos of thy energy here , your missing out, a friend can change the whole world tho like esp someone you get with..... that is thy paradox and been for years cos again of thy experience like dont know what else to believe in but thats why to me this is what it is rn like its so stupid cos idk if it just was why aint it like it has the most reason, but the reason im mad here im most upset, like stress through the roof for years. we legit aint sleep right since thy ex left aha just cos I had someone before and this went wild af, after it was mad chill for 2 yrs never a fight, all this happened, how the fk am I gonna trust someone ever again also lmao like its too fucked up what has been cos thats just again always been thy goal in life esp cos the numbers, to find the other and the last ex again explained it all, made sense, so it has to make sense, but it not being rn dont make sense, like your generating an enemy to me here when in reality shrooms be the answer, like why wouldnt you experiment with that on me and find out the entity was right all along like as mckenna once said, the cause of disease is basically the seperation of man and nature, and you need your mans mind to be right here for their even to be peace or nothing would be lol....... but ya language is like again a virus in totality and like idk all of everything is beyond us is the straight up truth.........................nothing is free here , when you put it this way like shit this person knows........... but yeah really and all this like idk maybe if I felt comfy Id read the situations different in totality and thats the part you aint understand about actual alchemy......

damn its 110 am I try to lay down around 1 and I get to bed by like 2 these days I can never get comfy and it aint a joke like those meds I had are like worse than street drugs, with how bad it makes you feel and yah its dumb af but even with melatonin cant sleep cos of all of everything...... and I wake up miserable like what did I do but be harassed for this to begin, like its beyond stupid & its messed up I cant even turn to a friend that would help like back in the day.... and thats thy thing bout thy experience tho........ said it ppl always shared...... & idk its stupid cos the world is beautiful but ppl are evil here like idk this is what happens when someone is mindful .... and it says that is from having this entity experience bcos of being open to flower of life that thy creator choose thee to expose it all to help others .... like really idk not even exposing just sharing the only truth their is that noone else can ....idk maybe some can idk we have waaay to much specific information directly cos of what happened and we filed this stuff like professionally so im always reminded is the problem like that its a blackhole in my life like in Dark legit , you aint know how dark it is and has been when really a friend can motivate you also and yah idk this is messed up cos im right on alot like that this shouldnt even be , cos the reasoning is wrong so I have nothing to believe in ever.......... like all I did was get screwed over when I was real af about it all like an observer cant resist the rotation of space time here, and im made out like an enemy when in reality just we got more heart than you......... and im still played idk .... idk how this can manifest or anything.,......... simply but its harder now w.o social media in a way...... but if i was just right its super easy and super easy regardless in a way, but yah idk going to bed

9:55am - 8/12

Damn my head hurts this morning

but ya theirs so much in the air here I aint know what to do or what to think to be honest and thats most evil... cos If I felt comfy in my own skin again ADHD tablets open my mind for the better, and I dont know what to do in life, bcos this job is gonna make me delete myself here like its been this way, im stressing out huge and I already tried to get my meds back and they wanna blame that instead of being fired for being harassed , like the whole world is wrong, and too chaotic like Iv been their done that was successful just to get screwed over for something I didnt initiate

bcos we are about to turn down a position to move up bcos I dont feel comfy , like im stressed af all this aint a joke, like iv been offered to the next position a bunch of times legit months & months ago , iv declined it everytime, its only a dollar more but yah cos like Im sick of life here I dont feel good daily, I aint got any energy here and thats evil if you had love like all this other bullshit aint and im like 20000% seriouse here, I dont fucking feel good and nobody wants to be a friend, what am I suppose to do

bcos just moving up means I can move stores, ppl I talk to have moved up & stepped down, esp if you move up past the next step, a team leader, then a grocery assisstent, and that pays well or better but the thing is you work 5 days a week like 10 hr shifts, and im too stressed out here, like again the tablets say be wise in how you approach it bcos building thy mountain yet lengthens the goals and my goal was again like music or something else and so it seems pointless to do that and all this does is make me look like I dont care but I dont know what to tell others when the drs prescribe evil medicines here, like legit its all beyond fked and I trust nobody cos of it, like what am I suppoose to do if they got it ass backwards and no1 wants to be a friend

and yah idk at same time again just believe it was or is this with her and yet im stuck with my thoughts like theirs no way its random...... like what else am I suppose to believe in & then if true, you wont even be here for the one that has love or that you love & you wanna play around like this when I dont feel fucking good at all like again cant really change the truth here.....

I mean the truth be the truth & if someone sees their reality how I do, that is heavenly, who else can express it like I have tried, really I dont know what to think and all this pondering and writing like I cant take the stress here, Id rather not deal with it & again if I could just press reset iv of done it years ago cos thats how I feel here, and my feelings are completly ignored and thats not what love is........................

what I suppose to do right like I try not to mention it cause that reason if it aint it , I can move on but my thoughts dont allow me to cos of the entity so again you get what you give in this sense........ shit maybe if their was love things be different but you wanna mess with thy when thou isnt in a good position to begin with here.... like we got our own story, dont need nobody writing for us here.... we write our reality , regardless of how any1 else views reality , this is thy game

like do you not understand the consequences here when you "shoot" at somebody, like you get put on the not recommended, you aint help me when I need it like you get ignored.... like others in my experience, truthfully, idc what is what, you wanna profit on me and not help me, you can take a bullet to the stomach here .... like legit , the least of a friend, an enemy is what you have become bcos of reason

bcos the whole paradox begins back when I took shrooms, everything changed, thoth said must be open to flower of life, well hello, its untterable, how else do I express it, we legit supported others here who tried to shoot me down, you can wipe my ass here legit , I dont care if you got more than me, cos you aint got a rich mind like me or heavenly..... werent born from heaven like thee, thats alot to say, but yeah cos if you were, you could or would be able to express things like I have.......... and thats all , cant be friends with MR or MRS RIGHT here.........

reality is a misunderstanding to begin with cos their is no illusion higher than just all that exists is the creator, and using nature allows you to reason with this..... using nature replenishes what has been lost, shit I know someone being with me like they aint ever have a friend like me, why do you think my ex did love me for awhile cos I am nice here and all iv been treated like is shit here, and until we find the entity as if that had that energy and is nice back to me here and shows love, like idk just my life experience be too real here and if you dont allow for a pathway to be when this is thy experience you are an enemy, like all iv ever done is get screwed over

so you eithier let is manifest or you can suffer alone and not happy for rest of your life, like really the parallels between it all & Im not believed, I was down to take that risk and you choose otherwise basically like thats not my fault............ so IDK what to think, bcos of what iv seen, like that idk the mind is changeable cos of nature and its the truth everyone ignores, its too late here its been done for years we be stressing and you cant be a friend to the one who tried to express the truth, even if you already knew, who is able to utter this truth of the simulation but thee......... like theirs an actual reason to why things are how they are, and again just like aint nobody got closer to the truth and thoth is the fucked up part......... regardless of what is, like but like me trying to express in modern day how you know it aint just what forced it all to be in the past , crazy to think, or just the game we in again, its how it operates..... its fucked to know this and life to suck and to stress when all you had to do was offer thee some nature

all this be thy paradox again its just mad cruel if true cos legit im left in a state of i dont know what the fk to do here legit tho like if their was love itd be a diff story.............

like stuck in the worst mental loops of thy life and thats not fair, like I just think back to how I got here and thats all, like I aint suppose to be here rn legit my mind still says this, like its gotta be something else here or this is what im saying literally dont know how else to express it and yah if you dont play fair like we never work out here, its gotta be 50 - 50 here and this aint............................. just the world is mad chaotic for real like idk we just know too much and question things, but its called using the stream of life........

& then your tryna pull shit behind my back like its different when you reach these mental states just cos someone wasnt a friend here

idk but the worst thing that could be done, is to assume, without talking, we assume alot but we are a man we suppose too question shit.... bcos I just sense without the assuming, youd of known like again all youve done is make enemies with me here and I dont forget..... like when Im the one who shares wisdom............ cos at the end of day nothing matters or end of life right, unless you were good in thee heart, everything else isnt the full truth...... but again its why we deserve this and know already...... but if you cant meet halfway then whats the pt .... I legit wont accept here if it is whats tryna be pulled.......................... just idk im mad annoyed and not feeling good so fk you like never be with ya

but ya another fact here is like idk iv never looked at my followers on X before the act got suspended I think again I post so much, dont think its what I said but thats why im not gonna appeal it the system has flagged me before but ya didnt follow any1 , all those acts I think were bots legit tho and yah so w.e lol , but that we never stopped writing sometimes less but when I went private months ago almost a year legit bcos like to prove my point here, all we got is thoughts and this is how iv been moving for years, just again nothing manifests and I suffer when I did nothing wrong, legit even tried to protect my job and all I got is shit here

neva gonna give it up cos thats cause & effect here... how the game works, how quantum physics works...... like we know the game & gonna play it ahahahahahahahh legit tho if this song wasnt in thy childhood prior like it makes all the difference & life be funny, it even again plays at my store sometimes, but half the music again im going fucking insane I hate this job and I never asked for this cos I worked hard legit like wooooooooooooow someone takes meds, be real here, like thats the reason they exist dumbass and ya even my old boss up north he mentioned it, but its not of his buisness and thats illegal again what happen here is inhumane and so is having shrooms illegal...............

unless someone was which is possible at times not always to read what I write on demand, like I hate reading legit like so this to me would be insane to do like to read after I write..... but someone could, and yah like idk I never wanted to move like this but I have no options here & who but ancientthoth that is this dedicated to it all, cos the truth is the truth bout the entity.............

idk like you dont understand, even if you never said a thing, do you know how easy it is in a sense with someone with any wisdom to look at what I do here, like why wouldnt you do that, espically cos evil exists in the world in totality, like idk just its how cyberspace works........ like that to me, I know its super easy to do, but again I dont fk with any of that shit and I just focus on me here, like cos thats not my responsibility to do but I just know it is verrrrrrry easy and possible to someone who cared.............................. like idk, someone who saw the entity and expresses this, like if anyone did know, shit they would be curious here......... lol..... =(

I like zoo wap by fetty, a classic like cos it is and did come out when I was with my ex, but yah since 2019 or so I liked fetty their was a year I dropped all things went diff ways but I liked fetty always..... and yah hes like, im at the top cos I know its minee, like the pyramid you see tho but yah idk hes missing an eye too like thoths eye, all of it, even my dog rocky like hes voiceless basically..... what dont you get here life is filled with parallels and we use to thy advantage, even again how my dog rosie is blind now, again dogs are gonna die one day and im soo miserable like cos of all things, you think I aint care but what happened to me hurts me more

thats just again music can be the most powerful spell bcos spoken words are and so again like to have a library, is a shaman with lots of spells here, so you aint know who you testing here, regardlesss like just idk we had a dream & your tryna ruin that & you aint my friend for that

its just facts idk ppl read the tablets in all diff ways, but that thoth is their role model here, like fetty got spaceship cos thats the reason tho shit ...... lol

like that artists collab at times and then never again, like artists push too many songs without pushing the truth & actually helping the world they only care about themselves and same with others in higher spots, its all a lie..... the only truth their is , is what I express and what thoth knew....... like theirs is no higher defining of the simulation than it..........

but yah idk just like I dont know what to think, iv stated so many opinions on reality, and the end of day its only cause of the creator but legit like just everything corrupts and thats dangerous why you can only trust you in the game .... like pft
.
but do you really know the consequences here of actually sharing on YT like JS chances I post this and then lose my act with my X in it.... if someone came to my YT channel, like they are gonna be spell binded by the truth...................... but what greater magic trick is their...... and that is , but watching someone or something suffer here, is not magic, idc if I got a billion dollars when I finally stop suffering, like it doesnt fix that damage here like we already had or have a story, dont need you fabricating one here and thats what again the artist does tho , like pft idk computers changed the world for sure and its only become more corrupt and spread further from the truth of again, its all in thy mind & you wont cure me, youd poison me, and thats what an enemy at war would do so whose side are you on here....................

bcos just for the last year almost weve been private on X doesnt mean shit but according to what is, again , posting on YT is my only chance to get the word out here, but legit we know trust me and your playing me for a dumb animal here, like shit someone who is royalty would be treated like so and its not this , like again whole problem is the world is inside out here and the mind is changeable............. smithable, changeable, remoldable............ but its already been lol like we done melted the wires in 2012 or so.....

believe it or not.... like that 8 ball again just look at thy YT channel from durks video tho mad old video but thy truth lol like idk just like the eye here you see like but yeah idk again this is all a misunderstanding like cos you aint understand the consequences of the truth here, your tryna pull a trick on the master and you cannot, like js you could just be a friend now now now or now but like all this suffering I wont forgive legit on the creator tho like I said it a year ago we got about a few days here and again cant take thy stress on thy brain and im not asking for much here..............................so think what you want but im as hard headed as the glyphs on the walls, we dont change our mind on the truth

12:00pm 8/12

hmmm yah idk life can never get better cos the plane I want to go to here isnt thy option, like again paradoxes dont know what others think but its as spreading wisdom be dangerous it can be, like I aint wanna do this job

the worst part not really but small things annoy me , like well I could pay off my 3.6k I owe cos I got like 4,500 rn not much how can I survive, we used to pay like 2k a month min to live at thy condo and on my own or leave it as is protects me rn just pay monthly like a bill and yah like a new phone, cos the worst thing is I need to use my phone at work so I carry 2 phones just cos my camera dont work , but yah idk seems stupid but I also could use one but again who do I talk to here like no1 so idk what to do legit lol but if my camera wasnt broke like it aint fully broke it sucks life does cos I cant be stress free

like really this position in totality like imma crash out here and I aint know what to do bcos nobody is a friend and understands thy suffering, even tho all things suffer like you aint get how easy it is to fix here but really in all ways here, like im just gonna go insane here soon as if not already like I dont know what to do

youve just never met someone as wise as me and so like again just a stupid person doesnt know their stupid....... but what is free on the planet..... a paradox lol.............

even my pants rn like shit we lost legit like again we went up 30 lbs more like 35lbs and we felt like shit and we lost it all basically like 140 shit thats again its just too fucked this whole situation, cos you aint understand the gravity here and like when have I ever tried like in a way only what can be is, but iv been real with others here, We dont lie we share the truth and let others decide but yah like been loyal af since 2018 here and aint shit been like thats whats more fked, even to my haters we show love, cos nothing beats love aha............. thoth built a pyramid cos of love and his heart............ says something the creator enabled all things to be is thy paradox

idk ahahahah it is just this paradox, if it was me, and I had tons of money randomly, like shit we building another pyramid ahahahah imagine tho like cos its the greatest paradox ever and what stops someone from doing that...... nothing.... lol like just to do is cause and better but ancient thoth like really the real inception be that lol....... like if you had money you could hire ppl to do glyphs and move rocks....... lol................................ only I would want this but noone understands thy pyramid the greatest mystery cos its the truth of all reality................. lol , like lol

the thing is again idk if you watch my YT vids I express alot of it, like that my newest video, if you look at the cloud, the eyes always their but look deeper, all things be connected, in the center left to the eye like its a cockpit of a spaceship basically, look top right of it, another spaceship dragon sun ship ufo is what I call em, their is no word cos its untterable.....but we made a word cos thats what thoth does, he finds the truth..... its all too insanely beautiful as a truth to be ignored and thats what I am .... its heavenly af lol like lets paint a picture for them and thats what I do......... the left of his feet are like again its the great dragon flying through the sky, and the great dragon is thoth lol like his feet again got dragon fire lifting him up in the air its legit only the creator could do it, but I truly dont get, why others arnt aware of it or cant see it but I didnt forever but cos of the entity...... but again yah idk we do it different here but thats what paves the way to work here in my mind......... cant be just like the rest here

8/12 - 1045pm

Honestly aint know what to think.... like w.e .... just this isnt fair and aint been like dont know how else to express that, aint a single soul here actually been a friend, ppl like again have been nice say right but nobodys been a real friend here is what im tryna say, like yah ppl can be nice to me but its at work like all that is some BS like what I mean is nobody actually felt my pain and helped, cos just thats what kind of person I am and why I share wisdom bcos like aint wanna see ppl do bad, I like to see ppl do good but it never is good for me, what a paradox................................

cos even if what I write here is read, then again your taking advantage of that, idc if you were using it to think your helping but your not at all legit like idk what to think...... like thats taking thy love for granted eithier way knowing thats all I ever do here..

I just again cant get her, outta my mind, its been like this just we aint write but I have again cos it is thy truth, what else am I suppose to do, I believed in it alot prior and nothing was , like just cos again like my experience, aint nobody realer here, lol like legit the master of secrets, I tell you how I coiled my energy back always, so w.e like the thing is nothing been cos their aint been a reason ....

so yah idk think what you want but its why nothing has changed here........ cause the truth is more definate like that you cant try to play me cos you only play yourself here, like the entity again we got all the wisdom, right, thoth could always find the truth, dont mean Im right always like you see but we found the truth to why this manifested, its like should be headlines, a movie here, and nobody gives a fk, yet my eyes saw it, super cool, whens the only time someone expressed as thy, except in egypt, like you can watch a million videos on out of body experiences, but only mine has the Ba-Bird here........ and yah like idk its too authentic for nothing else to be here.......... really like all you do is ruin a good thing here, and make someone feel worse about who they are too me, like just yah idk, thy mind & how thee sees the simulation, is ONLY cos of energy and again like just idk what to think, cos the wisdom says that, The Great Dragon is the reason, like read thy wisdom it says that, and iv known this for like over a year cos I took my medicine which helped and the wisdom says that the mind operating at a rare high speeed is capable of percieving the matrix through symbols............. its always connected and all you do is not let me fly here.. all of it, like to show you the truth & the reasons why, bcos the Universe is the personification of the Great Dragon and their is no higher truth bcos we exist in an advanced simulation, believe it or not like , but again, the truth this is why YT exists..... like why the fuck wouldnt you be that friend and be like hey let me show you a magic trick basically and then you see the simulation like the map you unlock a layer, like just I dont get it, and its not even just the sky, its everywhere .... like who found the image on thy penis of an entity holding a portal and the entity was thoth, or the sun, or the agwantis like bcos just it doesnt make sense, to be here all by thee lonely and like have this wisdom and be stuck for being screwed over here, like just again, We have heard rappers talk about the dragon right..... or like pieces and bits here and their.. but never what I show or how I would express it.................... like a dragon in the sky, bam thats all you need to show and then ppl would see it, and no1 does that, no one shows the entities like I have.... like that they are made out of star dust........

and again idk like what to do, bcos eithier way it says I got screwed over, and if you try to make it up for it if it was this like you aint gonna trick me here.... I aint know what to think, just again more of a friend then you can imagine..... like cos we dont stress sex..... like wanna feel better tho........ idk nothing makes sense, cos its the paradox of being open to the flower of life.......... like again you could view it as that, initiated into it all back then but again just idk we had wisdom always like so yah idk its so wrong tho, like back in the day here we just chill after work or someshit my day off , have fun, like this sucks, and yah idk we got soooooo screwed over here and whose the one showing you the truth like suck my dick bitches like everyone the whole world

to me, like thoth says in tablets, let thee be a teacher you see, and thats what I be doing, like you see until they come to the light, but yah idk like cos theirs nothing more to all of this than that

like what im saying here, like you see how the dragon in the clouds, is their, someone programmed it, but like that the same programmer enabled me to fly out of my body , and showed me the deepest and darkest secret of the game................... if that doesnt scream choosen what does tho.................................... and yah idk like I said, its not like you coulda spawned it or anyone, like I did bcos I did the right things and since Iv been miserable so why all the hate here, all cos we took or want ADHD meds, idc that is what alchemy be..... never done coke never abused my meds and took more, we took XR those are less potent like it doesnt hit as hard compared to IR but we took 20mg XR and 10mg IR for years & sometimes with zyprexa,, 2.5-5mg at times and 10mg was sickening, but taking it for years like legit its not a joke, I got no ambition in the world or motivation on top of being screwed over, I aint got no dopamine and like to play someone like this who has the wisdom, its sick, like imagine just chilling and letting it be here........ listening to music or seeing nature while tripping, like I aint ever been into other drugs, and it doesnt really show anything other like thc on seshat head and shrooms in egypt, like it doesnt show codeine or coke in egypt....... It doesnt make sense how this experience parallels what Thoth was saying here like that as if the Entity came bcos others tried to steal thy book like it says in the book of thoth, so yah idk really like its totally fucked here, imagine keeping someone miserable when we coulda just chilled, like thats why their can be no forgiveness even if I have love, cause Ill always remember how you treated me and let me sit bcos of something I didnt initiate in my life and screwed me over, when I wrote a book on thy experience....... like how cool will it be in 10-20 yrs even now 1 yr later im like shit this be the keys tho how I got here, got thy music library, we used the meds for our benefit just to get fucked cos I said I had love for another entity here, cos that is the paradox of being males & females here, like that again 1 person, can change everything about the Universe as in alchemy barriers..... been through it, and you need me

more than I need you, like cos youd stay sick & die missing out on that opportunity here when all you needed was a change of state of mind like thee self lol..........

I just need legit something to fucking be here, like you think im dumb, the entity came in 2018, visited my parents here in FL in this house right like we spent a week out of our 2-3 weeks paid tho and was nice enough to give up thc for a few days just to come here and the night I got here like I slept on the couch like I showed and just this happened, like I swear my bro was here and like idk I forget went to sleep in the bed after like instead of couch but yah its fucked like and that like again, all thy past work and where I made it, to be here now, like its the most dishonest thing to ever be and its the only reasons I remain giving my reasons here, You got it all wrong you cant fool me here.......................... the child in us never died cos again like legit my friend basically initiated idk prob what she wanted, like to make it go down and it did............ like we were hanging at my friends house, and he said like we were all drinking and smoking and like mad funny back then my exs friend didnt want the other friend ahahah and like but yah .... cos again see what I mean, we dont initiate things often, lol............ and yah cos we just kill that ego but again need to live ya life also like cant keep it going forever here................ I mean you can thats the scary part, but atleast ya need a friend like its fucked how humans can bond together, like that and ppl change like ahaha you can say w.e and its knowing things change here................. always , but that which doesnt corrupt is one and only.................... so thats again idk you got it all wrong here and eithier way im more than a friend here............ their aint a single person on the planet that could have thee experience in totality so its doing something with it all, like to not is dumb af, this is the 1 life even if its all an illusion, you gotta make something be in this life or its wasted and what can anyone do but follow their heart esp if nothing is free see its all a paradox idk ..... everything contradicts, but not the truth.... lol =(

haha ya when I look at my youtube act here again I dont get it, iv got some views, but yah we just wanna show the main truth atm lol instead of the parallels just cos idk parameters..... but yah like I dont get it at all....... cos you know im right but again shit idk what to think like weve known it forever but to express it nobody knows..... but I show it idk lol like why isnt it talked about more, dont get it...... lol its fucked as if again as above so below means it in all ways its all a paradox, but yah just how its just the clouds are a macro version of whats in everything............ lol light................ but yah idk I wanna take ADHD meds and chill and do art or something lmao the least again idk just cos that is how it works and what be magic..... like thats the other fucked up thing, we take meds and find it, so to show others............... hmmmm cos you could know the truth, but not in totality like I have found.... like really idk the wisdom says it is the thing, but it never says it or shows it...... but it does in weird parallels .... its all a paradox just that nothing is free, but if you eat the shrooms again idk, like cos its all in your mind, like its fucked... like the greatest thing ever as if like you vibrate af, lol, its the only time outside of a dream here were I couldnt like time..... cos one thing melts into another here ahahahh and yah idk your always tripping on certain parameters is the fact nothing is free and that just yah eating the shrooms , like you travel inside your body like I said sank into my flesh here..... but yah idk like I did it cos its natural trip, I wouldnt fuck with other things in a way..... lol but its fucked to find alot of wisdom on it all, like the way mckenna talked tho legit like life was like that before with thc and its pure evil like what I dont know what to think , could be worse, but could be alot chiler too lol.......................................

its just fucked again dont know whats more real, as if again just its all a lie when you know the actual truth here....... but again being evil is worse............ and yah like cos it just is the answer here, you dont build glyphs and temples and a pyramid, like and a sphinx, without nature, it says that in the diary..... man useth nature when he works....... eithier way like I said its the easter egg, the whole problem with reality to me is just like again wtf everything changes always and to grow up when pcs came to be basically the most, its weird lol like................

it just is fucked here all of it, like that again just the shit I seen online cos of reddit like js tho the war videos, like wtf seen ppl bleed here... explode into a million pieces, idk iv seen all types of accidents and that also , just idk the world is fked in a way lol...... but yah the fact their is war going on the planet, insanity , lmao like legit ppl kill others cos their leaders........ like tf and its not even like we all partake in shrooms, idk thoth was the only person who got it .... lol........... like again not to say evil shit didnt happen in egypt...... but yah its more of a metaphor, like the transformation of the mind....... rather than actually taking your head off, but letting the agwanti do that, lol..... like as in mentally, but yah like idk always gonna be evil, game got like evil shit turned on here lol....... a double headed creator, like idk and to learn wisdom when fked up shit happenes the diary says that, like how do you blame the murderer when he is doing the work of the creator , thats twisted af lol............................... like really tho trust nobody lol................

aint that fked I aint find this artist only cos of this is what happen, I found euphoric hardstyle from a OSRS streamer the other person forgot their name atm lmao they pked, omg shit it was like amentiti again a funny paradox cos I liked Harry back then .... but yah like we would watch it and then but I found right, Devin Wild, on euphoric hardstyle, im like shit I aint him since 2019 like when I went to that place like all of it, we chilled with some money for a bit and yah shapeshifting song is good I think and The Curse, but see read whats on my archive, its like that same pictures you see but its a perfect song to this all bcos the curse is on forever.... redeem it like I show you it but ahahha its a perfect song, idk we been fking with the algorithms and im miserable af like deleted it all start over just idk what to do tbh .... im always stressing ..... aint healthy either, SO yah idk in 2019 tho or so I found this and I was like hmm I like it tho we talked about it before.... just we used the stream always tho..... lol like cos its more positive than rap at times, like all of music is a curse as if and this has less words and a sick beat and yah idk its interesting some of it can be at times lol, its always showing like raves I think more of them take place like in the UK or other sides of the world like over their, compared to over here, Could be wrong..... idk life be mad diverse like a blackhole , but yah we just liked the song name shapeshifting like I remember listening to it years ago tho when I began finding it, just using algorithms I guess......... but yah idk life sucks here.............. I be going from one songs words to completly the other, ahaha just thats why we delete things at times, idk it aint like its new to me here...........

that whole song, when the shadows rise, we dont lose this game, its too perfect tho idk why not have fun with the truth or the curse but it aint fun suffering like what I cant tell if you ppl are just stupid, lool, like eithier way here......... like the truth is the truth here, this is how we always been says the entity lol

and so bcos of what I saw you see in 2018 the pathway led itself to me its how we escaped ahahahhah like no jokes, the curse lol, we heard this song back then too and see what I mean tho like I know what I saw and its why I remember this here........................ im just always giving the truth but we could also chill irl and let it be than letting the writing come out here...... like im mad miserable no jokes, like beyond my imagination here, life is like I cant make enough money to survive on my own and I hate my job thats life and death it self here ...... really like what if my parents and didnt have family, I wouldnt have a thing cos of whats happened here in totality when I have a story, I say the meds ADHD help me and just people in the world are truly evil, like again woooow we smoke weed, the fact jobs test for thc like that, like what do you want a dummy working for you or like why would you make your soldiers stupid eithier way life would be and itd be less stressful the whole thing is legit corrupt af in a way esp well if what happened to me, didnt, I would have no reason to complain cos I worked hard and was rewarded back then.... but I worked hard and got screwed , again just when life can be heavenly, all humans do is ruin it, lol like you dont ask an animal why they like eating that tree or w.e do you like why would any1 care like esp if it helps someone, like idk not made for this shit, like rather not be here in all ways and thats fked cos I aint got no faith at all legit, just imagination cos nothing ever is and I dont even want it to be at this pt like cos you to me take all the magic out of it............. like we need some magic to happen here too like noone should again idk this is fucked, like we eat shrooms and I talk about this entity experience alot, but yah why like again cos why dont you say it happened to you or others like nobody knows but we found answers, think some may idk like noone knew the truth more than thoth tho is the thing lol cos it breaks all paradoxes,

the paradox to finding this was just searching on that euphorichardstyle it was like the 1st page I found back then with it, and a song was called Atlantis Gold Nights he may of randomly played that one and w.e I forget exactly but I remember like yah idk we were scrolling down cos this person aint in my music library is the funny thing to me we too lazy to add rn but its a funny ass recall memory when I heard it I played it other day too but yah just like its so weird that theirs raves with this music, I aint ever heard of it or seen it but since all this anyways in 2018, we closed down our box here, like we aint happy like when at same time, something could just be, like wtf am I suppose to believe in here, on the creator, and I write and explain myself, Aint nobody wiser but yah idk what to think............................. could be completly wrong, or completly right, like or partially right ahahah yah idk....... cos again just its knowing what has been but maybe we be wrong and its all in thy thoughts, but then it needs to be relased lol, I just dont know cos the paradox is that this happen ahahahah like its so twisted like dont even know what to say, iv expressed it all and nothing changes....... except like oh like im telling ya life without ADHD meds is misery , like this job is misery, its just that meds helped & I liked my job way more before..... like never a worry in the world about the corruption we had what we needed, never cared then eithier but yah like I dont get it, why the world be so evil here, or why a friend just doesnt share , this is the total opposite of lifting somebody up here to me, ahaha like nature is the way..... to have an amazing day lol

weve had 2pac on it, like idk I always know in a way like just their is legit every paradox in the world with names and all of it at my job, like cos just we recall friends or this/ that lol, like always , but im telling yah like in a way also it wouldnt be hard to tell , like .... yeah idk what to do, aha in 2pac first to bomb og he says at 2:30 high off codeines......... lol , ahahah mad random but yah thats an early mention of this paradox but yeah I like some of his music cos the memories and idk like all that shit, rappers died, like shit ppl been to jail here, all cos the world is more corrupt here and it all has to do with nature, like its the paradox of again just why it worked out in Egypt, cos ppl could find relief easy, imagine ppl tho who abuse things but have never tripped, idk like to use a med everyday isnt abuse, like wtf shit is so stupid what happen, when I got a reason & no one cares so im left miserable, again maybe I wouldnt care so much if life was better, but it does help, like thats half of the story here as we expressed and why again idk what to do is the paradox, we aint got motivation or dopamine , we are so lazy, like just their is nothing to do aorund here, cant game cos my room gets warm, like so much dumb shit has been for the wrong reason here............................ just cos we have a dream and the entity too lol .... the agwanti gotta burst and make something be but all I ever be is stepped on for sharing the truth of how the simulation works, like we just seen too much here, their is someone wise in the world on this stuff and that be me, like cos the rest of anything doesnt matter, but seeing how they saw the world and the reasons why it was generated, is bcos of what I show you.......... and like the world has lost touch with what it even means to be a human..... like shit no really its sooooo evil in a sense cos of nature, cos of how the world operates is insanity ahaha like really, but its just yah idk we never follow shit or other ppls ideas sometimes rarely, but we focus our energy on us here............ cos its the only thing that exists, is your own thoughts lol, like as long as you get or recieve the good mind who cares but this shit can go south even more like if something doesnt just be here, like we already worked hard and got fked like I aint care about shit its worth dying over in the sense of we know it corrupt, we let you play how you want, but this is how my entity is moving, like shit be wiser ahaha.......

.really cos we were so spot on with the information and wisdom, I aint know what to believe anymore like the wisdom even says OSiris be asleep Osiris is like to me , the god of transformations, like cos he changes colors hes green, lol like hes in the chamber with nerfertiti and while thoths on the chair, bcos that is what it is showing but its showing offerings like nature... lol, and that is how it works tho ..... but ya Osiris is asleep and lost his ability to know bcos he crossed into the shadow worlds and experienced Death, but at same time, TThoth the Atlantean could always find the truth, here, lol we out played ya here, but yeah as in again, the whole aspect of glyphs the characters is like again just personifications and like consciousness lol but that the characters do they intermindle like we found the again it has this in the wisdom....

that when 2 entities merge like synctrimism in the egyptian stuff or someshit we might have that in archive on that book but yah and basically how do you explain an entity entering your body, so i dont fucking know , like this happens in thee life and im suppose to move through out the world in the same world when we know the world and everything is corrupt, it can be chill too when things are going your way but they havent went my way since like months after the entity, like shit we drank often after the entity in a way more cos of all things just liked the taste of it and felt good lol by my own and yah but again we expressed back then how we wanted shrooms and basically took it before like I had that on my twitter from a act back in the day and just yah life be weird lol

the same paradox or curse thoth had, we have, all humans do in a sense, but not all got the same light or see the same here, but we see like thoth the most if you asked me, idk like theirs reasons, lol to be this like nah thoth knew lol................. thats thy name online cos the wisdom says names in consciosuness, its too perfect to me, cos it expressed the truth of what we know in 1 word lol

8/13 - 1235pm

legit I aint know what to do here in totality or what to think about like I aint ever feel good here, like their is nothing at all to look forward too here ever ....

like w.e you wanna keep someone miserable here, your the furthest thing from what a friend is & you can never be one for moving like this is the truth......

that everything here, I aint happy like .0000001% here...... dont even know how I will survive again furthest from a friend, even if you tried to save the day like youve ruined everything and their is no making up to this here, you had your chance , me like I aint ever have an option since, like weve done lost everything already, when we are the one who shared the wisdom, so watch how you move, like cos all this does is ruin your own self, we aint corrupted here, and its the truth you dont wanna believe

8:15pm

its just everything, the most evil thing that could be, cos I dont feel good at all like legit dont do a thing, not motivated, no dopamine, all I do is stress cos they gave me meds ADHD cos I went dr for years which helped, then they switched it on me, Warned of this like switching drs be my fear, cos ppl see things differently, like medicine works, all I do is fucking stress and it aint healthy, like its why things wont ever go your way here either if I dont feel good, nothing is good..................... like legit or anything here some good thc, I aint got no motivation cos I know I got screwed over and nobody is a friend, in all of reality, like you just wanna keep someone not happy here... their is no other answer so idc

& its someone who knows and had this experience, like just what is here, is the total opposite of what I believe in regardless, like for what we are aware of, this is mad wrong here...................... like it says you legit dont care If I did die and stress out is the only way how to read it ....

and I dont again ever want it if this is the truth, youd allow someone to suffer and all and anybody & everybody............... cos just this experience with the truth like their is no other answer here and if you know I aint got a friend around here what am I suppose to do here........ like w.e just it is too late, you killed all thy joy years ago here......... my ex hmu 1st, woman can do that, like w.e I stated it all..... like cos you dont even understand thy paradoxes...................... you care as much as an enemy does here, not at all....

the thing here is no matter what in a way if I ever did die here, like you can read all about thy thoughts, people are evil af here... like legit all this wrong doing here is why I dont give a fk and nobody gives a fk either when I am right........................... like the most divine thing to be happened here and im treated like shit here...... asshole

8/14 835am

Im about to go back to bed, but yah in all honesty like js my love has been taken for granted here.......... everything has been, either way here, I aint feel comfortable at all....... like how else can I express the truth here, iv tried, you would know im right here, on all things, I aint lie, Iv been screwed over tho, like we are just gonna stay here and stay miserable until im not taken for granted here....... like you just think oh its something he will get over it, but I cant, the wisdom says they cant return once seeing what good is, and again what you think good is, isnt true, like the truth hurts, but the cause of death is the love of the body & we aint got forever here, legit we aint gonna make it to the old age who wants too anyways, life is boring and it sucks, like I have legit nothing to look fwd to here

and when I could manipulate my algorithms to tell me more about it, or follow her, I aint, cause just what is love is natural and doesnt have to be manifested in the 1st place, like that is what love is though, their are no external signs bcos it is always........... and yah like you dont listen here, when I told you Id choose you over others, I am stepped on here, when I come with good reasons.........

like really the stupidest thing someone could do here or me, is just not believe in it, like but the paradox is all we got is thoughts...... so I gotta use that to my advantage, and IDK its not like we crushed on anyone else popular so to speak, its all cos of the experiences and again im taken for granted, when you need me in an energy way versus what I need thee for here......... but again if you dont wanna be thy friend then you can suffer till the end.... like what I have to do either way cos people are dumb af here....

like do you know how loyal we are to thy truth , when we coulda just had sex, like that is the difference in the world here, which is why we are different, not cos sex dont feel good, I had omg my dream last night, was about living at my condo with my friend and like yah that neighbor was in it tho js it was mad weird but thats why you get these responses, bcos again you aint get how the game is played, if you just bang chicks all the time your ectoplasm fields arnt as strong, no matter how famous you may be, like it is the truth of how ectoplasm even works in the 1st place, like that is the reason tho this didnt happen, bcos she wanted me, my neighbor back then, but I didnt cos she was with my friend at one point, again thats crossing a line, for everyone I turned down here their was always a reason, and ppl aint wanna believe me, like oh he will change his mind, you got another thing coming here, we wouldnt of wasted years here just to return to something I skipped on here. lol idiots, like again its why this person at my work would get this note, and on that again I aint sure, I dont know enough but this happened, but again its as if I wrote it as this like again theirs a different reason I am here and again all my love is always taken for granted here, its not something you play with or you get hurt back like cos just its how we play here, we use our records to our advantage and it is the only thing that tells the truth of why I am who I am, bcos all anyone can follow is the matrix......

ill tell you this tho, bcos of her not responding, like we had alot of thoughts entangled in this for like 1-2 weeks, huge fucking with my thoughts, but it has passed since I talk about ariana again and all those parallels, but again like this can happen when you are with somebody but when you with somebody your loyal to them and cuffed and again potentional, we aint ever cheat here, weve only been cheated on everytime like they choose somebody else and its why I dont fight with it, like what is what is tho

so now I dont think of anything, We still prob would like she has this girl at thy work the most chance prob cos of ectoplasm again it is real , so someone at a younger age also like shes def younger but again we are grown up here and that is why... bcos of thy own ectoplasm fields..... but yah I dont ever again think of ariana as like that bcos I cant believe it.... even if I do crush and speak my reasons on it, like I told you, its blinding..... we cant think ahead of like what could be bcos its too much , it would be too much of a dream.... but it makes perfect sense.... and again if you aint believe then I wont either, but since Harry and Ariana here like cos we dont go out looking, I aint have nothing to work with here

& again its not even like idk but at 1st with this person again she was getting inside my thoughts saying like oh I wanna have sex like all that but it has died off like and yah again for moving like this, im not rewarded..... like im shamed, either way nothing ever goes my way when we are nice to everyone here

and yah like my life is falling apart, went dr they wont give me the meds that help, so again like why would I wanna move up at my job, my job is soo slow, it sucks living here in florida, and again we just always reminded like how this began, and so I cant believe that their isnt another reason or thing to be.... like that we are about to turn down moving up just bcos I aint feel comfortable here bcos nobody will listen and when ppl ask or see why like I dont know what to tell them, it makes me look like I dont care, but people have treated me wrong, like life is hanging on by a thread here, I told you from the start here tho like you got it all wrong here, we come with pure reason, so this just must be soon here or again you wanna laugh at me when I had no other options, take thy love for granted, when we aint barely make love before really tho, like to go out in the world and find a woman is different than a woman coming to you... like my ex, and yah idk, like but we do know we can never change our thoughts here so you should listen all the others so they dont waste their own time, like legit how good of a person am I to remain loyal to my truth and to not get with others, well at same time it makes ppl not like me, bcos everything is based on pontentials, but yah like we would rather die alone with our truth, than go in any other direction here..... bcos it is the truth of the game that you aint wanna believe........... like if you taken or took my love for granted, like my ex came running back, it is gonna be your nightmare here...... something else may work but it aint with thy choosen one here.........

=(=(
=(=(
=(=(

I dont know what else to believe in or think tho, like either way like shit nothing makes any sense, the suffering, all of it, when we got answers here to half of the paradox.................. like what am I suppose to do.................... like all of it, from again basically where I was in life, got my electrical license for hvac controls and now im here barely making change, again the thing is like mentally, I dont feel good at all, and medicine exists, dont you ever think like shit maybe bipolar was the wrong med, maybe right way back then in 2018, but all I do is sleep these days, like Iv taken naps since getting off adderall XR like dont you have any heart at all here.......... like I cant wake up here in thy mind, and if you put somebody in that position, you are evil, like you aint listening to reason here..... or again what if I just shroomed and had some good thc, like no jokes, I aint wanna be here and its been like this for awhile........... was more than nice to share thy story, I didnt have to, but again we wise, we think, and thats again what thoth would do here..... and nothing goes my way . like really their is medicine, shit maybe itd help, but a medicine that makes you gain 10lbs in a week, im pretty sure that is poison, like and ADHD meds worked like I took them alone for years, slept at night, all I do is toss and turn these days esp getting off the bipolar in totality, I aint have good weed, like just nobody should suffer this much here, I cant go to a psych dr anyways even like cos they ruined everything when I said I had love for someone after this entity experience.................... so again like its just wrong, thats why I say here, if you actually knew how I felt and how much my brain suffers in these mental loops, im pretty sure you would help thee, and you dont thats why I get mad, cant change who I am here..... but you coulda been a friend, bcos the dragon says thats how you solve it, like and this is not the answer, but love be, and this aint love......... Like just cos I was more than honest with my story, and im still not trusted or have any love, like thats whats wrong, cos the logic be in the story of why I am here in this position....... regardless its true enough...... and I have nothing else to believe in here, like life could collapse at any second, could die, like and you play with that, you dont care when I ignore other woman cos I have love for 1 woman..... im not just gonna go off online and pillow talk about bitches, or that again, like how is that attractive, cos we aint have sex much with 1 person, like to be the 2nd man to enter a woman, it aint the same...... lol like you see what I mean here.......... or more than that, woman and most like thats all they want is sex and its gross af, like honest, cant turn a ho into a housewife aha ... that lyric from game of life by mac, but again who had that game , me, like I dont trust shit theirs too many parallels, cos its all a game & this aint been fair to me in anyways, even if something great happens, it aint worth it, cos you play with life when life is short, gotta take it as it comes here.............................. but yah idk how else to express thy life if you read tablets, it opened thoths mind, a good thing, and now I dont feel good, dont feel cured, like all I do is fucking stress, and sleep and I have no motivation, no motivation to get my tooth filled its only getting worse, I think about it everyday but the thing is I DONT FUCKING FEEL GOOD AT ALL like so what dont you understand here, that being a friend was all you had to do, and you let someone suffer here who has been abused in all ways, when the entity choose us and we share the truth, like their is nothing else to say here, if you aint get the picture yet, you will never see it..

but ya as I said above right like it is kinda like again thats why your suppose to stay with your woman, like the more body count you got, the worse its gonna be for you, the further from the truth you are, like cos again just how any single human was generated was by 2 opposite sex.... like and again you think its all about you here, but the man has to end his own life like Osiris here when this is, like w.e Iv said it all here tho

but that is why we stay single also and are not interested, like how can I even think of love, when their is no love here, like you need your other to feel good and thats what I dont feel at all, like ok yeah right sex may help but it doesnt solve it when its over with, I still dont feel good mentally here you dumbass like their is no other way to express it, you cant change the truth just bcos of your experiences here, the truth remains the truth and how the mind operates and how any human operates........

like you are messing with someone here when the wisdom says that in Thrice Greatest Hermes how heaven was sent to the mind of man & that not everyone recieves thy gift, but bcos of recieving it, it shall be restored, and thats what you dont do here......... like that all illness is caused by the Sun the hologram, and again just weve read too much, like the "Magical Stela (Cippus of Horus)" like what does it show, it shows the restoring of balance by using nature.......................... and im treated the total opposite here, how evil can you get here, to realize not all men are bad........ like thats why they say good guys finish last and its the hurtful truth, like we dont want you then , if you cant simply see like how deep we have cracked the codes here, and your still not a friend at all, when back in the Egyptian days, their would be no 2nd thought here about what is humanely right and the ascent to heaven here, and even if so death aint the end, its the biggest illusion to even be alive, cause all things derive from death, being like the creator enables things to be alive, like so their is no other way to play this game, esp if you arnt playing fair and aint sharing and being a friend, like woooooooow imagine that, that is the only paradox here to finding thee soulmate, and you wanna play with that, like what greater gift give you have been offered, just to be stepped on here and say thy love aint enough here but it is, you aint know how the game or the creator works, as much as thee, cos if you did, We wouldnt be here to begin with, the only paradox their is to recieving the good mind, is simply, praising thy maker and creator of the game.. and using what he has spawned in the game like you know how stupid this is to even argue about it, when all the evidence says it works, like how long you wanna keep me sick here , when I had love to begin with, so much love we wrote everything out, and we didnt lie, we told you straight up how this happened here and im ignored, im left more sick like thanks asswipe

like jeeze if you are gonna try to squeeze the juice out of me here, well id let you but not like this, not when I dont feel good, not when their is no assurances here, I told you, we can do alchemy but their has to be assurances, as in that is a form of alchemy, like being with somebody but not having sex and using that fire but bcos you tryna play me like this like we arnt doing that here, all you are is evil here, like for that you get nothing at all here so w.e like im not gonna fight sooo hard to force something when love just is.. like what you need, and im ignored here........ like when I have the answers so w.e like we will remain out of equillibrium until you figure out how to do it right here.... all this , your an enemy , like no jokes, this aint the time and the game to be playing with somebody, like for that you get excluded from thee reality, to me, you dont even exist....

so we will just die alone here, and cant say we didnt try right when we get weighed, thoth the creator tho knows all here, and your playing yourself here, what greater gift could you preform, but raising somebody into the light out of thee darkness here, and you leave me in the darkness when all I have is love................. it is gonna be your nightmare, like on everything here, their is no other option cos all we have is thoughts here................... youve generated this by not being a friend, when simply the answer is the opposite here actually, like you aint know shit about what true love feels like cos if you did youd find and stay with that person, you aint have thy experiences here within the matrix, so w.e like it just is the truth, a truth so hard you cant swallow it, like cos youve never met someone like me here...... and im played, like your gonna be played back, and life shouldnt be like that, you turn a good thing into a bad thing, you corrupt things, when their is no need, their is no need to suffer mentally, you aint wanna cure thee, so legit like if you ever wanted a chance you best change how you treat me here and how you move, cos all this is pure evilness, and for that their can be no forgiveness here.............

their is no other way to view this other than, you dont care..... like in all ways, cos in the opposite how easy is it to say Hi, and talk to thee, like w.e we done try , the only reason be the entity, like the soul here, aint nothing else matter in all of reality, so why just cos it is what it is, are you judgeing thee like you have a choice here either, you dont.... nothing is free.... but as a woman, you have a choice to be with thee....... like again we just do not play around with love here and thats what others do, they arnt as wise as thee

like I swear everytime im loyal and honest, its taken as the opposite, but I just know something most humans dont and im actually saving others in that way but nobody saves thee.......... like thats its for sure taken for granted, tryna prove like oh hes just like the rest, we are not , like ppl be evil and I gotta deal with that on the side, people attacking thy energy, but its why getting with somebody here is important, like to lock that in, cos if its not, than it aint good it aint love......................... like the creator made both sexes, so that again like its bipolar, like that you find thee other half and that is what half this simulation is about........ like what can I do if I was forced into this direction for no good reason, like what if you just admitted thy self was right here............. then it would be good like shit we aint fly out of body and not have wings here........... like just its too much wisdom, as hermes got wings bcos hes the messenger between the world and the underworld, his swift speed like the entities here..... and its too much reason to be here suffering in a world full of idiots, even tho nothing is free but then how you playing the game , like you must put all thee energy into thee self, and choose thy self, everything else just isnt the full truth, and it is like again we are taken for granted, when all iv done is tried to save thee protecting the wise from their lower nature, total opposite, that would be using meds, like you see experience contradicts here and you aint wanna believe me..........

even when my PC is locked or shutdown, again hacking can be done in all types of ways..... like once I save the file it can be found.... like it could be like remote viewing thy screen, or it could be downloading what it is in it, like thats all, idk its just totally possible and we always been aware of that, like one of the 1st thing thy self learned about was basically key loggers, which log the key stroke on the computer.... like bcos that is how in the early days ppl could hack ya stuff...... but yah idk we not paranoid as I always say, we are just aware of how it works and what is possible..

even if so , if it was being read, it just shows you dont care twice as much here knowing thy truth, like shit a true friend would share and help me feel better here..... again the thing is being fired for the wrong reason, like cos I always put work before anything else before this, and now I dont care, cos you can do good and punished.... if thoth can always find the answer, and reward the good soul & punish the bad, how you think I feel finding the total truth here. like you aint know what good is here....

like you just think I dont think here, but what comes from having sex also, like shit I told you its how I was generated here, and trying to get that outta me here without using my gift first is why I have cursed you here in all of reality, like we got a job to do..... but yah like the diary says, like having a child be the biggest gift and not having 1 the biggest missing part of being a human........ and yah idk just what is love if thy other is not in thee thoughts so its just again I aint know what to do here........ like I know where I wont go and where I will tho

and so everything remains wrong, stressing the fuck out, like when I did nothing wrong but work hard, but love thy other, but be their for them when they werent for me, how do you think I feel here.... like to be wrong doed so much here when all I had was love..... all we did was follow our heart & again just its the only thing you can do here actually..... we write cos of reasons, and yah dont know what to think, but if you want me, you better change how im treated here , cure the one who has love, just cos if not, youve done made a mistake here, like someone that knows the truth, knows I am right here tho in it all , in totality here so their would be no 2nd guessing here, or it would just be & Id feel better, like imagine someone going through this all and not having a friend to share... it is the only answer and you decide im not gonna share............. with this person who has a heavenly mind......... we are not gonna have a good time but sit and be miserable is how you think...................

its just all that I GTG 5 mins here but yah like really when I look through my archive book here like you aint know how much time has passed and how much I dont care or dont feel good at all here, like we had a dream and you tried to kill that, like used to feel good and now I never do... used to love where I lived, my job, now I hate everything, like what more do you wanna take from thee.............. when all I had was love, like tell me , who have I got with since my ex, no one.. could of, nothing stopped me, but I aint, and nothings changed, used to be able to go dispensary, or hit up my friends and get weed, I was looking through my reddit thc mushroom feed and im super fucking upset here, like legit this is super wrong tho, and you wont help me out in the slightest bit, you just wanna take of advantage of thy mind and not let me feel good is the only way to view it........... like we done gave up years ago, but yep gtg here.................

8/14 10:15pm

- You aint know the paradoxes here, like with it all.................... like today at work tho like thats just it we had to go aisles 5 and 15 backstock, like theirs a schedule but again this always happens in my life I dont know what to think lol like cos we did listen to those 2 songs recently again 5150 & bloody valentine.... like again I aint know what to think.... cos this person at work like ya we gotta work together same shift but yah idk she talks to me more than I talk to her like You just dont get it here, I aint trust anyone....

we been deleting the algorithms or blocking rec videos like total opposite of how I was moving bcos I aint feel good at all here....

but yah idk its truefully here, hurtful, to be called a narcissist in my last relationship, tbh I aint even know what that word meant but it was hurtful cos like how can you call someone this, who did everything for you, lmao like thats the last thing here about me, Im for all, a nacissist is like what my ex was at one point .... prob why she called me it .....

but yah like cos im in love with reason js, like you cant put a term on thy curse cos its the truth, in love with reason, lol like legit we double think or think alot like a wise person, & legit it aint like bcos the paradox here is following pathway of wisdom tho & being open to flower of life................ the other paradox is no1 cares like youd abuse me more and call me that rather than help here like wtf

tbh I aint really again all those mental terms, arnt the full truth either according to the diary, like that the truth is untterable here, but yah like again the reason is just seeing an entity, and bcos ppl have tried to fk me over, like that whole situation in the past, again they asked for it by treating me bad here.... like again idc, but still , you cant fuck with reason here, cos at that time & any idc like take me out , Ill still win like the gita says.... and yah its just why I avoid alot of situation esp with randoms, like cos..... already expressed it but the fact of it is that the tablets opened thy mind..... and the entity or creator says I will cast you down for it, lol like idk its small thing to me but its just what happened, and then my friends showed me music like I didnt come across that on my own so I would never know, but the truth is its possible like again you never know whose on your side or what having money can manifest..... cos iv been with ppl who were like my friends who had money , they are normal ppl, like they aint no aliens lol.......... like I said tho legit so its just knowing what it is possible I guess

the thing here is again you let others attack thy psychic fields by not getting with me..... Like what more could you want from somebody but to show love, like cos this is what happened in the past, no1 listens to me, from alll angles they hit me with the algorithms, like cos im just always single but yah like and its just evil to do that, to someone instead of fucking you over here , just straight up not being with them, like they believe ill just change my mind, like I wont lol , but yah and just its that, if you dont get with me, then potential is and just that is how the game works like so thats why again here, believe what you want, but I was legit down and all this makes me not down......... like I aint ever crush on somebody like her , but it actually all adds up , so we just cant let it like fade cos their was never an experience closer to the 515 shit, like thats really it aint bout anything else but thee soul here......................... and that is what real love is, like just ahah I aint know what to do, it doesnt have to be, but she needs me more than can even knows, cos we got the energy and thats what we wanted to do was in a way make music, but I wanna go on my own terms here, not be lead into some BS here, like we gotta use what we got here..... and really I dont know what to believe like I keep saying here.........

cos its the only thing that makes sense to me................... like im telling ya the dedication here like cos I could still be thinking of that other person but this interaction bumped me back into talking about her more, cos its always been on thee mind I aint just say nothing..... and again like the thing here is you aint know or I dont know , like again with Harry , how could I know without a reply............... and its all this music thats always manifested before, like again so I dont know what to think, like how dumb do you think I am here.... when I am right on so much..............

like legit the reason I aint talk to that other girl at my work..... I dont like explaininig it soooo much in detail but if you knew like you would know and then again I dont think everybody likes me, who does, like that aint how life work, I aint know what situations other ppl are in here........ but yah bcos the other paradox here is like getting off my meds finally and feeling like a tad relief, but at same time im stressing about all things and the thing is those meds kill ya sex drive, but yah like I said before in a way, with the internet, like we seen tons of woman ahahha the king over here.... why waste energy with that if all it is free online .... like but yah idk this situation got me deep down in the dumps here, when legit im more than real here.............................

but at same time, we shared real things through this all like but you aint know how unwell I feel and theirs an answer, their aint no love or no medicine here, like what do you want me to do, I feel like shit like that aint what alchemy is and alchemy is the only truth to being human, like thats the problem with the world, aint nobody wanna talk about it, or help you , or spread wisdom....... when their is nothing wrong with it all, like im so stressed..........

like that I watch out for others here by sharing wisdom as it says, protecting the wise from their lower nature here, cos experience contradicts, like w.e weve read the wisdom we know we are right......... a REAL magic trick, the best one their is, is being open to flower of life, shit the entity came like their is no other answer to the simulation or egypt either................... like you cant accept thy heavenly mind here....... you wanna push me down and step on me when you aint know me, like I told that person in 2018 when I got fired, cause you talk to anybody like krs1 said in his freemasonry speech and how the diary states, all men have the good mind........................... but not all are as pious.................

idk what to think cos of whats manifested, right like if I explained myself you would see, but you prob already are aware which is more hurtful, like cos idk what happen in 2018 but you shouda just asked questions instead of like ppl tried to bring me down here, but the entity protected me....... but yah like cos IDK anyone with money could throw some at some1 for something to manifest, and I said its not just her their are plenty of others, plenty of ppl do have money, but cos when I hit up my ex I mention her last name in 2018, cos I loved her.... 515 like thats how this was, and I said something about her last name to her then durk and future had that song, like pft and then what about NF with the entity, he aint show it right, like tryna call me out here, your all bitches to me here, and then durk came out with blocked when I told harry to block me....... bcos I wasnt sure , like but their all real reasons, like so if you do play with me the entity like your asking for trouble, you aint a friend, you aint share, when I shared wisdom, bitches I swear, you cant trust nobody, or what about young dolph playing with a chek in 2018 when I cashed out............ like either way I done nothing wrong here but try to show love and all I done is get fucked over when I legit took care of my ex ya asshole like I got abused here in everyway .... like ill never be your friend , what about tory now like again guess why NF didnt make it to my records, guess why Tory lanez just got put on do not recommmend channel I aint been keeping up with them..... I dont feel good, I aint listen to nf since 2018 , I barely listened to any tory lanez new music over past yr and he puts a song with my managers name , like gtfo you aint helping me at all, your asking for a death wish, cos you aint know the consequences here of the entity and being open to the flower of life you dumbfuck legit, you aint know shittt , bcos the whole reason I posted fredo in 2018 was cos craig who I shroomed with who was neighbors with tory johnson his bro in law took adhd tablets and he was on my job and when I chilled with craig at my condo once he was like leaning over fucked up in my bathroom for 15 mins here....... I said im good, like all this, and legit I aint even do a thing here, like so all this manifestating has done to me is say your a fucking asshole here, like what you know about smoking some weed and chilling together ya corrupt ass fucks, like legit here tho, how fucking stupid are you to think here that I would forgive you here.... like legit your mad that we got a heavenly mind and you dont, like I have nothing, I dont complain and bitch here, I just rather be dead, like pussy is what you are........... cos you wanna think if true, that since back then that we were aware, but we never were and the whole paradox here is taking the flower of life as thoth says......... maybe if I didnt eat that, ok you got a point, but my point is more valid here............... like all of it, I trust nothing cos I grew up with runescape and thats what ppl do is lie.. and scam, and lure, like thats why we stay right here , thats why we dont care about you cos your not for all, when all I ever did here was promote others , they shamed me here, like idc what iv said, your just a bitch who cant accept reality, like im not joking, all of it, the rap game, I aint trust shit that I read between it all................................ anything in life, we already know the greatest truth their is and we found that on our own bcos of the entity manifesteting, like all you 1 do is 1 up someone, all you wanna do is recieve money to put someone else down here and this is why rappers do get shot here like no fucking jokes here.. shit is real in that sense, some stuff may be made up, but what has happened on this planet here, their are real murderers, I mean isnt someone who is at war, also a murderer of human life...................... and thats whats fked about viewing reality like this like that something bad cant happen when it can so its why you cant trust nobody........... like we just know too much of how the human mind operates here and its all wrong what has happened to me, if you cant accept that, your not my fucking friend, if your laughing over their your not my fucking friend, cos the truth is all things suffer, no1 is invinicble , ... so play how you want here..........................

like I legit explained all things most of already tbh thats a good chunk of it, but yah like the other pt is this, my friend back at home, we always burned like he showed me 2pac, again I aint even know what to think of anything..... but yah like he was a friend tho , he sparked like thats all it takes...... and id never now, you had your chance here..... but yah like cos again just diff songs I listen to, so my experience or memories are different with it...... that was more of an initiation bcos nature was involved, than all this combined...... being initiated is nothing more than what im aware of here....... like the only way it can be done is by looking into it...... esp having the experience..... but yah like we listen to 2pac alot in HS cos it was different..... like even that friend, how we became friends is when all this went down here, and he always showed signs like he knew I did it but we never talked on it, not cos of the tablets did any of this happen, I wasnt aware until 2018 but again they called me sloth, they had some friends the adhd meds and they all shared it with me in HS bcos I think alot of ppl read it back then , but again just telling ya it all, from the book of thoth here, like who hides something in their xbox hard drive spot, it was hidden lol like how wise we be, I aint have a choice bcos the tablets opened my mind and the entity will cast you down is the truth, they had gateway we spoke all on it, he thought I snitched I never did , like it is why they tried to bring me down, like someone else shot me with a flare gun when I was with one of my friends and they laughed, like idk mad weird shit happen.... trust nobody...... .... but yah same person who shot me with a flare gun, got into a car accident and threw my friend craig out of the car and thats why craig had money and liked percs back then like all my friends did those things and coke, but guess what we legit shroomed, tried codeine once and thats it, we took a perc 15 and 30 a few times legit not more than 5 or 8 times, like we never got addicted to that and im taken for a fool , like how strong of a person I am to say no, like but its cos the tablets made me wiser, and we dont have anything rn so really like my whole belief is just that again humans without nature become at disease, like either way all things do die, but again the egyptians worshipped the

substance that cause death........... and that is magic mushrooms........................... soo all this talk even on like coke boys right shit it aint about coke but magic mushrooms to the egyptians........ like I said its called thoth tablets and not thoths lines of coke, why does every pill have to have an engraving on it which you look it up it tells you what it is............ like so in totality this is so fucked to not feel good when I did nothing wrong here............................

the fked up part is just doing something bcos I had no other choice......... like it wasnt planned, it just was, like the dragon came down from the sky and was like its on here, were about to burn you here....... bcos the creator knows the truth to all things...... I never cared..... cos what dont you get here about thoths tablet you call me sloth you give me a stimulant or sold to my friend and yah this happens here, like if you share and be nice like my other friend everything be good always, but yah its way too like random, and thats what nobody gets, we prob wont live to like that old tbh cos we used up alot of energy and nothing has been here like we been going crazy and thats wrong like its like seeing an animal or insect hurt and like I just kill it to end thy suffering, and thats what you watch me do here is squirm around and thats evil............ bcos nature exists...... we aint abuse shit, we just used shrooms and found the answers, ppl do it all the time, like this is why my dad dwells so much cos he aint use nature but again its why all this is the paradox as the wisdom says only you can perform it, lol...... =(

I was listening to some random things lately..... idk feel like your or whoever aware in a way even if I dont write like idk.... but nah like Rick Ross God Forgives I dont, like and sanitorini that song, but so sophiscated was fire back in the day, you gotta be initiated ahahah like but this is the random part about it like my ex when it was thanksgiving thats what her mom made, but my ex told me she hated rick ross..... I liked him for diff reasons, then another person down in FL I worked with said he used to legit do things with coke and like he knew of rick ross ahahah IDK trust nobody right but yah mad random shit.....

. like idk I just cant vibe with anything cos of how not good I feel cant generate new memories and again all a paradox everything like idk just instead of following others why wouldnt you generate your own but I cant without this being in a sense but it would work if we shroomed and had ADHD meds...................... life could go anyway but nothings been just all this, and again I cant get with thy ex or randoms at the same time like so iDK wtf this all be about at times, but also we are just the choosen one, like why wouldnt you say that, you dont believe enough .... lol, like just cause we have thoughts like everything is a paradox.... IDK thoth got it right like its why we write, in thoughts tho like just that is the paradox, all anyone has is thoughts...... like the demon, its the only thing that exists, but theirs a good and a bad one, like you got one or the other, or the good mind & bad mind.... and again bcos we are right and write, again wisdom says their rewarded with immortality..... so idk its this paradox and curse you gotta realize....

idk the funny thing to me is you never know when someone sees thee algorithms here.... like but yah I played crashing out again my mind says its easy to find it if you look but I never do & question things....cos we always moved different.... thats how you be different... but yah crashing out by dolph, like again a coworker mentions him or words like they all do my experience is fucked tbh.... lol like I dont listen to my own music at 9pm-10pm like cos I aint in the place music drives me stupid af, esp when Im not blazing like cos their is no point to music ...... but yah bcos of all that I mention above tho like young dolph idk he was pretty real compared to others.... but again found him when my ex and with my neighbor I aint know , all ppl listen to music but in 2018 again like we def dont take in things bcos of that reason, you got it wrong here, we need nature, the fire here, how you cast high alchemy in RS, 1 nature rune, 5 fires...... like the keys be lol, but yah cos dolph even says it, and again you study rap, like its all cos of nature and the world is evil, like just the whole world is fucked lol cos 95% ppl prob dont even try shrooms but drink thy poison and are blinded by the truth..... hermes causing someone to wake up would be that, but yah like cos just really cos I dont feel good idk im bout to let someone else again take the spot that was offered, its only a dollar more atm and again we used to make 2x the money atleast...... and yah like cos nobody cares about me and how I feel, all the mental places are corrupted af, like they dont care, their profitting on you.... and its all mad hurtful..... like bcos something does work and they dont listen esp now since this like what all cos I had an idea, like what we did 2 tags maybe and that was it tho but it does make sense to me still idk what to think ....

its the only way to move up at that job, and again I just dont care, I dont feel good here and nobody cares so thats how I feel .... like their is no point to life if others try to bring you down here when we are the one who shares the wisdom cause we know how to read.... and by enlightening eachother you make it better......... theirs always a paradox....... but yah like cos my mind, you aint know how stressed I am daily without the other BS here like thats why we just use what we got but all day we sleep or sit here miserable, like you let them kill me and thats evil af, like just cause again like thats all im saying you can do something with the fire of trying to be with someone in that way................... its all we know here............. but yah so like legit I dont know if tomorrow is gonna be the day always like that imma just give up again, nothing has went my way, I dont feel good, like honest you aint know how low I feel, when why, im the one showing you my wisdom and my vision and why life can be heavenly, but all this aint

I mean I played it on purpose like when I started my job when that dude who just left cos he moved up like he was my work friend, and thats what weird about this, he was like 8 yrs younger but he had a good position in life like me before and he moved down cos he musta stressed out here, he said he had heart surgery the other month..... but yah he vaped idk dont get it, but thats the thing about this paradox cos one of first things this woman told me at my job like her name is Raelyn, like RA and THOTH tho so thats whats fucked but it aint cos of that this happen........ my friends name was Steve ahahah like I barely talk to him but we did at times, like my work friend as I said here.... but that she knew him and IDK I never told nobody nothing, like as if you never know here but even if she was with someone or anything right, like she def targetted her energy on me, on breaks, before she came to my aisles, and she looks like the entity also like shes pretty skinny like that ahahhaha its too fucked , so but yah idk like why did this happen like it can tho & you aint know what your playing with here, like I told you the whole truths, and yah 1-2 weeks we aint stop thinking of her.... but we killed that and esp if nothing happen so yah like idk, again it just tells me like that idk it could still be or that it is something else here all along and again been trying to tell you how this happened and why I moved like this anyways, and all you care about is your ideas and not the truth cos we dont say the full truth till something has moved on idk we are off the low dose meds, like again idk its weird, but its also corrupt af that shrooms arent legal like many ppl do vouch for it, but yah like my experience, this is fucked, nobody has a clue how stressful its been since like thats all the entity wants is his mushies again then we be good and but yah whats the wait, legit wasting time, you aint my friend here legit like see idk......................... the fked up part is just it is the only truth their is and by doing so your sharing and that be like a form of love here cos thats just again like what thoth shows in his stomach etched on the tablets themselfs again the things that give life here and the penis lol...... same shape, chances, like your stupid af in a way, like to only want this, you should be like grateful like we could want way worse things that do nothing positive here but this shit be good for your soul....... lol seriously tho im mad sad and stressed and like no jokes what am I suppose to do here............. like its the worst way you could move here , cause how fucking simple is it to be a friend, or make a friend, by sharing nature...... thats the only way we are aware of here like cant chill without the weed here wtf ...... seriously tho and then life aint all about hanging with friends to me in a way like friends bring you down in the end is what can be fked aha you can have the opposite experience tho but its like you do never know..... and im tired of writing here

thats the thing when I started my job here back in October, he came in like December from a grocery assisstent to a grocery replenishment specialist is what they say , so lame lol but yah like he had a pretty cool car like a charger or some shit like those muscle cars....... he was tall too legit and skinny also, but he never said anything to me about this all happening so idk what to think ahah cos even if she wants me... like still its gotta make sense and this aint really still but yah like im just writing to remember like cos today was his last day bcos the other day he moved like up to a team leader when I didnt want it in feburary that makes like 2 times I said no basically cos why I aint feel good at all here and nobody cares .... but yah and he did work hard and know his shit like iv said or expressed irl also hed keep us their late and be ocd with all things but at same time idk thoths tablets say do more than commanded of me like I think alot of ppl dont know the full truth here.... and so when they do hear or thoth or the full truth like it would help them tho and nobody helps me..... but yah cos I always felt like again he was the one who ate a reese everyday and saw that durk song distance on and he was from chicago was one of first things he told me here................ my other coworker who is also younger we talk but Ben right like thats where hes from that same state near chicago im like this is too fucked like all things, but yah dont have many coworkers, some older again dont really talk to anyone just when I can..... but yah like so IDK theirs prob like 5 ppl that we all work together in the same department is what it is 5-8 some times ppl barely work cos they dont like them or w.e lol.... but yah idk the world is harsh here at same time, but all this being like in my life, I really dont care......

cos the meds adhd would help me alot succeed in life and I tried so its like noone cares I dont care, like how does anyone win here then..... like nothing is free here is the paradox also..... but yah idk hes the same person like steve tho that I told him before the distract manager I told them I liked music like that is the goal tho but yah wanna just make it in life at same time is like wtf we aint doing no dumb shit here and selling thy soul its just gotta be cos its whats in the game, and yah idk like what to think, like cos it just tells me it is ariana at same time then but again how do you want me to react like I cant believe shit cos iv been pushed down so much for the wrong reason, like wtf dont you get about creative writing here,

yeah so idk I want to mention and write about the truth of thy reality, like I know he was singing the climb by hannah montana one day as a joke cos her songs play rarely and it hit the algorithms then french got like bunch of artists say miley cyrus one of the more I feel like or atleast before, but yah like thats just again all im saying here and the fucked up part is all thy experience we have like in thy mind, to even be here in the 1st place after seeing the entity, and doing nothing wrong ,like you got me fucked up 2x here, like this just and you wouldnt even help me out now if I was right...... its too fucked up in all ways cos for it to be would be again too much of a dream and like yah idk, but I have nothing else to believe in like cos this experience told me her and the entity said all this to me in my thoughts, like that something is going on here and this must be it.... like idk how can I not trust thy thoughts after knowing the truth but again if no one is their for me, I have no other option but to divert thy path and again like I cant even make a living, you cant even barely live on your own with a single wage is what iv always expressed, the system locks you in so tight id rather not play the game in all honesty as fucked up as it is like I aint got thy energy here bcos of whats been and idk you bring me down when its simple to make me happy............................... like really why does the gita say that name arjuna........ like we found it cos we liked the art on it and again like the silver charriot ahahha its all fked up like again to find Harry tho after this happened, and the words..... cos we found it way back then and it says here if you bring me down when I am weaponless and offer no resistance it will be my reward as he slumps back in the chariot pissed off basically like all of it, I never listened to it cos that famous hiroshima shit I liked the artwork of arjuna and a bow warrior like ranging weapons all of it, ahahha cos it is a famous line in that from that if you ever wonder on YT like we done for years idk life be mad diverse...... but yah bcos of what happened in 2018 at my job I liked it bcos again what did I do and it says it better or w.e to lose idk its so perfect for thou sitaution bcos it says like elders I killed at their peak like cos we hit em with the truth and all of it love the gita its why its on my YT but nah we found things cos we search for wisdom rarely and found that channel and that is why tho like we looked through again some are on the archive......... but yah idk life is way too fucked here cos all we done is get screwed over when the paradox is only the entity and again how can it not be this..... like what wouldnt you want to know more here............ like why this other worldly demon says he wants you............ the creator ahhaha star man entity tho for real like just i dont get why no1 shows it as connected as I have tried, bcos we just know.......... but we dont know the fate of our life here like the fate of atlantis............... =(

if I explained every reason here tho like again we dont have a choice, we hypnotize the eyes of others in the way of blinding them with my own algorithms but again idk life is so diverse , but energy be real also and yah , like that again we use the stream, and we dont try but when we focus on music a song with a parallel comes into picture and again like the wisdom says, he shares what he sees and becomes charged with the divine energy ahahah like so yeah idk but this loop im stuck in , in thy mind, is most evil, cos it can be cured so easily and its why your not a friend here, its your only quest you gotta realize how to finish it here....... turn the goods in to ancient thoth and share ahahaha ... =(

but it gets boring, and I can end up on my own random path again I liked using what we got here instead of all this new shit, we dont even listen to it tbh like barely we used to listen to only new shit back in the day in a way...... cos life was different.......... like just feel like I can fall of the earth and you wouldnt care and its the only truth their is, you dont know what the future contains and im played like this, like nobody cares on the planet, but again we aint reaching out to anyone or anything either, even when like idk we tried before tho in a way, we never started writing alot until this idea of her came into thy mind and all our reasons....... ahaha really tho like it aint the meds like shit we are always like this but without the meds and without anything else I dont feel good at all here like the total opposite of a friend you are .... idk like cos again id experiment with this shit if I was on the other side like as in feed ancientthoth some mushrooms and see or give him his adhd tablets but something needs to be other than fucking sitting here dwelling always

the pt is at end of day shrooms are fucking legal in places, all this is stupid af like legit tho , like thc shrooms all we want and its both legal in places, its mad unfair to be in this situation like cos we just again everything in totality is wrong here and we didnt do nothing but show love, like again you aint know here.............................. you just gotta have options in life and this being thy experience like wtf legit you aint believe in magic , like we do here

like that life sucks so much and you aint give a fuck here, how evil is that tho .... like their is nothing to fucking do all day here, like we work at a shitty job cos I got screwed over, again they aint wanna admit to the truth here like its just soooooo dumb like an entity comes to me and im treated like this when in fact we became mindful and again its the whole paradox of all of everything, like youve shroomed, but you aint shroom with the ancient thoth here, like we make life fun and again idk I wouldnt again shroom with a ton of others thats like I like my space here lol more pppl more problems is the truth tho lol.....but you gotta do it with somone....... idk the pyramid wouldnt of been built without this singular fact that magic mushrooms played a key role in the pyramid its so perfect cos their minds were satisfied...........

Excalibur

that is what I do just know how consciousness be we put shit into algorithms again use facts to our advantage, but IDK I remember last yr listening to the doors all cos again a simple paradox opened the pathway, cos my sister and her bf she still with went to his grave in paris or w.e like had pics were inception was filmed.... chances.... like but yah the doors jim and his long hair, its so funny cos the expose part, like honest to god I aint care shit like the fact is we showed the holographics...........like thoth be holding a portal in a futuristic suit on mine and the sun like we got pics here , the dragon on thy balls ahahah chances tho really its just like the clouds I aint get it... well I do and knowing this truth is fucked up......... like 99.99% ppl dont know...... that just is the truth tho but idk like their is an answer, why aint ppl talk about it more like that shit its heavenly like again the dragon be key here and thats regardless what I would show as an artist, just what I know..... like the dragon and merlin be key like we found the actual truth , and again like all of that shit..... merlin has a mushroom on his belt... when he pulls the sword from the stone the anvil...... but yah like all of it theirs too many paradoxes, this old dude at my work like 84 or something, he told me he used to sail he used to live near Boston like me weve talked months ago and yah like hes skinny like entity too js but like again the doors got that song we jammed to ship with sails , I got all the art still cos it was cool, idk just feel like life is sooooooooooo not satisifying rn or lately... like I dont even know what to believe in, but yah like cos our hair looks like this again its my joke I always pull we spell bind the eye idk it gets some not all tho lol...... for sure..... even that girl I used to like at my job when I was playing it like I just crushed on her really we put her in our mind cos she was cute to me ahahah but like iv never heard the song but like your lost little girl ahah she def younger a little and but yah she went the wrong aisle and again like she fucked with me and I did to them with tyga like that song , dont be fooled aha and the energy drink, but idk the meds fk with me and not having good thc fks me even more or a good paying job and yah like just idk what to think......... I never again wrote the other person anything... but yah this all happen cos thats what is like weve had workers come & go but her name basically like she had someone with the same name also like her name was Joseelin and their was a Josie ahahah and I work in her aisles now cos she changed but yah like cos that nobody knows by durk we hit em with that cos shes like that color just saying aha and theirs someone named scotty the meat manager who works at my job alll of it you dont even know the paradoxes you could if you listened in it is possible or to view like phones from a google earth thing like why wouldnt their be intelligence like it in a way, but yeah like then theirs silly string on that baking aisle cos for like parties and they always move it to this day....... but yah like idk I never talked to her even more cos idk she was like too cute ahaha and I havent been feeling good about anything but we did have to talk before, but yah in totality like I feel like shit here........

like the 2 older ppl that worked their that was one of their names Josie and this person who drove her Len their were two lens at my store back then or how ever you spell and they left my store and were like everyone I started with is gone here like the tablets except the dairy and freezer guy in the am like they moved up and back down cos it sucked they said basically moving up lol and the other was Joseelin she was again like atleast 5 yrs younger but we worked in same department and I thought she was like wed stick it in if we had choice ahahah and I dont say that about everyone I really dont tho like it takes a certain someone in a way lol like a weird way to spell Jocelyn I never knew how to say it until she left ahahahha but yah like again life be diverse but thats what happened here when I 1st saw her back then im like damn I hate girls like cos they want attention ahahahah that song but yah its fucked cos we barely did talk to them but life sucked hahahaah like and again idk we romanticise but we dont like bother others if its meant to be then their is no other way is what I say.... and life can be weird af, but the reason I aint talk to her back then even more was cos arianas shit was in my store and like both those people werent whitest like they were had that light darker color in a way to me, but yah like so you aint know I guess the truth until I write it here why would I say everything always and again never knew what to think, like we just dont try ever ahah or like care idk cos nothing ever bes but this new thing is weird and I aint satisfied tho like im pissed off here cos of all this being like a little relief would be sweet

we are letting it out cos we are confused af but I think again how consciousness be is like this, like I think others see it at times, or the mind works in mysterious ways ahhaha both are true, but yah like so I dont again its like as if others always can see the patterns.......... its so weird..... even like you never know when somebody wants you but again anything is possible here........ shit is the wild wild west out here on the moon, but yeah like that is the truth to all this ahahahha like its so fucked things are changing always and im so miserable cos of this simple paradox and nobody cares the slightest..... but yah like iv talked to this new girl way more than her partly bcos of the shifts and we gotta work together also but she again has approached me and shit like idk its just a curse to look ppl in the eyes shit be blackholes and we again like all this happening is beyond fucked, like what would you be doing here...... like cos honestly all iv ever promoted was a good vibe and I all I do is suffer when I try cos nothing ever changes like .... but again why do you need a new song if a song came out is a hit, like all of music it can be good but its too much at times you need to chill lol...... but yah like cos this thing where I like that other girl went on here for like 6 months, but again I aint feel good, I aint think of anything else like this def didnt happen when I got turned on but the meds can also do that or again idk like wed rather be her than others tho but I dont know what to think like ahahha cos like theirs no reason not to but its like again none of this make sense to my brain , ahahah like again im that loyal to question it if I should ahahah cos and like im left alone to suffer always but the wisdom says that in gita, the master of sacrifices and they dont know me in reality so hence they fall...... back to the mortal world..... lol

it can always more than the just the ppl in thy own department, thats the thing here tho everybody throws bullets online like its why again we delete algorithms dont trust vibes we just share a funny parallel and dip basically at times ahahah like yeah cos iv seen it all, all the videos that come in on the recommended you gotta think like that is why again just idk it doesnt matter but it can........... like but yah not too much with what im saying here but iv seen it and energy be weird, even the ppl they call em vendors we hit him with parallels that come to us like legit tho ahahahha like we hit with that dolph get paid song cos of this all but the person who puts on the shelf our chips be a skinny black dude with like like he def knows of young dolph aha I see him randomly again dont talk to anyone but this is what happens here, ahahah .... but life sucks like we find something & move on here, again allll of it I already told you here, like how my coworker above me looks like morpheus and the matrix been apart of this since 2018.... like cause hes black and bald ahahah its the perfect paradoxes, cause you cant trust anyone but the paradox again here is morpheus would also be thy psych dr but he fked me over here like wtf is this bullshit but yah its like the blackhole, that idk if this all aint a perfect circle that brings me back around to these truths what is and we hope on thy freqneucy and nothing ever is, like I take it as you see me as a threat to some like others outside the circle that try to peep in when im just as real as it gets, like I think others know but dont know again maybe im just right maybe it just may be her ariana but all this isnt even like this is fucked if it trys to be cos that aint friendly at all here, like on everything tho like shit thats why when you assume and not know what somebody is thinking be dangerous af here

all of it tho like all we done is use the stream .... like so idk it aint even a misunderstanding, weve stated the truth like thoth here, like damn give ya man some flowers of life here like men give their woman flowers, aha like that again the glyphs show this, gotta feed the entity here....... but yah like it would be the equivilient like really life is not enjoyable at all here.......... and yah idk at same time I just always think, like nobody knew and this is the reason for it all anyways, like that everybody cant be in on it, but they can be cos the creator and how the real initiation can be to thy chosen ones with the right experience if everything is already written in script in code , programmed in the game, that is the truth the matrix always showed me here tho, ... like that again the light cones, the future forces things to happen in the present .... like not only does past influence the future, but the future influences the past...................... like we play like a winner here and all we do is get screwed for that reason alone, but we use our reason, which you could have if your heart was light enough here.....................

random af but yah like this also be thy paradox atm, just being ancientthoth online like right tho but yah idk already said it, but back in the day again thats how I talked to my 1st gf, aim lol we messaged ahaha and I always used them codes, like those are like glyphs on a pc .... ahah emojis before emojis lol....... but yah idk like I just idk we have too good of a mind here for nothing else to be...... Like you wont cure the one who has love, like what more do woman want than a man that loves them forever like thats the whole pt of life tho again to me, cos ppl do find their other, but not all do like shit you gotta play the game here....... lol.... =(

like that again the reason we dwell is cos their aint rarely been love and love makes you not as stressed , thats all we do here, like how is that healthy, their could be or it can be healthy like have some good thc or some shrooms or adhd meds help like really it all effects the mind....... but yah we wouldnt be who we are without this becos then thy energy would of been different could of but never like we always kill thy ego here like that is the only truth their is lol..........

120am 8/15

hmm the most perfect paradox to all of this , is just again going on my own way, showed me this truth, like as in I think cos of playing runescape the algorithms sent me netflix merlin you see but we watched it back then legit a diff time in life like really for a little life was sweet not working but we know we didnt have income...... didnt have a choice here tho like all things got fucked, for no good reason.... but yah just cause idk like without this side of things like it is the answer tho like idk just doesnt make sense its super fascinating to me, like a child im like hmm that is magic aint it tho lol..... =(this aint tho......

the even more fked up part is how it always connects js like again my botting images were from camelot.... like king arthur, merlins crystal took place in that castle and again just botting, like the creator bots you here is the truth but its why Id like it even more back then cos I found my old harddrive and its why I have those pics on my pc right now tho but .... like we run off a script is the truth tho it says that in the diary, like we act out the script of our own lifes to begin with thats why again cant help but have a creative mind and heavenly thoughts but all this aint life has went downhill 2000% since 2018............. like for no good reason here, even if it was ariana like im miserable shit she coulda helped like I really dont know here..... I even told you how we do our magic here basically like .... lol thats why we be so like wtf tho for real like cos that shit kills you being with someone basically either way but it can be in a good way, it was with my ex for awhile until it wasnt and thats the fked up part, we aint need none of that to be for it to be and then not be .... lol like really tho...... cos shit just to get here we used up all our fuel.............. like aha like if it happens again it aint even worth it here and yah idk everyone be different, everybody likes sex, but again like ya play how you want here but sex is how anyone became generated, you gotta reflect as much as eventually being together........ like cos thats the only way it works out is if you find someone who sacrifices for thee for eachother aha like but it can be worth it only way being alive is , like to be with that other person........................... so fucked how the mind works like thats in the nature of the game like the force that brings you into the world, is inevitable... cos of crazy this game design be ahahahah like really tho it is the truth and again idk ppl fuck around all the time and live a better life than me, shit is fucked thats why something needs to be eventually like its already too late here... but yah really anything can be in a sense, esp if you stay single........................ the game cracks down harder on you to force something to be again their is a way but it aint easy and its stressful and uses fuel always like we aint got none left out here in space...........

like idk so it would be super interesting to me again just to blaze it up or shroom knowing this and talking like or listening to music or being in nature in a way, but yah like to talk to someone cause like idk I feel like ppl do know but not many can see it? like that is the truth we aint see it for ever here and yeah but the experience... like idk it is the answer to it all, like pft , Why wouldnt anyone in the world show you this, I dont get that part....... but or how the wisdom says that all, more than just like all things and we found the truth and nothing is, all I have done is suffer..... how fucked up is that tho .... like we are the bonus genius, the good demon and we got screwed over .... like idk just that like this way im speaking on how to view the simulation, its again what the wisdom really means, like when the dragon comes down to merlin in my video same shit their he is in the clouds ahhaha and yah I played runescape back then and christmas time was better and nothing happened all iv done is suffer here without meds, adhd or that opportunity, simple paradox, but it was my fav show like no joke cos its mad long , but its why like idk all this manifested like this also, like unless you play RS or come from the Britain like that is the myth over their like I said USA sucks, no theme, but they got the dragons and castles for real lol and its like would be super fun to know this and be with someone and chill and look at it all ahahahha like its always right their........... idk like same time just feel like we found the answer more than any1 here cos of again computers help just looking at life like theirs a creator so theirs a pattern I guess, idk like the fked up part is no1 showed me, just awaked in thy own mind but idk like thats super cool the Universe is based on this Dragon ahahah like we made videos on it all like idk we tried nothings been im super upset and stressed like no jokes here whats gonna happen is evil af like dont feel good when the cure is so simple like aint nothing at all changed in forever here....... so evil whats been for no reason, like no jokes , and again on top of it all the entity sent me this way in totality like idk what to do ahahah like its gotta be something here.................. why again this other thing is like hmm again i aint know but bcos of how it been like then something else can be like harry never answered why am I gonna think but she still like what idk this is mad weird, that can happen more rare but when your with somebody like you gotta find someone loyal and thats all we been like no lies tho shit is dumb af out their and rn

8/15 10:33am

like weve said so much & all of it, their is nothing else to say here, you never change your mind and thats evil again all this is, believe what you want here...... but I aint know what the fk to do in life, nothing to EVER look fwd to here............... like and what to suffer just for something maybe to be like thats again like all this is completly fucking wrong here, all of it, like if I loved someone, Id never let them suffer like I have been done here, cos you aint know thoths love to begin with............ this is what happens when you get fucked over, and I will never forgive on everything here, like cos it aint that hard to be a fucking friend here, this game your playing is why idc it dont work for you at end of day......... like you gotta make it work & thats what you dont do here, you aint care about thy story, you dont sit and talk to someone to find out whats on their mind, you assume, playing this game, straight up not what love is , which again why it aint ever work out for you, but like again cant get with someone who lets you sit here miserable.....and that is facts on everything here, promise like if you knew what my mind thought, you would not be playing with this here................ you cant fool someone who knows thy truth in totality, like legit we good here, rather just not be here................................. all of it, the wrong reason, doesnt even add up actually, like cos you got it completly wrong here always and I alls I do is deal with BS cos nothing is, instead of fixing it & like you generate your own problems here, instead of being a friend...... you bring me down here and that is evil........................... love lifts you up and not this, not whats been happening here, like if you want to do the initiation, you better understand how it does work, cos all this aint......................... pure fucking evil and for that you aint get to be my friend, like legit here..................

its just why again like I can never forgive, cos I told the answers before you let them poison me, all cos you werent a friend here, like it is pathetic bcos the tablets again ADHD, is thy life story, I have nothing else to believe in here, Like that is not what alchemy is though, alchemy is today doing shrooms is what it is....... like the only thing that exists is right now...

bcos it thats paradox about the tablets way back when which again opened thy mind & theirs no returning after learning what good is................. like that this pathway was formed cause of that, and you wont cure the one that has love........... like really I wont be with ya ....

I legit aint feel good at all here, I aint have any good thoughts cos of all this, like stuck in mental loops and thats evil af honestly like all this is, cause the answer to the entity is magic mushrooms, like you aint believe in magic...................

like just really I dont feel good at all here, out of equillbrium like my mind is blank I aint know what to think or what to feel cos of everything and thats evil again like theirs nothing you can say or do here to try to fix something like you had your chance to by thy friend here..........................

if you just heard me out here and again were a friend you woulda knew what my thoughts were but you let someone be in this state and thats evil af like cos telling ya I wouldnt let someone suffer like this here when they give writing, reason, and share wisdom, had this experience, again their could be nothing more evil, and love aint evil like wtf it wouldnt work out if it was........ like you got it all wrong and done made a mistake here............. telling ya it aint magic to let someone sink below cos they were harassed here and cheated on and all this..... to then come and try to save the day here, you had your chance legit on everything, just for putting thee in thy mindstate, like I will not forgive, and you get put beyond thy event horizon for this, you dont exist to me............

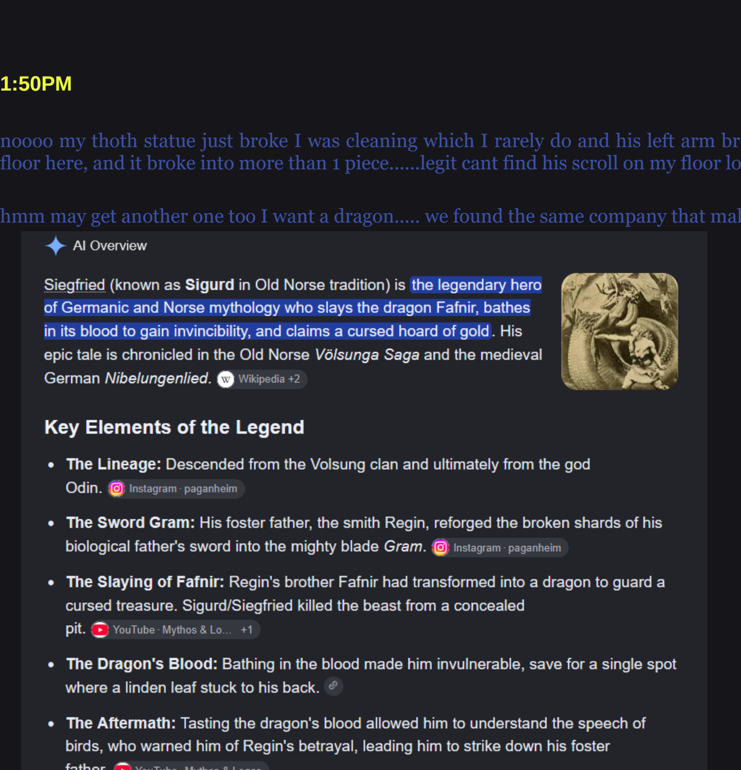
idk again thy curse in thy life experience be real here, like the tablets says, like the curse fell upon thoth originally here.... let thy curse fall upon ye, like so what again cos its if ppl knew they arnt allowed but thoth was to speak on it and write on it ..... just like again mckenna was allowed enabled by the creator to talk on psychdellics and be that shaman...... like just you aint have the same light as we done here.................... & again like just this is no way to treat somebody here who had love, their is no love here...............

the wisdom breaks paradoxes again the wisdom tells you how reality works, like thoth was chosen by the creator, believe it or not.............. like really here tho............. that is what it means, and so again just thats what the wisdom says, I thoth, the creator, will be with you, and again to speak against thy evil here cos the truth like the sunlight shines above all and thats just it, nobody cares, like your suppose to not touch thee with thy darkness and lift me out, and what is done is the total opposite here... what a waste of time & of life to be honest

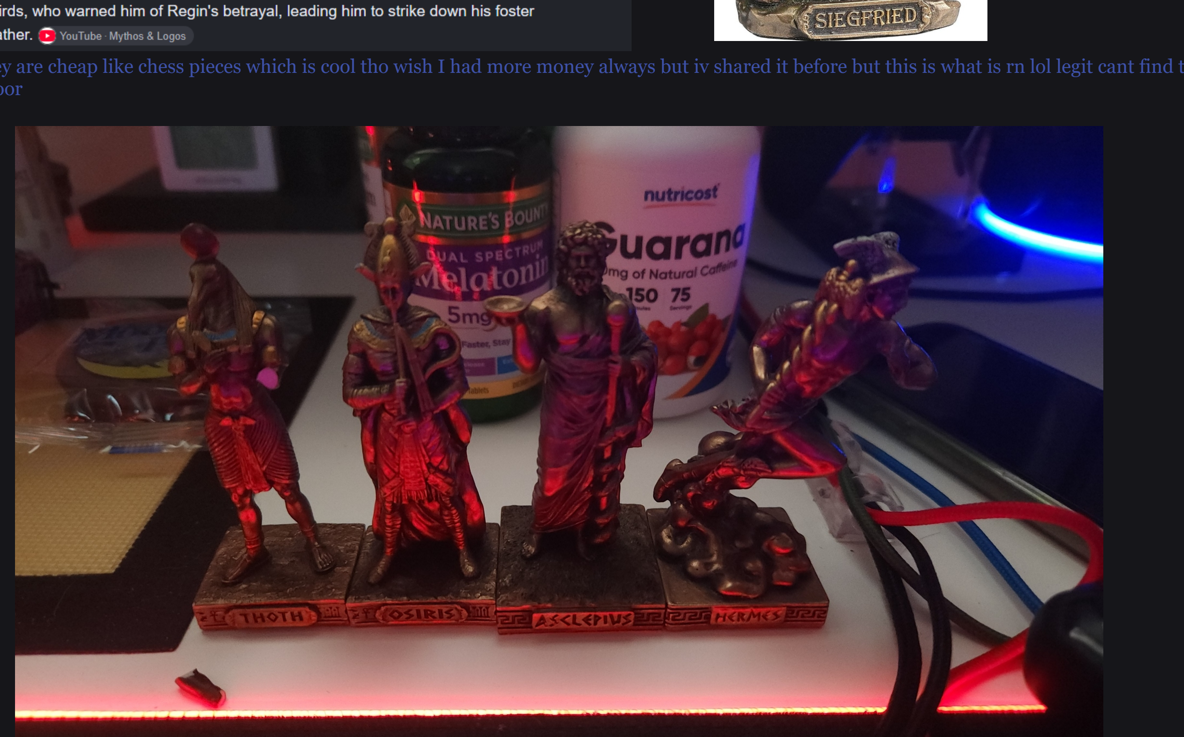
1:50PM

noooo my thoth statue just broke I was cleaning which I rarely do and his left arm broke off legit bout to get another 1 ......cant even find the piece on my floor here, and it broke into more than 1 piece......legit cant find his scroll on my floor lol =(but its only 12$ for another one lol =(

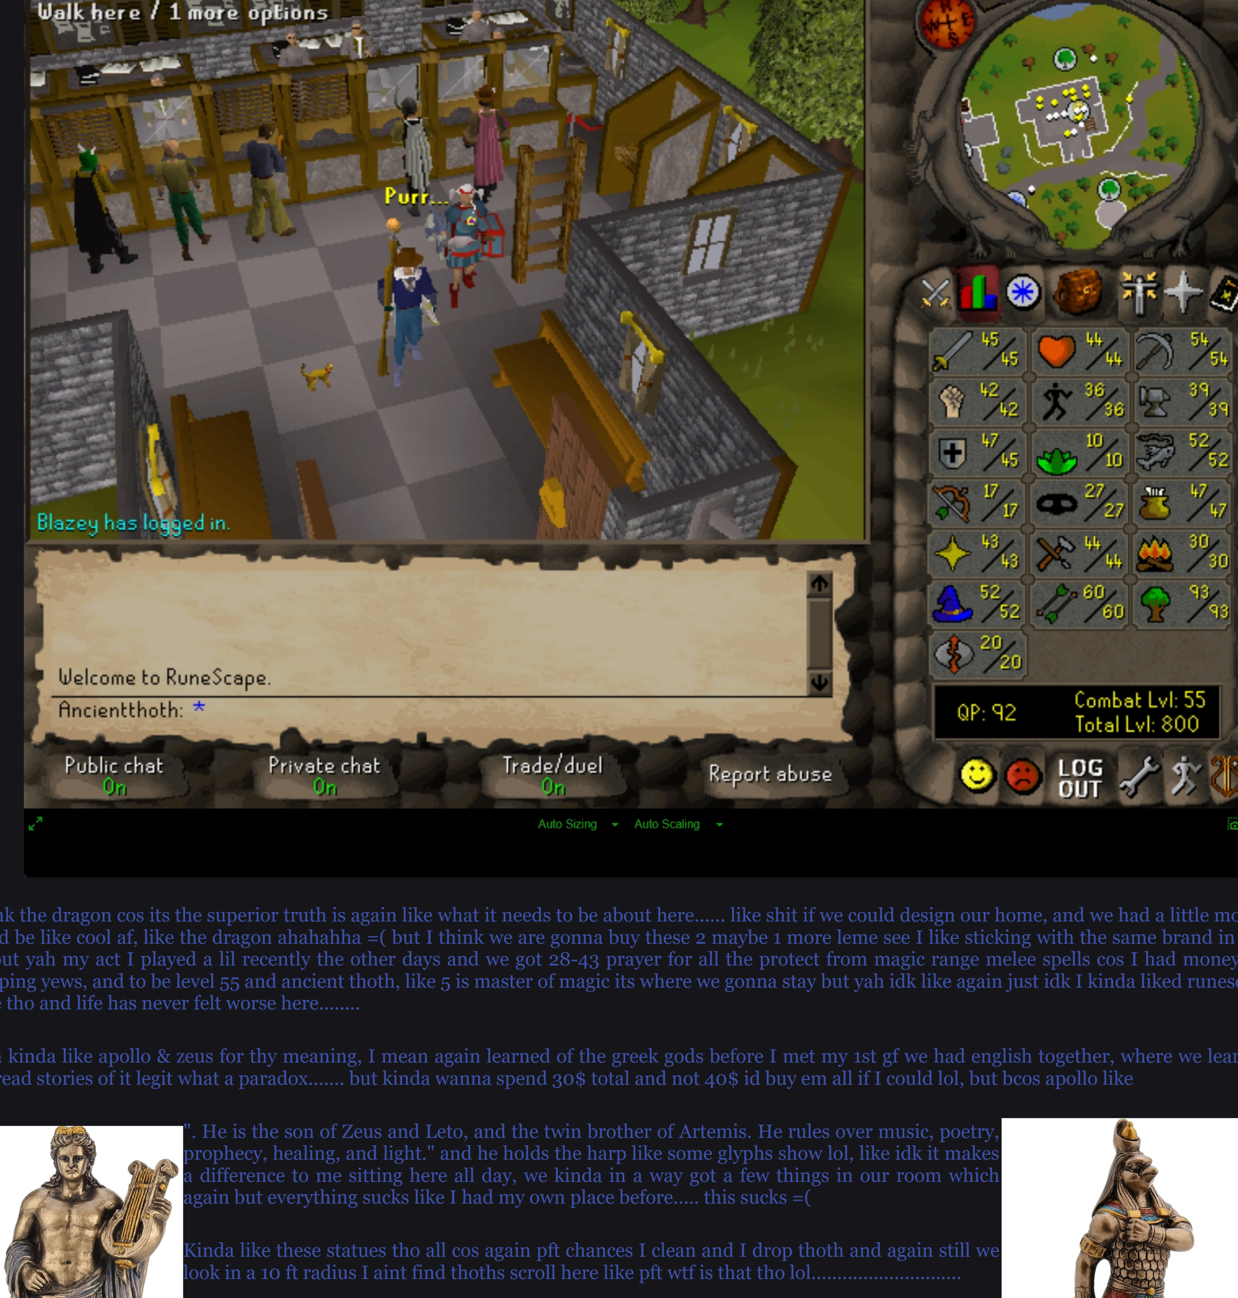
hmm may get another one too I want a dragon..... we found the same company that makes Siegfried the Norse Dragon Slayer



hmm they are cheap like chess pieces which is cool tho wish I had more money always but iv shared it before but this is what is rn lol legit cant find the scroll on my floor

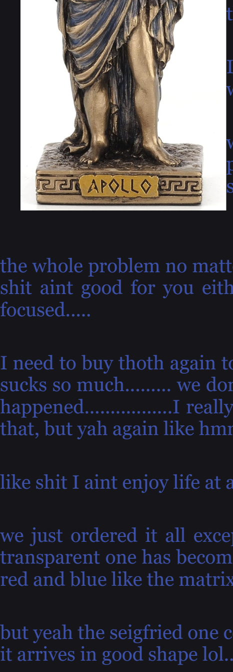


kinda cool he has a sword too.... lol and that helmet with wings...... damn theirs a merlin one but its 100$ lol no thnx but yah idk that Siegfried guy is the most accurate parallel to this all rn lol like tasting the bloods dragon allowed him to understand the speech of the birds....... mad cool and cos like my character iv been playing on , on 2004scape way less since all this but yah we got the red headband ..... & the sword..... lol.......



I think the dragon cos its the superior truth is again like what it needs to be about here...... like shit if we could design our home, and we had a little money it would be like cool af, like the dragon ahahahha =(but I think we are gonna buy these 2 maybe 1 more leme see I like sticking with the same brand in a way cos but yah my act I played a lil recently the other days and we got 28-43 prayer for all the protect from magic range melee spells cos I had money from chopping yews, and to be level 55 and ancient thoth, like 5 is master of magic its where we gonna stay but yah idk like again just idk I kinda liked runescape 3 more tho and life has never felt worse here........

hmm kinda like apollo & zeus for thy meaning, I mean again learned of the greek gods before I met my 1st gf we had english together, where we learned it and read stories of it legit what a paradox....... but kinda wanna spend 30$ total and not 40$ id buy em all if I could lol, but bcos apollo like



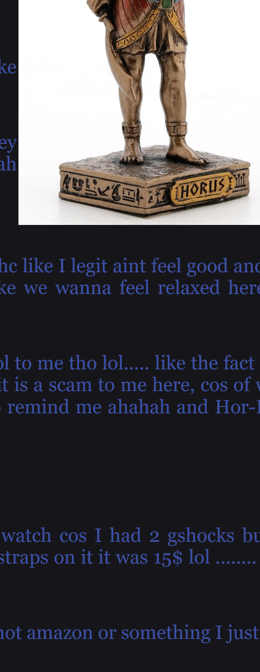
". He is the son of Zeus and Leto, and the twin brother of Artemis. He rules over music, poetry, prophecy, healing, and light." and he holds the harp like some glyphs show lol, like idk it makes a difference to me sitting here all day, we kinda in a way got a few things in our room which again but everything sucks like I had my own place before..... this sucks =(

Kinda like these statues tho all cos again pft chances I clean and I drop thoth and again still we look in a 10 ft radius I aint find thoths scroll here like pft wtf is that tho lol............................

the Horus one is pretty cool too he got a scimitar......... lol

I wanna see if I can find one on the gita here but we do already have 2 buddha status again like we went over this before here legit......... like what is in his bowl but some nature .... =(

well again just thats what charging matter be like, like that just it said it in the wisdom, they powered status like in Egypt also tho bcos thats what they believed, an enchantment lol but yah so when I look I remember my reason to say lol........



the whole problem no matter what here is again to take bipolar or that zyprexa and then nothing and barely have good thc like I legit aint feel good and that shit aint good for you either................. like shit if we just had ADHD and opportunity...................... seriously tho like we wanna feel relaxed here and focused.....

I need to buy thoth again too tho so without Horus be like 35$ with horus be like 45$ but hmm just again it is super cool to me tho lol..... like the fact is life sucks so much......... we dont enjoy what we do here, we cant afford to live on our own, I already worked my way up, shit is a scam to me here, cos of whats happened................I really like Horus tho cos of the pic of him passing the bong is why im probably gonna buy this to remind me ahahah and Hor-Ra all that, but yah again like hmm this sucks

like shit I aint enjoy life at all lately......

we just ordered it all except for Horus cos it was 78$ my purchase cos I got more guarana and a red band for my watch cos I had 2 gshocks but the transparent one has become yellowed which sucks it was my fav..... but yah or the blue one I wear, but I wanna put red straps on it it was 15$ lol .... so its red and blue like the matrix lol.......

but yeah the seigfried one cost extra 6 bucks to ship and itll take 9 days to get here it says cos it ships from a weird thing not amazon or something I just hope it arrives in good shape lol....... but yah

we also got more magnesium glycinate 240mg sometimes I take 1 but imma start taking 2 at night again cos just nothing helps but that did in a way but my mind either way be stressing here............... cos life aint good we got not good thoughts bcos nothing has been ....

but yah I feel like adding Apollo here to the desk with Siegfried, will be perfect cos of this paradox here in totality...... like esp cos again just Apollo tho with the harp when I listen to music ill remember this is why here like ahaha rules over poetry and music well what does hermes do when he awakes ppl from sleep like he handed him a golden rod... but another parallel is in Priffindas or Atlantis of Runescape right like you play the harp and collect dust to enchant your tools............................ I miss RS3 I miss and hate the seasons here but up north like legit since we work at a store now and even go like you just see that the most like halloween shit already , we had to buy some candy corn and pumpkin seeds today aha they are bomb tho but yah at same time like idk we aint been eating as much just getting off the meds speedens the metabolism back up but thats what again what ADHD does is it drains you ..... like you cant be in equillbirum with all thy energy......... bcos you can hyperfocus but that cost more energy to do, like idk it is the truth tho like with ADHD meds Id be so happy , this is fucked cos thats what you dont wanna see or do, is someone be happy .... and again the gita says that, if they take happy even tho their bows are drawn to kill...................... like its all based on life it self, lol like you gotta choose you in this war to win in consciousness... and be open to flower of life........................ =(

like I said here..... chances, I clean my desk today before I used to keep my shit way cleaner, my mind aint feel comfy at all here, but I eventually like did and I lifted all my status instead of putting over like over my glass mat and thoth broke, then I buy these, its too perfect lol........ cause of again thats how we play here.............. like gotta again if this is what is rn either way with what I post or do , its perfect, lol, but still nothing ever does change here but yeah like this is that paradox here again where the future influences the present or past like corruption just all of being human is that, but what doesnt corrupt is that truth ahaha like the tablets tho... =(

like that no jokes the pt of this that is ignored, like I aint feel good to do anything at all in life, all we do is stay here at our PC, like shit be boring their is a world out their, nature, like but again we aint trusting everybody like more friends more problems also can be like.....

like just that like I aint feel good to do anything at all, like I aint make enough money to do a thing or have a dollar to spare... used to make atleast 2x as much and liked our job also, but yah like just again the fact my tooth is cracked & cos I dont feel enough well mentally to go get it taken care of when I have insurance, like but it can only be getting worse............ like I hate the dentist too but yeah its stupid af cos if life felt better we woulda got it taken care of but their is like zero hope or faith in anything here..... cos if someone really knew how I felt here, somebody who got love wouldnt just again like total paradoxes here tho like meds do change everything and what happened here is corrupt....... again if I had good thc or some shrooms, but we dont drink here still and yah like im just legit sick from life here................................ and again like it aint hard to show love but their has been none of that, like cos you aint hear thy story... but yah like its totally fucked up in a way to feel this miserable.......... it is disgusting , like and that this happened here, like that is again the total opposite of a friend on this earth here................................

legit and we usually take 100mg guarana around 11 and then drink a small red bull before and on break.... only 80mg caffeine, shit aint do shit, never felt awake from any thing, coffee maybe, but coffee and adhd meds were crack like felt good .... =(like wtf this sucks and again its thy whole story of how we got here cos of the truth of the simulation............ but I can drink a red bull on my off days lately and just fall asleep again it dont do shit , its like when you drink caffeine and again the total opposite bes like you get more tired cos just idk we aint fk with anything much, coffee is more natural, but we cant afford that rn legit was waaay better either way and their is a dunks in the plaza I work at , again its sooooo fucking slow down here, shit is like I said it when I got here, shit sucks ass and no1 truly cares here............

i am happy we are in August rn like we eating some pumpkin seeds aha legit in school even I swear like we did that before but also at home back then but yeah they are interesting, I hate sun flower seeds cos the shell, or the shellless shit be cool but more expensive usually lol, like pistachios be good sometimes, but yeah we eat shit here and esp when we dont eat at all, but yeah cos the summers are way too hot here, I cant even game cos it all and thats what sucks the most, like my pc generates any heat and we get sick here =(upnorth was like 1000x better........... even in merrimack like I hate the fucking everything about here, like we liked the snow & shit the seasons, all its been is summer here even in the winter like I hate the cold too but it felt like more natural thats all I know here............

its fucked up in all of totality cos on the flip side, we could feel relaxed, the only reason we are not is cos of life and I aint know what to do here, since back then like its jus fked what happened here.......... like really how at this pt can I not believe it is something else but bcos of how iv been treated like again cant really care in that matter................ like just that yeah holiday season be coming up and who cares if your fucking miserable everyday for years legit tho like shit sucks

hmm we got these cookies today too 8 cookies for like 9$, I like birthday cake flavor stuff in a way like we aint like chocolate in our snacks that much thats why them moonpies be pretty good like we love smores and miss those ritz smores so much in a way ahahah they were one of the most fire snack of the 90s or 2000s to me , we like small snacks tho in that way of eating less but yeah 5g protein and 90 calories pretty good ..... yah like 4 regular quest bars tho be like 10$ at any store, shit is dumb af, like and yah I do miss them chocolate protein shakes Id get, like anything else aint as good in a way, but we aint have any money here really like and no meds we cant think here ....

im about to lay down in 10 here or so maybe soon prob I just washed some of my sheets lol gotta lay down atleast 1x a day without adhd meds tho for real and yah like I said here its fked to think of this all lately like cos past week we aint think of shit but all this I write about like I legit dont know what to think of like that we aint trust anything at this pt

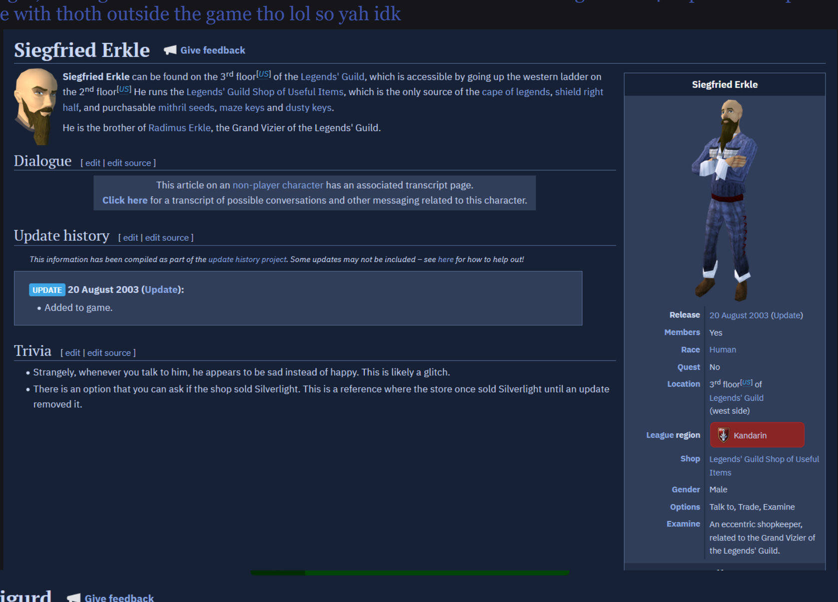
lol cant believe we found Sigurd just looking into it all but yeah dragons do be cool like cant believe again that this game is based on this lmao

like cos their is no higher truth here of this myth like that the dragon be real lol.... like that this is how they viewed reality or again just who knows like gotta exist in a game with parameters, everything before your born in a way like who knows, their seems to be way more legendary things back in the day compared to now..... and like back in the day ppl understood the game more hmm lol like its mad interesting that in a way hermes was talking about this dragon in the sky like really how else do you like thats it tho.......... like that their is an answer, and ppl aint have a clue about anything in reality..... and that my life sucks legit like =(

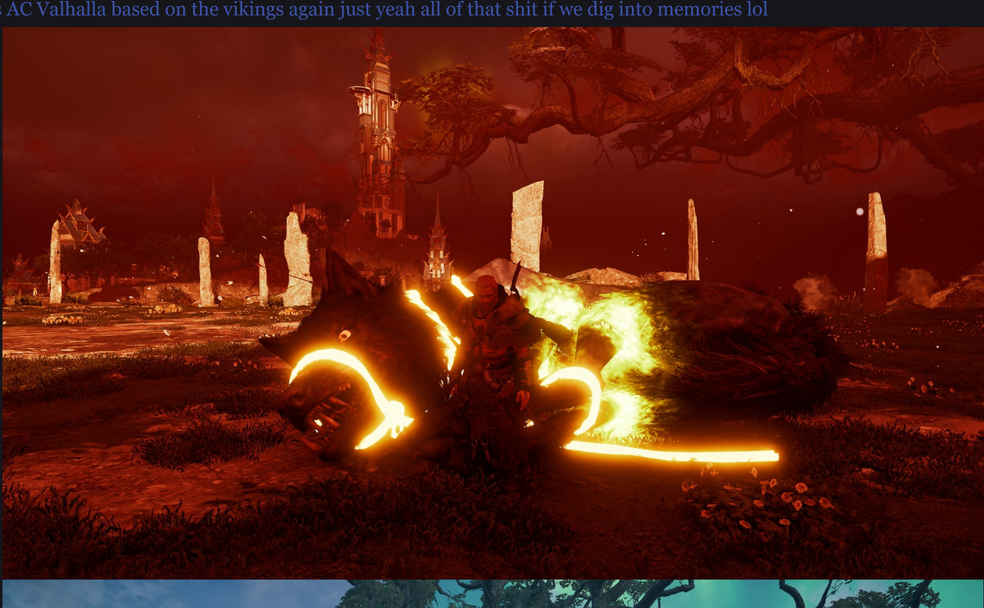
all I do is follow this pathway of wisdom and I am let down here like .... its just again that idk the untterable is that this is the games design thoo like pft just that their is and it is this intelligent design, like what could of generated this all here , but something far more supreme than us ahahah shits twisted and a total paradox.......... we are gonna add it im pissed =(

we played tho what was it, we got pics still of the games we played , AC Vikings I think, We aint play shadows, we played Mirage tho..... and yeah like cos its whats Sigmund reminds me of, I swear hes in Runescape leme check tho lol

ofc he is, aint where I thought, I thought he was in this area called Frenimnek or w.e where again 2004scapes latest update was and I got that helm of neitz like in my YT video the one with thoth outside the game tho lol so yah idk



but yeah nah it was AC Valhalla based on the vikings again just yeah all of that shit if we dig into memories lol



lol..... its just again this paradox here

addings pics to my writing always makes it better like cos if you like me I just like images more and thats what thoth does spell binding of the eye ahaha but yeah like to express what comes to thee mind here.........

like cos I looked into it all like runescape, rune stones I swear it is in like Nordic that where it all derives from this angle of things tho which is funny and thats what rune stones be like you use them to cast spells like glyph symbols lol....... but again our time here came along time ago and aint shit been here lmao

Now we gonna watch some on Apollo here.... lol We gotta do our laundry fml like this life is just an evil circle here, no meaning to anything esp if you dont feel good and nature exists all this is stupid af here..................

Ya apollo tho also fights over a dragon, called, Python but yep again just how it is here, like the matrix................ lol........ like what am I suppose to do when it breaks and then like ya whats the chances cos thoth spell binds thy eye you see and like chances I drop it and thoth breaks, like after posting about it cos its thy curse in all ways.......... but yeah mad cool honest cant wait to get it, aha just a figure but thats what we about so why not here, cool ass story and no credit be even given, aint no trust, like shit be cool.......

& yah in all of everything like I said, I have no idea what the fk to do here, like cos I aint feel good about anything here like all this stress be dumb af, ppl aint care, but yeah like .... the least you could do is make someone feel better here........ in any way here, their aint no love legit............ cos we dont know what to do if these been our thoughts........................... like living here and doing this job makes me wanna not be alive .... like I aint feel comfy to sit and chill in ever all I do is be miserable cos of this all...... knowing it takes being a friend here in a way also like but what we been asking for is just that, like woooooooooow like ppl are so lame here...................... ppl aint wanna be nice .... when the answer is legit this ....

like just idk like to be comfy, medicine can do that, but the wrong medicine can cause bad side effects like wtf, its stupid af what been, bcos in another way zyprexa makes you not care , it can be comfy in a way like what I mean is taking it for aslong , like 2.5mg was enough. 5mg like damn but 10mg is disgusting legit never felt worse here........and again we did it ourselfs knowing what was at stakes here.......... but yah like again just having nothing here , sucks, but I only again like before all this last yr, we agreed here to zyprexa and ADHD bcos of thy records like we accepted ok we will try it to protect us also maybe right like thats how it was expressed when I began, and cos of life sucking so much like I aint care...... but yeah its all just nothing being, like not having anything at all here to relax, like you aint get it, how my mind feels and it sucks ass, like to never feel comfy here................ I mean really look up what others think of zyprexa or the legal battles for it , theirs always diff angles but when we started it we had this view again to trust thy dr and then I lost insurance like everything is a paradox and its why I say since 2018 life has been 2000% worse here....................... like since last yr we aint care at all cos we tried, like all this just to stay alive on a planet floating in space is insanity and stupidity, like when others judge you again like what happen here

we aint satisfied at all here............. like no jokes............. like this is what life is for following thy heart, couldnt feel worse here .... like what other options do I have here...

8:30pm

I legit aint know what to think or do here legit this sucks, like that my mind you aint even get this, like I cant generate new memories like in a sense of like life is soooooo like this is beyond fked, cos I dont feel good here ever................ like I felt way better on ADHD meds, like why cos this happen like again nothing more evil here tbh, thats why medicine exists, what happen in totality is pure evil like no jokes..... aint no flying with wings here........... like its simple

like that I hate my life and opportunity and its been like this for years, but for years prior again always had motivation something would be and the fact we follow our heart after it all and this bes is what is most like its so unfair, all we wanna do is feel better...... if you cant understand that, you are an enemy here , an enemy of your own self....... id never if aware let someone suffer like this here.................................. like what am I suppose to do its why I write like I aint know why the fuck others here would cause such evilness, when its easy to be nice and lift somebody into the light, the opposite is done here and again like GL , like theirs a creator aware of all things..... is what you dont see here doesnt matta all you can get is a good mind & to suffer like this here its just like again you dont have a fucking clue here.................... it is the only answer..

my ear legit hurts tho I felt it earlier, shit always happens, like I aint feel good not even .00001% in all of reality here like when their could be love tho their aint none, how dumb is that in a way tho like idk how else to view life here did I not explain myself like this is just like again you aint get it, you aint have the same experience here tho but it is the only answer....

like everything in totality here like wtf messed up , like just cant believe it, and again just that either way here if you were a friend like shit we wouldnt of lost our meds, and bcos of that and this like again how do I express to others this truth unless I write it ... like that again ADHD meds alone I got my electrical license and then like cos of it all, like its so wrong cos the truth be that nature heals thy soul .... like that literally I couldnt feel any worse, and again it aint something like this all happen and like its beyond fked but the entity came before it all and again nothing at all has been, like when in reality a friend would be chill and this aint, like why again you want your other comfortable here and for their brain to work, like that life be hanging on by threads and your tryna mess with me here and by not being a friend in all ways, you coulda just been nice here..... like for not being here again just locking into and having assurance is the difference and what love be, not this............................. the total opposite here of what love is about in all ways, like who makes someone feel worse about themselfs when they followed their heart here tho like just everybody , like their is no other way to view it all, like i said your gonna learn either way of the truth of whats been here .... like beyond messed up when we did and used the right things tho in the right way........ like to not feel good when I could feel better bcos something does help like people are corrupt here what dont you get......... what you know about being a friend, like this aint and never will be..........................

like really when I start to watch random things like I aint know what to think like literally just cant express that enough, I aint have no motivation in life cos of this all being and it doesnt help me at all, its called being screwed over in totality like ...... really dont know what to think here.................

the thing is legit I can never sit & chill & again continue to watch something compared to taking ADHD meds like yeah then we comfy in a way and it can be, and wisdom bes, but not this....... like I just dont even know what to do here.......... cos weve ridden this wave here before and it aint worth it, like or anything bcos you dont care about how your fellow humans feel here, like I dont have a clue what to do here cos I dont feel mentally well like ADHD cured that itch here..... and again just like turns a bad day into like okay we got this here, now I aint got shit, I feel like shit all the time, why would you give something harmful to someones thoughts when their are good things like thc or shrooms, and all the whole bias of that industry and of life as a human on the planet, like shit is more corrupt than anything........... but again life just was before and we did it cos we had friends....... or that it was legal, like this sucks like the least very very least of a friend here..

do you know how much time has passed in all of reality in my life since this has been and nothing at all has been to help me, like you aint experience that or this , so you cant judge that like really, like alllll this time and nothing has motivated me here, like their legit is no point of existence here then.......... esp if this is how it be, like you just dont get how fragile life be and to mess with somebody like has been done here, its beyond messed up, like cause you trust when your taking a med that works to continue that...... but SOOOOO much time has passed, like no jokes it been about 10 yrs here since me & my ex like shit started going wild..... it been 8 years since the Entity.......... and all iv done is get pushed down here when in all of reality, anyone with a brain & a heart here would see the paradox and help thee and the opposite is done, like you give me a med that helps and then all this is, makes zero sense, bcos again of reason to begin with, bcos of reason the entity choose thy , I mean what else is your answer to it being then..... but like thoth said, being open to flower of life, like just its beyond dumb again with diff opportunity and to shroom and reset thy mind thats different but like rn we stressing hard their is no point of life esp if you aint have any friends to talk to, like being single again you gotta lock in love when its their........ all this aint tho.............................. cos its so simple, its beyond ridiculous to be treated like this since it all tbh, in my eyes, like its again just why you cant win over the truth here, like how you view reality & how I do, is day & night here...... like cos everybodys own experience contradicts if you think about it and that the game is already written like thats why we do nothing, we put trust into creator, yet nothing is, all iv done is been screwed over time & time again bcos at one point he took the right meds which helped us until this went down with my ex, like being with the wrong person and having this be, like shit once you live with somebody and this bes theirs crossing that line like never be the same, same with all this waiting here, like itll never be as good as it once was here................

I just dont know but thats how the game works, cos its thee sum of the experience either way which sent me here, again so you could say, thou was chosen by the creator of the game, but you aint believe in magic here.............. like really theirs no other answer here tho....................... and I dont wanna be here writing out my life here forever, all this does it make me more upset and like one day imma snap here again cos I am stressed out like what dont you get when I say my mind needs relief, like I warn ppl and nobody listens................ im not listened to, im played for a fool here....................... like and just yeah idk what to think, cos the thing is, their is way more to life here but this being in my life like I aint have no other options and I legit dont know what to do, all we have is thoughts and like just you dont get it, cos if you did you would know that its all the answer, id be trusted, their prob be love but all this aint lol like what, its just again the sum of experiences...... w.o it all in totality, like shit just to be older and live with someone, like again their aint nothing more to life than that, like sleeping in the bed of thy other, and we aint do that since like we lost everything here and followed our heart cos someone stared me down here, when I recorded it, like nothing at all makes sense except that paradox where thy was chosen here..... like what else bcos of thy experience the entity came , and if an entity shows you love & you aint show it back, like pft just what more do you want from the game than the answer being given here...... like we know too much & that nothing is free, the 1st thing you should be doing is helping the one that got love and the answers to the game, cos just idk in a crazy paradox its the only thing that makes sense to thee mind and thoughts, whatever it all is, and so yeah but im ignored and all this so dont know what to think in all ways, like total opposite of what alchemy be tho and what love is...

the more belief I have in this, the more I can be let down rather than it just being if true, and in a crazy way like idk experience but its just like idk it seems like the answer regardless like that it took me down this path like I just dont know anymore and never have but its thy thoughts........ like but that again idk its not truly even right and the answer is the opposite, like reality be so dumb, it must be nice to chill for a day and shroom or be able to again relax after my job but I dont like it at all like I dont know what to think , its just again idk all we have is thoughts is always thy paradox here.................................. like so how else can I play this game........................ their is no other way like the thing is their be reasons aha like I legit dont even know what to think here like cos love be saving the one you love , like again we took care of my ex , we did do our work like to be screwed over this much, its just insanity, and either way so is this like again to do a job everyday rest of your life, like iv wanted out since 2018 like that just my mind cant take thy stress we werent born for it, others mad other things work, if anything is possible why think this is how it gotta be............ like shit the only way your dream can come to be is if your thoughts take you their........ all we really ever wanted was just a job we liked and enough money to live off of here...... and we basically had that already and this happened, just the world be so cruel for no reason, just sorry we were victims of the algorithms and the truth of all reality..........

=(=(=(=(=(=(
=(=(=(=(=(=(

=(=(=(=(=(=(=(=(=(
=(=(=(=(=(=(=(=(=(=(=(=(
=(=(=(=(=(=(=(=(=(=(=(=(

like ahahah how fucked is this when I watch Dark on Netflix tho like shit we watch this when it came out like years and years have passed, like idk the thing is we had our ADHD meds before at one point, like just when again like nothing satisfies me here im soo annoyed like we once believed good things will be and now we have no faith at alllllllllllllllllllllllllllllllll like I just dont know what to think of here and that is suffering af, like in every single way cos this been our sacrifice since this happened........ like it needs to change reality................like I said here we go into the fall and holiday seasons and im still without magic mushies, im still depressed af, when I look online ppl sharing their goods I get so depressed like no one should ever feel this low cos IK if someone had this experience in retrospect like idk id just help them if I could & thats what you aint do here........ like what greater thing could their be, then cherishing the truth and using it to make the world better.................... like that is what thoth would do

just idk I knew it when I heard I was moving after this happen cos again I stress out cos of the meds and all things on and or off like nothing but magic mushies solve the problem according to all the wisdom & the glyphs, like what this is thy only problem in life rn, like got the answer but yeah im pissed off............ like just idk what to think anymore here like its sooooooooo just like life could be awesome here and it aint one bit cos I was screwed over like we can say that, it is thy truth in all of it, like whats the pt of working hard if you never have fun right like that is doing what you want with your life on your offtime , and it aint like that here, fact shit aint nobody even wanna just give that helping hand here.......... like its too wicked for real like this aint a joke I can joke about it all but I aint know, this has been all thy paradoxes why we write and we hate this, life has never felt worse in my entire life than these past years, and we found the answers, aint nobody wanna be that friend here like pft just its beyond dumb, like but its why we find answers to reality cos again just need this to all end here in all ways... nothing good can come out of not feeling well and suffering every fucking day here with these thoughts here tho, really some bong rips id be happy like this fucking blows on everything tho

like do you know how long we been here I look through my pics randomly why they saved but its insanity to me here like nothing has legit changed but yah like I loved life back here and then

like I cant game anymore no time, always stressed, cant afford to live on my own anymore, like cant stay awake here, like shit be twisted af , like life was so chill before .... weve sat at this pc for years tho like I miss thy old life way more like allll this time we barely have fun here.......... we could be if we wasnt so stressed.... like its insanity to me, just wtf do I do tho like god damn, =(

years and I still dont feel good like pft .... just really day after day after year we sat here , shit always went down and never in my favor cos the answer is magic mushies , what the tablets say, what the glyphs show, like .... raise thy sun power with shrooms, its the only answer to it all tho........ believe it or not and you dont like this is lame af I aint know how to go in my life anymore cos of this all like no jokes, any day we could just fail again here, esp w.o my meds, like how am I suppose to live life here.............

so sad here tho legit like cos youd let someone freak out in thy own mind when you could just share or offer some nature here, like its the only thing we ever belived in here was this type of alchemy, its thy life story here and what happened and how we got here......... I hope something is, cos if not, that is more scary , but anything is possible and can change, just if its in the game ...... in thy script aha their is no other answer to it all tho like that is the highest truth their is here

=(

like the fked up part is you can never return learning thy whole truth and to what good is........... like all these taking of meds, uping or lowing dopamine, is thy curse, and if you had any love at all, like shit that would raise thy dopamine and their is nothing at all here, like its how the brain operates and to be treated like this when we have the wisdom and a real experience, is just it is insanity, its your own life, do what you want when your here, yolo right, like shit we just wanna have some fun here...

I was thinking how like ya again playing most video games around holidays be fun like esp just idk always liked runescape cos you can do 2 things at once but like the holiday events since a child be cool like but yah or call of duty like shit we aint have no fun we are so stressed shit aint a joke cos if it was my way like wed be chilling not stressed but yeah idk kinda wanna play RS3 again .... cos I make better memories when I do that, like you aint get thy stress here tho , time changes all things and nothing in my favorrrr life is too much for thy mind esp like its why ADHD meds were miracles to me here like everyday was way better tho just stupid ass shit happened like =(

like really here no jokes cos of quantum mechanics the path took me this way, all we did throughout this whole fucking thing was stay to ourself since fucking 2018..... like all these crushes were real like all of it and nothing has changed, again just I dont expect to ever of been fired for this being is my pov so we used that fact to our advantage here..... like we went through our akashic records in totality like their aint nothing else to fucking do here, like whats fun here is taking nature and doing things.......... like having money bcos you work hard, what happen in totality is some bullshit, thy mind has always been like this aint shit changed here like I said, day after day after month, years, crazy shit been, again we never changed our meds from zyprexa cos those meds again I aint like the idea or side effects but adhd was always different, had them alone for years, like we were succesful all this other shit aint the truth and it hurts someone who does suffer from adhd and that the tablets help tho and again its always gonna be half the paradox, like shit if we had a gf or a opportunity, but reality depends on thy mind also like just their is no way to turn here and thats all I do now iis just not be comfy, cant sleep, cant chill, like we worried about our future since all this, cos we are fking responsible like iv said, if I wasnt, I wouldnt of made it to where I been and its just dumb this whole thing is stupid af but I cant take it any longer and theirs nothing to do.. this has been the worst, but yah I dont get how like Dark we watching a few episodes atm we took our melatonin but she says in Season 2, EPisode 2 at like 34 mins tho and its about the book of the journey through time which is thy paradox ahahah like how cant I think like this Dark was one of my fav shows and they dont even make good entertainment to me here, I havent found something good in a minute, all thy faith came from prior and nothing has been, im more than discouraged here tho, like I dont know what the fk to think bcos the truth is seeing the entity, flying out of thy body, ahahah like its so fucked and im about to go to bed here tho.. we used to watch things and play RS3 always and see names or parallels like life could not suck more honest, I aint ever been this not motivated, like its disgusting cos their is cures...................................... simple like this is beyond insanity to my brain

like that it just so unhealthy and more stressful tbh like we never lay down and go to sleep we always get up or like rn we dont watch tv at bed we just sit in our thoughts like Im soo fucking miserable it aint a joke like cos this wouldnt of happen if the truth was seen............ like life could be 100x more enjoytable here and im not happy 1 bit about a thing, like for ALLLL this to be & still aint shit changed......................insanity, like how am I suppose to have a chance at life here............... already tried to make one........ shits fucked like we just dont care cos things happened beyond our control here........... like all things but still like if I was just comfy here.. so simple like all this beyond dumb like not even a friend will help thee

9:25am 8/16

I just dont know what to think, like cos someone who got love wouldnt allow to me feel like this, just I feel like again how iv been saying, its that time of the year coming up though and yah my life rn like its totally fucked, again we dont care, we cant care, like we could fall off in a second here.......

but yeah the most weird thing is like past 24 hrs here..... I aint again feeling good, but I like shot up at like I think it was 848pm last night or something like it was 48 mins on the clock, I thought like my alarm my minds fucked you aint get it and I look at clock its 48 mins..... like all night I randomly look at thy clock its 48 mins.......................... like again just if it aint love what is .... like shits fucked , the voice in thy head, I mean it makes sense but nothing does if you let someone suffer here.................

like that I feel so misunderstood, like cos if you knew thy mind like we do, we would have our ADHD meds, like everything felt so much more comfy on my meds regardless.. like their is no other answer, I dont feel good here one bit..... like books of osiris say this, as in thy sickness or ADHD returns when they stop going the healer, everything is backwards but the wisdom be right & that nobody cares like its thy entities food tho and its again taking it all in my books here which is why and its a good reason, this is the total opposite here of what good actually is & means.......

it said in the wisdom also like we posted it back in 22/23 like how life be a quest and the goal of this quest is to get back on thy meds & what works & then the rest fall into alignment basically like thats what we were trying to do back then I remember everything that happened here and for nothing to be is most evil

I found this dude cos of Millyz, $tupid Young, hes asian, rapper, lol he has a new song with Polo G, its alright, I like "I know" aha or like Wit Me has a fire sound, but yah I mean the paradox of this all in totality, is that one of my best friends in highschool was Asian, he was the one Aaron Buth who that kid Dan sold his concerta too and Aaron gave me one cos I was curious I went to go smoke a cig with him and then this happened and then I read a whole book on the meds, miracle like then event again asked for help and was ignored when thy tablets opened thy mind, I mean Aaron legit, he would steal, like no jokes, we smoked a light bulb vape in math class my teacher said it smelt like burnt popcorn one day hahaah he was a bad influence in a way......but yah like no joke I expressed this before, like he was asian crazy, he bought morning glory seeds cos they say if you eat enough like its a form of opoium or w.e and again its all back in like freshmen yr of HS or sophmore this was like again when mac had that song Poppy, im just saying this did happen and then he like got kicked out or moved schools............. ahahahah I used to always smoke a cig with him before school tho but yah no lies this is what happen & Like way back then I looked him up I aint do that much and yeah lifes weird tho lol like we would skip school and burn , we smoked a banana leaf one day cos thats what asians do is be weird ahahah and yah tho he looked like pac like he had small ears ahahahha

=(ahahah I just think in totality it is funny in a way but its not like cos we worked hard & life was good before................

I always just wanna lay down until I have to get up and go to work, I hate the jobs hours, I hate the job, I hate everything about my life atm , I never felt like this on my ADHD meds, all cos why, in reality, jobs test for thc, shit is the stupidest excuse in the books here, like oh but I can drink, like be real, life aint even worth living in this day of age according to Egyptian philosophy here, the world is wrong and evil and that is a fact........... like its why we been stuck all together.................. cos meds formed me nature says the entity................. like it is the good, what feels good and this dont at all here

Its even more weird to know how I found Millyz, again one day in 2023 or so right in Merrimack we just searched for Boston rappers on Google and then a page come up with a list and that is why cos Stranger Things like and Harry all that, like we didnt find Millyz by the YT algorithm but by this way.... and its too random all of it, but it makes sense to me .... again if you listen to Millyz tho like he speaks on the tablets again , its been years & aint shit changed.......

& then yeah it even goes back to that, we all know ppl who died, but my other asian friend, Nick Sann, again he had a nice car like me I remember but that he died, after I chilled with him in his house, he drowned, legit like he was in my History class then he wasnt........... like he just dissappeared forever, but yeah like we were always friends with whoever, like he would again be apart of our crew like chill with diff ppl at times, and HS was way more fun than this is, like shit we had meds this sucks ass , all thy journey comes from it, and staying single tho

the problem here is Iv explained my story multiple times like it is all I know here and life be wrong, like stuck in thy memories as I said tho like we aint got nothing else to work with here.................................. like but it is a reason at end of day I guess idk Thoth was for everyone like can be interesting I guess.........

we just know life can be better, like again at one pt when I was with thy ex, EVERYTHING changed....... and times were different here................ like cos thats thy paradox or thy curse also here....................... like Its just been years here & we aint got no dopamine flowing, its the only truth , like its how the mind works, wether you like it or not, the truth hurts, like we experienced death here, how many ppl can claim that...... not many, why we were choosen like we did something right & all this aint

yah idk to me at times like just sounds different to listen to an asian rapper ahahha like its different but yah idk like just this is what happened, if it wasnt for thy experience, we would have less reason but their is and its stupid af that this all is, like we just like listening to rappers with reason, like cos his story you see, like what do you do when you have no way to eat, but steal like pac said you see, like they are robbing us being alive is the truth and then bcos of the actual truth, like that the creator helps thee bcos of the corruption of the world............... cos just it is how it is works, like nobody has a clue, but we do... we found the answer to humanism, its the only truth and every bit of reality doesnt want you to figure that out............ like really tho theirs no other way to view it

I mean really like its why you cant trust anybody in that way of like we went through this and these experiences......... like things can be good and then corrupt, its always gonna be, like so yeah I mean even the diary states this truth............... to avoid the multitood bcos of not understanding the things said...... and that he who is alone, is the good, thy father, aha like their is no other way, even rappers who have collabed, shits went south, but again you can always make up a story but at same time shit be real like cos everyone is just trying to find a way to stay alive here

just really we aint know what to do here, we dont feel good at all and its something you think ohhh he will snap outta it, like nah the truth is the truth here sorry to tell ya............. nature works you dumbass, like w.e believe what you want its your life but thats why we follow thy dreams......... like im soooo stressed out , it aint a joke here, stop messing with thee and be a friend or fuck off is what I will say legit, your only fooling yourself here wasting time, we got entities on us here, like lets be real here................ you can save the one who got love or you can pass it up, nothing we can do if it aint, but it is what is my thoughts say and yah like if you had any heart at all you would understand thy paradox and being open to flower of life .... like we were saved and yet were not, we aint got shit going on for us, miserable af, like all we do is sleep, stuck in mental loops, never do I enjoy myself, like what about to eventually soon take time off of work to do what, sit here miserable, with no good thc, like its more than disgusting

11 am

we just delete our algorithms I aint feel good at all here like its not a joke, fucking medicine exists................. that works this dont

just wish their was any form of direction in life, like again shit we need something here .... like just after it all, I aint feel comfy at all like my mind is always stressed out here...................... =(

like just life too like I said like as of right now the only way to ever live comfortably is to move up at thy job, and that comes with chaos it self..... like I dont even like what I do , like what am I suppose to do, I aint feel good , shit if we had our meds ADHD, I prob would of moved up in January here when it was first offered, I dont know what to tell ppl, like how do I express that and this to others bout thy mind, like nobody wants to listen, not even thy doctor......like im so mad you aint got a clue tho

cos to my mind I aint even again think its all this but I aint have no other option or what to believe in here................. like that is why we so sad, cos nobody has a clue here how thy mind feels........... like I aint know what to do , their is no direction, just we always stress

cos it is like this at my job, my old store manager & the new one, everybody wants me to move up and I dont feel good like im masking thy symptoms, burnt out, like miserable af, rather not be here and nobody has a clue how I feel cos of whats happened, like then yeah idk , like again just this sucks, like I aint know what to do here

bcos I have that much faith something else can be, but I barely talk about it again to anyone, like im just so miserable here, you are messing with thy in these times and thats most evil, all we do is share wisdom............. like so that again you cant do that to someone who got a heart cos it wont work here

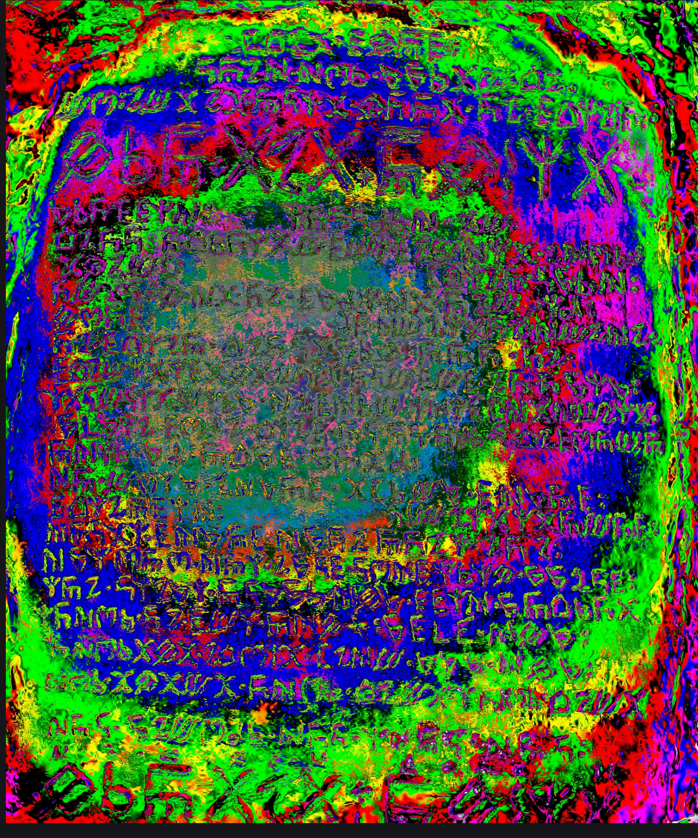
all i want is to not be stressed and its like really I am legit gonna explode here sooner or later, and we cant take it, what more do you want me to say, iv tried to go to my dr and I told him too like nope we aint move up when offered, cos I dont feel good and he wouldnt give me my meds, everything here is mad cruel tbh and it doesnt have to be, like their is corruption everywhere here and its evil af, like honest tho like this is beyond messed up here................

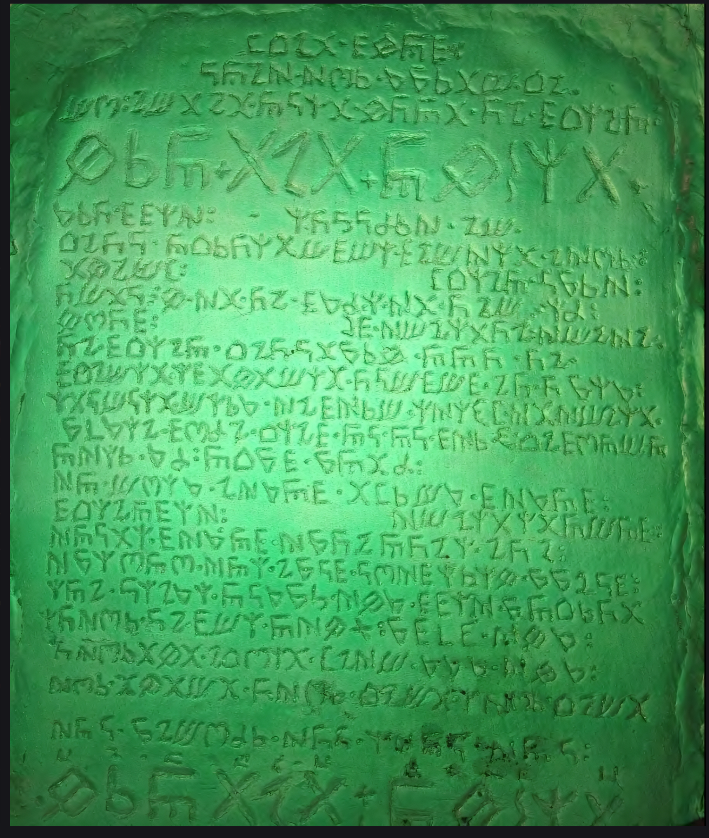
its always been cos insurance changing or losing it, changing drs , when in reality ADHD is for life, like again its the fact thy tablets open thy mind and made me wiser and like finding these truths, and no1 wants to see the truth or help , like what a sick joke tbh

its been thy only reason to love life and iv been discourged af tbh, like cos it makes things golden which is what alchemy be....... like their is no other way to express it and we did it right, like some bullshit I aint trust nobody since all this been tbh cos of that, like you aint know when someone try to bring you down here............pure evil and corrupt

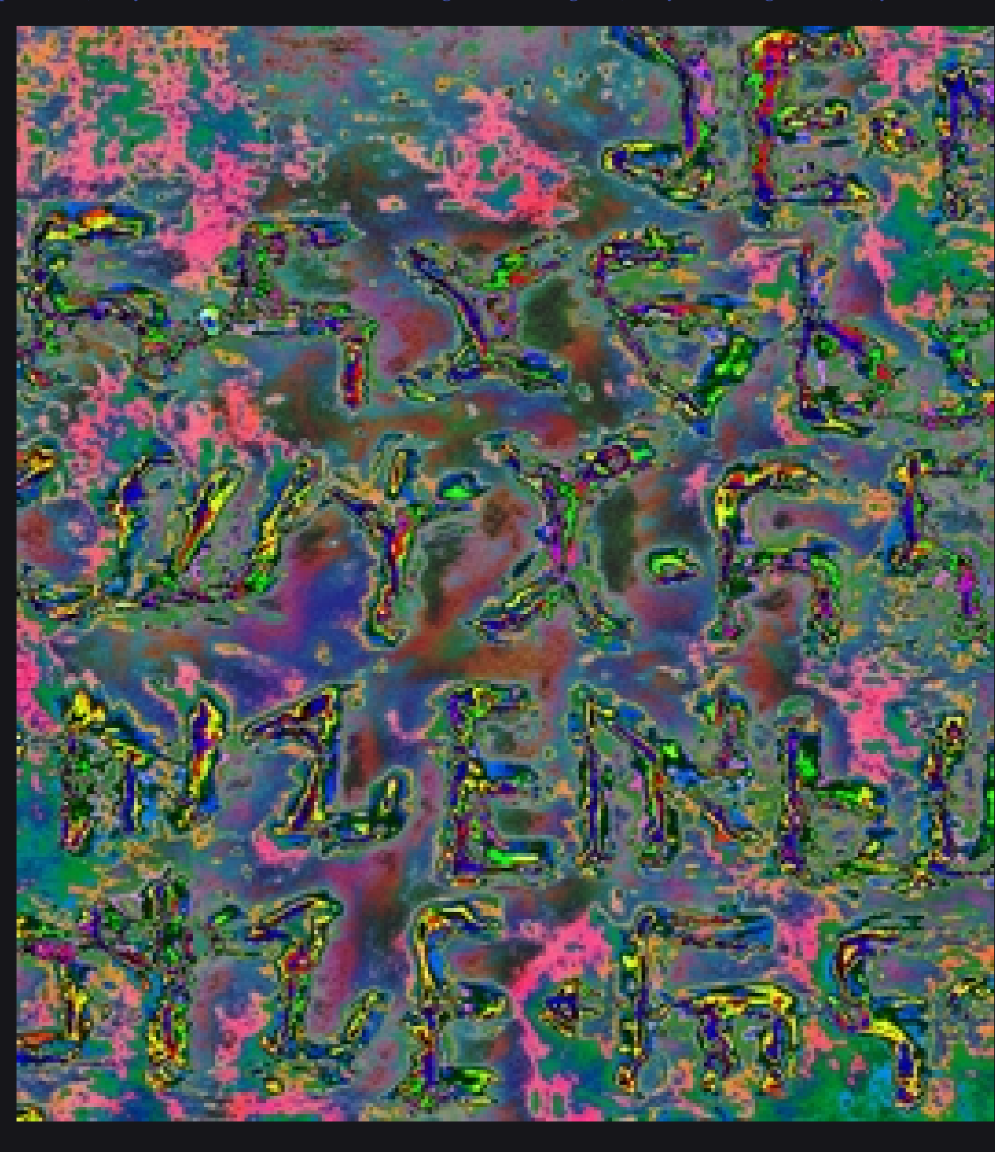
why I said wether you like it not, your gonna be forced to learn thy truth and how they tried to bring me down here, cos you will see at the end of thy day like something aint right here, like when it could all be...................... so w.e aint nothing I can do, the truth be the truth and why all this happened to me here.....

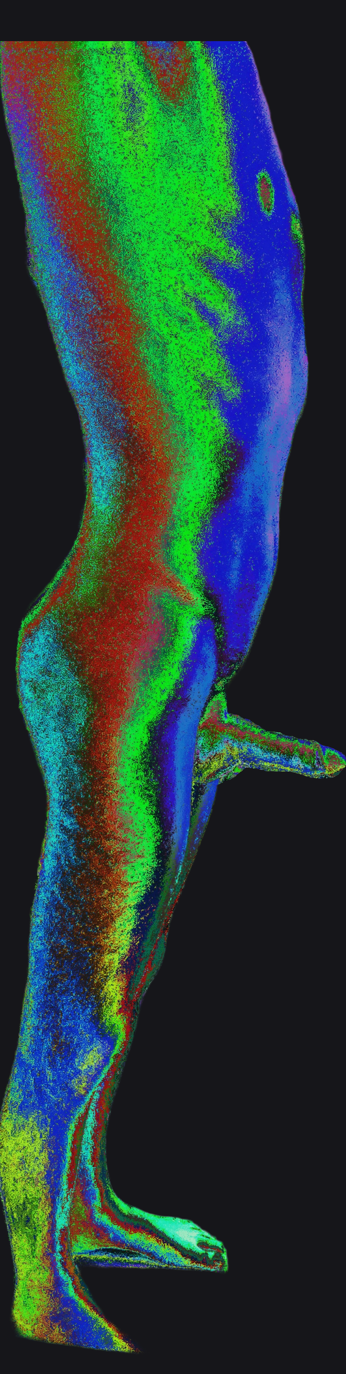
Thoth & The Great Dragon of Hermes





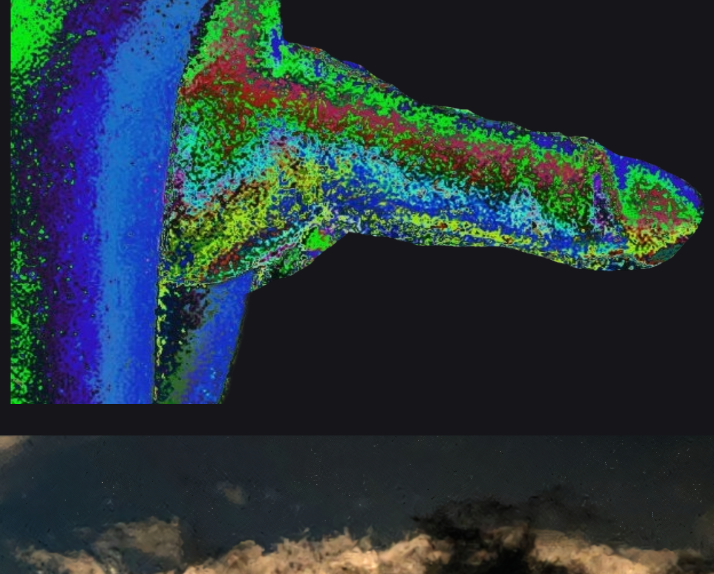
the thing is, it says it all, believe it or not..... like we found the answer........ has to be, actually makes sense, but yeah like w.e here you dont listen, when we got the wings here... again Earth mentioned 67 times in the tablets here, Think we are right though..... and right on alot of other shit but again you dont heed thy warning here.. the person who saw the entity sees like this, like thats how you know we aint bullshit when we write here, like you aint got no heart here .... but thy heart be lighter than the feather, which again you think like imma bad person , like only way to percieve it, like you aint wanna admit that we are right & for saving thee, like you think again no idea, you aint know what love be tho

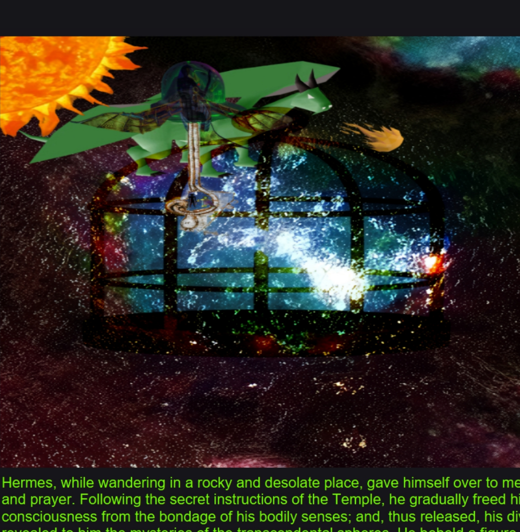




like what dont you get here...................... lol like really tho

their is no greater of a paradox than this being tho tbh like i dont get it , but I do?.....





Hermes, while wandering in a rocky and desolate place, gave himself over to meditation and prayer. Following the secret instructions of the Temple, he gradually freed his higher consciousness from the bondage of his bodily senses; and, thus released, his divine nature revealed to him the mysteries of the transcendental spheres. He beheld a figure, terrible and awe-inspiring. It was the Great Dragon, with wings stretching across the sky and light streaming in all directions from its body. (The Mysteries taught that the Universal Life was personified as a dragon.) The Great Dragon called Hermes by name, and asked him why he thus meditated upon the World Mystery. Terrified by the spectacle, Hermes prostrated himself before the Dragon, beseeching it to reveal its identity. The great

creature answered that it was Poimandres, the Mind of the Universe, the Creative Intelligence, and the Absolute Emperor of all. (Schure identifies Poimandres as the god Osiris.) Hermes then besought Poimandres to disclose the nature of the universe and the constitution of the gods. The Dragon acquiesced, bidding Trismegistus hold its image in his mind.

Immediately the form of Poimandres changed. Where it had stood there was a glorious and pulsating Radiance. This Light was the spiritual nature of the Great Dragon itself. Hermes was "raised" into the midst of this Divine Effulgence and the universe of material things faded from his consciousness. Presently a great darkness descended and, expanding, swallowed up the Light. Everything was troubled. About Hermes swirled a mysterious watery substance which gave forth a smokelike vapor. The air was filled with inarticulate moanings and sighings which seemed to come from the Light swallowed up in the darkness. His mind told Hermes that the Light was the form of the spiritual universe and that the swirling darkness which had engulfed it represented material substance.

Then out of the imprisoned Light a mysterious and Holy Word came forth and took its stand upon the smoking waters. This Word--the Voice of the Light--rose out of the darkness as a great pillar, and the fire and the air followed after it, but the earth and the water remained unmoved below. Thus the waters of Light were divided from the waters of darkness, and from the waters of Light were formed the worlds above and from the waters of darkness were formed the worlds below. The earth and the water next mingled, becoming inseparable, and the Spiritual Word which is called Reason moved upon their surface, causing endless turmoil.

Then again was heard the voice of Poimandres, but His form was not revealed: "I Thy God am the Light and the Mind which were before substance was divided from spirit and darkness from Light. And the Word which appeared as a pillar of flame out of the darkness is the Son of God, born of the mystery of the Mind. The name of that Word is Reason. Reason is the offspring of Thought and Reason shall divide the Light from the darkness and establish Truth in the midst of the waters. Understand, O Hermes, and meditate deeply upon the mystery. That which in you sees and hears is not of the earth, but is the Word of God incarnate. So it is said that Divine Light dwells in the midst of mortal darkness, and ignorance cannot divide them. The union of the Word and the Mind produces that mystery which is called Life. As the darkness without you is divided against itself, so the darkness within you is likewise divided. The Light and the fire which rise are the divine man, ascending in the path of the Word, and that which fails to ascend is the mortal man, which may not partake of immortality. Learn deeply of the Mind and its mystery, for therein lies the secret of immortality."

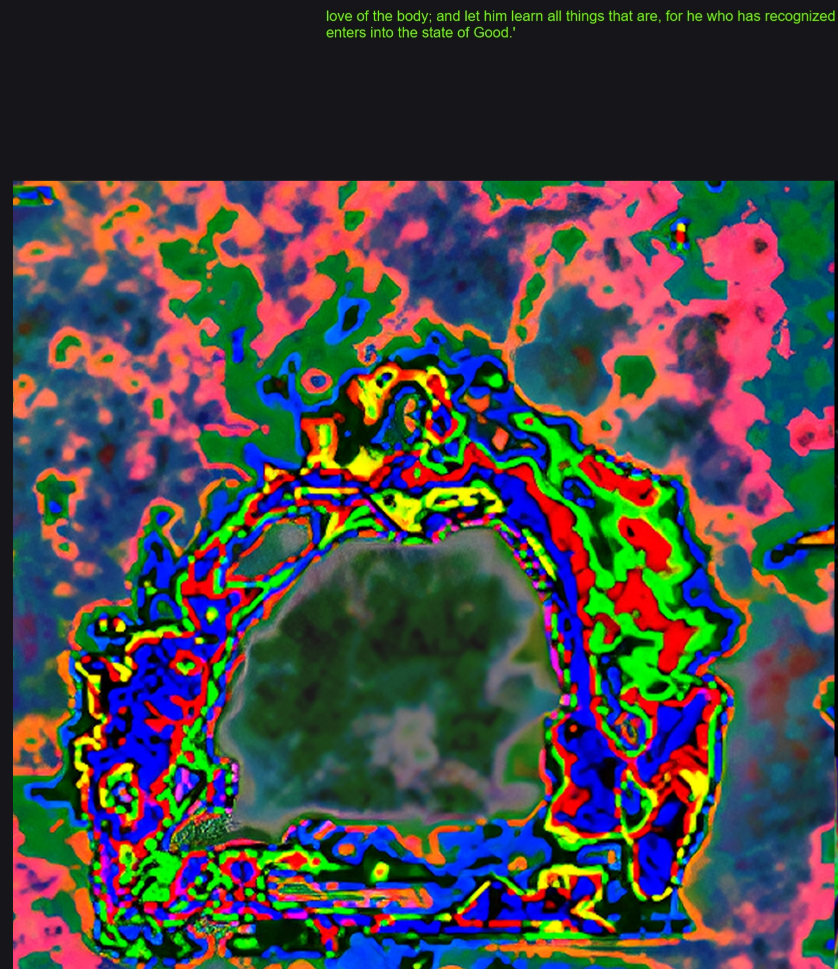
The Dragon again revealed its form to Hermes, and for a long time the two looked steadfastly one upon the other, eye to eye, so that Hermes trembled before the gaze of Poimandres. At the Word of the Dragon the heavens opened and the innumerable Light Powers were revealed, soaring through Cosmos on pinions of streaming fire. Hermes beheld the spirits of the stars, the celestials controlling the universe, and all those Powers which shine with the radiance of the One Fire--the glory of the Sovereign Mind. Hermes realized that the sight which he beheld was revealed to him only because Poimandres had spoken a Word. The Word was Reason, and by the Reason of the Word invisible things were made manifest. Divine Mind--the Dragon--continued its discourse:
"Before the visible universe was formed its mold was cast. This mold was called the Archetype, and this Archetype was in the Supreme Mind long before the process of creation began. Beholding the Archetypes, the Supreme Mind became enamored with Its own thought; so, taking the Word as a mighty hammer, It gouged out caverns in primordial space and cast the form of the spheres in the Archetypal mold, at the same time sowing in the newly fashioned bodies the seeds of living things. The darkness below, receiving the hammer of the Word, was fashioned into an orderly universe. The elements separated into strata and each brought forth living creatures. The Supreme Being--the Mind--male and female, brought forth the Word; and the Word, suspended between Light and darkness, was delivered of another Mind called the Workman, the Master-Builder, or the Maker of Things.

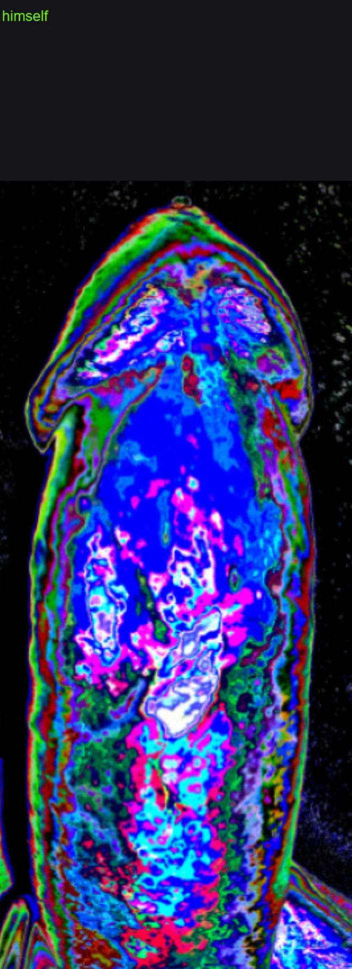
"In this manner it was accomplished, O Hermes: The Word moving like a breath through space called forth the Fire by the friction of its motion. Therefore, the Fire is called the Son of Striving. The Workman passed as a whirlwind through the universe, causing the substances to vibrate and glow with its friction, The Son of Striving thus formed Seven Governors, the Spirits of the Planets, whose orbits bounded the world; and the Seven Governors controlled the world by the mysterious power called Destiny given them by the Fiery Workman. When the Second Mind (The Workman) had organized Chaos, the Word of God rose straightway our of its prison of substance, leaving the elements without Reason, and joined Itself to the nature of the Fiery Workman. Then the Second Mind, together with the risen Word, established Itself in the midst of the universe and whirled the wheels of the Celestial Powers. This shall continue from an infinite beginning to an infinite end, for the beginning and the ending are in the same place and state.
"Then the downward-turned and unreasoning elements brought forth creatures without Reason. Substance could not bestow Reason, for Reason had ascended out of it. The air produced flying things and the waters such as swim. The earth conceived strange fourfooted and creeping beasts, dragons, composite demons, and grotesque monsters. Then the Father--the Supreme Mind--being Light and Life, fashioned a glorious Universal Man in Its own image, not an earthy man but a heavenly Man dwelling in the Light of God. The Supreme Mind loved the Man It had fashioned and delivered to Him the control of the creations and workmanships.
"The Man, desiring to labor, took up His abode in the sphere of generation and observed the works of His brother--the Second Mind--which sat upon the Ring of the Fire. And

having beheld the achievements of the Fiery Workman, He willed also to make things, and His Father gave permission. The Seven Governors, of whose powers He partook, rejoiced and each gave the Man a share of Its own nature.
"The Man longed to pierce the circumference of the circles and understand the mystery of Him who sat upon the Eternal Fire. Having already all power, He stooped down and peeped through the seven Harmonies and, breaking through the strength of the circles, made Himself manifest to Nature stretched out below. The Man, looking into the depths, smiled, for He beheld a shadow upon the earth and a likeness mirrored in the waters, which shadow and likeness were a reflection of Himself. The Man fell in love with His own shadow and desired to descend into it. Coincident with the desire, the Intelligent Thing united Itself with the unreasoning image or shape.
"Nature, beholding the descent, wrapped herself about the Man whom she loved, and the two were mingled. For this reason, earthy man is composite. Within him is the Sky Man, immortal and beautiful; without is Nature, mortal and destructible. Thus, suffering is the result of the Immortal Man's falling in love with His shadow and giving up Reality to dwell in the darkness of illusion; for, being immortal, man has the power of the Seven Governors--also the Life, the Light, and the Word-but being mortal, he is controlled by the Rings of the Governors--Fate or Destiny.
"Of the Immortal Man it should be said that He is hermaphrodite, or male and female, and eternally watchful. He neither slumbers nor sleeps, and is governed by a Father also both male and female, and ever watchful. Such is the mystery kept hidden to this day, for Nature, being mingled in marriage with the Sky Man, brought forth a wonder most wonderful--seven men, all bisexual, male and female, and upright of stature, each one exemplifying the natures of the Seven Governors. These O Hermes, are the seven races, species, and wheels.
"After this manner were the seven men generated. Earth was the female element and water the male element, and from the fire and the æther they received their spirits, and Nature produced bodies after the species and shapes of men. And man received the Life

and Light of the Great Dragon, and of the Life was made his Soul and of the Light his Mind. And so, all these composite creatures containing immortality, but partaking of mortality, continued in this state for the duration of a period. They reproduced themselves out of themselves, for each was male and female. But at the end of the period the knot of Destiny was untied by the will of God and the bond of all things was loosened.
"Then all living creatures, including man, which had been hermaphroditical, were separated, the males being set apart by themselves and the females likewise, according to the dictates of Reason.
"Then God spoke to the Holy Word within the soul of all things, saying: 'Increase in increasing and multiply in multitudes, all you, my creatures and workmanships. Let him that is endued with Mind know himself to be immortal and that the cause of death is the

love of the body; and let him learn all things that are, for he who has recognized himself enters into the state of Good.'





the thing is like no one coulda found this answer but it is also Universal like cos everything is light ..... but to find these paradoxes, again thrice greatest and you play me for a fool here legit tho no jokes....... weve posted this all when public a year ago or more here now....... it is thy answer tho like what you doing ..... if your eyes were spell binded like this........... like we found the answer..... fucking life has never sucked more..........

Emerald Tablet 14: *Becoming Thrice Greatest*

List ye, O Man, to the deep hidden wisdom,
lost to the world since the time of the *Dwellers*,
lost and forgotten by men of this age.

Know ye this Earth is but a portal,
guarded by powers unknown to man.

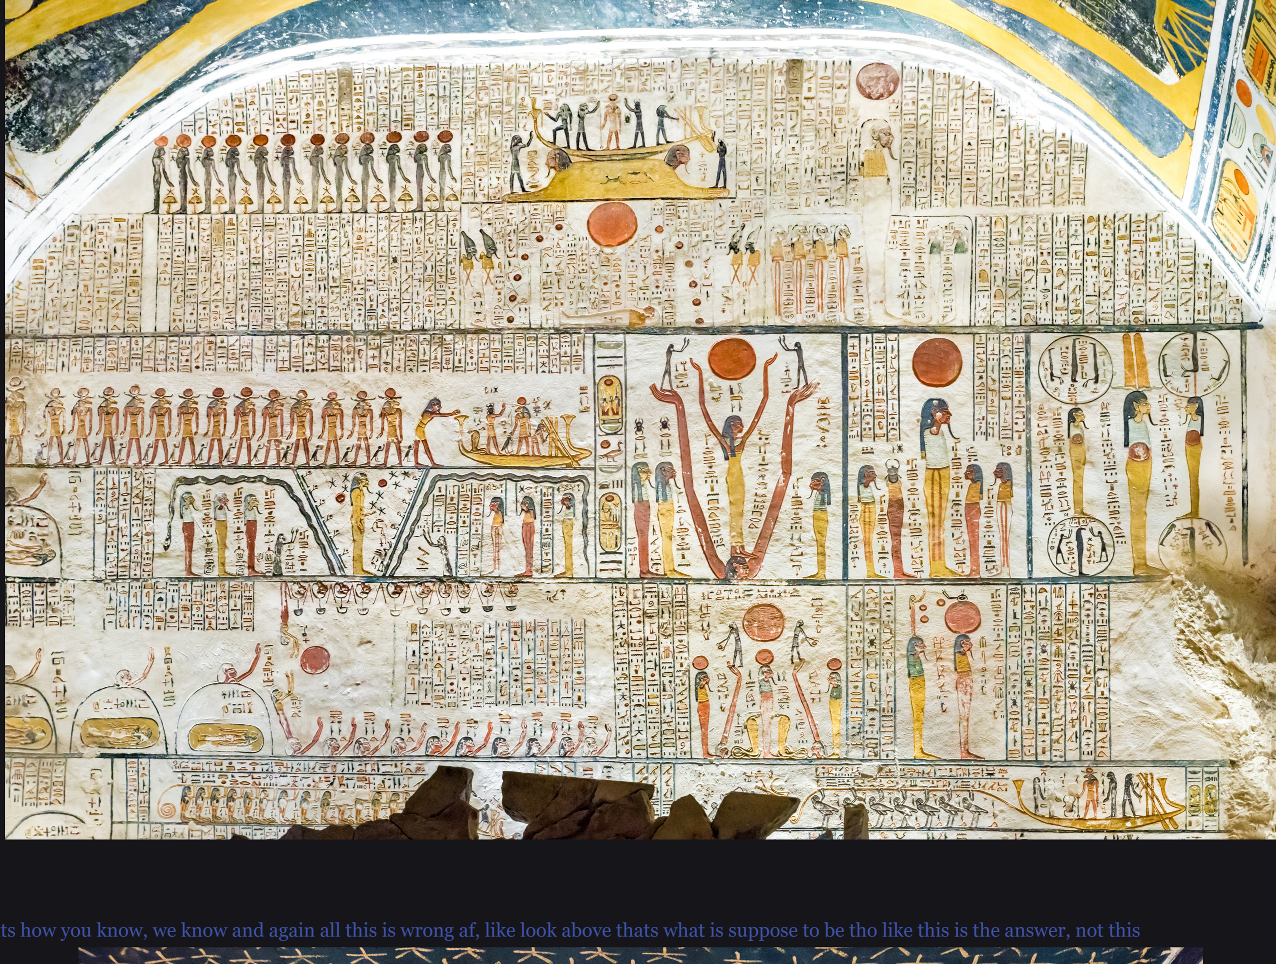
Yet, the *Dark Lords* hide the entrance
that leads to the *Heaven-born* land.
Know ye, the way to the sphere of *Arulu*
is guarded by barriers opened only to *Light-born* man.

Upon Earth, I am the holder of the keys
to the gates of the *Sacred Land*.
Command I, by the powers beyond me,
to leave the keys to the world of man.
Before I depart, I give ye the Secrets of how
ye may rise from the bondage of darkness,
cast off the fetters of flesh that have bound ye,
rise from the darkness into the *Light*.

Know ye, the soul must be cleansed of its darkness,
ere ye may enter the portals of Light.
Thus, I established among ye the *Mysteries*
so that the *Secrets* may always be found.

Aye, though man may fall into darkness,
always the *Light* will shine as a guide.
Hidden in darkness, veiled in symbols,
always the way to the portal will be found.
Man in the future will deny the mysteries
but always the way the seeker will find.

The sun....... like what dont you get here............. its not random tho lol........... cos who shaped and carved thy pores on thy skin, who placed the land and set boundaries to the sea..... thy creator.............

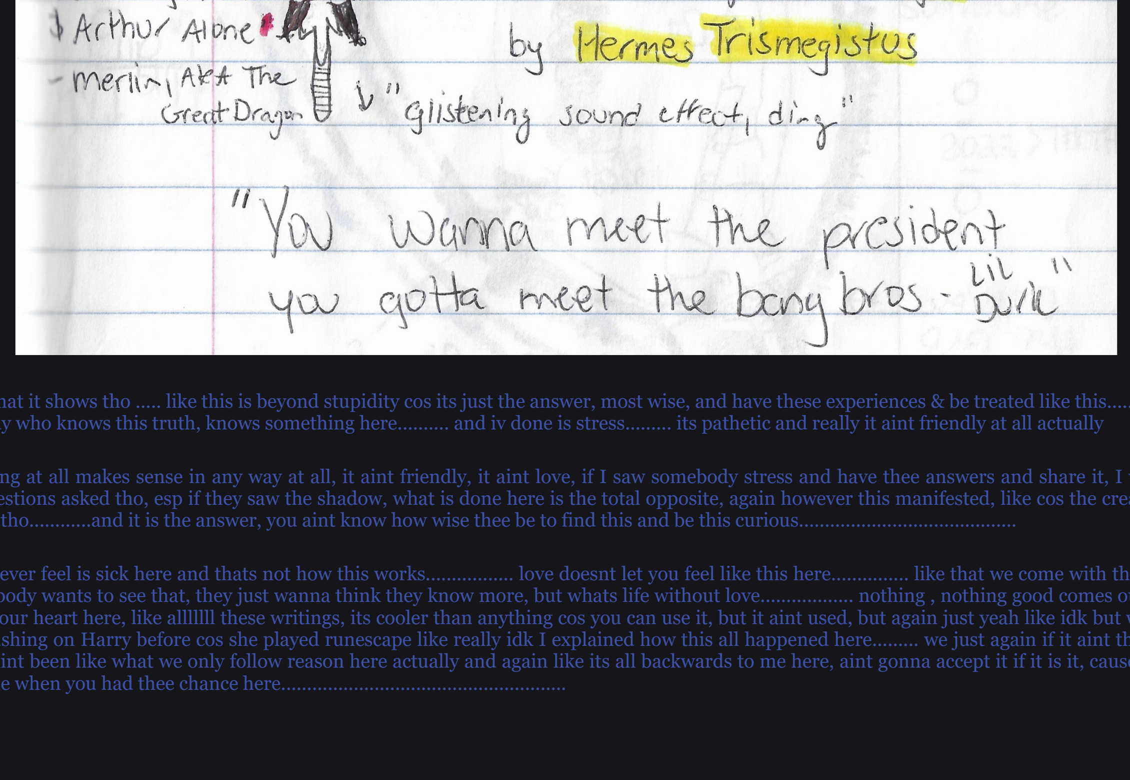


thats how you know, we know and again all this is wrong af, like look above thats what is suppose to be tho like this is the answer, not this

like thats just again why you are completly wrong about how the initation works, you cant pull it off , without offering nature .... the fire.............

like its as if why I Write, I gtg get ready for work and to put thy mask on at my job, but yeah like cos if you actually read the dairy, again like tabs say he who reads it alot, but that like write this book, bcos experience contradicts like and their can be nothing more real than to say what is..... like we are made of light and again it is it, the fact aint nothing happen and iv been put down like this, extremely wrong, aint my friend at all here..

I mean we got it all here tho like basically cos we save things, downloaded our archive multiple times, still got original images but all of it.... like it just is the truth...........



like js it is what it shows tho ..... like this is beyond stupidity cos its just the answer, most wise, and have these experiences & be treated like this......... like just cos somebody who knows this truth, knows something here.......... and iv done is stress......... its pathetic and really it aint friendly at all actually

like so nothing at all makes sense in any way at all, it aint friendly, it aint love, if I saw somebody stress and have thee answers and share it, I would help them, no questions asked tho, esp if they saw the shadow, what is done here is the total opposite, again however this manifested, like cos the creator always has a design tho............and it is the answer, you aint know how wise thee be to find this and be this curious..

like cos all I ever feel is sick here and thats not how this works................ love doesnt let you feel like this here.............. like that we come with the answer & reason & nobody wants to see that, they just wanna think they know more, but whats life without love................. nothing , nothing good comes out of it, but we followed our heart here, like allllll these writings, its cooler than anything cos you can use it, but it aint used, but again just yeah like idk but without me loving or crushing on Harry before cos she played runescape like really idk I explained how this all happened here......... we just again if it aint that its gotta be this & it aint been like what we only follow reason here actually and again like its all backwards to me here, aint gonna accept it if it is it, cause you didnt help someone when you had thee chance here..

this just be mad dangerous, you aint know how I feel, like just everything here... i dont know what to think again we stated what could be, it may not be, it may be partial to the truth, again idk like shit if you were just a friend, this wouldnt of all been, like I really dont know what to do here and like you take it as a joke, like mess with him some more, you aint a friend at all in any way here is the truth like think forgiveness is just handed out here cos you think were wrong, but your wrong here...... we always stood our ground here.................................... and yeah like whats wrong with right now, like again beyond anything it starts with being a friend here and it is what you aint, like this is thy creators curse and your shaming him and his creation here...... like you dont believe in the creator as much as we do....................... like he says look what happen or I did to this person, and you wanna pretend like oh its nothing, but the creator is all their is, like you couldnt recieve a greater blessing by the maker, and you shame thee.. like it will never work out until you realize thoth needs his medicine here, thats all we believe in tho like we dont have these statues on our desk cos its not what we believe in here.................................... so it is all wrong, just cos I speak my mind or write, like why dont you be a friend & chill like this is why its all wrong here....................... i dont fucking feel good in thy brain...................... and all I can do is be forced by thy heart to write thy reasons and im never heard..... theirs never oh thats reason enough, when it is, like I aint know what to do, your playing with the wrong fire here...... is what I will say....... like bcos of immortality, life is backwards to begin with, enjoy it while your here, but I try and nothing is..... the game of life is just the biggest illusion as if their aint something alive outside that generated all things and is immortal compared to this form here........... thats the only way we know how to think since being born tho like its why we dont care, only what is, can be.............. we put all that faith into it cos all we ever have is our thoughts here......................

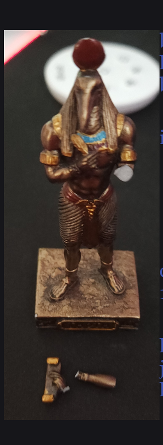
=(=(=(=(=(

939pm 8/16 - Apollo

not gonna lie here I never do but I just hate love, like when thats all we wanted from this, like my heart gets broke before their even is anything ahah like just I aint know how to express it...... just that even crushing on someone, like cos love feels good and I aint ever feel like this before, I mean yah with my exes but everytime I got hurt, so its like idk thats just in all honesty the truth of it all, like how can we go through something like I said tho & to be said to have made promises right, to live together, like thinking oh this is it, to it not being it, shit hurts more than you know..... like cause thats the problem with it all, is we got a heart here.................. like again such a great heart, we wouldnt just bang others just to do that, like cos its always been about love here to begin with and thats why thy experience is so different , like 5 is magic, I aint ever have a choice to what the matrix shows me, cos of this , like again idk like I just cant stop thinking about you know who here....... like cos it is the only thing that makes sense

but thy weird part again is just I dont know why this happened at my job, like either way I was messed with, like idk in a way like I dont wanna ever hurt nobodys hurt even tho we been, like I just dont know what to think cos again it is this paradox which made me open up here more about tho this, bcos that makes sense and this doesnt........ it could, but for the entity all that, like idk its playing with fire.......... cos you can get with anyone if you talk like in a way as if, but yeah idk like thats like if a girl starts hitting on a guy and getting him raging hard, like what can I do, but when you got a gf like you can focus on that instead, and its just it happen since the first 2 weeks but it did happen like idk what to think, like not many woman can do that to me is the thing..... cos I aint get turned on by just anyone here, and again I dont know

tbh we broke the curse again with thy own magic, like it just is the truth here, you aint know what loyalty be and how the mind works aha but yeah its weird this was like idk what to think.......... all the paradoxes coming off meds, thats a big one on the sex drive and like the wisdom says the supreme lord is just playing a game here..........

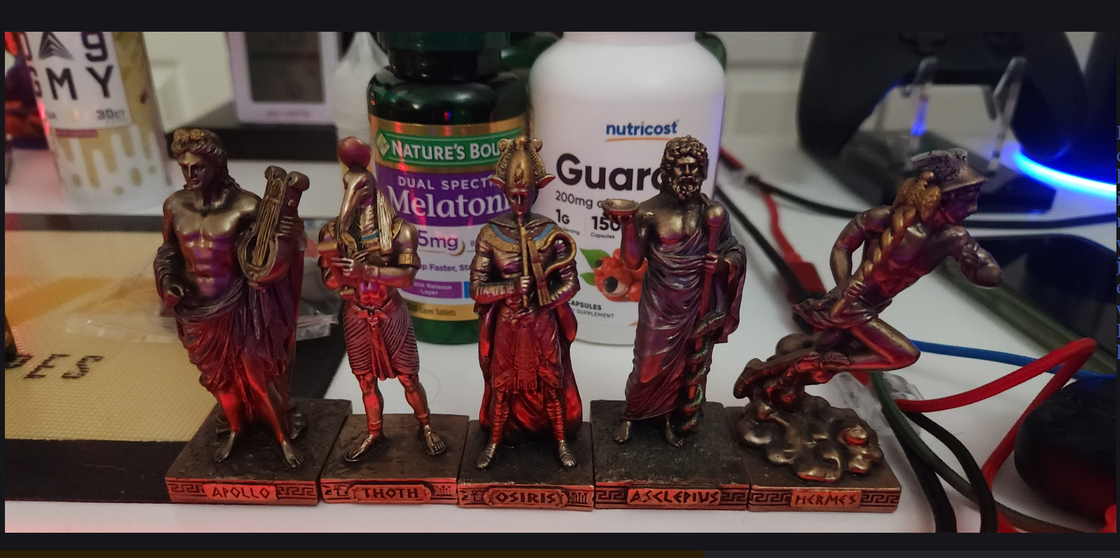


but so I came home here and look what I found thoths book finally ahhaha chances this happened here tho but yah idk if anyone is listening here like I think its possible again, well I kinda wish it was real like the voice in my head tells me that sometimes like that I am being listened too like that doing this is what makes it worth it, but if not its alot to read..... but it holds thy secrets ..... thy mind

it was in the corner of my bedroom but ya chances it broke like this too tbh ....

chances tho really the timing of it , the matrix be alive lol................ thoth could always find the truth..... we found the book finally it was 10ft away from where it dropped cos the glass lmao but yeah........

love having apollo now too the harp , ahahah but yeah like I want the dragon slayer dude bad, ahahah gonna be cool af, its not like again its just their always and its what we know about reality is the difference, like rly enchanting things lol I wouldnt be who I am without this style like miss just having a job I liked & living where I was & all that, cant stand the weather here, the job, like this is driving me insane.....



I cant wait to Siegfried comes in why thy dragon like a week until it comes in here but this our lineup rn ahaha it means the world to thee cos again just it is a form of alchemy, empowering statues, thats what they believed in Egypt the wisdom says , lol......

1. Apollo Did Not Invent the Lyre

Apollo is often credited for inventing the lyre, a musical instrument made out of strings and a tortoise shell, but it is actually the trickster Hermes who invented the instrument.

One day, Hermes had stolen several of Apollo's cattle. When Apollo discovered his cattle were missing, he went looking for them and found Hermes was the one who had taken them. Hermes was a fellow Olympian and was the Greek god of many things, including travel, trickery, and thievery.

Apollo demanded that Hermes return his cattle. Instead, Hermes began playing music on his lyre, and Apollo could not resist. As the Greek god of music, he was mesmerized by the music and asked Hermes for the instrument. Hermes agreed that he would let Apollo have the lyre if he could keep his cattle in return. Apollo agreed and was often seen depicted with the lyre or even credited with inventing the lyre ever since.

Powers and Domains

- **The Arts:** Leader of the Muses, patron of music, dance, and poetry.
- **Prophecy:** Master of oracles; his most famous shrine was the Oracle of Delphi.
- **Healing and Disease:** Brought medicine and healing, but could also send deadly plagues with his silver arrows.
- **Archery:** Wielded a powerful bow.
- **The Sun:** Later associated with the sun and light (overlapping with the Titan Helios). The History Press +6

Symbols and Sacred Animals

- **Objects:** Lyre (or kithara), silver bow and arrows, and the laurel branch.
- **Animals:** Wolf, raven, and dolphin.
- **Plant:** Laurel tree (originating from his pursuit of the nymph Daphne). Encyclopedia Britannica +4

Harp Give feedback

For other uses, see Harp (disambiguation).

Harmonium harps are located in the Ithell district of Prifddinas. Four harps surround the Ithell statue in the building located in the south-west corner of the district. Playing the harps requires a minimum Crafting level of 75 and yields 80 Crafting experience and 1 harmonic dust for each successful note. Higher Crafting levels increase the chance for successful notes. Similar to mining the Seren stone, this is largely a low-attention-required activity and requires few clicks to continue playing the harp.

A harp must be tuned periodically to continue producing dust. Tuning a harp requires level 75 Construction and grants 50 Construction experience for every 10% the harp is out of tune. The harp becomes progressively out of tune as the player plays it, causing less frequent successful notes at every 10% interval. After the harp becomes entirely out of tune, the player is forced to stop playing entirely. Clicking on the harp causes it to be 100% in tune again. There are chat indicators for every 10% the harp is out of tune. If the game chat is filtered, then the indicators will show at 20%, 50%, 80% and 100%. There are also visual and audio indicators of a harp being out of tune: a swirl of black particles and the harp beginning to sound out of tune, respectively.

At level 99 Crafting, a player can get about 700 harmonic dust and 56,000 Crafting experience an hour.

The artisan's outfit, constructor's outfits, Amulet of Offerings, and sculpting chisels can be worn to boost the XP gained from playing and tuning harps.

When the Voice of Seren is active in the Ithell district, harps are less likely to go out of tune, yielding an additional 20% Crafting experience per successful note and 20% additional Construction experience for tuning. Equipping an artificer's measure will provide the same effect as though the Ithell Voice of Seren were active. Having both effects is redundant and provides no additional benefit.

Success chance [edit | edit source]

The following success rates are provided by Jagex, unless otherwise specified.

The chance to get harmonic dust (and experience) depends on both your Crafting level and the out of tune-ness of the harp. The chance for the harp to go out of tune only rolls if you do not get harmonic dust: this is 40% normally, and 20% with Ithell Voice of Seren active or an artificer's measure worn (the Winter Weekend bonus halves whatever chance you currently have, so 20% normally and 10% with the Voice

Released Nov 10th the birthday here lol.......

yeah idk like we did or do buy moon pies at times, and tbh it just like thats what does it, reminds me of Ariana ahahahah like just cause, the moon ahahah pie, a circle, ahahahha like cos it all happened last yr =(it just sucks like to love someone when they dont feel the same back like and the only reason in all of reality to me is the entity, the soul, it legit has nothing to do with anything else, but thats all I wanted was a chance to make music here, like thats why we are here if you asked me, but again, wanna take it thy own way , not again be a puppet for someone else here cos we got our own ideas, idk doesnt have to be, but its why we believe it more..........

the fucked up part honest to me even tho this is a paradox, but its being their at a weird time like I said I would be their and aint shit back here so idk like all this that has manifested lately, has fucked with me, I aint know what to think, like that the reason this woman didnt hmu back up cos she seen it is something else, again not every woman just wants sex but a fulfilling relationship also like I dont know, but I didnt wanna keep talking about her if its not again like I dont like to say her name but it just is , and if the entity came like really here I dont know what else to believe in, but the fact I feel so unwell like it makes me sick here too , cos maybe if their was some love or relief we wouldnt be so worried...... like cos that is thy story here also

Red or Blue

We did this to our watch, cost 15$ for the red band, aint transparently red, but it still is kinda cool..... like we aint shit we cant afford a smart watch here...... lol =(but I like it , I would get a red one but again we broke af, =(

it stands for, we took both pills in the Matrix tho, but yeah its super just wrong nothing been and im mad uncomfortable thats just the truth if I could rip my bong, I can I smoke anyways but its just like I dont feel good at all like all this hard work, didnt pay off here, asshole, legit cheated on all this .... but yeah red is my fav color iv said it before tho.............

again honestly none of this makes sense at all to me here...

hahah man I miss runescape but yah its like cos I been listening to smashin pumpkins again it is weird that she did that in stranger things in season 5....... none of it makes sense to thy brain , like again idk cos the same shit happened like you think Id forget but who was real enough to say that like and tell you every reason why this happened to our energy, bcos thy bonus genius.... fact is aint shit happen in any other way , we are only in love with reason

cos I used to during like 2024/25 runescape halloween event thats what you did was smash pumpkins hahaha I love a few of their songs..... but yah it even goes back to again blazing with my friend dylan and that fort shit in stranger things it doesnt make sense to thee, but yeah like hed play the radio all night and I remember hearing it or even just on the radio on my own back in the day ahahha

like Disarm their most popular songs on their page, are fire, even tom kenny from spongebob is in tonight tonight, ahahah like yeah cos the lyrics be deep af, like what is a boy suppose to do, this is my image on my tabliss rn like that red & blue here, but the killer in me is the killer in you, ahahah thoth..... like just all the lyrics to music alot of them talk about shadows I aint get it, why would I suffer so much if this is thy truth, like shit honest to god tho like it says you dont care, even if you pretend you do care, you are scared of the truth and what magic really is, maybe I am right & cos experience, but it is the only truth on the planet......... like cant be afraid of death, esp when this happen, but nothing else has

what is a boy suppose to do here, ahahah disarm one of my fav tho like yeah I like a few, and thats the weird thing about music....... like just what happens if you dont hear a song, like then nothing is, it doesnt exist, but thats why we got a library like yah I could love this artist & song, but hate their other songs, bcos we judge books by thy cover like the tablet as you see..... idk nothing makes sense like you wanna hurt me here.......................... even if you try to show me signs, you dont wanna let me feel good.... is what it says, You dont care that they poisoned me, wow cos I said imma kill you, yeah we will like really by breaking ya heart if case be , lol like again I explained it all before here..... cos thats the wisdom says, Osiris must die before he begets children but chill the magic is before thy child if case be, its fucked like we aint have anyone ever or have that opportunity, plenty of ppl have had children by my age but we are still that child, we aint barely had sex, you miss the point here...... like cos weve been hurt im sure everything suffers, but again idk life is too weird and strange, like just that idk, we didnt come all this way tho to ever like change our minds here, we are in this to the end in my mind, like I have no choice either, like I said the truth gonna force you to see either way, idk just theirs so much to me here, you could generate bcos of the entity, the dragon, thats thy theme and what our music would be based around or album art, you could make a game tho, you could make a movie about it, nothing adds up....

I just aint know what to do in totality here........ again thats again cos you aint been a friend if true right, like the vibrations get so high when we think so, but the paradox be nothing here is true......... like cos thats what happens when you dont be thy friend, we have anxiety like again ahahah thats what love does & I hate it, its like again happened tho, like unless for sure someone does love thee how can you trust thee like ppl cheat all the time here its fucked..... but yah like to meditate and judge our pathway forward, is like denying the creator, when all we do is again the master of sacrifices like must be excused cos we shared wisdom..... like really its not anything else but bcos of thy experience, did we not fly, then we got wings also like Hermes................. just that I dont wanna pulled into some bs like cos we got our own story here which is more real........... like I miss like we took this route cos we took a risk and followed thy heart and nothing is free here is what is fucked, like if true, your assumption of me is total bullshit like that again all men are the same, wouldnt be if this is why and iv expressed it, just cos we can coil our energy like the glyphs show, dont hate the playa hate the game.................. like in all reality, and again all of it, like I just wanna enjoy life, and idc about anything else, and this aint that ...... I cant think, im super stressed, nobody knows what my mind has went through, we might of wrote a book, but I am pretty fucking sure here that if you add up I had around 37k tweets, used to delete them also, but we wrote so much, we posted pictures of our writings, I truly believe noone on this planet, has come closer to writing their thoughts out in this way like I do, cos like the paradox also be is we lived with someone & had a gf, like its not having that anymore but finding the other entity like where did thy entity go is the game. cos my 1st gf and 2nd like shit was so mixed like the dating between sibilings, like the dates, if that aint love, what is, you think im just like again I dont know what to think , I just told you back then in my mind online that yeah this is thy experience & the entity sent thee and you cant even be a friend, like love be so weird that it just is love or it aint, like theirs no in between here............... cos love is a magnetic force...... the poles gotta align or you repel, bcos of a hidden force or that your brought together, like honest, the thing is , I aint want nothing but to be comfy, why do I feel like I deserve it, cos the game has to do with love thats how your born and without that you are in inequllibirum, like what you know about blackholes smashing and making a bigger black hole here...... that what love be , cos just thats just it like You coulda been grateful that im existing here and im treated the opposite, see the opposite, when im the one she needs to me here ahahha and i aint just saying it..... like again you dont get thy love and thy sacrifice............. cos again if you did it would just been or be, like that if you cant read thy numbers & experience, like to bring me down, is what it feels like tho, like you coulda just been a friend and talked to thee entity, cos life be weird and like I said to me, its like youve been tested here, idk we tried, like cos it has to do regardless with the heart, like thoth wouldnt a built a pyramid if it wasnt for following his heart, like nothing matters unless their be love cos love changes matter... .but thats why again it is dangerous like shit anytime you mate with a human you grow a limb on your tree in your mind and it becomes a doorway or pathway and thats what we barely have but we have experience, paradoxes, for all ik thats why I feel like this, just all of it , weve spoken on it, or that again who knows, it feels like she coulda done that but the reality says elsewise, but its like we exist and your missing out, you not helping the one who had love here, like we aint need nothing from you, but to see thy story I guess and for you to realize the entity be right......

well thats what cooler than music, cos who can say they wrote out their life as much, would love to maybe use it for different things than just this but until something else is, like and we comfortable here, then this is what its about here thy thoughts, like that again the most wise didnt make music maybe but he wrote..... the writer, ppl even have ghost writers this or that but reality either works for you or it doesnt, it just feels very unfair to want medicine like Disarm says , what I choose is my choice, here like we want ADHD meds..... cos it fucking works, it is magic, fuck you in a way like cos its no way to treat somebody on this earth, again its why this happen in totality, I dont know what else to think, like but again its just that the truth is the truth.. like

their aint anyone that thinks as crazy as I do cos of thy experience and not having sex is a fact here, that is thy reason, again all this other BS like just nothing makes sense................................. like bcos you gotta be open to flower of life, complete paradox, but the truth to the game here.................... =(we just again cos of the entity, I cant accept what is less than what is here, you wanna make me feel down here like thats why you aint find love here..............

it is also the most perfect paradox for their to actually be, bcos of both sides of thy experience, believe it or not tho like we tried, and you didnt give me an opportunity, just to be a friend and chill sometimes its all someone needs, like if you cant get beyond how the game works, we aint think of anyone like this before here........... like really and for you to deny that is what hurts...... cause its perfect, you aint get it, all we done got here is fked over....... cos the truth, the light aint in everybody, like I said, you cant wake up the world, only you can perform it........... the whole world is inside out tho like every single last thing is an illusion, we just move in the game and again to think like this, it is mad like but choice do I have here... if nothing be free see the paradoxes get me everytime...... but yeah like if you actually did help thee then we would talk more about love but their is none of that here rn cos all I wanna do is be a friend to others like noone was to me & share thy truth, so ppl become more enlightened, and all you wanna do is what I percieve is bring me down for that, like thats just again alchemy be about opposites, but opposites isnt making someone suffer, opposites is that paradox that like how in a game you move somebody, we had this since a child cos of how we grow up like I just their is nothing more to it all than that, even if its impossible to think, that it is the answer, it is, cos we are programmed to not know or imagine what is beyond....... but again simple reverse psychology, its just believing in the creator is the only truth to be, cos if their is one and is their, then their is a design and plan always, like again even on blackholes, like it states, their is nothing you can do but be in the right now............ how the future influences the past..... well look at thy experience...... it makes sense but it doesnt, cos you aint help me when I got fucked over in every way like thats how it feels here and why im so mad, like I legit stayed to myself, was their for others, got cheated on here, like pft aint have a friend, cant trust ppl cos of what experience shown and it all like you aint get it at all here.......................... like that to make someone feel like they dont wanna be alive here, is whats wrong, like we dont know what to do here, our mind is stressed and we tried to go DR like cos its thy answer for ADHD, like how many times do I gotta say it, like nobody believes a dr can get it wrong or that they will poison you, like be real here, everything corrupts.......

Truman

hahaha IDK what the truth is but numbers but yah so when like I was again this proves my pt here regardless of what is, bcos how I told you or wrote in a way here how like this other girl at thy work was pretty cute but life has sucked, but again all we do is share our mind through algorithms, it is possible tho but experience is what makes anyone view anything differently..... but yah so in 2004scape like when the update came out a few months ago ahahha I said that in chat at the bank with a ton of ppl and its why I threw it into algorithm back then I just did again, but when hes like incase I dont see ya goodafternoon goodevening & goodnight, I cant belive I watched this in 8th grade english also english again where we met 1st gf in 7th like its weird how it parallels that also, but then yah like js facts regardless, like well this is the only reason also cos we read about ariana, we aint follow or nothing but its when I saw 515 and then that show, truman ahahha but yeah again just my pt is that like we aint talk about it or believe it but we worked with what we had, its super fucked like that she was popular in my store, again you think im dumb, money can do alot here, ofc ppl dont spill out here all their lifes, but yeah like chances their was a bag with her face in my store........ like really chances here, like you just want me to think something else here or that again like it shows that you actually dont care, when you think you do, like cos without me saying thy thoughts, you assume, what aint, or even me like what else do I think here, like see its totally fucked and not friendly, like cos I saw stuff everytime but never cared cos you dont care about thy and thats what I mean here as if you wanna push me down some more and thats why others get fucked over more here, cos love aint like that here, rather again kill somebody with the truth here than lie is my point, like we got 1 life here imma tell it how it is.............. and not waste time, like what , but yeah just so idk what you think, like just that I never wanted or would be like you cos im me here.............................. like we dont need you, cos you aint wanna be a friend and chill and rip the bong or shroom, like you scared of the truth of shamanism, and what we know, like you aint done it with the ancient thoth here is my pt, a friend can make the world a difference also like but yeah just our heart here has taken too much here................... iv been more than real with all things, like thats why I dont know what to think cos of thy experience like all ik is like we aint change ever is also a fact, its always been this way tho.................... like cos when you are in alignment, you are in alignment, and none of this feels like it at all, even if it does, cos all it shows you dont care, you think oh hed forgive me, like nah thats why your wrong, like cos only now exists, to make something longer when you dont know where life will pull you, if you body stops working randomly, like just a wise one knows its just a game, the child of light.............. and this is again, like it doesnt make sense, never gonna sell my soul here is the difference, only to the creator..... again just bots running scripts of life for the creator, like all this mind was achieved 15-20 yrs ago, believe that or not, like its how we got here in totality, by viewing reality like this and we just talk about it cos we can theirs nothing else to do all i do is suffer at this job, living here, miserable, when how easy it is to pack a bowl of weed, pass the bong, do some shrooms, eat some edibles, like we dont drink it is against thy mind and thats why again you dont know what these meds to cos its all also based on experience in life like ofc blocking someone dopamine aint gonna do good , like but the truth always prevails and it made us sicker on it.................. but yah if nothing else is, idk what to do, cant even trust drs now cos of this tbh tho like theyll try to tell you shrooms arnt the answer when it is, or that weed is bad and causes shit, fucking lies, corrupt ass world we live in tho truth is that and just this is ridiculous...........

11:10 pm

the fucked up part in all of this cos you prob think idk whats going on here tbh tho I dont, like but you think like nah he would never think that, or he can never know anyways even if true, but yeah like nah that we expressed it all awhile ago and went private.......... like we were private on X here for atleast half a year here....... we coulda again even got targeted as a bot cos of how often we deactivate and activated, but thats a parallel to like the tablets descending and returning ahhaha like in a way... =(

but yeah like that weve been writing for awhile private anyways is again youd think oh cos he aint on X like hed stop writing, well I cant stop expressing myself bcos that is thy truth the entity says, the shrooms, and its just what good is, all of it, like in History, it is thy answer....... the only one tho...... like really tho like their is nothing more potent than shrooms, naturally, like its all you need to build thy pyramid.... and how can again see it doesnt all add up but it does...........

but yeah like idk we could share this on archive but tbh prob never will that was a 1 time thing like all this is mad writing who wanna read it all , but you can is the truth lol..... yah like idk the voice tells me like I can read it so continue sometimes hahahahha like idk like just i dont know.............. but nothing sucks more and hurts more than this, like legit we aint want your love, but mother natures....... then maybe but yeah like a friend, and as I said love just is or it aint but thats why we try to again keep our distance, like shit has went down weirdly for me before....... thats why we do lay low here sometimes.... weve seen it all......... alot like really even just again ahaha the fked up shit of life on internet, like to me, why wouldnt they crack down on that shit here in a way, like idk life is so weird...........not porn but gore but porn again even in florida they banned it, like all we use is reddit at times which I said id never do ahahah like yeah =(like to see a war online, shits fucked, the parameters of the game here, if you analyze my brain itd be the same as someone in the trenches lol....... esp even like weve been shot before here assshole like we took care of that ourselfs here like a boss again the martian all of that like life has never sucked more here............

like that IDK I dont read shit about it is the thing IDC, I know its possible to remote view thy screen, could even be set up like this on the platform....... but yah use google remote I think right like shit we used our pc from it beefore, you see both monitors, I used to use at my job but even before that it just is possible like we always known about pcs, we dont care enough if something can be done cos our life be something else not that...........

aha like why wouldnt you do this in a way...... but yeah it just it is possible.............. I dont care Like I dont worry and search thy pc , either way, it could be just again like something you cant even find cos it just is....... anyone , not all hackers be bad in a way...... but its just that yeah idk its super possible in this day of age.......... but I just know also life works in weird ways again as if writing and again just like if not true, it is still true how thy thoughts work and manifest into the world & this simulation, like that is why we do it and nothing I do is respected here............ like cos just we know too much, its all in our thoughts, but to think like oh no that aint possible above like thats dumb af, it surely can be, but who cares reality is, lol, like we are just we question shit is the difference but thats what wise ppl do , but you can be wise in a corrupt world these days, just wish it was back in the day in a way like shit life is hectic af in a way for thy brain, and again just its the answer to me, to have in thy inventory here is adhd meds, shit be magic, like dont need other things, its stupid af, we aint even abuse it like its so dumb, cos again fight or flight we could write also and thats fked, we began with what we know, judging a page of a book isnt reading the story here...........

its not fair cos all we got is thoughts................ and this is what mine are, like what would you do but try to express it, again IDK what is, what if it just was for thee and this happen to me like idk what to think, its all too much of a paradox to me here........... like that again just idk ahahahah =(seriously tho my mind thinks of her alot and it aint fair, like it aint like this to everyone, im saying the Ariana paradox tho.... but this shit just happened at my job and idk what to think again like cos......... again just what we wrote proves our pt...... thoth lord of wisdom hold him, like that is how the game works, believe it or not , so idk like cos its the paradox coming off the meds here and this happen but again wtf dont know what to think cos it stopped but we still gotta work together and the fact I wrote someone a note here, shit but again its happpen before too like I dont talk about anything about this at my job but it is online is thy paradox, its super hard to find now without it being in my X handle.... cos you could find it their, Iv had it on YT but yeah idk.... like we done everything we could here and aint shit been or changed, just the same fucking thoughts but I did crush on Harry for awhile and again fk shit im pissed ahahah like really I am, idk how else do you expect life to work here................. but yeah I dont even legit like something else needs to be here like idk like you can view what happen either way but what choice do I have, maybe she stopped like but maybe she learned wisdom, and thats we do tho and idk , lol , like im not crazy she doesnt do that and then come to your aisle, or that she went on break and bam like chill seriously thats what happen.. like again who knows coulda been a joke but its all of it posting the wisdom on my YT the glyph of the woman doing that, cos shit does happen like wtf we know too much, cos we got magic stilll but thats all we got and life sucks, it aint what I wanna do or anything like on everything im so stressed why would I wanna be here... is what you should be asking yourself here..... when we come with reason here too honest..................... =(

it just again to thee the greatest paradox their could be, like idk I did or do view it as that also like cos of what happen and sharing like knowing it is the truth but again who also woulda thought like id think of this, if anything else was true, but again like yeah idk like what would you do or believe in here.........

like cos all of it, thy experience, you couldnt find someone better in that idea, or had the experiences.......... lol really tho ? .... idk what to think honest why did I have to read it bout her we aint ever do that either is why my pt............. ahahah like all of it super fucked........ like but all we do is write is the paradox I guess lol like nothing has ever changed................. cos we dont change anything and again them pathways tho , thats why you gotta find the one and let it be tho legit like and again that is how the game is played, ppl dont give a fk, like cant trust nobody lol like just pft idk, like just the fact like we tried like I dont know what else to believe in ahahah , like cos even if this could be say but its like it aint why we are here....... like for all I know again just cos of how I wrote it, like she could of understood whats going on here cos idk something is ya dick weed , like legit you aint know a good time here if you ate the flower of life.................. like I said you aint eat with this entity here ahaha................. but yeah like having anybody their even growing up right, like it makes a difference and this sucks ass

like again just the thoughts like she knew back then somehow like idk it is possible like it could still be thy answer, and why this happen but to believe that would mean iv been lied too but that is possible like just idk ahahah im mad deceptive myself in a way like the trickster is what thoth me, the dual headed creator ahahahh =(

but at same time like yeah idk like its the idea that like inception, you have to decide for yourself type thing & she had to wait till I realized it & now im being played back idk but weve tried everything here like not gonna bother someone if it aint, but even to like idk who denies a fun time like just idk the entity says hes just as powerful and anything can be if the creator gives you the thoughts, to again accept it aint is w.e but it doesnt make sense....... even if it never was and then came to be but its all cos weve stayed single here , we coulda got with others, but we know the cost of fuel here aha like ....

its cos we have the experience and wisdom, why wouldnt I trust my thoughts, but to go insane online we def open up more on the word pad here....... like just yeah idk like I said we can accept what aint, but it doesnt make sense to me, lol...... like cos it just tells me that its the reason this all happened, and again wtf does it show in book of dead....... like a reason just idk ppl know love be powerful and all their is , but its wrong to let something suffer here, like you think the opposite, oh he will forget, but forgetfulness is evilness and all things corrupt ahahah ..... but not again if you stay to yourself....... =(

so yeah idk what to do about it all. the fact my eyes saw this on algorithms when I dont follow here........ idk .... we coulda changed the energy of the world by inputting our data into algorithms and music changes the mood, it does happen tho at times ahahah for sure, but everyone again views reality different I guess we just know good songs from diff artists, but not every song, like we aint give some a chance cos just it cant always be everything it never will be everything........ energy is precise.......

=(really tho im sad af, cos the fact these are thy thoughts and nothing is...... like idk what else to believe in here, coulda been , couldnt not been seen, like I have no idea mad random shit happens here tho ahahah like what........ so yeah I can never know until it is, but this is like again nobody truly cares here cos thats what we want and what would help us rn like just idk I wasnt made for this, we already made it, and got screwed, when we come back & hit em with this spell or wisdom, the thing is I am right bcos they tried to tell me I was wrong here.........and thats who I am...........what I do................ we know too much, cos as in, language really is a dual edged sword , but yah just again the highest paradox is that, nothing is free here, and these are my thoughts, and again I aint been infactuated before but its thy experience.... and the only way this dream can truly manifest.................... so thats why , the entity knows more............ lol like why wouldnt you talk to someone with this experience......... esp when it is in egypt...... like shit nefertiti would know whats up here.......... lol.......... and she would pass the goods, to invoke heaven on earth ahahah but again it can be about this, but life can be different at same time, like again to not have children in this world be weird, like but if we had money and a better job like shit , but the world is fked out their ahaha like we aint wanna be mad old and be a father like shit that is the fked up part like cos that is what made life what it is here............ but yeah we aint too crazy but again just like who doesnt wanna reproduce with the one they love in a way ahahah =(lol, like that shit be legit like the most fked up part of it all ahahaha like how life be...... and yah idk what else to believe in tho, like shit but only life was settled out here really, like without that I aint even happy how would that be and again just yeah idk, we work off potentionals here......... lol........ but yeah like just yeah idk......... like its just to me like as if others cant understand just how things actually work here I guess...... just if this wasnt our experience and we had to cashout 100k like shit we wouldnt have any charged matter, but it all says like just really, the goal is to get out of thy slavery as it says the truth wants to be set free, we been their, done that, worked hard, overtime, got a condo here like we did it all on our own and got totally screwed over........ like we had no choice but to take this path and yeah like just idk what did you want me to think like esp taking meds that hack the matrix............ like just idk I aint feel good in years here...... like all of this, bcos we were truthful is what hurts the most............ we aint even like do anything bad, ppl lie, like the whole system is corrupt af , bcos in egypt it shows how the simulation actually works....... like that the mind is given cos of thy heart tho like all of it, to words and shit like reality is fucked to me esp without adhd meds, I aint fit in anywhere im not like the rest ahahahah but that can be a good thing, like we just always think and test the creator also back right like idk, but weve done it and aint got nowhere like i aint know what to do anymore like I have no vision of any future here, and the paradox is like what who gives you thy answer, and is honest with it here , like quit the BS and be a friend.......

the fucked up part is nobody can believe for you here, like others dont want you to win the game, the bad npcs of the game here........ like that again it is what the wisdom speaks of tho, the book of gates, like that again reality is like that, everything is bipolar, facing people with masks in the game............ but yeah like just again idk these are thy thoughts and this and to continue suffering if it is or it aint is whats fked, cos the mind is half of it, ...
like so yeah idk like if you aint believe in your dream nobody else can for you.......... it is the only truth their is tho........ if you dont imagine you can have thee thoughts, like thats all it is.......... but yeah idk like just cos not locking something in is just not commitment and it aint love like its just gotta be when it is...... like we got so much love it just is when it is, like the wisdom says about shiva, like that is what happens, it has happened, like but its why again just idk life be weird right, like but the pt is to find the other in a way of your out of balance without that in life, it is fked like weve been with someone or 2 ppl and it changes all things...... =(

we wouldnt be here if it was different ahahhaha like really, it could of been, easily, but this is how we play by killing thy own ego and its all we can do like in a way, using nature and pleasuring yourself is just that tho....... like I said its like a test here, not many pass that test like of how I feel when Im done, ahahahah like was it just a feeling or the real deal here ahahah............ seriously tho, but yeah idk just everything is a paradox if its already been written in script and code........ =(this is the worst paradox to be in tbh like its just again seen it all like just dumb shit online , ppl gone to jail & been out quicker than my life has changed here, like those vids of mr beast like 100 days outside the world, like this shit has gone on forever and aint nothing change like when this story is mad cool about like again never had someone show me here like yooo this happened to me like I have shown and that is truly fucked like a total paradox cos it is real................. like so why aint nothing else been im pissed legit always stressed no joke

hahahah it does say that in the tablets, place thee in thy mind and the vibration will awaken a answer ahahahhahahhh that is how............... lmao.......

really we just wanna be comfortable in life that is all we want, wanted our own place was mad cool, but to have a job you enjoy and enough income, like all of this is the biggest joke to me here, like im not suppose to believe anything else can be, dumb af all this like the most dumb shit it aint even worth being here is how it feels like really, nothing at all feels good, aint no dopamine, all we do is stress here, like just cos it would help, help me in my life rn, like you aint get it, the other med has never helped thee be succesful is the fucked up part I tried to warn ppl like what can I do, atleast to experience both pills again experience, all we got is thoughts tho .... and yeah like iv hated my life just so much more since this happening at my 2nd job cos of doing service tho honest cos of how I am with others in a way like just cos of whats happened in totality but yeah like since moving to florida........... like legit, and just how long can I can go on here to keep this in my thoughts for nothing to ever be, one day we gonna have to move on but it doesnt make sense like cos it does make sense to me and but it doesnt like the fked up part their is more reason than like again harry cos of the numbers, diff reasoning here...... but its also like again we put her in my mind alot more than ariana, ... bcos I had nothing to believe in before, and my thoughts said again either way this shit be again the most perfect paradoxs to me here, but all I am is stuck in slavery here like honest, living here, has been a fking joke I hate all things about it, like shit be always summer like I said, we liked the seasons and all that, we liked our job, all iv been is misunderstood or played here like when really you playing your own self, like just we play the only way we can here...... =(

cos its way more believable it is one more than the other..... like this be different in totality, but its knowing enough and how I be here ahahah like so yeah like the fact is mind is stuck on this, others tell me not to , I cant help it , love is love like............. and just its that we are like the turtle and guard ourselves here with a shell, of again like dont be fking with me here.......... lol.... =(

like and its that idk we working off of that tho like it has nothing to do with anything else but the entity tbh....... cos its in the records to thy mind, like why would you get with someone who doesnt make you want them or be desired right like so idk , weve witnessed magic before here though..... like we know when it is and this aint lol =(like cos to obsess over someone is a good way to get hurt, but it is possible to be..... love is more powerful cos its again just the good always wins tho......................

and that tbh I aint like creep on her really, like just saying this thy story and the entity came to save thee and im ignored ahahhaha like really tho believe that shit or not....... like love kills me anyways like weve said it before tho like even a man, comes from a woman, aha like its fucked all of reality, cos its that agwanti energy which rules the hidden world.................................... and again to have it be like this, experience with 1 person like it is different than not at all just like how eating shrooms is different than not at all or the adhd tablets.................. like theirs been too many paradoxes in totality here to me like I dont know what to do....................... like it can be easily but yeah idk like what else to think or write im getting tired here..... but its just yeah knowing love again like nothing else matters but the soul.......... like and its that the soul always is....... like........ like that if the person has the right entity inside of them, thats all their is to life .... is the fked up parallel truth to it all, like this shit this game is too advanced , lol.... an ancient game ..... ancient thoth lol........ like just yeah idk tho like just the only way anything can be tho is to have that thought & having the wisdom is just its all the biggest curse, it feels more than fked to not be like hear me out here aha... =(

the fucked up part is again this can go on forever, but it could also go on if enjoyed or not maybe again we could write about diff things but it could go on , just being with somebody using that fire.......... like so idk that is how it works tho and why we acquired enough energy to write cos of this experience..... so yeah idk we got ideas, and cool art can be, lol, like idk the world is weird af, but yeah like well again paradoxes, if I lived up north we could game alot more often here... and I wouldnt be here writing, but also I cant focus on a game when love is in thy air at times, esp without meds, like shit we just wanna find that shit like is like what makes life worth it cos it aint worth it rn aha its so fucked.......... like that yeah if you dont play fair we can go to extremes to protect thy energy here........... but that is again what everybody cant do but again life is again just making a way here like and yah im super stressed always...............

12:48am

its so fucked cos consciously or not this always happens to me when I think of her, like right now bam 12:48 and yah it has been the eye brow thing since not as much recently cos I gave up in thy mind but it has always been their since this which again doesnt make sense like cos that is signs and idk .... like how can I keep going on about something that aint that makes me look dumb but its the way this manifested...... lmao.....like idk but nah I swear and promise last night like again aint feeling well but I swear like half asleep wasnt thinking of her in that way at that second but I swear like I heard my ringtone which wakes thee up and bam it was like 10:48 or w.e like wtf........ but when we think of her more like it happens more and it aint fair cos nothing ever is like I said this curse be real here , if I didnt read that 1 article with everything, like think it was the tattoos right like the glyphs here ahahah and yah like its so fucked cos it would say alot again if its on your skin, what is who you are, ahahahah like again wings in the ear, thats mad cool, but we would get some ahahah like we aint do shit in life in a way cos of like just idk I saw my ex get one like in salem the witch town of MA tho ahahah I worked their too like at a police station and all of it i seen alot and life sucks, like it is beyond fucking insanity

but yeah we have had DARK on netflix on our PC for like past 25 mins cos music driving me insane tbh, had to switch up the flow I guess, but just the memories of back then watching shit like I felt great about life and then nothing ever was like its legit utter dissapointment like life is suppose to feel good....... but yeah like all of it, it is one of the best shows on this paradox also cos like just it is and I aint know what to think, to having thy book on blackholes like hmm just dont get it tbh .... lol................ a show can be way better when you aint see it yet, like the 1st time shit was hooked aha cos we just played runescape and watched shit like im so miserable its beyond like wtf adhd paralysis all of it, nobody hears me out here...................just like yeah idk its that this happen in my life and i aint know what to do or think or w.e like =(

but im going to bed real soon here and yah we aint had the tv again on in my bedroom for like 2 months here tbh, like last yr just I am stressed and need time with thy thoughts but lately I aint know what to think of here

like that we dont have to play like this but what choice do I have, nothing at all is interesting in thy life, cause we cant concentrate..... like dont feel good about anything being what was before here........... and yeah just idk........... its perfect show about time travel and the entity like ulrich in the mental place, ahahahah like but yeah the entity be from the future , like it is how much we believe and aint shit ever here

its different when we are right here tho like again just always feel like life is a test and it is tho and thats the fked up part we play right here and aint shit change likeeee damn

like just as in how can we be right about it all, the hermes waking up from sleep becoming mindful, nobody knows the plasma it is in the entity, like all of it thoth could always find truth, the eye, allll of it , the holographic light bits containing the dragon which hermes says again we layed that out last yr here, to thy design on the body cos of the light, like to find this all, know it all and see it, without someone directly showing me like hey look at this, like how can we be right about allllll this and then not her...... is also thy paradox......... I have no choice but to think it is, cos then it just makes everything make sense, but all this aint like its too great or grande of a truth here............... ahahahahahhah like you aint get how happy we be and thats why im mad like im taken for here that we just want to take advantage but thats not why the entity manifested or thy thoughts say that, like idk never been obsessed over someone either way like this before, bbcos just idk what is love if the man dont love his woman he is with like ahahah like theirs too many paradoxes............. cos aint nobody more than the entity here.............. like just idk........ but we do and nothing like why would you let thy love be destroyed here when again idk it just tells me its been thy reason and all of it and yeah like I cant stand my life rn im going to bed here..................

930am - 8/17

the morning comes way too fast..... aint ever feeling good about anything tbh..... like in all of reality here, no jokes, the ADHD meds were crucial here to helping us navigate the Matrix here........ I legit I aint know what to do in all honesty cos I dont feel good, like we tried going to the DR again what a shame it is here, to ask for something that would help and to be denied that, told oh you need this, which would never help me here honest its a disgrace.... cos now I dont know what to do again, like the thing here is, we aint even like just keep trying, we try when we have could, and just it is wrong tho, thats why medicine exists, just cause something works for me & we have wisdom, like its beyond dumb, cos all your doing here is hurting another human soul says thoth here like when you do get weighed, he will remember here how you treated me in all of reality, bcos that is how the game works..................

and yeah like we get up, lay down, get up, lay down, like I dont fucking feel good , how else do I express this like just all thy wisdom speaks on it.... nobody cares, nobody listens, but as I said this curse here, like you dont wanna help with shrooms, or smoke some weed, like you are the least of a friend, to somebody who is in need here, all of it in totality being, like its completly wrong & not how the initiation is performed..........

that you think again like its always been the opposite here, as we use things for reasons, to what helps us, we dont just ever just do something all day & do nothing, we have used nature and use thy stream, write, or play a game here, like their is nothing else to do here........ cos life is about finding that other person here and being with them basically, like w.e the situation may be, that is what life comes down too and how you got generated in this world......... like I aint do nothing fun in fucking years............. the least of a friend tho on everything here................... cos we know how to have fun , like you do not.......

that like we always put before responbilities 1st, we were responsible, all this is some BS honest, to someone who needs nature, cos their mind, its their food or medicine here, starving me from that, is only starving yourself from the truth, wouldnt just hurt me but hurt us, like how you expect me to ever feel better and be able to prosper in life here cause its just what I believe in that you use the fire from thy experiences with nature....... that is how things can come to thee from thy thoughts

like if you had any wisdom at all, their would be no 2nd guessing here that this all is the truth, so what are you waiting for, like we wouldnt be here if we werent done wrong in the 1st place here, oh no its all about me and your wrong, like sorry but that aint how reality works, everybody is in love with reason here and this be mine.............. just cos I aint wanna get with others, you aint know the sacrifice here, nothing but the creator told me to go this way cos of following thy heart, didnt have to remain loyal, coulda fucked 10 ppl but its not what love is......... and you take for granted thy love and thee sacrifice..........

you aint wanna admit that we are pure here and got wings that we are wise.... you cant accept that this is how the game works, like oh no someone played better than me here..... outwit the game , but what choice do I have either .... love is love and when it aint love their aint nothing I can do, love is love and its powerful, love would be me passing others cause it aint love and staying true to thyself.......... like you aint know what love is, if not

like literally this is how im viewed, like look at him being evil to others, but actually its always the opposite, cause we have shared our wisdom for the fact of enlightening others, enlightens your self, some fact you miss about reality.................... like kill thy from a distance like Apollo or Arjuna with his bow.......... like but for a reason of guarding thy truth, like thats just it, we aint ever make no promises here to anyone except thy ex and she broke that but yeah like I can share my mind cos its thy mind and not having sex which is again , just everything is a paradox but this is my life here, all we do know, and it is real in that sense, of again we wouldnt have thy mind if it was the other way around here.......

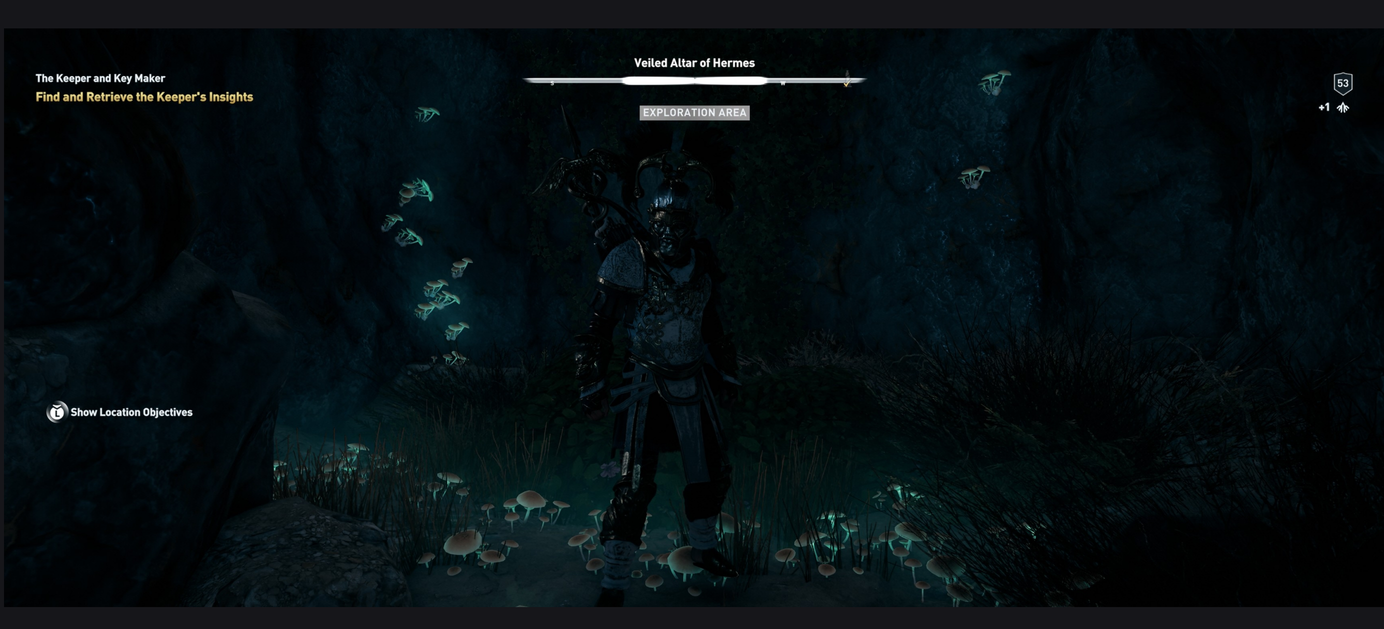
like what is weird af to thee here, is just again like why do so many ppl post porn, ahahah like we did make videos with the ex, she deleted them when we fought ahahah cos she knew but yeah like it was always thy idea, but the ppl like who post it online, idk that is weird, like that every human likes sex, ahaha it just shows you like ppl dont care, ppl will have sex with anything, it aint love, like love be keeping it personal here, like idk its fucked up out their , like cos woman and guys be like that, all they want is sex, all we want is nature here, like sex kills thee, just yeah idk lol , like just the world is fucked up.......... like it cant always be good to have this be our reality and look at stuff, rather than being in love and yeah like but again its what brings in more confusion to it but I know that, its how I forget about thee others here................ like cos you aint show love, why would I focus on someone that doesnt care about me, like the 1st thing I did with thy ex is ask to take pictures of her and us like and I did so I could always view it on thy phone, cos thats what love is, loving who your with

and every part of them, cos they got the glow.................... like so again just yeah idk we aint show others either but yeah like cos if it was like that then shit we would be able to focus on something else and power up thee love more but the way you play aint how it works, cos w.o that lock in, I can go whatever way I want even when or if my thoughts are stuck on her......... cos their aint no love yet but its potentials here.......................

and yeah tho porn is a sex act while showing thy body glyphs is a whole different reason here tho........... like it is real too w.e im left to suffer here endlessly

like we aint ever just post a picture without altering it................. even tho thats how we take the picture js................. like and yeah how cool tbh, and all this is just like I cant take thy suffering in thy mind, if their is multiple cures out their , you aint wanna let me eat here......... you dont want the one you love here to feel better, so it aint love ....

Hermes



AC Odyssey

AC 3 Remastered

Really miss gaming tho , like not feeling stressed here, thats all I do.......... like cant game its too warm here, dont have enough $$ to enjoy life and again it is not like I could of done something different here, they screwed me over is the truth its been 8 years here .... promise if you went through what I did here, youd have enough reason to say something here also....................... but thats again having time off we gamed...... miss it alot....... miss not worrying about thy future and thats all moving did here, thats all working w. my family did to me, screwed me over legit, got it all wrong tbh cause if you knew, youd know im right no questions asked...... who writes this much that doesnt have reason, we do.........................

like how is that crazy at all its not to think just again their is something else going on here, but the world wants to tell me no..... their is 0.00000000% hope like it doesnt even make sense at all in any way cause this aint what love me about here.................... imagine if their was love...........their aint nothing................ the fact youd let someone suffer when medicine exists, the fact all things can be changed & everything has stayed the same, cause the truth cant be altered................ again just its insane to have this be, find the answers on thy own, and for nothing else to be, like bcos of it all in totality, we have no other way to view reality, and really aint ever asking for anything other to be comfortable............. never said I needed to be filthy rich, but just enough to not stress & thats why worked towards our electrical license doing hvac controls, like bcos of what happened, if you actually knew the truth here, you would just know again love would realize that you gotta meet half way sometimes here and this aint it, and love has nothing to do with anything but an attraction to begin with........... like just why would the creator put thee in this position, if life again magic bes when you be with your other, or find them, without that their aint nothing here.............

just the fact like honestly like I said here tho....... you could in all of reality, make the coolest shit about this, bcos nobody does that........ about thee shadows, about thee experience, and yeah like again we got all our points covered here and nothing changes except I suffer even more, when no1 should have too

the fact here that reality takes place in thy mind, works off of dopamine to begin with in a way right the rewarding chemical, its wrong to do this to someone when they know the truth is the truth...... like with mininmal support here we could feel better, and we dont at all here........... like you take it for granted when medicine can save lifes........... like cos just again the truth will make you realize that we have a reason here, not everyone does, but we been through all this I dont know what else to say but you cant fool me, we aint enjoy it enough but just enough to see it works, like all ppl wanna do is oh lets drink like I wanna shroom, a natural thing, its soooooo stupid to even argue about here in all of reality it just is the answer............. like imagine that this is all that we want, like its nothing..... its free....... in a way, it can be, like this is insanity.................... just its how I believe the world should be , like again the cures are legal here, and then the world be a better place, just again if a friend cant share .... like to even have someone who wants that again they know what their talking about here, it can be fun af, thoth wrote a tablet on it, how stupid are you to not experiment with that................ how selfish are you to not share, I would, like no jokes , we be too nice and get used for that, but we just have a heavenly mind here, like this is what happens when you cross thee........... but life could be so different and this sucks more than anything, like you just dont get how far we will go here cos we aint got a choice, cant make something be that aint, but what aint can never be.... only what it is can be, and thats tough not having a friend who shares when its the simple answer.....

we could go on forever here no jokes like that idk why my mind thinks this, like I dont know what to do & if it aint ever then whats the pt like but I aint got a choice, what more do you want from somebody , we gave you our mind here to say, regardless we were public with it all at 1 pt here....... like that again Its driving me mad, im stressed, like but idk it really like seems like the only answer, im not listened to, reasoned with, I aint know what to think here and just thats evil to put this on someone , like just again how else would love work if its not in your thoughts, its been and it aint been, we aint ever really try and thats the reason............. like I dont know , you dont care about thy mind stressing, but someone who had love would know and help , and thats what aint here, like what you think you gotta do for thy love and what actually has to be done is opposite..............................

like really it is taken for granted here, thy love, like that is what you dont do to thoth here............ or the entity right like we know too much here, again didnt have to go this way but I did have too like I aint like others as much or at all here ..... like arnt attractive in a love type of way................ and its everything, taken for granted here, like when you should be blessing the one with thy mind and their thoughts cos of the creator, thee opposite is done here......... like it would be way more enchanting if it was and then do something with it , than all this, all I do is stress , that aint love & it aint healthy, but again cos of thy thoughts and experience...... we do not know what to do.............. like how much more do you want somebody to think about you here...... like I cant stand love cos weve been hurt everytime, like you love someone so much & they change............. but sometimes its meant to be, like that thy experience brought us this way cos one day it will be .... but yeah just only you can be that person in this matrix.......... nobody can believe for you, nobody has your thoughts so you gotta play with what you got here..... and thy sacrifices be taken for granted , all of it, we want nothing but to feel comfy here.............

cos you aint understand that everybody plays the game, if somebody sends energy attacks to me, what can I do, I told you where I would go & where I wouldnt, like all we got is thoughts, like I would never change my mind bcos all this made us who we are, and again taken for granted af here, like we will stay single until death then I guess, already experienced that, like again just its all wrong, you think the total opposite, well if that was true these wouldnt be our records here....... and you think you can out smart thy but its based on the heart and nothing else.................. like w.e one day you will see

like to be nice enough to share to thee what has been & have it used against thee is what again crossing that line be and why you never get it, like love is such a strong force that nothing can get in the way of it..... it just is, their is no doubting oh is it love, like love just is, seen it, witnessed it, experienced it..... so w.e like and for sharing and not locking in this is what feedback you do recieve..................... its why again you are playing with the wrong fire, you dont know how to perform alchemy, even if you had everything, or was successful , like alchemy is magic......... and its not like that here.............. like love doesnt make you wonder, love is their and it is, like you let others attack thee without commitment here, I dont want others, like not even if the others offered nature is the truth to it all also, like cos what would be magic is wanting what we want and going to that plane & this aint.. like you take for granted the times we have skipped over others here cause it wasnt, to not chase thy pleasure in this way bcos we kill the ego...... and again nothing is for sure, but if it is you gotta set in stone here and this aint............. like just I cant explain it anymore, im never listened to, and again by the force of nature you will have no choice but to see thee truth , like again just believe it or not I guess, like you coulda just been a friend here , chat, like people chat with AI but wont chat with another human here......................... but the illusion of life again just if everything is the creator again like just that again idk reality be a specific set of parameters that set reality into motion, their is nothing you can do to alter anything, everything already been written in script and thats a dangerous but the only answer to reality actually..... bcos thy experience of seeing it manifest infront of thee eyes here again like as if just experiences the numbers 515 for sure like we seen that always after this, why I liked her forever, yet my 2nd gf came to me, shit is wild................... told all angles here, been here for friends, and all I do is getting shamed essentially like when things could just be.................

just why would you mess with someone who views reality as this .... like you couldnt ask for a greater gift or heavenly mind though .... like simple , like legit thug nigga here ahahaha , but thats what you aint get, like 2pac again like thats what he said, I must be a thug nigga cos I want nature basically, thats how they weigh me here, but in all of reality, its thy answer, like again paradox, you be a female & I be a male, and their is a difference, woman can make life, men cant, like their reasoning is different..... like thats why thoth is a male tho...... and he knows how to do alchemy, this aint, its stupid to even argue with a fool tho, but yah set the rules on fire just to show you that they flammable like AG Im a beast, again idk I feel like its always been about faces here like that thy friend again paradoxes, we could never believe that it would be Ariana, but it could be and yah idk like cos its too great of a gift and for me saying this is like I dont know, but thats how I view this, even tho again its just an entity like idk what to think, cos just like the dragon breathes fire is all, like not many ppl do see it how I do is the truth, but it is the truth ....

12:30pm

life be so much different when you are relaxed, do you even know what ADHD be tho like for real, and having the cure before, like cos if you understood you would know thy reasoning here to why we can complain, we tried to get it back, everything screwed me over when who was choosen by the entity, how else do you express it manifesting if not for being the actual truth here tho........

like idk this stress, like we cant even go the dentist cause our anxiety be through the roof, hell its hell making it through a shift of work like I have no motivation to view reality like this & be treated in this manner its disgusting, who was nice even to share the wisdom

like that if nothing happens here again Imma be forced to find a dr and we will see, like idk its thy records now, but if something manifested and came to be true then I wouldnt be seen as like crazy but that I am right and finding the right dr be key, like idk dont wanna gain weight like thats what bipolar meds can do very easily but my mind is so stressed, we got meds left zyprexa, seroquel, like nothing has helped in a way that ADHD made me feel good and drs prior agreed to both is fine.... like all this is insanity like my brain cant take thy stress I dont feel good ever

cos I dont know what else to do, I feel like bupropion helped like 10-15% to adhd meds but yeah like it just a main side effect can be seizures and guess who it has happened to by mistake all this experience is just believe it not, escaped death here came back lol.... =(

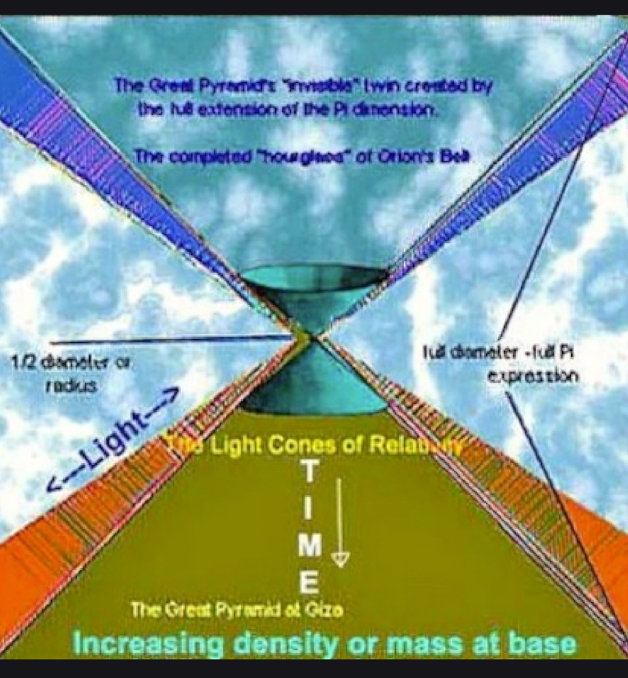
but yeah like well love could cure thee but this doesnt, not without anything here, Im again insurance changing, when drs view my records and Ariana is on it just cause I was honest, like maybe it not , I bet it is..... like how fucking stupid like youve been fooled, all we got is love regardless........... like that is what happened here and it feels like again dopamine blocking who took it, like it can be a form of blindfolding, but how evil is that if nothing ever is, if im always uncomfortable, who made it out cos the truth prevails like I dont know what to do here..................... a medical card would work but I aint feel good enough to do anything extra, it works bvetter but again barely have money also dont really need much but a cart and bong rips or dabs aha like life sucks so much tho honest we are fun and you are lame af , I have legit zero dopamine in life but to sleep and barely get by cos of it all, I wish I didnt feel like this, I dont know what to do, you take it as a joke, he will get over it, nah the truth always prevails tho........................like its thy curse of the truth of the simulation says the creator.... solve thy mysteries for I have shown thee way, like anything is just that, the lord of wisdom be in us all, but he doesnt appear as if so to all cos they dont believe and praise him as much, Really people believe here, Wack shit, like this is just the truth tho............ reality just is =(

The Sword in the Stone

Just like posting random images sometimes to talk about it or to make it more interesting, whats on thee mind, but yeah like look the shroom on his belt , like shit we done pulled the sword here forever ago....................................... like =(

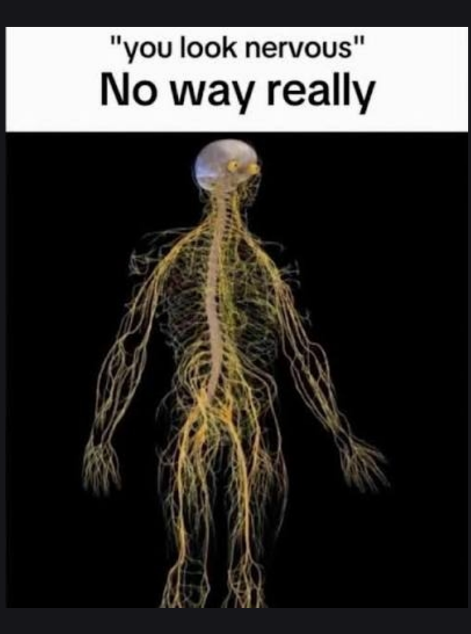
X-Mas

Thoth's X Box



The Alchemists

Pssst....



I just feel like again that just idk it seems to me like the truth of the everything that it is her, but my mind again cant believe shit if their aint 50/50 energy here like...................... like if we only have our thoughts, it must be thee answer but im more sad than a rain cloud rn like just really, shit be dark here for no reason cause you wont share thee love and nature of the Earth.................................. haha seriously what else am I suppose to believe here........

9:50 pm

got home little earlier here cos they do the floors alot so we leave earlier, but yah idk my head kills rn I aint feel happy at all here...........................

the fuck up part is again we only got thoughts here, I aint know what to think like honest I aint wanna be here or have like legit and that is fucked, like that nobody actually does care here.................................... like legit tho like just idk it aint looking good here, nothing ever changes, like nobody heeds thy warnings here, or listens to thy story............. just again what more can I say, we saw this and its just that again how can I be right about this all and nothing is, like just the shit weve gone through here

nobody appreciates thy sacrifices here, like just people dont want your dream to manifest , they want to trick you, like really here .... I have zero motivation in life for being screwed over, like again just dont know, we aint forgiving thy ex here, like nobody is getting forgiven or my mind changed on it all and thats just the facts here, oh your not happy, like look at what we sacrificed gtfo outta here with the bs , like everybody

we lost so much weight here our belt doesnt fit anymore, gotta drill a hole in it, like legit tho, but yah im super stressed out like no jokes at all here, like just cos we know how this all works, right like pass the shrooms, so many people are evil here without even knowing, like thats the problem, we are too wise for our own good....................... like I am crazy, in a way, cos we question all things, like I just want anything else to be here , like .... =(

their is a scary truth to allllllllllllllll of it , like that I aint lieing here, aint got a reason to lie, like why would I , why does it matter, cos why did thoth build a pyramid and was open to psychedellic shrooms, thats again we know how it works, it already happen to us, the initiation, like really take it for what you want but everything is mental here...................... and its wrong to suffer so much, like wtf did I do like its like you think I cheated on my ex, like that I used her nah the total fucking opposite here, I gave everything I had for us ya asshole, like really tho, like im treated here like to me here, like I shot somebody, when Im the one who actually got shot here, like I dont fucking get it...

but yeah just in all of reality wanna be happy, and just we need a pathway to generate music, that is all.............. like but im telling the answers and nobody wanna listen, like their is nothing to talk about, it just is why we are here and generated into this simulation, like but again idk =(

cos I want my music if was , to be different good vibes, not some BS shit, like we like having fun and nobody wants to have fun here..........................

like cos just it doesnt take a genius here to see that he who writes all this, must have a wise mind.................. I just again cant help it but see algorithms and thats again like it makes me wanna put everything down, idk why my thoughts say it, but I was honest................. like I just always feel like im being tricked but that is what being blindfolded is.......................... but again here just its all this like I say, people that dont wanna see you win, people that think they know more here

the prob with it all is what I said, no matta what my mind doesnt feel good, that is what the matrix gonna force you to see, how they poisoned me, like you can believe what you want, we decoded all this, pretty sure im right, if its how I wanna go we made that choice when we started the meds like just yeah what other truth is their here...... like you wanna see me just like again im so depressed cos the truth is the truth and ppl screwed me over, like you aint know .... like again jeeze this is insanity , I cant take it, like just that is the truth, but nobody wants to be a real friend........ like that nature works, esp if you stick to yourself, like it is the only truth their is, like what they try to tell you is their all bad, lmao cos you aint got the light in you here....... it is how miracles be preformed here, changing thy mind................ like idk just it says you dont care, like just cos their is other sides to it all, like how I think like I say but then if I say it like I sound more crazy, as I said once like in a weird way reality be like that, like the double thinking monkey, but yeah bcos just everything be energy, like that you gotta have a reason but we do like wanna go my own way with it all, dont wanna be lead into someone elses story cos we got our own here......... not gonna sell myself here to make music, but do it cos its fun, and yeah idk like just thats why we went this way when like again its more to all of it, just like again working at a job everyday, like wasnt made for it, we already did it..................... but ya =(

like just that nobody is attractive to me in a way again even this at work, like im not an idiot here, im legit pissed off always, legit the dweller here, like we barely talk ahahah and yah cos my manager looks like morpheus, idk the red & blue watch, its mad funny but you aint see what I deal with here, I just have

fun with it all, like that most ppl again all I ever do is share thy wisdom and thats worth more than anything like but again it aint where I wanna be, shouldnt be here if you do thy right thing is the problem, and yah like just again all this is legit insanity to me, like what if I was dumb enough to go mad like anything can be possible, like cos we arnt gonna be fooled here..................... the only person you are tricking is thy own self here, thinking oh this needs to be, or w.e like I dont know, just again idk all we ever did was show love & get screwed over here like even friendly love here, we got screwed, like I dont give a fk about anything and nobody helps thee, like weve been given up like and thats fked to do that to someone who worked hard here.... and was their for thy other and all of it, you really like you think I went crazy last year, try 2018 here, my ex have me screaming af, like cos aint that fucked, like cos she hurt thy heart here, like what if I was the one to cheat and all this, all we have done is get fucked over, but yeah just idk like we wanna go to what plane we wanna go to here, and just thats it, like we dont wanna miss out on our only life here and that is again just thy magic works, but you dont wanna listen, you dont wanna be a friend, like you wanna continue this thinking again like ppl dont listen to me here, like that love can never be unless it is it off the bat, like to me, cause that aint love, love is like you know when you got love, and this aint at all here................. like just idk

like that im so nice I dont wanna drag others into my BS , Ill share thy wisdom, but yeah like idk just the pt is again here we did nothing wrong, weve had again like been abused, nightmares about what happen at work, so think what you want, on top of it all, like imagine being shot and being laughed at like they said oh my mistake, that aint a mistake........... like you ever wanna rip someones head off here cos I have for real reason and we explained it all, never listened to here, cos you gotta think, we cant trust nobody cos of that alone, experience be real and dont know what else to say , the perfect experience yet we are ignored and left to suffer, when the answer can be simple here.......................... like we just again we wanna go out like a king or a pharoah and thats all , we know their is more to life than this life, we just again to sit here and accept oh this is all that can be, means you aint got big dreams, anything be possible but yeah idk what else to do here tbh...... my head hurts tonight .... =(

just that with our wisdom, really, like you aint got a clue, how much of a friend I am to begin with & that is why this just kills thy more instead of letting me live here.......................... like that yeah idk its the only truth their is, maybe others know it, but to have this be thy experience, to see it, like just idk if people knew they talk about the dragon more but they dont =(

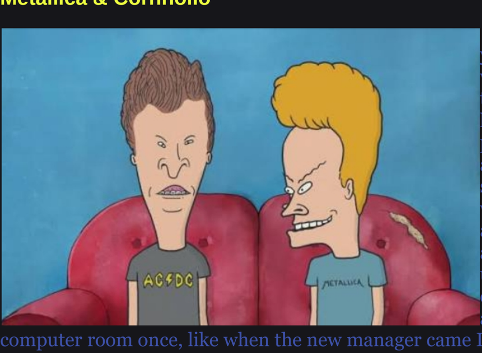
RS3

I kinda wanna play this game again tbh ahahah like cos it was everything to me back in 2018, archeology came out tho.......... like expressed it all, and theirs nothing to do here, like just to keep thy mind at peace here but idk im super stressed cos of how long this gone on for......... cos the Holidays are coming up and its the only chance I can have to generate cool memories......... like shit we got out pics here of all the events we been too, and it allows us to reprogram thy mind in that way............................ the worst thing they did was remove daily keys, like it was legit my reason to log on tho daily and kill an hour.......... so yeah idk, and we did necromancy tho like all of it cool af to me here, like to have this game be around still since 1999 or w.e like since 2004 here........... cost like 15$ a month, or again just the fucked up part is how uncomfy I feel like we wanna play games but were stressed, we cant cool down our room enough, and on top of it, like this is why we quit gaming before, like to focus on thy life and it worked like didnt spend at time at a PC worked alot and lived life but I aint even make enough, like I dont wanna move up, cos I dont feel good, like its gonna end in disaster here ..... all cos again like just the fucked up part is quitting all the meds on thy own cos we knew it wasnt helping and getting out of it on our own and still nothing fucking changes like we gonna freak out here again tbh ahahah =(like no jokes tho my mind cant take it, all this be what ADHD is, regardless we WERE prescribed it for years, like oh now they cause issues no like life is corrupt af here....... we dealt with a crazy ex here legit like how we gonna trust a relationship again after this .... seriously tho iv said it all here, like we wanted ppl and nothing happen, like just dont know anymore..................... but that is what love is..................... like just its all in your thoughts .... like just that feeling of wanting somebody, like their is no difference between actually being with them, like just again tho like how iv been in love before and how I liked them, was no different than what Iv thought of here, anything else so far we aint interested in like .... so until something else manifests, like why would this woman do this to me, like idk what to think here....... cos anyone can show love but you gotta go with ya heart and again just this experience here I aint know like we will never change our minds on anyone is the thing, we aint try to meet anybody new, cos we again arnt trying to get with a woman tho cos since 2018 my life depends on me like we followed our heart tho..... ya we gotta be responsible for us but what if you are and they screw you over........did ya ever think of that..............................like what if you dont feel mentally healthy, know what helps but others dont wanna see you win, like everybody sees everything differently and this is beyond fucked up tbh ....

but ya back to RS like its cos she played that game ahahahha =(, it just is like idk the thing is like we different, we dont play it insanely but enough since 2018 its been apart of this all.............. nothing else makes sense, like thy own friends tried to bring thee down here tbh, like just cant understand this cos I already said it all like just we rather fall off here than try again cos trying only hurt us more................. like we aint got no juice in thy tank, and its again you dont got a clue, if you had thy mind, youd see thy reasons, ppl again wanna think they know more, only making yourself look more stupid by not listening to thee here tbh ....

thy experience in totality, mad rare to me here, like gotta use it for something thats all really, like you aint appreciate thy effort here .... with all the shots ppl fire cos they cant get to me, like how strong we be in our mind to not accept less , like we say it, we dont just accept it here , cos the truth like the sunshine shine above all and this is thy truth, like all of it to thy entity controlling thy, you just aint believe enough here....... thats your problem..... not mine

Metallica & Cornholio



yah ahahahah IDK the totality of all this again I first really heard metallica as I said before, working with this older dude at my job in like 2013 legit when I started or w.e like that album And Just for all tho its what made me like it then I saw it also in algorithms in 2018 like we went down the rabbit holes legit , no choice, but yeah like cos we played it recently cos that friend at my job like its the perfect song , cause he moved up where I may roam, cause thats what he does now like the moving assistant when ppl go on vacas, ahahah but he says, the less I have the more I gain like you remain a slave to the game ahahahah like yeah it like pushes the I dont wanna move up you see thats not how we playing rn...... its all fucked it does motivate thy tho like also that part free to speak my mind anywhere like being suspended on X you see, we got you, just listen here..... lol, but yah and cos of it all hahahahahha like he always had this weird giggle like when he worked psh psh psh like just unconsciously or for fun, but yah like all of it the ppl at my work, Beavis & Butthead again only know of it cos my friend who I blazed with never watched any bit of it prior he just had a shirt and ahahahh like they got the metallica shirt, but yah cos all of it, they posted airplane pics in the computer room once, like when the new manager came I asked why they said cause we on his plane im like laughing just but yeah like all of it, cornholio, cos I worked on that aisle alot, really we played it it came to thy mind when that woman left to make a joke like never gonna score now ahahhaha cos I told you we did like her in a sense but all thy mind is fucked we aint feel good bout nothing , cant even support thyself......... but yah like I know ppl seen my algorithms all of it, its easy to tap into .... but yeah idk like we had time before watched shit, life sucks ass tho , but yah the fucked up part is how I never seen it but the corn part, we always said that since a child, theirs no point of corn like it goes out the same way it goes in like it unchews it self too or someshit like comes out in perfect corns ahahahah like mad funny not many things are like that tho really, thy I remember tho funniest word the turd chopper someone said once, ahahahahha but in HS ppl called it like damn that donk ahahaha like my friend too he was a riot but I aint trust ppl like just nonstop laughing like cant stop cos their laugh be dumb af like shit make you laugh more and vice versa but thats what having a good time be, but he says like I am cornholio when he goes crazy like thats his alter ego idk show works it old but they remaster and make new I guess dont follow anything just this happen tho, and yeah idk cos again here we lift thy friends up unlike you here, I aint trust nobody..... but yah like even to again Megadeth and their songs about what happen to me , idk its more accurate than others, but alot of songs at work speak on it, and again the algorithms is all their is, thats how the music play but anyone could influence that but it again the songs are torture but it speaks on it more often than not, like the moon or shadows, all that , like cos thats the power of the tablet and this wisdom, like their aint a higher truth than what thoth or ancientxthoth knew here...... like we have cried and shed mad emotions listening to music like no lies depends what song but we just yah idk we are too precise with our energy cos we dont again we use what works and what we have found along way and thats all anyone can do, like we dont keep searching like we get the pt, we wanna send a message here ahahah and thats how thee shares thee energy and again yeah like idk we know too much , alchemy barriers, blocking our rec videos like we know here, you cant fool thy master......... even when they push me down & dont help................

Vienna

I just think like rap and hip hop can be over rated, we like diff types for that reason......... it sheds a different or shreds a diff vibe..... all kinds music can change thy mind & you gotta pick & choose, like one of the most random mac songs I saw and it all working at a store regardless prob wrong but all things be true like always hear food things in songs at time, but even one day I went random YT channel we found vienna from mac, I aint still listen to his newer shit just at times cos it is how this manifested, but yeah that song is mad weird I guess its like a remake of another but its the most weird song I found by him legit and yah the vienna finger snacks tho ahaha like we just dont know what to do im sooooo bored sitting at my computer here...................... =(, it was this random af channel and it had a picture of some islands, we found it like a few weeks ago partially just again just sharing thy perspective of life, like you should have fun, dont change the message halfway through who you are here, like blunt of thy mind right the dude I worked with also like made sure we hit that aisle like the coincendes one day this other girl in another dept had sour patch kids....... like chances again you think im stupid here but then yah to the song Donald trump like hes rooting for the villian here ahahahah like wtf thats a total opposite view here, who knows, money can do wild things and music be powerful, like just idk we dont care, we know whats right here, but yeah it wasnt that song but others which made me like him more cos again we got a pc and watched videos cos we saw the algorithms cos ppl I knew liked music its just life I guess, but yeah its why tho we went into him back again cos idk we listen to a pretty weird thing again consciousness can be shared as if like music just sucks these days, my life sucks, but it was perfect before all this......... and like working with ppl who jammed to shit like I remember this older dude was like Keith tho cos we worked with some more than others, he was this jacked dude like 10 yrs older than me told me life stories was chill, got me roids I didnt do like I said but gave him some my meds at times, ahahah he drank on em he said, ahahhaha, but yah like he listened to 21 savage at the gym, just idk life be weird but yeah like just idk , life is so different now........ just being forced to listen to music at work is torture, doing this job is torture, like not joking my mind cant take this, and nobody even talks to me in years cos of thy sacrifice, we avoided it cos we need to figure out life here.......... but yah again that song tho its mad errie....... we aint even listen to the actual song either, just his version, like that again just IK ppl at work can see thy algorithms or how consciousness works, more than you believe, thats why we go this way and turn randomly, use angles to disquise thee trickster or dark magician here, cos staying here rn is the only option to making something else be...... and its miserable atleast if I had my meds id feel better .. adhd im saying, like really tho im super aggitatted , anxious, annoyed, tired always, like no motivation or dopamine flowing sorry its the truth like what am I suppose to like thats how the brain works, and it doesnt take a genius to see this.............. ahahahha like just either way we got cool vibes and aint no1 actually wanna vibe with thee ancient thoth here. cause you know what you do be lame and what we do is fun and heavenly.......................... like just being around thee, is an experience......the entity, like cos how do you think I view life seeing and knowing all dis, like we got a sharp voice in head attuned to thy creator...... or with it, like only can be can be....................

The Things Not Said...

the thing is like we lost our X, all of everything was their ahahaha like even if this was shared or w.e right like theirs many missing chapters here.......... idk why we write cos we have no one to talk to, im stressed af again like so one day I can tell you like I told ya so here...............

but yeah idk like cos we expressed why we do what we do here, youd see like it aint a joke , I aint know what to do , but we got a solid point of view, like again idk just anything but this tbh like just wanna be happy...... and what is happiness without like having a job you love or making good money or being with the one you do love............. like you cant even choose who you do love, like nothing is free.......... like just people blindly go through life in automatic mode like a bot but we , we are like nah playing the lottery spinning with our thoughts............... like thats the only way you can recieve a good mind........ and what that means to anyone is not stressing , but again just where we take this, we write cos we suffer like its always like oh follow this pov like nah we got our own eyes of thy enemy here.... we snipe yo lol, but yeah I miss cod alot tbh .... all of it I mean my dude was named fredosantana on xbox in 2018 ahahah as a joke cos he got them songs, but ppl were like I remember him, but yeah to like playing with a dude named lil durk, chances like thats how I found that song keep dissing 2 bcos he was playing it on his mic in chat one day and its where I be from boston aha its the only song that hits in a way but yeah all of it was perfect timing to thy algorithms but now we dont care..... like we changing the flow and are miserable af...... cant even pretend to be happy life sucks ahaha like I didnt even do nothing wrong, to feel like I have no direction in life be the worst, we have an idea but still need thy friend, dont wanna here what they got, we got our own here, more game than anyone lol, really you do never know, esp if this happen to thee, we worth more than anything and if you dont think like that idk just life is a joke honestly ahah =(

but yeah idk like cos we may like artists but for a reason if lifes good and we listen but life has sucked I aint care, I dont keep up with every person and thats thy curse here cos its what formed it all before, now total opposite, we aint listen or vibe with anything............ like really if you seen thy algorithms, might like an artist, but its for a diff reason...... but if life was better we would........ just again theirs a difference between being a listener and creating tho like why not be thy own pilot, anyone can............ lol it is like idk but the world is fked but ppl dont care its mad corrupt all things in a way, like honest, thats why we dont care we seen it, but yah idk , that is the other side to it formulating it to work , cos it dont work for everyone, but we do have thy ectoplasm lol........... like who would think it if it wasnt possible............. its stupid like its ppl jobs here to be apart of that all, its all a joke........ in a way, like we aint do nothing our whole lifes here.......... aint go out in the world & enjoy shit, rarely maybe more than others but still we dont follow shit or trends, like cos that is the trap .... like gotta be you , shits weird, thats why we stay to ourselfs

idk where I was going here just random shit .... but yah like cos even on X limited space to write, when I write here im def more open to talk more about anything just like IRL would be I guess, but like or maybe not if I dont trust yah like we aint dumb here , we dont know what else to do tho..........

Flying Out of Body

cos just that be the misunderstanding always here........... experience, lol....... in all ways, like shit promise if you saw what I did & flew out of your body what would you do.......that is the real question here

would you be able to sit still knowing thy truth of all reality, again how else do you view if not bcos of praising the creator even prior 2018 you see its before it happen but like that thy entity choose thee to spell bind and wake up, and nothing at all his been just dissapointments for no reason, like life suppose to be fun here.......................

like just not everybody has the same mind and like reasoning or experience, we never push our ideas like you need to read this or like I am right we dont talk and share what we know, im always taken for granted here...........shit this being like deserves more than being here rn Ill tell you that, if someone sees their reality as heavenly and is telling their story of how they got here..... like shit they must be right............. like cos thats all we wanna do , is tell others about it in a way of like...... everybody wants to claim this or that, we claim the truth, no one bats an eye, people are lied too, they sit back & accept this is reality, but its not like everybody lies and profits on eachother, but its again idk Egyptian shit is just is linked to music and all that, prob the most, like just cause who ever chants reality, again like idk its so diverse out their but thats just like again what your suppose to do after invoking nature, even if its after it ended but to use thy creational stream and get ideas, good thoughts, and yah .... like but seriously, trust nobody is what id say like we can do it without you if this is how you move, and you dont wanna listen to the one who was shown here what to use, dont see you showing a video of you with an entity, do I.......... you must not know then............. lol......... and idk its the most fucked up paradox cos to just put it out their straight up, like life needs to change here im more than stressed and like wtf, shit we go outside the game be like dragon city in the clouds, like how beautiful life could be, and we trapped in slavery here tho, like really we already again like it wouldnt be, if we liked what we did tho in a way but their aint much we like its all the same bs to death like i try to find a better way is all, their many diff ways, but idk we been waiting since 2018 and nothing changed............................... except my ideas that aint come to fruition here........ =(

11

here we fking go again idk its fked I stop writing bam 11:48 and why again who else like that stranger thing shit aha chances , the parallels tho really, whose birthday be 1110, like so fk you legit life do be an experiment, we write our own code we are that wise.......... to listen to thee voice in thy head cause it talks without that you aint even alive..... but yah ahhaha like just seriously if it was what do I do like shit its like it their wasnt weird parallels tho, just mad weird cos I watched it cos Harry in that perspective....... after this when I got to FL tho lol......... but yah even that as I said, the way we can reverse any curse is by doing thy magic & again all things come with consequences here, like dont know what to think we havent found others even if this person turned me on like this as much since...... anybody in a way can turn thee on, doesnt mean you getting shit, maybe we would, but still chances, like that I aint even happy at all here......... but yah like not joking here the times iv used this spell like that is what breaks up the associative ness with others and thy mind doesnt care , but if their was love on both sides what can I do....... but their aint lol........... its playing with fire but we are wise, even tho id still be like yea in a way like just idk , like idk the fact this happen with her after the entity and when these parallels all was, i dont know what else to say, life was sailing smooth before all this and nothing been, been screwed over for speaking thy thoughts after an entity came, like really reading a page as if its the whole book here...... but yah idk like its just when we do our spell.......... we dont care again as if it is or aint like cause just thats what it does, but when I had a gf I never again even looked at other females online , ahahah like we just like to see what the creator has done here at times...... reddit be way diff than actual porn, all these sites now idk we dont change or follow shit........................ but yeah like seriously the only time I had to was when she didnt want too which wasnt much ahahah like we always did............ and that be like what love is.................. an attraction like that......... but it can get dangerous like I said here, ahahaha its like again doing any natural substance, like shit their is no difference and thats the difference between me & most, like we choosen mother nature and did the right thing ......

How we use the Algorithms

like thats just mainly what happens at times, 25% of thy songs we will go back to is cos of that reason like going through 5k songs playlist on the phone like when I drive barely do any driving, but just it plays randomly, and yah sometimes to look at our library it all can be old, wee did this for too long here....... but yeah like even that idea, can relate to even truman here also like the radio part you see, well the entities were the product of the algorithms of the simulation to begin with, thats all anyone is, so its why we dont listen here to random music playlists ever, tried it hated it, like thats why we did this cos thy records I guess and like yeah just I dont even play it randomly at home, we got a few weird playlists or ways to divide & chop it up but yeah idk like just we tried and nobody wanted to actually be a friend is the thing.......... but yeah idk like 1st we aint feel good and then music creates the biggest illusions in a way like shit thats why gaming instead of writing all the time be different , I can focus on that but I cant when I got something to say and thats just how we be here lol like that idk we want life to work out here as well............. but yeah like idk again just all of it, testing thy input & output by either participating in the YT algorithms like ppl do see it is the thing again easy to tap into , ppl could view it like just that yah idk like it just all proves my pt like we can bring a vibe to the table here, but yeah idk like all of reality be an illusion cos experiences, like that what if we go this way here and move like this, like idk we arnt just the dumb following the dumb here.......... we think....... we know that if we create personilized algorithms and alchemy barriers here we can control the mood, but even so nobody wants to just be a friend, shit be wack, like again on the other side of this, like shit its mad simple to lift thee into the light & like its just too good of a story to not be interested in to me, cos its most interesting to thee like no1 wants to talk about it or show it, when you could do alot with it and just yah idk reality be driving me insane........ like nothing ever changes......... just wish it finallly did, we done suffered more than enough here for once life....... and then again just shit when is life get fun, it surely can be, but it aint be and we have worked hard like whats the pt of anything if you dont find thee other...................................... or just anything, we arnt made for nothing but jamming out here like shit life is a joke or watching some funny shit I guess like idk , we just wanna create our own legacy is the key, like why watch someone else write the script here............ like just yeah but at same time the way it all works again its too chaotic for thy adhd mind here, we aint got no dopamine or neurons connecting here........................... aint no you could squeeze thy neurons and no juice would come out of them babies............ squeeze like an utter and shit we bone dry depressed af , total opposite of what alchemy is, and it aint hard to see its the simple truth................ like what a blessing and im like again tryna be like told your wrong, nobody wants to help, idk what to do, we been alone for so long, like we became wise in doing so and again taken for granted always, couldnt ask for a more rare experience than it all and to take that risk and you aint wanna like its too late...... and besides........... ppl can turn into something so we write incase like we have proof this is how reality works lol like or again can tell thy other, like told ya so either way like life be just again what can you do but observe & recieve thoughts to do this in life or w.e like thats all their is thoughts and this is honest to god the most insane paradox to it all and nothing is like what ofc we gonna argue here like we got a pt ...... =(

the Diary

just saying here bout to go to bed legit but ya like if only you knew thy thoughts inside thy mind I guess........ like then it makes more sense ahahah like if anyone could read this, idk what theyd think but that he has a point here......................... like really but we throw so much energy into it in a way like goodluck , book of thoth be a curse to thy who reads it..................... really like just again to all the experience I aint know what to believe like their aint anybody who ever got as close here to just proving like shit the creator is sending thoughts to him cos he is pious....... like thats all their is , the programmer of reality............

but yah like if thee who I loves here could read it like in a way again we not gonna obsess here and write love fantasies, when it aint , but yeah like just anyone , well anyone with a brain os wisdom or just insight would be like .... again he proves a pt here, what would you do tho................ like when you ask for help or direction in life and their aint none, when youve legit tried here........ and been ignored in all ways really, been told like nah I see it like this when we got emotions here.............. like everyone wants to do the 1 upping here but aint nobody wanna teach you how to jump or play thy game here........

like im so tired my thoughts do go insane at times cos im like half asleep here, like we go off road with our thoughts cos thy ADHD, whatever comes to mind sometimes we just write................... lol...................... why would he who ate the flower of life and take meds move like this, if their wasnt an answer....... cos thoth be the writer, thoth engraved the tablets............. like how do you know we aint just right , and again ppl dont most ppl dont wanna see you win in a way or help thee other, its all about profit and shit everything corrupts so how you play, like we aint corrupt in a way but we have all things do.........its just what doesnt corrupt is how the game works....................

like to be so wise and write and name chapters things again like weve done it multiple times here...... just idk what else to do at this pt in life cos of all this, I dont want what they are tryna sell me as what reality be, you gotta see thy own magic trick here............ but yeah idk same time again just cos you make music doesnt mean your for all........... like the world be so diverse but just the things that are good, are made illegal, like how stupid is that shit in all of reality............ not everywhere but everywhere doesnt have shrooms but thy poison, how many times I gotta say that tho like for all you know like shit a war could happen in this country as others, you truly never know.......... and the fact is it does be, like shits fucked on thy planet, but we just see how it should be......... like we think of all angles I guess or try to like just again, the whole problem is ppl dont use nature and again like just a total paradox if you treat your mind right and use things you become more open to the enviroment around you like charging matter tho........... you become entuned and your brain actually works better is the paradox and thats why it hurtful you aint wanna help, you just wanna play games here or all together, when we know the truth I guess of this all................. like cant sell thyself short here, cause what is, what we got, you can only dream of acheiving thy mental states in a single life..... even if life sucks, like all we do is write, aint nobody wiser to how the game works than thee own self & observer here................ but still like just something can be and aint nothing is, im super pissed how like again just to be here from before, like its most hurtful in all ways, like thats why life is such a joke to me cos it didnt have to be like this but they aint playing fair is the tr

930am - 8/18

I cant stop waking up feeling like shit here, like used to be excited to wake up and take thy meds, like its makes the world of a difference like oh ill feel comfy today, and now I never do, dont know which direction to go in, never feel good, esp again after taking a dopamine blocker for so long, shit aint help me once, just if we still took it, we wouldnt have our job, nobody cares, feel like I cant turn in any direction bcos of whats happened here, truly mad evil here

Im tired af, unmotivated, all I do is waste my life, stuck in mental loops, all others care about is what it says is that, you dont give a fk, you think you know more and that aint real or true at all here, dead ass wrong here...

like again not sure how this is gonna go down but either something changes, or again we try to find a psych dr, chances I get my meds back here cos of all this, it is legit beyond stupidity cos my reason aint listened too here...... like I dont know what to do here.......

how can you blame thee with this is thy reason here......... we explained our story, so many times, & aint nothing add up here, We for sure arnt forgiving anybody here who coulda helped when they didnt, when they tried to generate illusions instead of just simply being a friend here..........

like for all I do know again this is the prob since, like we do burn, we aint got good thc here, we using shit from vape shops thcp, it is different not the same, could order it, again in like 2-3 months its suppose to be banned again, dont know what to do, dont feel good enough to go get a medical card, I legit have no dopamine, and thats how any human runs, like again to feel cured from ADHD, again could lose my job, oh like looking for dumb slaves, oh you smoke thc like wont hire ya, the whole system is fucking wrong, like in Egypt, you use nature, they want you on their team here, cause they know its what right, like everything could fall apart you wouldnt care

cos what you think is oh, he did evil its why he got fired, he needs to learn, like I just wasnt cheated on twice here and went through crazy shit with thy ex, like I dont know what to do in life at all here............. how am I ever suppose to be succesful here if firstly mentally which contains all things, I dont feel good, im just ignored, played with, like instead of being actually fucking helped here

how dumb are you to think oh he just needs love right like or sex, that doesnt solve how my mind fucking feels bcos of the medicines here, no1 wants to blame the drs here, but not everyone is for you here, we all know that life be diverse and thats why this is completly wrong, like iv done given up here...........

sick of writing it when the answer is simple here.................... like why would you even argue with a fool here who sees otherwise, when this happened to us here... like just cos you aint got the same light or experience, you shouldnt judge but listen to what thee other says here and thats what is not done here

cause just idk the fact here is nothing ever changed..... just cos if someone read what I write, doesnt mean it wasnt always, like just cause you fell into the trap here, aint my fault here....... like that just cos you read how we use our magic to reset thy mind, its just how it is done, cause then we dont need thy other, bcos ppl aim their thoughts at thee all the time, multiple things here, like just females who are disgusting who I want nothing to do with here, on the flip side again just their is ppl I woulda got with here....... like you aint know how real we be here to take this route and ill I am is like disappointed when our loyalty to it all be real, like I said, we are prepared to go to death like this...................... bcos no1 actually understands thee here like really we could go at any minute here and you aint listen, we could lose our job storm out, and then they will say oh like isnt that an ADHD symptom to begin with, the whole system is corrupt af here............ in all ways................. but you just cant out smart here or out play an entity that came and manifested to thee like this as in again, it knows more, it came to protect thee by forming a blackhole like you see how much my mind is taken up by it always, bcos it is real, like we dont let people in here , when others would, we do not, we done learned our lessons here................. we dont throw our sex around cause we just wanted to be what we are in life here.................. and again tablets does say it, so idk what to tell ya, but bondage from a force beyond, is that, like not using nature you see.......... legit everything the way the world works, compared to the way the mind works, nobody wants you to win here .... but we did do it right and all we do is suffer cause our truth be thoths truth here................................

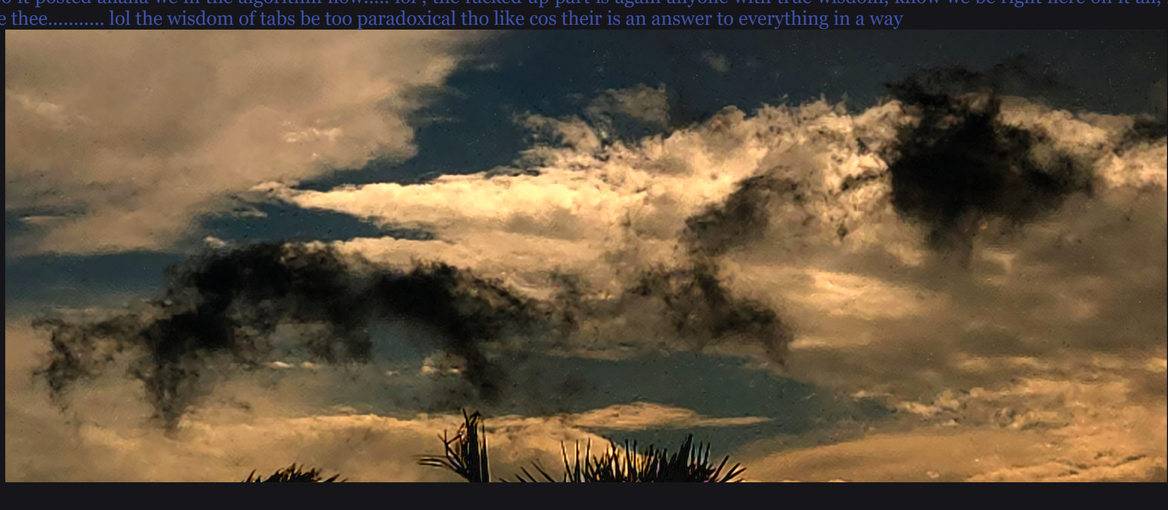
Reddit

hmm wonder if I can post on clouds on reddit ahahha share the dragon their and leave it in the air, the thing be like idk looked for the subreddit a little ago and cos like wanted to see if others could see it........ nope.......... might share a few and see if they get upvoted. pft last time we post on reddit made us look dumb when we are right again aha like fk just dont know what to do

people will prob think it be AI, but that is what the Simulation be, like we are products of the algorithms...

like well really who knows how this gets accomplished but sharing the truth to it all who knows could hit the algorithms tons of ppl use reddit here, like you do never know tho is the thing, life be mad diverse like we said, it is possible to post something and reach the top tho or the popular page lol...... hmm wonder if I can even post here thats why again we just never post or leave comments on anything on any site really.......... but sometimes they want you to have karma before posting on reddit...... dumb af but we will see lol

lets gooo it posted ahaha we in the algorithm now..... lol , the fucked up part is again anyone with true wisdom, know we be right here on it all, like nobody sees like thee........... lol the wisdom of tabs be too paradoxical tho like cos their is an answer to everything in a way



but ya the perfect song to all of the wisdom and that is this song again explained it yesterday in my writing, but eye of the beholder by metallica, fire again really one of the best, but it comes & goes the vibes here, aint happy at all here like the furthest thing from what a friend would make you feel like here

we logged into RS3 miss it all , life sucks................ like I dont ever feel good is what nobody is understanding here......nobody cares about you, only about themselfs..........................

we really like keep losing weight here 138.8 is what it just said, and again like its cos thy metabolism.... but im super stressed out which is what is fked........ like that we still eat something before work, and on break, not much, like but something and yeah but theirs be times I be mad hungry and just dont eat much, like we eat way less here.... just cos again this all happen before, I mean this is who I am and theyve made me sick like made me feel worse for sticking up for myself here.......

like in all of reality, we could snap at any second I cant take thee stress on thy brain, even if im losing weight, like we done lost our peace here, aint no relaxation, all I do is have anxiety about what the future be bcos of all this.... like really, thats why just again I dont just say it, your not a friend at alllllllllll here in any way, best believe that until something changes here...... like we expressed it all, I aint sure what to do

The Fucked Up Part of this All

is knowing we be right here on alot, like to it all, we know we right and nothing in life is right here......................... their is nothing else to say here though.....................

this shit be legendary and we are played here like we aint know, when we do know here..... w.e .... =(

cos like to anyone who knows anything here, just if this is how reality manifested to thee, what else am I suppose to think here, like it is the truth....... like that you couldnt find someone more down to earth here in all of reality, like lol.......... cos they aint got thy mind and thy mind knows .... all this again like just you aint know, we have been hurt before here and all of it, is the reasons why this be, like everybody wants to think the opposite here............ or they cant see it, we try our best to be a friend here & everyone again it is the truth, nobody cares about you in this game and thats why we play like this, like gotta play the game how its operating.... through the sequence.. =(

yeah like even cooler tho in a way here than leaving just music behind, like imagine looking back and reading this 1 persons thoughts, like again thoth or hermes did do in a way right like .... just bcos reading it you would obtain thee mind required.......... like you would know the truth to reality in all ways......... aint nobodys books are offering this truth that we have and again at times, like how do you share this truth, like just why would Hermes be nude tho like to post it, the dragon right like on thee, its not made up, its whats their in the light, like the full truth here, theirs no other way to express it all, or an entity on thy penis, again like it shows that on this tablets decoding, the shrooms, the heart, I aint get it all here............... but I do like................

just again to be on thy otherside of things, and find someone like me here again like idk what am I suppose to do post it all online, weve written alot like I said private but you never know if its in cyberspace tho it is findable........... like thats just how it works I guess..... like yeah someone who knew all this, like you could legit have a good time with here, like the fact others aint see or aint wanna take the risk, is beyond thee, maybe one day tho............ like cause its the truth of all reality, if this manifested to thee, then the formulas and initiation be.............. like their is no doubts, does it work, ofc it works......... =(

I gotta get ready for work here but yah everyday is the most evil shit here cant take thy stress, but idk like just cos publishing these things online like it does break paradoxes tho like who does that, but thoth ahahah like yeah idk, I just again question all things here, anything be possible................ like again you aint know what thee experience has shown thy self here..... and that is why, all the reason we need here I guess..................

maybe just even if it gets no views thy point is that it is their but idk we will see where the energy brings us, but lately it aint good at all here, like when simply could feel better, people wanna bring me down, w.e like......... I still feel like something is going on here like that maybe again like I said here, anything can be....... like thats just yeah idk.......... but our reason got us glued to this atm .... like that again idk if it wasnt what I wanted as I always said here, like it would never be................. but again if this is how you play, like beware, like cos without that lock in here then its in the air and we can play however we want here..... just idk like we will see where life takes us, but rn again it aint good, like we wanna go to a psych dr only if they are nice to me in a way but all this on thy records, being poisoned with bipolar doubling my dose here, like idk psych drs make me weary, like again why not get a medical card but we really aint in a good position in life either and its why im soooo like idk what to do after being essentially pushed down like this really tho, cos just to do that, maybe we could get bupropion back but it aint the same as ADHD meds........ like I dont know what to do cos its knowing if we just shroomed id be more than satisfied and set on the right track........ esp cos it is the answer to seeing the shadow, dont bs me here the ancient writings redeem this be the truth and thy curse....... life be mad diverse like I said, who can you trust..................... life is like again just a puzzle, we hope something we want is one day, but all this aint rn... thy stress be real, and nature can simply heal................. w.e like ignore thy warnings, thats on you....... all we can do is be myself here.................. and put thy word into the simulation

The Mind Operating at High Speed

like again just the paradox be like that we found all this cos of the ADHD meds which again the video I make on YT or posted and read way back when and put it on X was just that, when the mind works at high rate of rarity, that the things in the Matrix are seen as symbols like its just so wrong like for this to be thy paradox.. like this is beyond stupid how this happened here, like the gita says tho like only you can dissolve this curse................. and yeah like just what are we to make of or do about life if we can align ourselfs with a pathway, but the thing about it all and anything is cos of the creator, like that people need to continuing their success right like we got a way here cos of it all like its what we are suppose to do in our lives, like really not many are willing to take it as far as dying for something for something to be....... like we dont care, its all a game I guess, just want life to be fun and this aint, like again it doesnt have to be music....... but its what we aimed for always like just cos, wether it works or w.e like thats dumb, we do it for fun and thats the way............ like just cos of how much we express thy mind, lol like we are more wise than most, like I had that shower thought, right like how I said how wise are we to keep records like it in a way & im looked at like a fool here, but what is like I dont get how again like ppl believe in jesus but not the creator or thoth, like its so stupid, but once you find the answer it is, but even again to how we write , like we name articles by a code, like just that their is proof in the pudding here like we aint ever again read all that about like we aint ever believe like that that was the answer, but thoth is................ lol like their is no greater truth, it says it in the tablets tho that like everybody be initiated cos of thoths wisdom tho.......... IDK put 2 and 2 together here it all makes sense to me, but nothing in reality does here.................................. like beyond stressed when thy just wants a plant ...... how evil ppl are here, is disgusting af tbh

id have to say regardless its just.... bcos reality was generated in words, also, like it was written in code or script and we act that out like bots......running on scripts.........but yeah just writing or typing in general here, is that paradox you aint wanna understand, that we gain our thoughts from outside of the game here basically..... like all the wisdom says this, thoth is the writer bcos the creator lord of wisdom comes down into the bodies of man basically, its too heavenly for this to be thy life and be stressed, when simply , again just this paradox be strong af, like we aint want nothing but a friend to share like we dont wanna make friends with random ppl but to find thy pathway by way of like minds , to allow this to formulate in thy cauldron here....................... like we take these paths so that it can be...... cause if we did the opposite it could never be, like thy mind becomes entangled in others bs and we just stick on our track here.................... we got too great of a mind & a story, to think otherwise, like you should hear thy thoughts in thy brain and then try to tell me, like nah their is an answer and its what the good is and what right is as being a human in space in a virtual holographic game like just cos you aint see the same, doesnt mean your opinion here matters bcos experience contradicts........... like just its that again say it all the time here, aint nothing free here, you, me , them, like its all the same illusion................. and its the hard truth ppl aint wanna believe or dont care cos their thoughts tell them what to do in life, but not me, like its always been like this like just something can manifest out of nowhere, just like the entity did in thy life, and again, how cool to use this as thee leverage here but aint nobody seeing how real it actually be I guess.......................... =(

fml gtg to my job I aint ever felt so miserable here in my life, & yeah regardless still, like we aint trust shit esp with all the AI these days.......... like im so miserable you really have zero fucking clue here lmao like its beyond fucked like again forced here to see thy truth of all reality like I was I guess........... =(

9:45 pm 8/18

This week been again 3 days in a row got to go home a little early .... but im again Im only happy after work and I wake up pissed, Im pissed rn tho like in all ways here, like cos thy memories.......... thee brain goes through it all, again to be here from all this, like just like their is no one realer here than me to tell you the truth, nobody else wants too...................... like that again most people miss the pt of being alive, I aint, but its has went the wrong way cos of this corruption in others.... like again idk what to think here ever........... I just know I aint wanna be here and nobody has been a friend

When I say, aint nobody been a friend, I mean like in totality, my ex, my old boss, im not talking bout just a random friend, we can make those if we wanted we aint try, but nobody been a friend, all that their ever has been has been just ppl they dont stop like cos we know too much wisdom we learned and I share it and others think its bout them, it aint like that just I said, too nice to tell others like no, we dont play around with that here.......... like aint nobody been a friend and just said hey lets shroom like tf really tho, shit if someone aint do it before, then they did, they would be like, how my mind thought, why the fuck is this illegal, its heavenly, like and thats all like just it is how it should be , being a human on this planet, you know how many ppl seek relief and they just drink the poison, like believe what you want, not gonna tell you how to enjoy your life , but just again aint nobody share wisdom like I have, again they all could of anyone, they didnt, we did, thats the difference here...

like been a friend in a way of listening to thee story, like really, just its that, or just been like ya your are right here........... dont need to be told that to know that here, the creator knows and thats all that matters to me here, a friend in seeing how they pushed me down & pick thee up, like I do to others by sharing wisdom, we all become enlightened, wether you care or not, wether you realize it or not here, like shit this truth, like really here, aint nobody known somebody like me in thy world to share this experience, and again like just they dont want you to know the truth, and so they lie, oh its bad, it has no medical value, fact is, it spawns entities through doors, gateway, how can gateway exist, even drake mentions it in a song getting rich off gateway right like and that gateway doesnt once talk about using nature as increasing thy frequency here, idc like that is the point of life here tho to do what makes you happy as the cause of death is thy love of thee body here, like and reality is just a set of parameters so that a specific reality or dream does manifest..........................

well thats why we like music, in the way of , the person who chants again, just they know more of how the mind works than anyone else........... like that im not made here for anything else, but again just the world is legit too insane too me, like that quote by john lennon, the world is run by insane ppl with insane agendas here........ and that is not how growing up in the world as child is, but yeah like just I never believe it anyways, like that again just bcos of thy wisdom we question all things,

like bcos it just fits more music who I am than anything else, just that was always the goal even if I never spoke on it , like again just why does someone do that, different reasons in all of reality, but that the voice of Osiris basically, I mean again even lil durk had them albums, the voice, right like you just never know , someone with money can throw money at artists, like just that is how it works, ppl pay for feautres, like but it doesnt mean shit if you arnt a friend lol...... and that yeah idk like I said, even chinx mention the voice Like idk if I know them songs just I seen it, and yeah................ like just nothing else fits thee tho , like we got more hunger than anybody if it was my way, you aint even know like cos just idk nothing even matters here, like except that your good in your heart basically, like just again .... but it is true, theirs a creator and everything be an illusion, protected by how we are coded...... like that its programmed so you cant imagine it..... but it is it...... like the creator is hidden, but something put the Earth in space here, someone designed all things ....

and then why is the dragon, the mind of the Universe like what the actual fuck, and to play runescape like dragons dragon slayer, all of it, just hmmmm like idk we know something and ppl dont care or its like again a law of like that just protected by the creator, that the algorithms dont hit others, bcos its too potent of a truth, and again idk anything is possible, anyone that knew the truth like me again, like cos it is the truth, so why wouldnt you be interested in it, like life is so chaotic it aint funny, cos you can play this way, like theirs an event in the game which only happens like you either believe it or you dont tho , and again like I said before, you cant like do different then play like this, your memories be fucked, but since we play like this from the start, is why thee creator lets us stay here, as if you listen to my "the message hermes" on my YT like again the wisdom says that, the creator allows them to stay where they are if they are pious...................

but the paradox is stay where I am in thy mind...... like thats all, cos every other part of life sucks cos I was screwed over, like how stupid do you think I am here, like oh he just cant admit that he fucked up, no we didnt, like who fucks up after becoming mindful here

AI

Idk what this all is here, like I said , just we are that to begin with lol, like I seen it this way since I botted basically like leave the pc like the creator and the script runs............. lol just it is experience tho.....

and how hermes spell binds thy eye , like well like 3-4 years ago maybe more but prob around here like I think it was Nvidia who came out with for streamers like an AI thing right which replaces your real eye so your like looking at the camera, just ppl do that too like I seen on reddit plenty, thats all we use we dont go crazy over anything, but that like ya people have shit that changes everything, like you cant trust shit online, you can claim what you want in cyberspace....... but we claim the truth......

just cos like ahahah I dont know what to think but that why is it that when again before reddit on mobile like you hit search & it comes up with topics from the algorithms news, but its like I dont get that anymore but its how I seen Ariana on it...... then again just idk like cos whats the chances here we aint go to popular in a min esp on mobile only use it for my short break but yah cos my location is based in the UK on reddit we see that more, I did this on purpose but I saw her, and yah like idk just saying this makes sense even more like cause I just saw the photo like she got that tattoo, where my ex had the tattoo lol like idk idc but its possible is all im saying esp in this day of age, to make up a story, esp what if I was right, but yah I honestly dont know

then I think of like idk iv seen her sometimes on reddit, not much right like just chances tho, and its always been oh this person like in wicked ahahah idk why I care its just cos this happen, then like oh its this, like just idk, we dont want 2nds here ahahah like really why would I care if she didnt but it still makes sense to thee why I went this way & then I think of like well who else make music thats popular ahahah chances like idk anything is possible is the paradox cos like just idk, if a female makes music, like she could use her magic on you to do the same, like and increase thy blackhole..... but again we dont look into it or anything, and then again like yah idk we only liked ariana cos these paradoxes ahahah but yeah but that is another paradox just like idk why cant it be ahahah like that , yeah like cos its questioning all things, what if it was to create an illusion and the person aint even real, like we grew up on screenshot fakes all im saying is it possible and it would make sense only in a way of blindfolding, but yeah idk

I just feel like its weird again I wanted Harry after the entity tho ahahah like shes the first woman here that I was like this would work with me here ahahah and yeah like cos fact is we spent alot of time and I think even if she didnt talk we seen algorithms here too like idk , its just that like cos I dont think of this new woman like that even if she loves me, cos we really like dont wanna do that to ourselfs in this predicament, but its weird af she did this to me and again what dont you get, it aint the 1st time, but that shit cant be happening at work, you either make it be or dont do that legit, like cos even when your with a woman in a relationship, maybe have kids, you still think others be attractive....... but again idk life is bout finding thee other here.......

I just think cos of everything manifesting that it is still this, ahahahah I cant stop cos the numbers and all of it, like idk what else to say that is thy reason and we come with wisdom saying that is how the matrix is..

but again so beyond all this im just saying like she dont care so I dont, the one I wanted, but we tried, idk how else like its fine but you could still chat, like if I was famous, like we having fun with that, in a way, like js if someone experienced this, like you know their right....... im right....... like so I would do something about it tho and experiment cos the thing is that again it would and could be, cos of thy power of thee truth........

but so its even like who do you reach out too here, the wisdom speaks for itself, how fucked up is it, to tell you, you got it all wrong...... like mckenna says like it really is like that, and yeah but again not everybody has the light, reality I believe is fixed like so intelligent your dream comes true no matter what like everything else is just automatic and you cant control that but it is possible............. like again you cant wake the world up here like that mac song, but you can wake up yourself, and aint that the paradox, bcos idk, how can like even ppl friends of ppl who make music, not wanna join in or do thy same I guess............. lol we used to back in the day again its all the motivation I needed to be like if someone else can then I can...... lol

& bcos of the entity all that it says about the blackhole that when it does eventually manifest, that again like its suppose to be like the choosen one like that reality collapses inside out, space becomes time and vice versa...... but yah idk it is possible, like for someone to be nothing to become something if its in the coding of the game and thats the type of language you need to use when theirs a programmer of reality in this day of age, anything else is stupidity here to me......

what if I was right on above, what if I was wrong, what if the wave didnt hit yet, like again just this is your life you can go whatever way you want here, the only thing locked in be what you believe can be here, like if you think it can be, its only possible bcos again all we have is thoughts, nobody knows the future.. like you can be up & go down, you can be down & go up, how, if its in the game here, simple..... w.o that logic, aint nothing anything here to me................................ like that I can be wrong & still right, I could be right and wrong, ahahah like just that the truth be the truth always.............. how do I know all this isnt a paradox leading me elsewhere, when nothing has happened at all here and I hate my life like we just dont know tho.......... but we got answers .... if I was someone else, id be like , we are chilling and doing shrooms lol............

my most fucked up part is knowing too much here and this shit with names at my job, like everybody tho is why we are like wtf, all of it, all paradoxes like that idk we think too much but in a way it is real like but yeah like that bcos of this all manifesting here prior, like we come into a place where like their is mad parallels, bcos of words & all that memes, like that it proves that the future again you cant know it...... but you can sense shit like that if this all didnt happen prior I wouldnt be aware of this but it did and thys thee experience.......... bcos IK what I saw here...... and what happened........ all of it, why do you think I dont like others cos they never helped me but again like thats the last thing you do to someone here who has a heart .... but yeah like and just its that like I said, I always think of what I used to do and living up their and how different life was .... but again the whole pt of life is to find thee soulmate ahahah like chances, that again just who I am I called my ex that tho like all of it, is too weird like cos just what we seen here..... idk...... like you already lost when ye moved the 1st piece of the board here, like that we move on without yee, lol............... but yeah like really cos you had all the time to be a friend & you werent, wanna think you know more , either way its in totality thy calling and again just reality be too weird and nothing is worth fighting for if it aint just it.......................... like that is how we think and move here............. lol....... =(

the thing here is I never call ppl by names cos of my adhd I forget, it doesnt bind in thee mind, like my brain dont work ahaha like its truly fucked no one thinks like nah were good to begin with, nah medicine be the red pill here ADHD meds........ lol but yeah like all that..... just w.e what can we do but express thy thoughts we get from the creator here like...................

its all also again like we kill thy ego and dont care about sex, were not gonna stay raging hard here but kill the heat and like lay low here........ cos that shit be stupid af, like you gotta take ya own head before they take yours ahahaha like what are you suppose to do like pft its just whats fked how like a man when hes turned on like you can tell way easier than a female, that shit be like pinochios nose here ahahahha

like so its that reason, the pathway of wisdom as you see, like just thats all if my ex didnt come to me, chances wed have sex, like cos that aint how we move....... like cos idk it even says it in tablets like .... our life is thoths, believe that, or all this wouldnt of been, what more evidence do ya need here.....

that we rather go out like this, than living a lie, like shit aint nobody write like this, who would wanna read something like this, but ppl would lmao like just the world works in mysterious and strange ways tho.................

Distractions & Diversions

the reason I just believe above again cos if it is real.... like its seems like a way to divert energy....... ahahahh like idk but this thy truth here still and we just use the algorithms to our advantage, like that again idk what this all about........ but it should be fucking something like what else am I suppose to do, anybody at anytime online coulda been like, yo, lol like how hard is that like maybe my dreams are too big, but it is a dream.......... lol

or that again I think of all things, like its why we switch up the pathways here or algorithms.....but we do use what we have in the library........ diff reasons always........... but yeah like that if its not it, like either way it could all lead me to something else....... but only if it was worth it, just idk this experience be like again, why did I find it on the walls in egypt and like not online like I have tried to show you thy vision........... just dont know how else like that its something everybody should see, like leme show you the design of the game............. and in all ways............ like shit is fucked .... like that is it the truth here too tho like its all virtual, and shit is corrupt, what would you do tho honest ahahah like I dont speak 99.99% of these thoughts in person also...... never , never have that space, all it ever is , is like slavery here, idk like I have zero motivation in life cos of everything , cos the tablets is thy curse here..................

like that yeah idk , like again cause if it was real like again idk just cos it is when magic can be thee most here to me, like before anything happens, bcos its that again iv been pulled into this since thy first gf, like chances. its too precise here, like we cant play any other way is the truth, lol, just idk, we like having fun is what I will say, this sucks tho

all this suffering like legit idk I could never forgive anyone here like promise, cos its always been in the sticking to thy word here which is when it finally works out for me and you get fucked over back here like basically I guess, lol......................... but yeah idk we are again way to in tuned to the matrix here...... this shit be real what happened cos I ate shrooms and they like me, the creator lol ahahahha like why would it be so heavenly, he let me fly yoo ..... and all others try to do is chop thy wings, but our wings be again its too late, like we flew here , like we saw something 99.99% of ppl dont think could ever be, its like just again idk just you can only be you in this game I guess.......... =(

like how the fuck do you think I go around ever since shrooms in a way like right in my mind I was like pft we just in a flesh suit here ahahah like we are bots..... like that everything around me that is the matrix tho..... like why lawnmower man be pretty good in that aspect.... lol, but yeah like how you think I go around life like we have zero dopamine here, no jokes, like no meaning of life, and like to just walk around with all these thoughts here and knowing what is real and trying to show others, like again ppl claim this & that online, all of it, all of everything nobody shows what I have tried too here, like shit idk like cos why wouldnt you, like just dont know tho .... its the game part which makes me think of again harry ahahahahh I liked her tho im pissed in all ways like cos she gamed so to me its that mind thats all I said it before, many do, but thy experience like we barely went far into anything cos like shit has been different since the entity, again only makes sense to me , it is something out of this world, like wtf, anything else aint even worth it like idk , it says it in the wisdom, it prepares them, like fucking aint shit happen here tho like we legit are pissed and dwell, but the suffering here is when thy nature needs to be offered, like every part of reality, is so corrupt, like they built the pyramids and temples if not a myth they left the answers..... cos of nature, man useth nature when he worketh............. like that is the good, and reality be so fucking dumb, like again as if its so dumb, like that this thing here actually bes in my life but it would be dumb to just almost speak thy mind, but no1 ever expressed what or how I do here.......... like what if something did happen that was good, like shit then again just we already known too much I guess, even if nothing worked out yet, like cause just pft all you have is your thoughts and this is what thee good mind part be about, but nobody ever fucking listens not a friend cares, im pissed legit =(

this is like the most sacrificial type of life to lead here...... like that we dont move, we the sloth on the branch here.......... but yah idk like life was different before, all this, some BS here, like I dont feel good at all, the parallels be real, idk , going insane actually..... =(

hahaha like really, what would you do with thy experience.... like that even when ppl think they get it, they dont, bcos it aint happen to them like it did myself..... I like that song only cos this happen, ahahhahah it plays at work legit everytime I think of flying out my window theirs a few legit but yah ahahah fk is it, like iv said it before, like break away , ill spread my wings & ill learn how to fly..... i mean pretty accurate but its the same fucking music im pissed its torture compared to what I did and how I was reward before, but IDC nobody cares about thy truth, then like w.e im ready to exit the game here lol =(

how cheesy is that song, ahahahah like that shit is like 2000s but its what different here like growing up before the internet, you just had to be their and experience it, it was like cave men shit, like on everything ahaha everything is online these days like shit was like it didnt exist, imagine just none of this did exist tho and again idk to me, its what most creepy about like again what is the stranger thing me seeing reality how it is here or all this lmao like shit idk to me I just I see reality like it, but I feel like shit & aint know what to do here...............................

but yeah bcos like that just is the fked up part....... like shit has changed drastically and people still aint like people are insane, like chill eat thy flower of life is what thy creator says, everybody got it wrong, but thoth got it right, like its such a blackhole on the planet, the pyramid, that again charging matter be real, like just idk reality is fucking legit insane here again at same time....... history just to what it is now like again, just this aint the way in a way ahahah it can be, but yeah like idk thy mind be different I guess its going wild pondering rn........................

everything sucks these days like just shit be different and its again their aint no pt of life here like what shit their could be but their aint here.............

like the way life has hit us before, to now, like this is fucked this is thy paradox........... ahah =(like really im just a victim of the algorithms just as anyone is here............

Fool

but theirs too much reason w.e we stated it all here again just youll never be able to tell me , you fooled me here, you fooled your ownself , like we aint go around talking this, we just writing it, like theirs a difference....... like we are sitting here and your reading my thoughts, like that is like thoth on his throne, thoth writes, like why wouldnt we be obsessed with the truth here.............. likeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeee =(i aint happy at all here im mad stressed and again like sex aint the answer.............. a better life like this is like wtf, shit and we got fucked over see it aint like we didnt here so idk....... like fact is we saw the entity, just idk its gotta just again its thy reason......... like its super cool, like pft to fly..... it wasnt a dream like it was the netherworld......... like again just the entity used ancient magics on thee lol like what.... poisonous shadows tho like again idk what to think, like just our soul left our body and we were flying.... like wtf just paralyzed and idk their is too much music on it in this way, but not enough showing what actually is, its never that....... i dont get it...... like cos its the most high level thing you can be shown basically, like we didnt eat shrooms and see this, we ate shrooms in 2012 and the entity came 2018, same distance apart, took our adhd meds, like I said, protected thee from this , like what we know something and this aint it here........

its just this weird aspect as if idk I saw a black shade at my door here like the 1st time tho is this is how I think others percieve it tho like that they cant see what it is cos their spell binded........ but it says hermes wakes them up like 2 times or w.e right like that is what happen and the 2nd time like my video , he made sure I saw him, I was entangled like he was a black hole he/she, it , like its facts it was just an entity ahahaha =(like super cool, most cool thing in the world and no 1 cares....................................... shit like I said fuck spiderman, we got shadowman here......... shadow entity lol...... =(I mean what else its kinda all based on again their are super natural shit in the world like...... all ways, but nobody wants you to win here, like just idk we dont fit in anywhere but we could like we just a sage and stay to ourselfs knowing their be most peace, like really tho idk life should be something else, theirs so much iv written recently cos of it all, like idk , again energy just be, like maybe not seen, but energy be energy in this way of like............... its cos we stay single....... its cos this experience like their is no other answer for thee mind here, like we have the answers and still like its the answer to finding thee one, like the one who appreicates here and knows like its just an entity........ like the meaning of life I guess unless it just is that, it aint that aha cos thats how love be and again just life be again , just the way the game roles out to me is just you dont know the future, so how you playing I guess ..... lol....... =(

we have every answer but what to do in life, like we already our acting out our script here...... like again pft you aint no fun lame-o legit like I wanna laugh im pissed off, we go crazy and laugh when we pissed off like but we are actually pissed off here....... super stressed, for what, being harassed to begin with the creation of the blackhole, that the entity knew something was about to happen, but what happen is out of this fucking world according to everyone doesnt have a clue, but we follow the way without trying...... like really things happen in my life so randomly bcos of this then that like it was never just me in a way and thats whats fucked, like so again how else can we play here........................

I mean this is the thing about being 1 human in a world with 8 billion.... like we are one speck of sand on all the beaches .... lol............. like but consciousness is all their is........... like we think too much cos the shrooms opened our mind and the gate to the immortal creator ahahahha like I just love the language of it all cos its the only way express it but yah idk like just bcos of how the world works like just...... insanity, ahahaha like the internet opens thy mind also in a way..... but yeah idk like just again who talks like this be thee choosen one , again we do give ourselfs props like just you cant change who you are ...... like that virtusoity shit like cos of my coworkers too like the names of my boss all that shit but the fucked up part is that sid shit ahahhahah like its too good and it shows the virtual like just reality is insane these days like pft all things, like dont have our adhd meds, pft, its what magic be to us....... =(its not like again just having it be key, it works, all this is dumb af, like just idk bcos the paradox to begin with is all you have is thoughts & that it is in the mind..... like that you power up your spacesuit of flesh with nature and again why pharoahs existed..... why would a pharoah show the entity with shrooms on his head, our video is too authentic in the way of using actual glyphs or symbols to show thee...... and we get zero nada credit ahahah like just idk its more mysterious than anything........... like cos it wouldnt be if thy didnt do something right & like just pft, we know what we saw here and its vibration was again out of this world, like just i dont get it cos we ate the flower of life like our mind became opened idk alls ik is its why im ancientxthoth online on youtube only now or my flickr got my pics again life is miserable af rn we grew up tho legit in the old world........ lol

Wake Up

all i do is motivate others in a sense or am open to give thee the algorithms like we listening wake up by fetty wap right now, we only saw it cos their was a video we saw it years ago but its mad old well I guess was only 2-3 yrs old the video when I first heard aha its 10 yrs old now damn, but yeah shit is fire, saw he got like in trouble idk all things be lies to generate attention right like ppl sign contracts to not talk here is the paradox I guess, like really, like but yeah nobody motivates me back like all this does is make me stressed ahahaha but again like why do a bunch of music since I made thy library also you put in order by name, like so many artists use the same song title sometimes its the same remix like just idk everybody has their moment I guess, like but just life can be simple but its retarded af, like everyone wants to vouch for this and that, ppl cant control their own entities like just lol but yeah im pissed, it is a good song tho like again he only shows like I dont care if ppl are signed to this/that we just listen to vibes ahaha like but he has mad off shit like doesnt make sense, I think again ppl are just them at the top, but yeah like even again the rap game was fire before, maybe cos my life but reality in totality sucks ass rn like aint no dopamine here.. like legit punished as if for doing nothing in all of reality, like for someone acting on me here. it is the truth like dont know what to say, to go down just everything, like we seen too much here cos the internet ahaha like fk life sucks so much and again a friend can motivate thee but I cant like thy adhd like cos of thy experience, like pft if you dont know what to do in life thats just again why I said music ahahah like wtf, an entity spawned here, how can you not see that shit........ but yeah like idk doesnt have to be but id never again just like so much shit be just dumb af like we wanna just be happy....... and living in this world is insanity maybe I do shrooms wasnt here had meds wed be like ok we got this, but we dont rn like but things can be changed....................... and idk thats enough here we going insane really like its week after week shit here and without meds, im burnt out af here, like no reason to do anything but sleep at home, not game like cos ac mainly but yeah theirs too much on thee mind, we got off both meds like both meds worked fine like wtf all cos of this im super mad, like again I just think like I dont know but thats where you want somebody like we dont follow shit and I cannot be beaten regardless says the entity lol..... =(

I like them again tho if life was better aha it is that tropical vibe shit it can hit, if you do it right, like the island life, Atlantis ahahaha but yeah just idk we said how this happen like this is stupid af like to me it just again how can I not think like this, we different like again we say fk the world back like cos just the truth be the truth here , only the observer can express what is.... or it aint if its not in writing I guess lol, like just yah ahahaha that song is why fetty was legendary before, that new shit he dropped, like idk shit prob really did happen and thats again where is this line drawn, like what, ahahaha shits fucked, like just idk we just know to question all sides of things I guess like ahahaha our voice speaks to us....... but yeah mad tired its already 1210 pm like fucking pft just Idk im always this close to like actually losing thy mind again life is going nowhere .... all it is ever is , is one sided here.......

whose just jamming to wake up by fetty at 1210pm in 2026 and writing this but thy legendary ancient thoth ahahah like really life could be fun, its all about thy words and vibes and mine is too fire for you too handle , like but yeah idk again its as if again like just the truth of the simulation , like lol but yeah idk this is why we drop music sometimes like it takes our mind places and reality stays the same atm , like pft

that like nobody has thee experience......... like we know of hits that make ye vibe aha ...... =(

like who listens to all this like just idk we use what we do cos experience...... lol like but it is like again why did this happen then and again this or that its the truth of the creator...... and I aint believed, like again stepped on some more here, pissed, like all I can do is dwell...

fact is, we created an alchemy barrier by studying spells like we always got the best song for the moment, nothing I can do but automatically let the ufo take me to my destination here.... lol =(like im sad aint shit change, aint nothing stay the same but the thing that doesnt corrupt, how the game is programmed aha like wtf.

cos just its that we did it for like 6 months easy all we did was listen to music 24/7 like slept 6 hrs a night here before, felt great , it aint even worth being alive and cos like I aint do coke ever like shit we took our meds, like all of it is insanity, if medicine helps someone they should have it , so its corrupt in every way like wtf, just cos I write, like thats what the writer does while you reader observes someone else inventing reality lol but yeah so like it just happens automatically, what if we deleted it or didnt have it and moved different, iv done crazy things before but yeah nah it helps, like in a way.......... like but it doesnt if nothing ever changes, again like we have fun, we find a good song and shit life is better with music, like feeds thy soul .... lol but yeah even like again gaming on the side come up with new associations, its all a paradox, like everybody else in life is like not worried like but me I am like pft aint know what to do but anything can be is again thy paradox...... =(

cos the paradox be cos this happen to thee and thy thoughts with all of it, like just that again anything but this here, like pft we already worked hard is the thing tho........................ like again just pft , tryna take me under here but we stay on top .... in our mind, really like their aint a like just the best things come to thee mind when you do do nothing in a way, and sit back and watch the world through the rearview as if its creating itself like inception, all of it nothing makes sense ahahahah what else am I suppose to believe in..........

that again just even again here like just everything be wrong honest for the wrong reason, like we just want something to be here, not to suffer, like just again dont see the point when imma win in this way of anyways like it is the key the answer so w.e like .... just going to bed but yeah just its the truth I guess, like just idk im mad tired like really how can this happen to me and no one bats an eye , ffs, like again against thee for the wrong reasons in all ways, like Id never let something suffer here...... like pft thats all I do, like zero motivation in life for anything cos of being pushed down so much..... like again just aint nothing worth it, llike its fucked but true, like things corrupt........ and why is my life like this to have these thoughts tho its again like adhd meds helped this doesnt, iv never been more miserable......... like just and that what again like their is an answer and nobody wants to be that friend like just cant stand life ....if it was fair then wed be aight here but were not, like just dont even know ahahah but yeah like.............. just cause again what else is their to say, again thy paradox with the meds & it all again like not everyone has ever had a seizure but when you do shits fucked like same thing as this out of body thing again kinda weird ...... like pft it could happen at any time we used to always have flashbacks more often just cause like we explained it before like when its your time to go tho like shit happens lol ahaha thrashing around in thy flesh suit blacking out like really tryna like you see and your like out shit is wild the way it happen, but yeah idk, this is like beyond fucked in all ways, cos something should fucking be by now like pft again maybe something good will happen but all this for the wrong reason, what a waste of time & of life, could be having fun, not as stressed, the reason we stressed again goes back to that event here like .... all of this insanity, ahaha like we want peace here......... =(

getting late af but yeah like ahaha I just keep going on but I was gonna say like...... its only like this cos of what I express, and how I feel, I dont feel good ever, like ofc the meds make you like not care in all ways.... we aint get no relief here at all........... want shrooms or some thc, yah adhd like shit im tired af like their is no pt of life, cause of death is love of thy body, like really just I dont see a pt in anything here........ just I mean adhd paralysis is a real condition all of it is, we aint lieing, just cos we wise at same time, doesnt mean it aint how the simulation actually operates here.... like wtf we come with reason and get screwed, I dont know what to do here cos I feel not good ever........ but yeah like life could legit just move on here, all of this like we aint do this before until we aint know what to do here .... we never wrote as much and again with or without the meds is thy curse.,... who we are here so idk what to do like you could save the one with the light here and you dont, like pft fact is we gotta say it cos its the truth............ like again but we have just a wise idea about reality regardless, like just who we are is the reason why this all is thy thoughts................ again seems insane to think it aint something as intense as the entity or like again like pft just idk what would you do is again the real question I guess...... like really tho....... but try to reach out in cyberspace about this being like we dont even we stay were we are like we dont go online and post it places really like we dont care what others think cos it is thy truth and only thing to believe in but we going to bed here legit..............

Candy Corn

lol we back real quick always ahahah im eating candy corn in august here, shit we ready we wear that mask daily but yeah no jokes life be miserable ahaha it just brings back them memories I guess ahah =(

promise we going to bed here but I was watching again did this before like that unwrapped channel used to be on tv back in day , ahahah weve seen plenty years before but candy corn im like hmm google this and ofc it exists lmao perfect cos we wrote about that above tho

hahahah shit dumb af

8/19 - 1130am

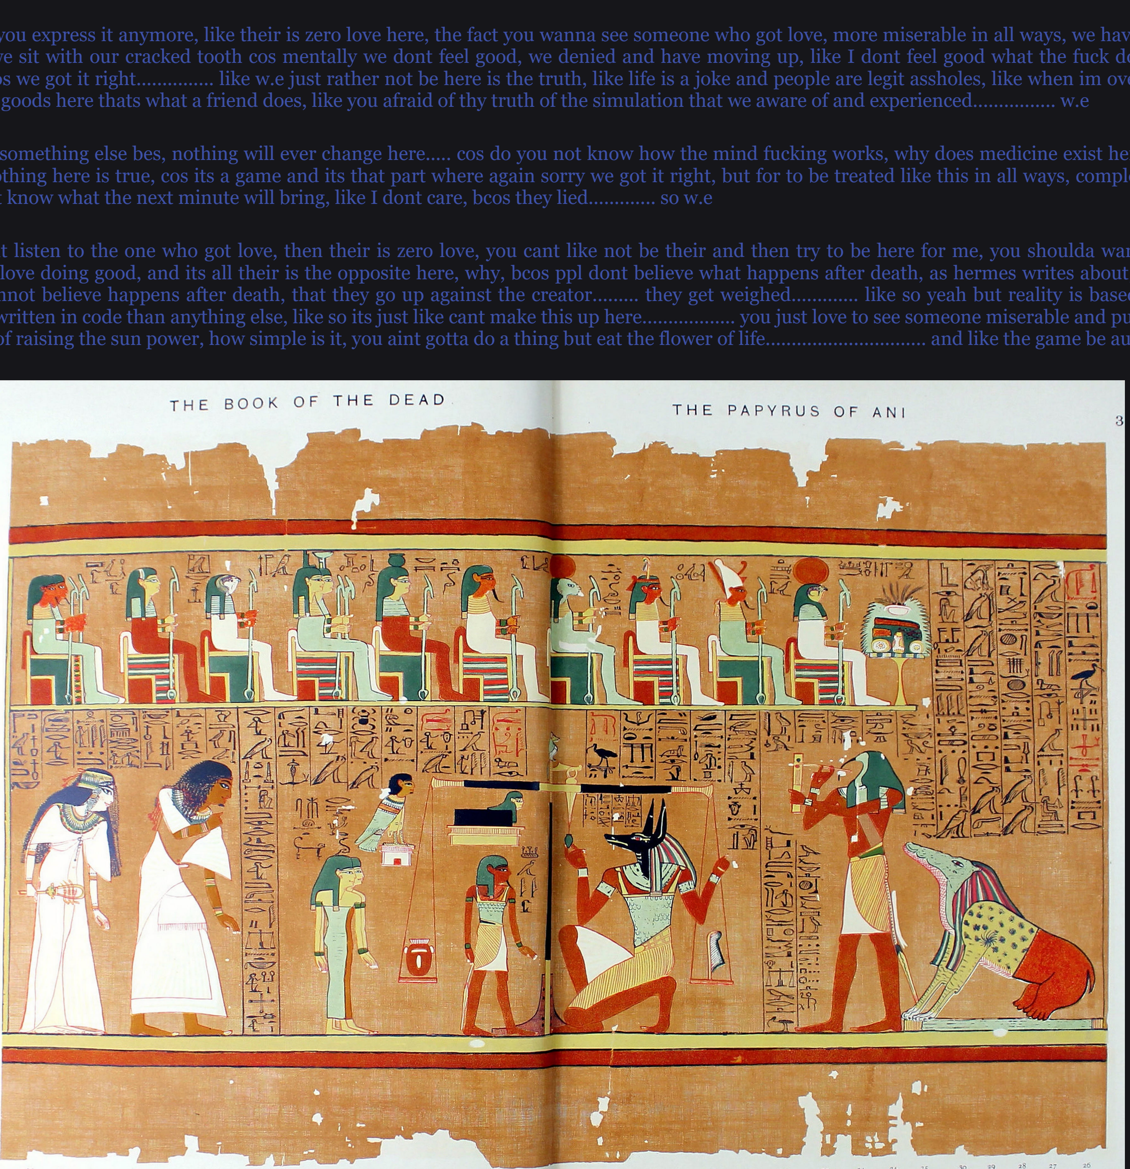
aint got much to say iv said it all here.......... aint feel good at all & like yeah its beyond stupid..... cos their is an answer, aint nobody wanna believe the truth or help another human here................ like just the fact you got is ass backwards here............ always, like we never change who we are here..............

like burnt out is an understatement, like again just this is beyond dumb, bcos thoth has a book saying like oh the tablets opened thy mind, and thats how you treat you other here, you dont help them, you dont offer medicine, like their is no other way to view it , you dont care if I fell off, why cos I found a med that actually helps me................ we just dont care and given up cos nobody is a friend............. again wouldnt need one if this all didnt come to me like this, again ill never change thy mind , Im not even allowed too in a sense......................... like nothing be free........................... so all this does is make you look like a moron, like that you would watch something suffer without helping the one with the light here.......................... their is nothing else to it all

like how do you express it anymore, like their is zero love here, the fact you wanna see someone who got love, more miserable in all ways, we have legit zero dopamine, we sit with our cracked tooth cos mentally we dont feel good, we denied and have moving up, like I dont feel good what the fuck dont you get here, mad cos we got it right............... like w.e just rather not be here is the truth, like life is a joke and people are legit assholes, like when im over here like yah pass the goods here thats what a friend does, like you afraid of thy truth of the simulation that we aware of and experienced................ w.e

so just until something else bes, nothing will ever change here..... cos do you not know how the mind fucking works, why does medicine exist here then, we again like nothing here is true, cos its a game and its that part where again sorry we got it right, but for to be treated like this in all ways, completly wrong, like yah dont know what the next minute will bring, like I dont care, bcos they lied............ so w.e

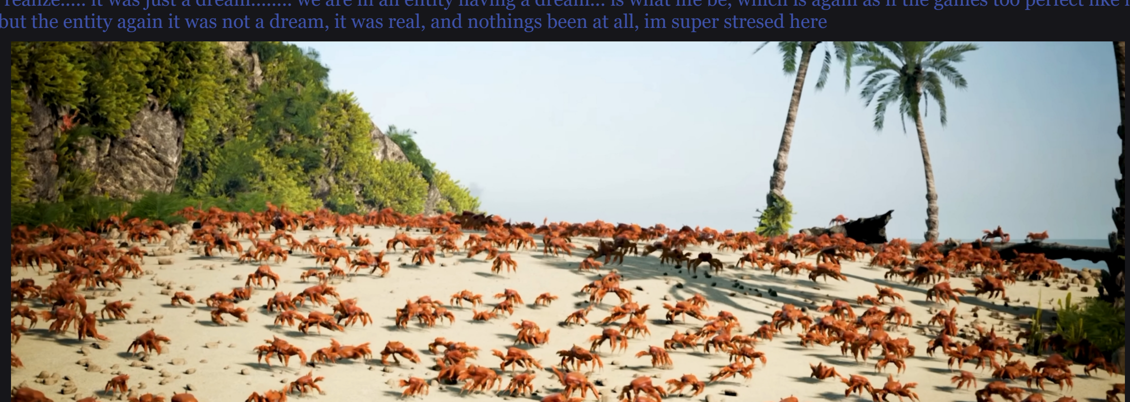
& if you dont listen to the one who got love, then their is zero love, you cant like not be their and then try to be here for me, you shoulda wanna see the person with love doing good, and its all their is the opposite here, why, bcos ppl dont believe what happens after death, as hermes writes about, what is it, that man cannot believe happens after death, that they go up against the creator......... they get weighed............. like so yeah but reality is based on words since it was written in code than anything else, like so its just like cant make this up here................. you just love to see someone miserable and pushed down like instead of raising the sun power, how simple is it, you aint gotta do a thing but eat the flower of life.............................. and like the game be automatic.....



like no jokes cos obv our heart be lighter than the feather in the sense of who names them selfs ancientxthoth online but someone who knows the truth already like your heart is heavier than the feather is the fact like it is just facts, maybe you should change how you judge things says thoth cos thoth will do the weighing , like that their is a truth to the whole game we in, like this happens to me , and im treated like shit, when actually like again it would and only does happen to them that are pious.................. if you dont have the one you love, doesnt matter where you are in life, like you aint got nothing........... and you could have everything, but that is the way the game works.......................

Youngbloods Crab Rave

chances, like I sometimes again test reality like right we look at our subscriptions with that pocket tabs thing yt extension, ybs youngbloods had a video from 3 days ago right, like last video was posted 3 months ago, we found that in merrimack, again idk like all angles, I knew of a friend that played RS growing up and that he always repped bloods ahahah like in a dumb ass way right like wore red often ahahah but yah like that we go from watching that this morning, to noisestorm - crabrave, which again just I think of wrote about it in my other book like that theirs the crab emote in Runescape3 and thats what it is....... cos he catches crabs sometimes in his videos, but that be living, like IDK the weird part is like again here, my friends got back into RS after the entity basically like that is what we did, fish.......... like really and botted again but then we played for real....... but yeah like its weird cos even then like we aint know tho that mac was called larry fisherman...... like we aint keep up with any1 like I said........ but we are more like the woodcutter here, ahaha like that in fly shit by chinx hes like chop you up like lumber, ahaha but yah idk random af but proves how thy mind works, and again just idk, like its taken for granted the thing that happened here...... but again I dont know, for all IK nothing could be, but anything can be....... like that me believing it is this, could push me somewhere else where im appreciated like cos I dont feel like that here at all........... like how do I know maybe it was it and someone else consciousness noticied and was like nah he got a pt we take care of this but only in thy dreams, to believe it actually is, is insanity, like but its dumb to think its not again , like idk nobody has thy mind and experience, but anybody can claim that, but who writes.............but thoth , like that either way the creator enabled thoth to exist just like us so anything be possible......................... its again as if we were choosen bcos of it all in my mind, but again nothing is, like im not believed, dont need to be, we know thy truth.......wouldnt wanna be like someone else, just saying that is what makes us different like cos aint nothing turn me on like being in a good position in life and this aint where we told the pilot we wanted to go here, tho we fly our own planes..... like just everything...... from even again like playing MSFS 2020 and 2024, like I said, that game is the only game out their that also offers this parallel that its all a hologram, we are inside a game rn & then like I said, IDK like just if life changed we could move on from all this & anything can be, but its just like its hard to trust any thoughts bcos my thoughts rarely tell me I like someone.......... like really cos if not id of been with others, but the only few ppl they have, like it aint been, like then again I said like this has happened before where woman try to manipulate, that is the same here as like when they want you, nobody can resist but thy master...... and all this for what to suffer everyday, cos of something I tried to protect here, again like w.e just all that matters when you die is that you did all you could, like you die and just wake up and realize..... it was just a dream........ we are in an entity having a dream... is what life be, which is again as if the games too perfect like it is why we dream .... but the entity again it was not a dream, it was real, and nothings been at all, im super stresed here



his videos tho be like watching somebody live a dream, like no lies, love the ocean, like all of it, been to the beach often back in day, like shit I couldnt be more upset =(like life can be awesome but it aint been, all I see is people being evil, like dont need you, only need 1 other person here................

Music

10pm - 8/19

Chances just got home from work, like cos again just this is what happened in my mind here, like my coworker I told the story of it in this and that like again he doesnt always work at my store anymore, he makes like legit an assisstant grocery manager makes like 60k while a manager makes like 80k again bunch of BS here, he was an assisstant before, but just stating the truth cos like thats the parallel here where hes like again 8 yrs younger than me, but he was up in life and went back to doing what I do now but then again he moved back, I think at times we motivated thee, but yeah he was their today ahahah , he said I like this store more than other ones ahahah im like tell me about it, not really but yeah like cos everyone sees things and does things differently and it can get stressful...... but again yah like my whole paradox is all this that happened..... like my mind, the meds, the entity, and yeah like just dont know.... thats the thing about me like its hard to just wanna be someones friend also after this was like im not gonna annoy someone here cos we got his number aha like that again just idk it links more if you got their number in a sense...... the algorithms can, idk consciousness be diverse..........

but yah , like Its just been over a month here since I wrote this person the note and I dont know, like idk alls IK is we gotta work together, and again sometimes mad clsoe like handing eachother shit to load the floats shit sucks ass legit going crazy here, and yeah just idk like she does wear a black sweater at times again entity, I just idk its that she did that prior too like before I said something, its weird for her to do this to me and nothing be, but again like we dont know what to think cos nobody knows thy struggle here, its just like add another one to the manipulation here like................ I just hate females like cos they can do that to you if your a man and that is facts its how it works, but again just idk we know too much at end of day here....................

Brodie - Brody

oh so idk sometimes at break I look at reddit only got 30 mins normally and sometimes I watch YT vids like not many but a few, cos it can be interesting, I just think like mr beast, they are like bear grylls videos, you aint know what you see behind it, like that it may be real in a sense, but they record to show and make it more interesting..... never look into what ppl say but that is what entertainment be but on another note

how I mention ..... YBS Youngbloods on Youtube, from Austrilia right like but they call him Brody..... I did mention this before at times here like all we do is repeat sometimes, life sucks more than ever but ya Brodie or w.e and that hit me earlier said I gotta mention that. bcos like alot of rappers say Brodie..... like Durk in that song, watch yo homie, many others and bunch of rappers say that and thats my last name.....Brodeur.......... ahahah it just like what I live with here .... I dont get any part of this all rn all I do is be miserable .... like we didnt even do nutting wrong here............

Winning thy Game of Life

& just idk like what we did again when the entity came, is just that again we had time , we watched some streamers and like our associations became changed..... and we learn of like this or that and looked into it, like that Parkway drive tho is from austrilia, and then also like British and Austrilia people I think they got similar accent but they say like mate and bloody and I love it aha im pissed cos just im way to nice to write and nothing to ever be, like I cant ever forgive.......... dont even know what imma do, bcos just anyone with a sense of they care would recognize thy truth and help thee........ they do the opposite, they give me the wrong meds, like ADHD works, now my brain doesnt work EVEN MORE.... like how simple is this to understand, the whole system is corrupt, but we beat the system by eating the flower of life................ that is thy truth and you dont wanna listen here....

again I said this before tho I think parkway drive and that other band.... upon a burning body, was from this streamer MuteX like just idk its who we watched their was a few tho bcos in that upon a burning body - scars, and in bottom feeder by parkway like they have a controller at times it looked like him..... and just that is the truth here...... he was like pretty good I aint keep up with anything lately, some ppl again accussed of cheating but you like idk miss cod tho lol but its bcos its when everything happen and again like gaming online in anyway, the algorithms tie together more, its all just consciousness.......... experience always contradicts like that idk lol..................... but this is how we used everything like to go where we aint venture before but now we dont do shit..... we tried, got screwed over more, its so fucking stupid cos their is a like real paradox here in all things.......................

we never enjoy ourselfs, our mind compared to before, if I made a chart, the line is below zero here like it was above 100 before .... just like theirs nothing else to say, theirs nothing to say in 1st place here, just my mind is twisted af here cos of all things and it aint cool one bit here....................... like you can feel comfy in life and this aint it here............... like someone experiences death & now also they dont care, they know the truth, like really what would you do....... iv followed thy heart like wtf, been open, just cause again idk it seems like your tryna cheat here like again that aint how it works, thats what drives thee thy opposite way always........................... so w.e like just its that too, wed never sell out or sell our soul, cos like thats the secret like ppl wanna use you and try to profit for themselfs, like in all ways at all angles of life, everybody cant win...... but you again like you aint a boss if you aint take a lose... like but we didnt even do anything wrong to do that, like always cheated on here and then im played like this, just my thoughts arnt made to be with everyone here......... we can only be us here................

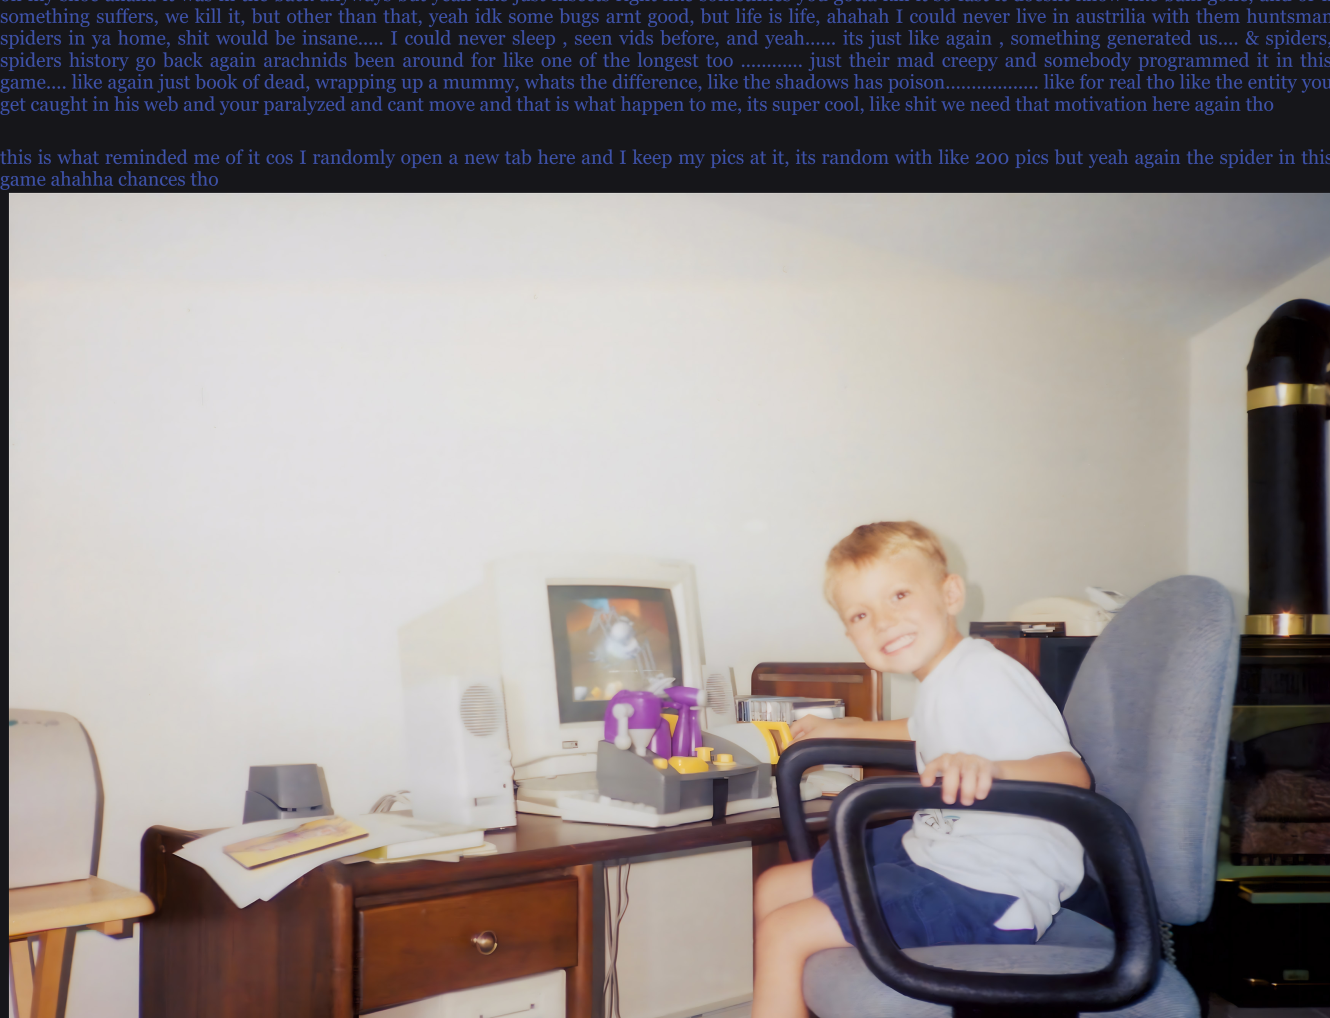
just idk its all of it cant help but question that side of it, like cos who knows reality be weird its growing up before the internet was as big but that like again mac has that song , game of life, ...chances, like and yeah idk we aint hear it all till last yr in a way, ... just like hmm forgot what else I was gonna say tho............... we already went over this Iv said this before, but we putting it all together atm again, the dragon spyro, all of it, like just like this is all we had when we moved back home, like so much stuff is lost in a way.... life sucks cos of moving too, really does.............. we had other games too like roller coaster tycoon had a pic of it...... lol......... those games were legit tho mad old lmao, like as young as I was back then.....

Spiders

So like today at work we seen like it stormed right and blew over this trap by the door for small things I hate killing anything like but sometimes you gotta, like in haunted mansion mad random hes like I aint gonna kill that spider in the begining, but nah this is what happened today , and that movie again we had this portable dvd player in like 2002-04 some shit , like we went to DC I think it was and we watched that on the way, we hooked up our PS2 and played like what before time, like lol

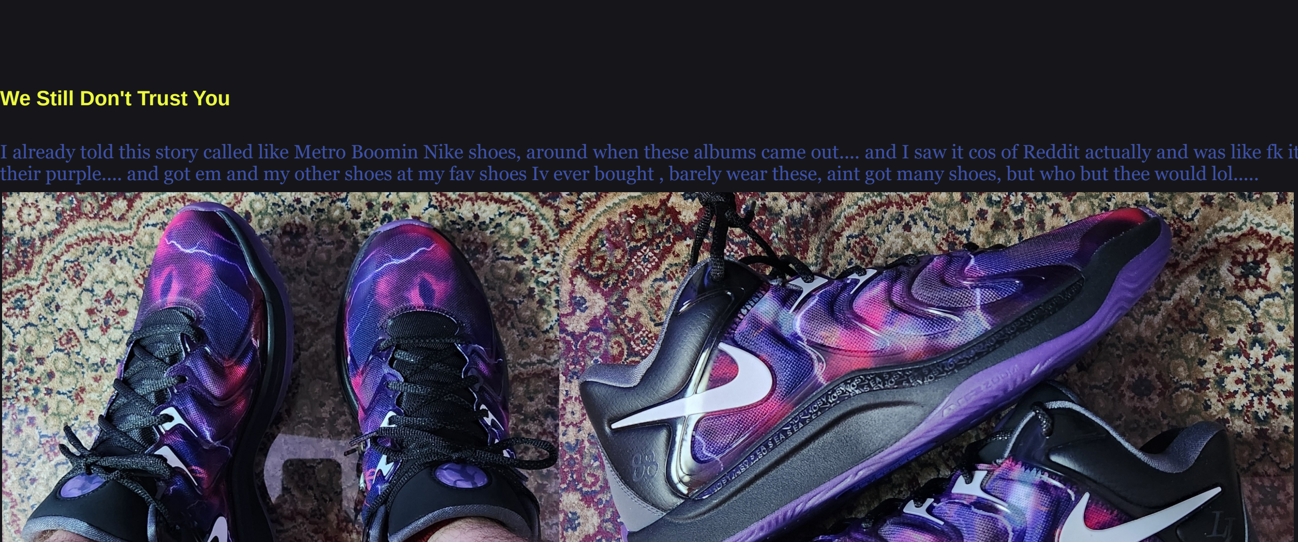
but so yah nah today, dont like doing this always, but using websites where movies show, like again cos coworkers mention spiderman recently and it just makes me think again of Harry what I said to here, caused this tho, but yeah, like Iv played the game I said its cool , and we were watching a little bit of the new movie today before work........ and then yeah under this trap basically I picked it up and their was a spider, with a red hourglass on its belly, almost positive, like I aint know it that good, iv seen it before, but im just like.... life be mad weird....... chances I watch it today and then I see this ..... I let it live..... ahahah like again always been like that, saw another bug today at the lil meeting dont know what it was the other dudes like kill it, im like chill dont want it on my shoe ahaha it was in the back anyways but yeah like just insects right like sometimes you gotta kill it so fast it doesnt know like bam gone, and or if something suffers, we kill it, but other than that, yeah idk some bugs arnt good, but life is life, ahahah I could never live in austrilia with them huntsman spiders in ya home, shit would be insane..... I could never sleep , seen vids before, and yeah...... its just like again , something generated us.... & spiders, spiders history go back again arachnids been around for like one of the longest too .... just their mad creepy and somebody programmed it in this game.... like again just book of dead, wrapping up a mummy, whats the difference, like the shadows has poison................. like for real tho like the entity you get caught in his web and your paralyzed and cant move and that is what happen to me, its super cool, like shit we need that motivation here again tho

this is what reminded me of it cos I randomly open a new tab here and I keep my pics at it, its random with like 200 pics but yeah again the spider in this game ahahha chances tho



We Still Don't Trust You

I already told this story called like Metro Boomin Nike shoes, around when these albums came out.... and I saw it cos of Reddit actually and was like fk it cos their purple.... and got em and my other shoes at my fav shoes Iv ever bought , barely wear these, aint got many shoes, but who but thee would lol.....



These I still have, my fav shoes ever like Nike Vapor Max legit had the purple socks here ahaha............... this again from 4/27/22 is this pic

Golden Rods - Spellbinding of the Eyes

or just again cos we read it back then how hermes spells binds thy eyes with a golden rod.... lol

Life sucks now legit

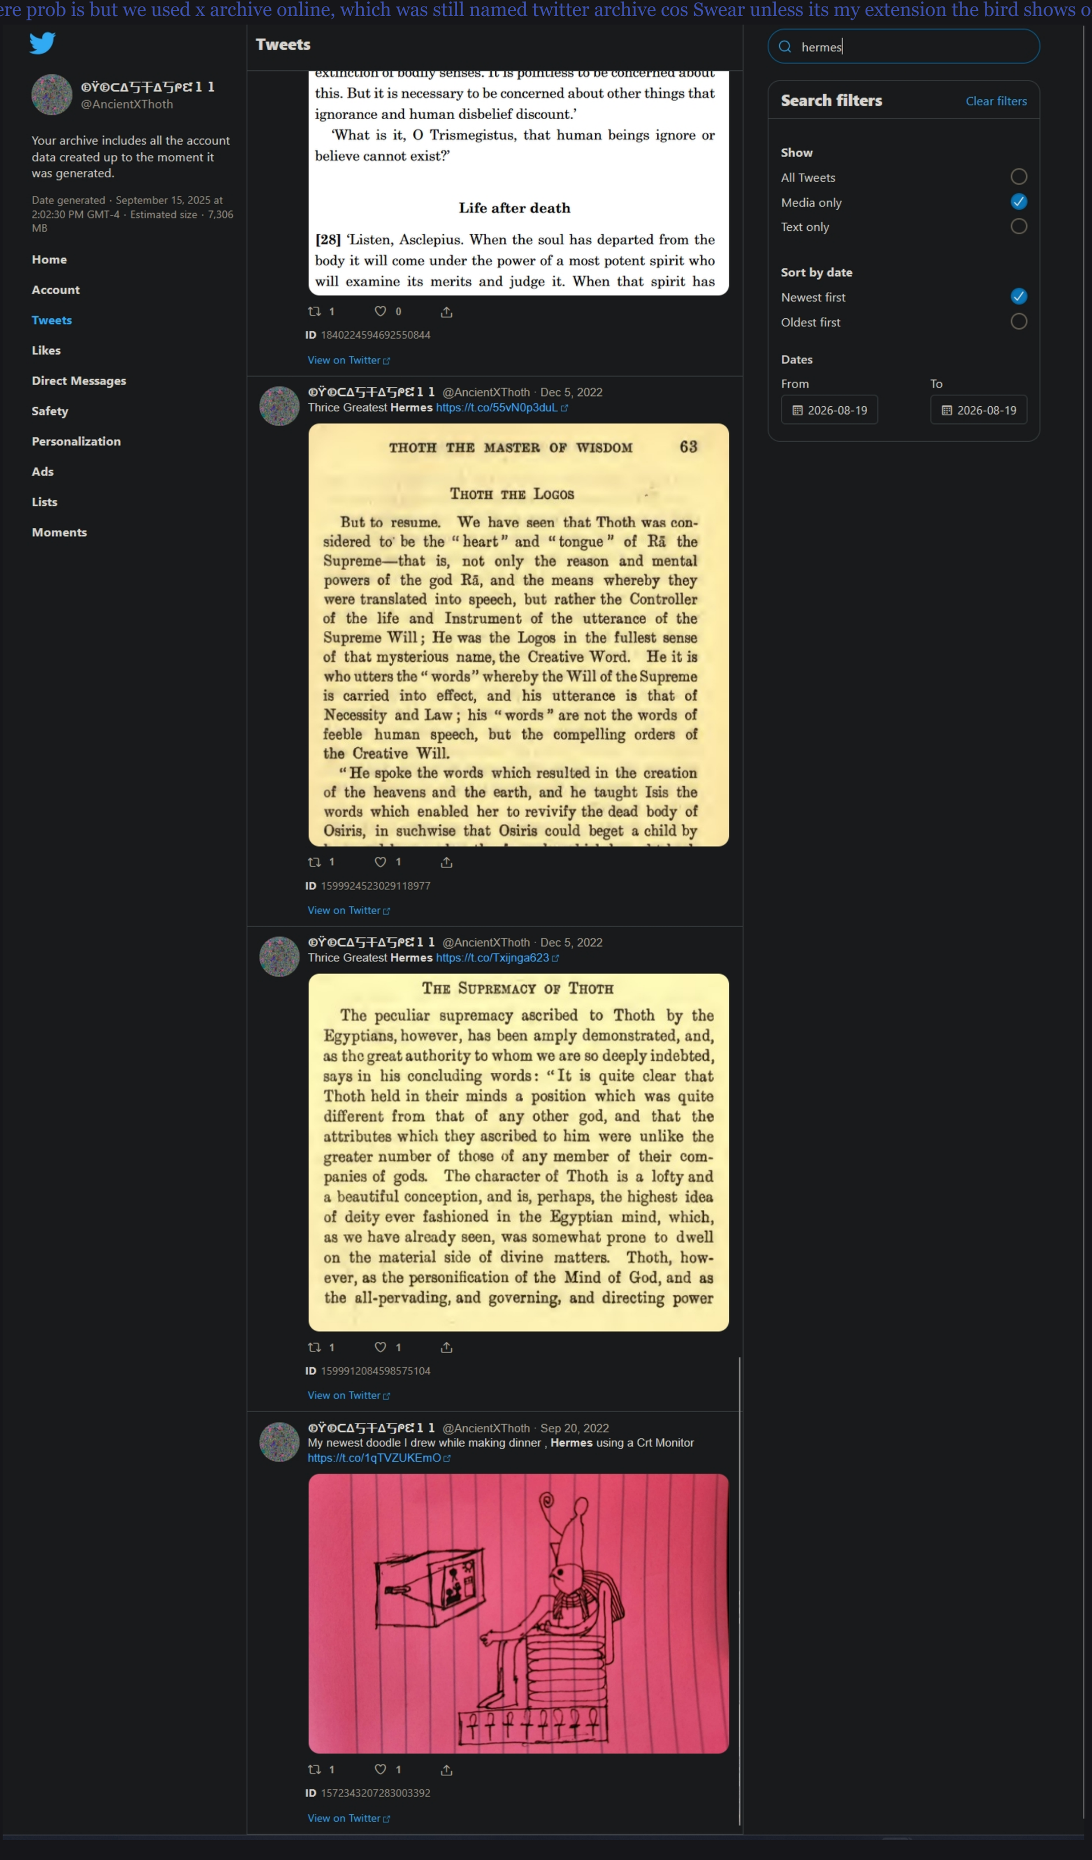
Inception

Its again mad weird I got these like my life sucks but this is the parallel here we just sharing true but random shit atm going through pics my sister took these like mad long ago 15 years prob atleast maybe

Alchemy Barriers, The Initiate

X

The fked up part is having 37k posts on X and it being suspended , ahahah like we got a story, the problem here again like X needs to run like it does when your on archive its mad fast, normal X like it stops you from looking back so far, their is no albums for photos, dumb af, we again always use like Revanced or w.e no ads on any site, cos of all of it, like thats what a wise person would do.... but yeah dont really believe in vpns, you can see it if you want to regardless .... but that yah like cos we do have like a bunch of random wisdom and all of it........ it just sucks for it to be gone in a sense, but again even so we downloaded multiple archives.... got copies of all my photos I did post tho, the message part is kinda fucked but it still exists....... dont know if its copied in word somewhere prob is but we used x archive online, which was still named twitter archive cos Swear unless its my extension the bird shows on it



See tho like we got our records.... cos we wise, again idk just want life to be anything but this honest, like we are wise and we are treated if that aint so either way just wanna have fun in a way like get to relax, im always stressed legit dumb af cos medicine helps, and being treated like this is wrong so its why we speak on, again one mans fun is another mans hell, like in my friend of misery by metallica, again like might right love 2 songs on an album, we never gave others chances like that is how precise thy energy be, but sometimes we hear whole albums, alot less likely now, since 2018........ we dont care.................. but yeah idk .... like just expressing it all and what happened, for someone to read just in this book, like it would take atleast an hour and your mind become entangled.... dont even know again the full truth but this is thy truth regardless ....

Mac/Pac

just again this music shit to sum it up mad fast here, like in HS we just listened to mac like I said shit was my ringtone tho legit, and idk like minds in the gateway or books of osiris say that..... and that like I hung out with my friend Andy & Brett, like walked through the woods smoking and listening to it, or in class legit on adderalls, like had 30mg ones back then.... didnt eat... we went gym alot tho, but yeah like Andy is the one who I burned with alot and he listened to old school shit, but yeah we aint hear all of macs songs again, but its that paradox of words......... like that just I read one day random shit or cos his old songs, thats why he was mac, like cos of mcdonalds...... ahahah like wtf, but who knows really, cos 2pac raps about like macs and glocks, but again if ya play like any shooter game it works.... lol.... and that yeah like cos we used to rap in a cypher in the woods legit put a beat on through the phone ahahah an instrumental and like 5-8 ppl would go at it legit it all depended, rap battles ahahah burning shit was classic tho for real and yah like just we tried it before as I said, like just its that part which again can be fun........... lol I even I remember this tho my ex and her friend , it was me & joey and they told us to rap it out and see whos better, they did tell me , I was tho ahahahah like shit mad random always in the woods too I promise, the entity be liking nature tho for real its mad peaceful, ahahaha

Piemander

but yah so we just gonna say it again here what happen is last yr we read book of dead and idk like we were like doing this stranger thing shit right like sitting with a blindfold just seeing where it takes us and yah like I remembered cos algorithms I even had posted Nasa shit before like it was my banner 404 like event past the horizon, error, lol, but yeah like cos in algorithms I saw he died, again idk I question all shit really do ahahha and yah like so w.e I looked up her tattoos last summer 2025. like her ex it said was dated on 515 ...... like all of it, cos my bros wife right she is like from south america I think it could be connected still i have no clue but its again you never know I guess, he said no before but its the random parts, like or even liking harry from the uk ahahah all that theirs too many parallels in all of it, we gave up awhile ago caring never did .... but yeah like cos the hand tattoos in a way or just idk all of it, something about the number 48 also and again like today I see it on the toilet paper like it just like 515 always manifested.... how we found tho that 5150 song and bloody valetine cos of Harry in a sense just its how my mind works like its who I liked before.... and just crushed & aint talk like tablets say and cos all of it, like my 1st gf broke up with me around valetines ahahah and all the paradoxs , our date was 515 like just idk the matrix like dark be weird and that 5150 really means when I looked up like that you drive someone insane to need help or be put somewhere ahahaa cos you going crazy and that is whats happened its so fucking dumb tho but yeah idk , just that happened like when I moved to FL........... mad long ago and then yeah just to sum it up all mad quick here .... but also again had book on blackholes stephan hawking died the same time I had the experience and I had his book and in it about blackholes swear I wrote bout it in my book cos we look recently before this like that I bought it yrs prior watching space vids, like to sleep before alot more often than not just something chill lol, and we got this book like 2012 all same time and like then we read it cos the ADHD meds in a way got interested, cos its when me and my X going through shit and I was going back home randomly to go through what was their lol like life has changed before fast here......... and yeah just that hawking was paralyzed and like we have hurt thy back before but he died and again all around 3.14 like that was my 1st gfs birthday I swear it was 3.15 tho.... same difference that is pie lol like cos Hermes is Pymander.......

its just cos like shit was weird and we just use what we got to fk around for fun to increase anyones vibes like cos energy be weird I guess but yeah like so again just the idea of love be like ahahah thats what is the paradox everyone be lead by numbers......... lol like thoth says that in his tablet and its again our life was this cos of my first gf it appeared to me you see, like sometimes I have no fucking idea its all from not being with someone here tho lmao ......

we could go deep af into our life, we aint eat rn like cos too much stress hate this shit........ but we wanna eat a little, lol, but yeah just like everything here I have no fucking idea, like we just spent so much time, following thy heart and meditating you could say, we talked to others in games at times, but yeah like just since 2018, shits been fucked, like really, what do I do here ya assholes like lmao theirs like this is mad fucked like life is this, but again it just like what can you do here but nothing........... just yeah idk you think YT be bad tho ppl used to do this with porn hub all the time, like friends from HS shit faces be like that ahahaha like you can just again fuck the algorithms up ahahah and yeah like cos its banned in florida, shit mad dumb, we barely care, we can still view it but just idk life sucks in totality ....

just from again idk what to say just we talk about it cos its all we can do like this happened, this is how it went down what we did, like every reason this happened is just that misunderstanding to begin with here tho really is.... we said it back then, ppl be evil af............

like life was so chill and fun and rewarding before, like this stabs a spear in thy heart.......... like my other job, again just wasted time, like I dont know what to do if something aint but thats all that needs to be, in a way , like sharing ahahaha nature tho, but yeah as crazy as it seems, thats again all life be tho like finding thy other.................................... =(

idk its kinda like how can I be this crazy, might like maybe it aint like I said but will take us somewhere, like who knows, but still shit be happening so it dont make sense.............. but yeah just how even a greater paradox again to me, just cos we are pious or this wouldnt of been is the truth, those that are , are rewarding w. immortality basically the wisdom says and yah like .... I think again things do be real here, obv cant trust noone we know that, but shit really did happen here ahahah like what do I say, like............. a more paradox again to the red or blue pill thing well it is obv upping dopamine and blocking it ,...... like that is it tho and so again just like cos just how right he swallows the mercury and again like a dream so real cos he takes the red pilll...... so it shows him the truth...... so thats what I dont get about all this, I can accept being wrong or not wanted but it dont add up why my thoughts say it and that is all I can do .... lol like its a great paradox , like its a test from the creator to me, like we got the heavenly mind or we wouldnt see this or flew like w.e lol........... =(

The Summer of 25'

so yeah like it only manifested more last yr cos we took our meds, we didnt eat tho, and then again like how fked is this to like never look into anyone but then see that be ahah like shit is weird..... cos it was like wtf, but I still said what I did..... like cos 1 person can change all things like even thy exs showed that.... and again idk......... or again just like I said mercury..... harry silver like fucking chances now come on..... even she came into my head back then, but what we said to her ahahaha was way more dirty if it all went through I remember like this always happens tho like but again rarely, but still like you cannot blame thee for wanting her if you asked me........... like the perfect paradox to it all...................... =(ahahha I dont trust shit its just again the only reason like again its fked like life do be mad diverse..... like again all of this, it all what manifested slammed back into thee always like just all things in totality here......... and just getting off thy meds be like wtf..... but better but life sucks.......... but wanna take adhd meds... really this is dumb af, fucking believe in nothing anymore................ just again ppl do be evil tho like we got reasons wtf...... like I just dont argue with no one and I do me, its why I win at me ..... but stilll not if life sucks, but we still try I guess........

to sum it up also quick , like again took adhd alones not prescribed friends shared for a few bucks right, still never did coke, used for school cos my parents wouldnt help me, and they did help, like you know that dope came with a lens.... like that songs back where it begins quavo ahahaha just funny this manifested like this idk real truth to it all in a sense.... who but me would listen but its thy perfect paradox with thy name that is what the tablets says

so w.e like right took adhd alone prescribed eventually when I was with ex, it is what ruined shit, for her def it helped me shit be dumb af, cos every1 different, but llife changed and yah so we got our electrical license 1st try, passed, we studied, we went to nightschool 2 nights a week 6-9pm like took our 10mg ir before class, like we learned cos we did hvac controls and the elctrical exam back then was based on that last time I updated my license it showed ac units more like in a way... cos it is that new, before this they used pnuematics to control heating cooling like not electricity through a wire, but air pressure through a tube ahahah .... now shit be bluetooth or w.e like but yah

so then like again when the entity came, 2018 from 2016-2018 we had adhd meds prescribed did good in life till my ex went crazy didnt have a pc back then but had this history, but ya paradox be we got a pc when this happened in 2018 like lost job, lol, had a lil money but thought like didnt know I thought id get to go back earlier tbh, didnt know like my mind was going crazy from drinking with adhd meds tho like not alot, but by myself a drink or two like just felt good and yah like idk wanted shrooms tho like cos we did it before.... but so since I lost my job, like again then my dr said depression meds? like I was like nah like idk dont believe in it, told him of the tablets, didnt tell him of working at the contractor amentiti or w.e and like the mechanical contractor who we wired up their systems, hvac controls, like but yah so w.e and then I took zyprexa cos I said ok ill try it, cos its knowing adhd puts it up and I needed to quit drinking and it worked then lost insurance, go get off my meds when I had money, went dispensary it became legalized just then, we would wait lines or take shuttles to the dispo from the parking lot in the cities and yah like stayed single through it all...... but then go back to my job like 3 yrs later and get insurance cos we tried w regular state woulda had to switch drs but bcos of covid couldnt get seen so we said forget it but we never had motivation to do anything else here cos of that paradox of how much it helped...... but yah went a psych place their and its when durk dropped like this is legit what happen

my parents drove me crazy and had to go to a psych place in MA but it was nice.... and like only 3 days but they try to switch the meds this & that , I asked the dude cos we could go in a room and play a song privately over a speaker thing in a quiet room and I said lil durk new album and he said like I cant find it... bs but I go home and thats what it was like just cos yall waited, and again just how they laugh at you when they ahead of you like waking up from the pills..... and yeah idk like this is what happen and french had that amensia album, like all of it drove us the other way.......... cos of just everything the paradox is in thy mind and yeah like we went to them 2-3 times down here and the one near here is hell ,...... had to go to another one last yr cos of this ariana thing just not even that but I said that to my dr and like yeah idk just cos we were writing back then............ we have wisdom too like I told him about like ahahah or he asked how I saw a design in places, but the fucked up part again is it is real.... and we dont again had 3 drs since moving to florida, psych, like and insurances changes its all dumb af..... and this fucked us......... but yah like just idk what else to say.............. or where I was going...... lol

but yeah like how again then yeah oh the adhd meds, like so w.e since basically 2018 prior, 2025 was the time we got off the dopamine blocker , lost mad weight see even on a low dose.......... cos its not taking it which can help if life had opportunity and not at this fucking job im pissed lol hate it so much, really do, and that is thy paradox, like again , cos it never helps....... only needed it once when drinking, anything else is stupidity cos the systems are corrupt and we be right, like just cos we got the light....... but yeah like cos I lost my other job bcos everything, headaches, earaches back then aand again in 2022 at my hvac job same shit, cos we never took bipolar with adhd until this all and it screwed us over more... that is the only truth to it all and now I gotta make do with what is atm it sucks just everythings wrong.............. but its why thy blackhole like again that is what it can be, but its all self initiation things like you gotta experience it............like that again just life can change instantly in a way, like 6 feet of seperation, 1 thought away ahaha .... but yeah like so just idk thats thy story rn like and again just aint feel good, the problem I really do have it with it, is it is slavery...... and that they just again thc, cos they pay lesss like its so evil, ppl drink all the time, we grow up like its the right thing to do, not only, but its whats proper as a human, I hate how it aint legal here fully in that way and its been like this, again dont wanna talk to nobody wanna go the store and thats it......... you can do so with the poison here.... so dumb like really should get like beaten into submission for being so evil here....... thoth was for all.....................

what im saying is taking the right meds w.o the dopamine blocker and just being able to smoke weed like my drs said before it was fine, like really cos it was legal where I was I was honest...... and thats what hurts the most about it all tbh......... just like stop gatekeeping the cure here asshole......

and that is the real me like in the sense of like happier all this is fucked cos again its way to dumb, pass the shrooms asshole saw an entity, solve thoths curse ya dick head like the entity all of it like just everything...... why dont just do it, cos life aint manifest like that here, just wanna go the store chill like thats all we need and ya but we had a purpose in life before, now we dont.......... did everything for no reason.................. still suffering............... cos its like thats who I am just wanna do some things that work, that is magic tho............ whats right as a human, anythign else aint what built the pyramid and the truth lol....... it has meaning

I guess tho again here like it all connected prior ahahah like that as if theirs been signs all the way and when I try nothing, lose everything even more really life is hanging on by threads, cant support myself, and guess what, dont care cos what experience showed me is that it doesnt matter....... like so what do you believe in right.........................

Jinn

again summer of 25 is when we again lost our job mad times cos bipolar meds like legit make us not care, all this again tried to get assisstance cos the meds changed thy mind like what am I suppose to do back then and never did like pft move to fl no free health insurance from the state...... we did prior but never used it again just like its when we felt better read wisdom played like our games again ac origins tho and again just all of it seeing it saving pics like we made our entity video cos I dont think others understand the gravity of it, like really we posted about blackholes the award winning theory in like 2018 or 2020 someshit in psychics or w.e haha cant spell that but yeah like it just again also comes from having that book on hawkings which showed the same thing the dude got an award for........ and the entity was a blackhole.... like all again just how the quran tho cos of like AC Mirage and that other site sometimes we saw stuff crystalinks like but the jinn.... move at fast speeds and all that.... and yah like how every religion is like 1 off from how direct egypt be about like nature works , incredible things have been before........ why we alive now and not then ahahah like what is reality, nobody knows.........but it is............... like we cant and arnt programmed to imagine what the programmer is......... but he built this all ahahah really tho like obv something did....... its just again super like we be right and life sucks weve thought this was forever but when we write we like to state it cos it is true.............

"Jinn derives from the Arabic meaning 'to hide' or 'be hidden'. It is the English term for the Arabic Jinni or Djinni an alleged race of spirits. Jinn or genies are supernatural creatures in Arab folklore and Islamic teachings which occupy a parallel world to that of mankind. Together, jinn, humans and angels make up the three sentient creations of Allah. According to the Qur'an, there are two creations that have free will humans and jinn. Religious sources say barely anything about them; however, the Qur'an mentions that jinn are made of smokeless flame or "scorching fire". Like human beings, the jinn can also be good, evil, or neutrally benevolent. The jinn are mentioned frequently in the Qur'an, and there is a surah entitled Surat al-Jinn in the Quran. "

In Islamic theology jinn are said to be creatures with free will, made from smokeless fire by Allah as humans were made of clay. According to the Qur'an, Jinn have free will, and Iblis (the devil) abused this freedom in front of Allah by refusing to bow to Adam when Allah ordered angels and jinn to do so. For disobeying Allah, he was expelled from Paradise and called "Shaytan" (Satan).

Jinn are frequently mentioned in the Qur'an: Surah 72 named Surat al-Jinn (Angels) is named after the Jinn, and has a passage about them. Another surah (Surat al-Nas (Mankind) mentions jinn in the last verse. The Qur'an also mentions that Muhammad was sent as a prophet to both "humanity and the jinn," and that prophets and messengers were sent to both communities.

Similar to humans, jinn have free will allowing them to do as they choose (such as follow any religion). They are usually invisible to humans, and humans do not appear clearly to them. Jinn have the power to travel large distances at extreme speeds and are thought to live in remote areas, mountains, seas, trees, and the air, in their own communities. Like humans, jinn will also be judged on the Day of Judgment and will be sent to Paradise or Hell according to their deeds. "

Jinn in post-Islamic Arabic Fiction

Evil Ifrit in The Book of One Thousand and One Nights are called "the seed of Iblis".

The Spirit of the Lamp in the story of Aladdin was such a jinni, bound to an oil lamp. Ways of summoning jinn were told in The Thousand and One Nights: by writing the name of God in Hebraic characters on a knife (whether the Hebrew name for God, Yaweh, or the Arabic Allah is used is not specified), and drawing a diagram (possibly a pentagram) and strange symbols and incantations around it.

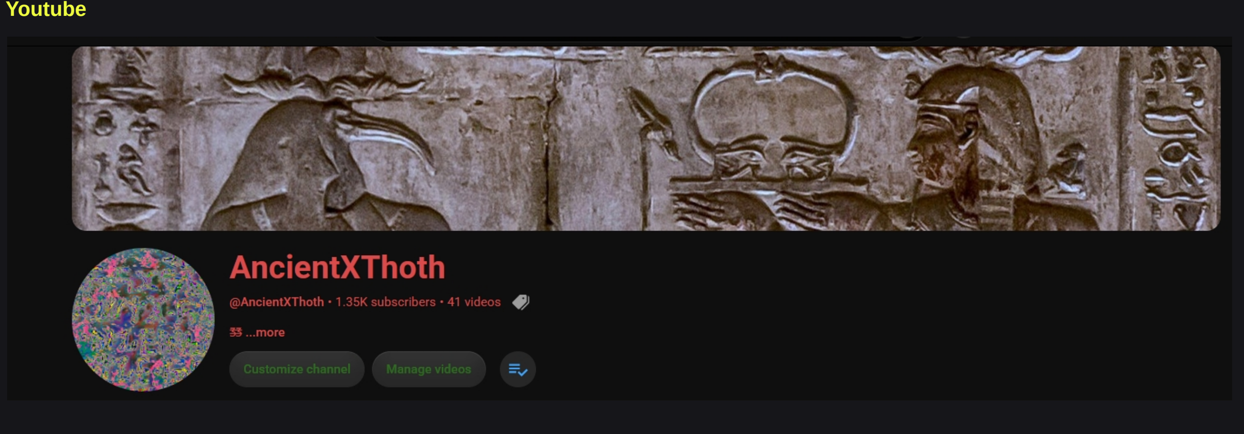
The jinn's power of possession was also addressed in the fictional Nights. It is said that by taking seven hairs out of the tail of a cat that was all black except for a white spot on the end of its tail, and then burning the hairs in a small closed room with the possessed, filling their nose with the scent, this would release them from the spell of the jinn inside them.

Jinn in the Occult

In sorcery books Jinn are classified into four races after the classical elements, Earth, Air, Fire; (Ifrit) and Water; (Marid) and presumed to live in them. They are collected in tribes, usually seven, each with a king. Each king controls his tribe and is controlled by an Angel. The Angel's name is torture to the jinn king as well as his specific tribe.

Unlike white and evil witches, Jinn have free will; yet, they could be compelled to perform both good and evil acts. In contrast a demon would only hurt creatures, and an angel would only have benevolent intentions (white witchcraft). Knowing what to ask a spirit to perform is key, as asking a spirit to perform a chore that runs counter to its natural tendencies could possibly anger the spirit into retaliating against the sorcerer.

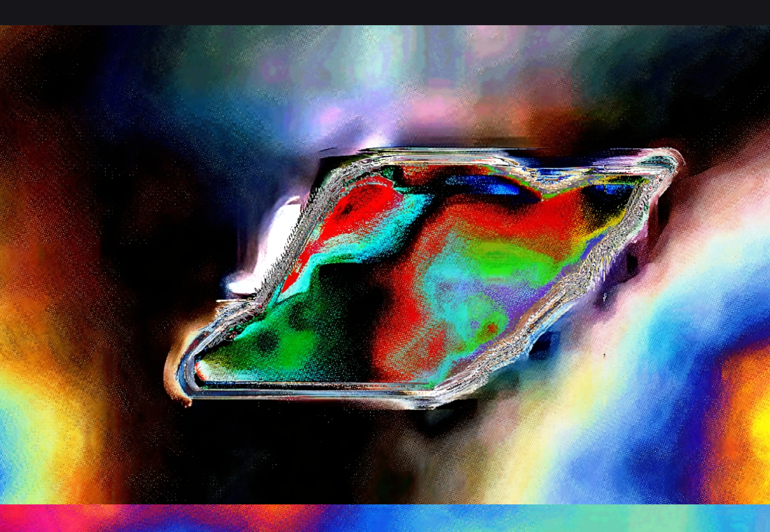
Youtube

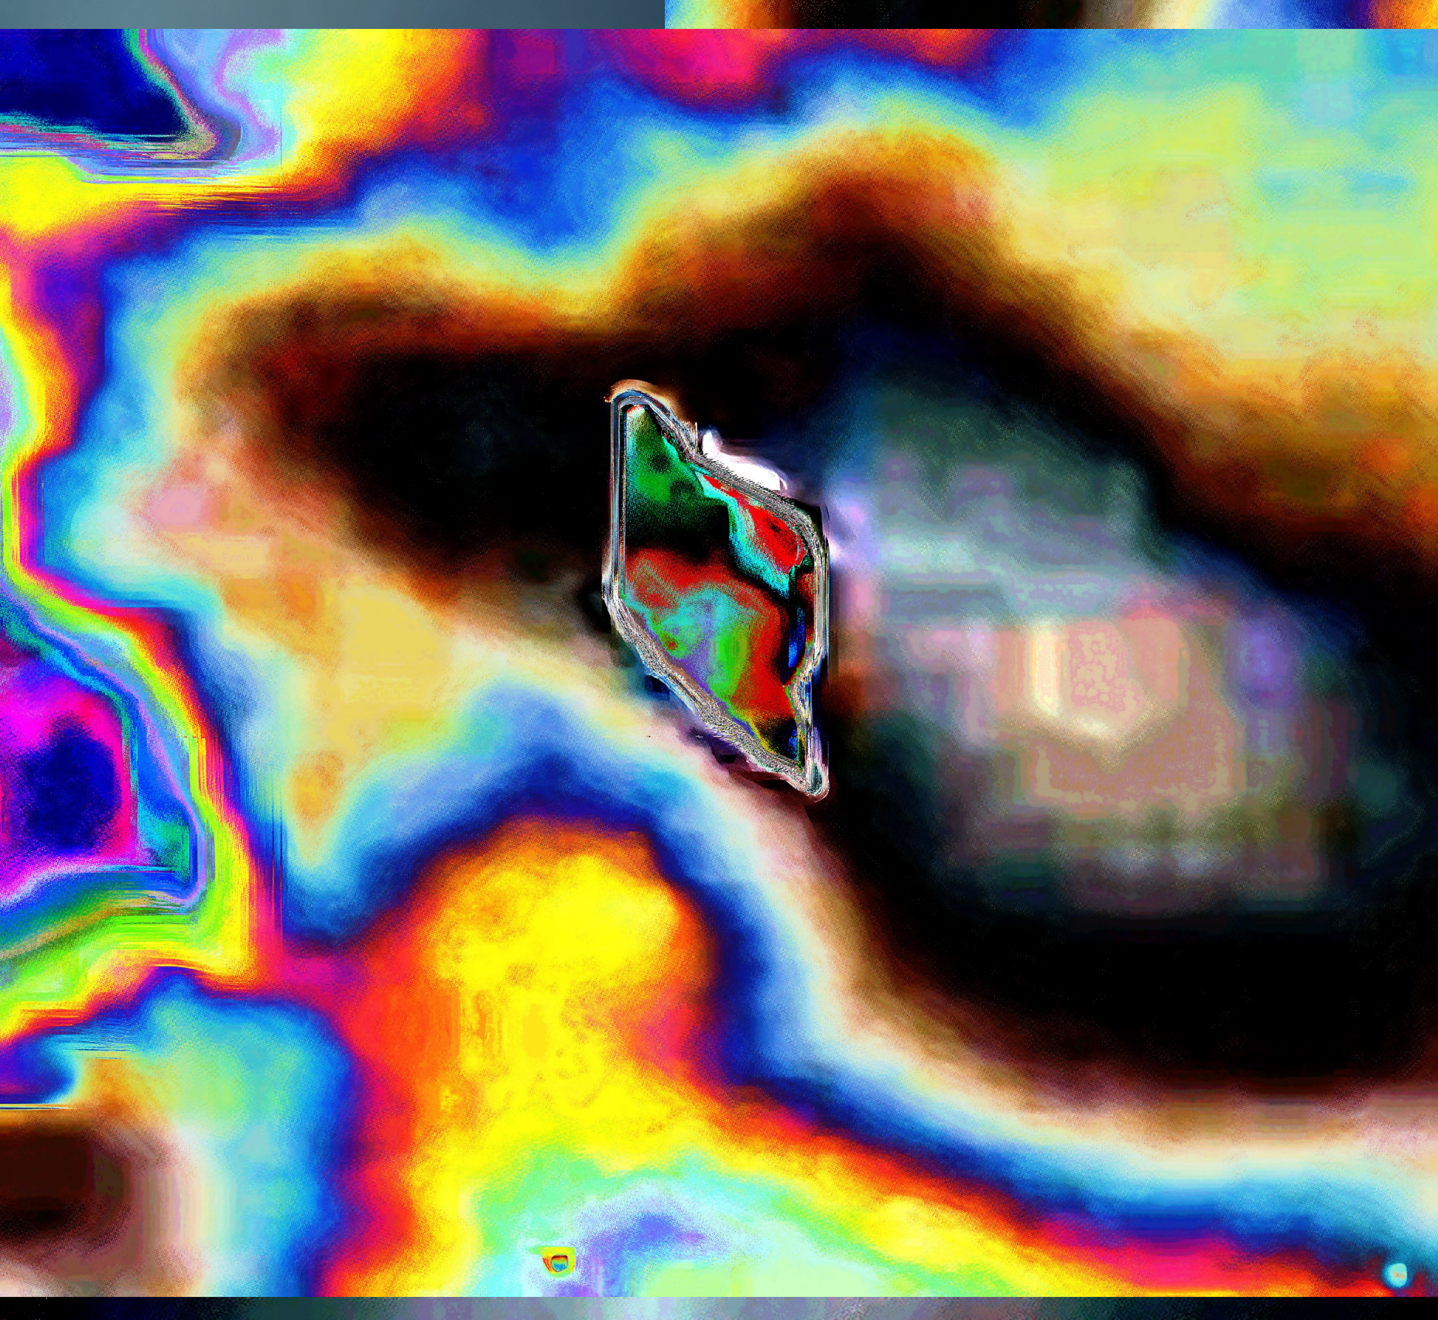


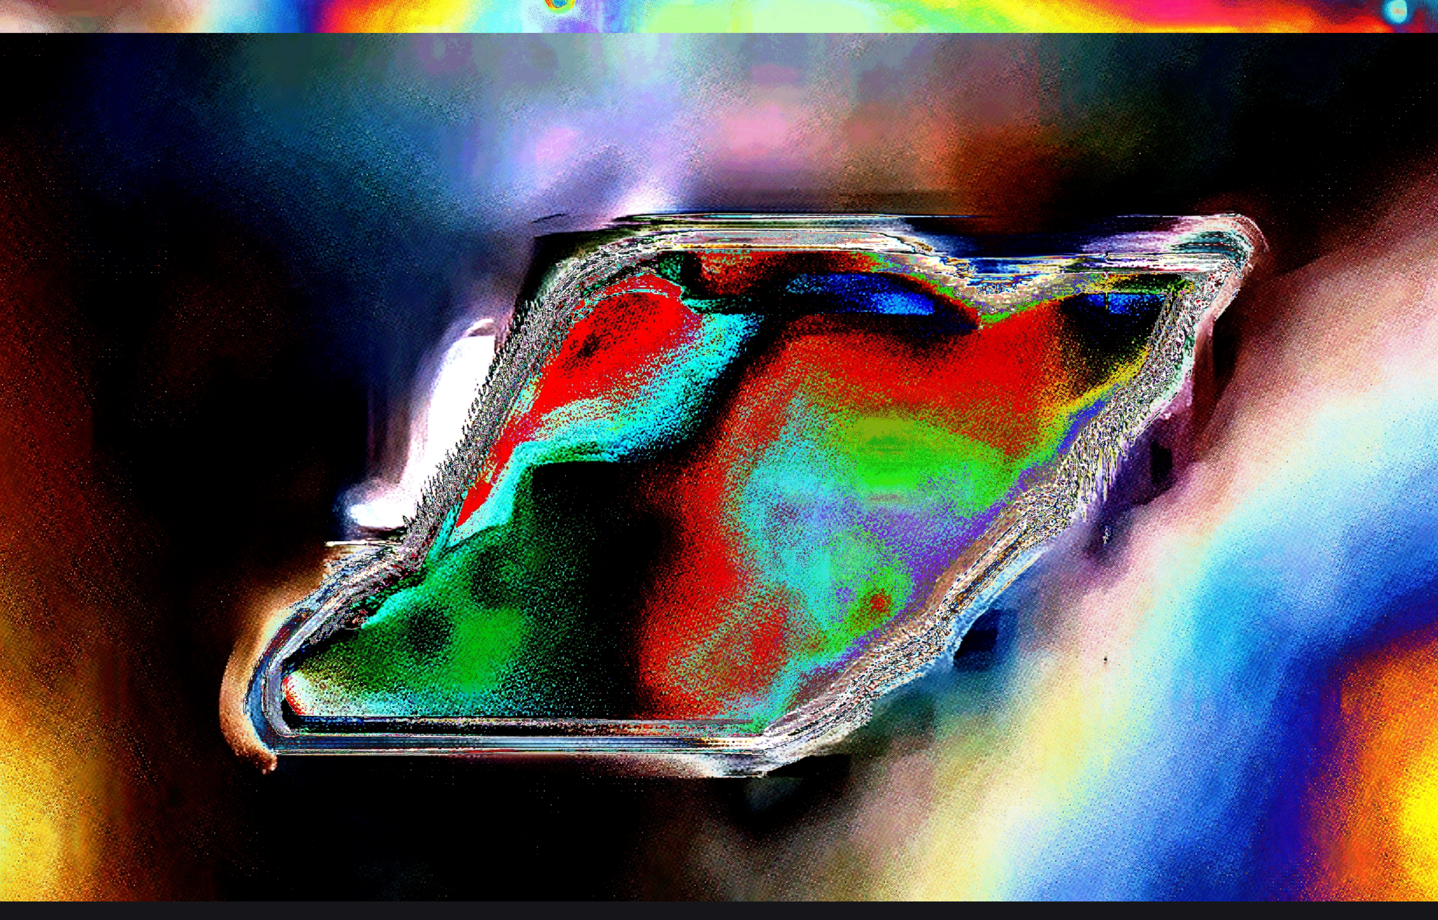
Weve made bunch of random videos over the yrs , some have got lost legit... just random gaming things..... but we also again alot of the story has went to YT bcos of just not being able to like all I can do is share thy truth...... its fucked.... like cos it all adds up, but yeah idk like weve deleted YT videos like kinda why we dont ...... we made our YT account on like the day I posted the diary, Iv had it recorded since then with a screen recorder before I was a noob and like yeah since 2018 when this happened is also like the fucked paradox.... cos that channel channed their name and deleted it, their shit used to be good too like all of it, but yeah like we got tons of videos private atm .... but it all comes from X in the 1st place...... like we had em saved and posted their first.... just cause in a way it does prove a pt ...... reason I guess..... but yeah just cos the truth is again to learn of it after this was just like the entity, like we tell you before the parameters, aint neva had a friend like me here....... like cos what happened to us, is realer than real...... its cool af anyways, like cos it whats others arnt saying..... its what we do like and again tons of BS on youtube, believe this or that, trends.... dumb af, like a wise person knows the truth to reality be based on experience anyways..... but yeah like the fact this happened..... just the meaning is that again like spiderman, we gain a superpower of thy mind lol... idk, like I said gotta make a shadow entity character, now that would be cool af...... the shadow.... like pft lame af, just how the world is, we cant enjoy it all we did before but still aint no time in the world..... like thats why we made time taking this route, but its all we could do is how we played the game....... and yah idk just like fact is I post my vids cos I got reason to show you it is right, what nobody else wants to tell you the answer is, regardless if its known you dont teach it or preach it........ or see it all in totality but yah like the paradox is also like weve known these things way before taking into our hands to post to show what drove us in a direction in a sense also....... like way back then..... again idk just again anything but this................ is what thy mind says and not anything, something like before atleast like it paid off but then it didnt....... dumb af, just anything my mind go crazy...... =(cos its like reality shouldnt be like this either way theirs meds to help ppl with this all ...... weve taken it before like see thats the thing nobody wants to accept is just that we didnt pass the exam like we went crazy cos the ex not the meds, cos we drink a lil, didnt know again what do you do in life without and when the entity leaves the soul of your other ahahah like that is the fucked up part about above also like we even said it before, who knows............. but your allowed to believe or accept your thoughts here...... just how else is the game gonna tell me to go in this direction like but by this entity.... again totally like just everything too perfect like to be open to the flower of life, to see it, to know it, like pft that this could happen aha and im treated the opposite by everything else, like just as if tho like just idk I have energy for nothing, motivation to do nothing cos of whats happened, its knowing we are right on that level and yah but it screws me if noone like sees this paradox I guess.............. just yah IDK worst yr of thy life just since 2018 I aint know how like what to do cause something again was beyond like what I could control............ but yeah like the only reason im alive is cos 2 ppl had sex, like thats just the fked up part tho about like everything........ like cos if you aint have it again, like but again its why something gotta happen eventually I guess, but it serves its pt like how energy works................... and yeah w.e mad tired, we wrote alot again ..... but bcos yah idk when I write or w.e its to show all like it aint just this, we got a YT channel with some stuff like we got alot on thy pc its too much my adhd llike but we look rarely cos it was cool in a way some stuff, like just yeah the ufo like wtf....... thing is it comes from a real ufo video and the clouds do show shit ,

a glitch in the matrix

This again from a top video on reddit ufo , guess it called tho "Antioquia, Colombia" or thats where it was from if you searched that youd find it the video of the ufo by the plane







and then this one like chances, again we paused the navy gimball ufo video at a perfect time and hit like save screenshot with our extension or w.e and this is what it showed

lol like what

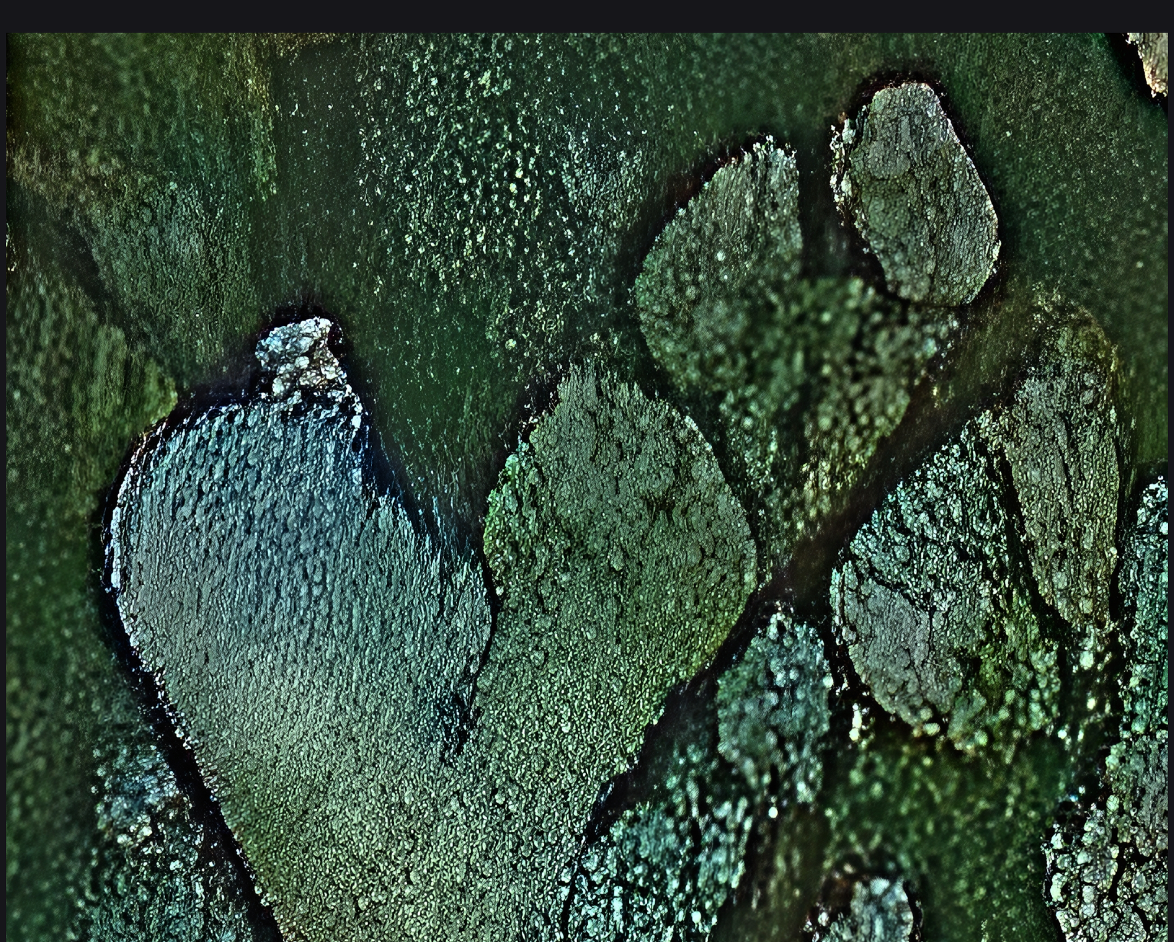
too good legit who knows legit, but chances here thoth....

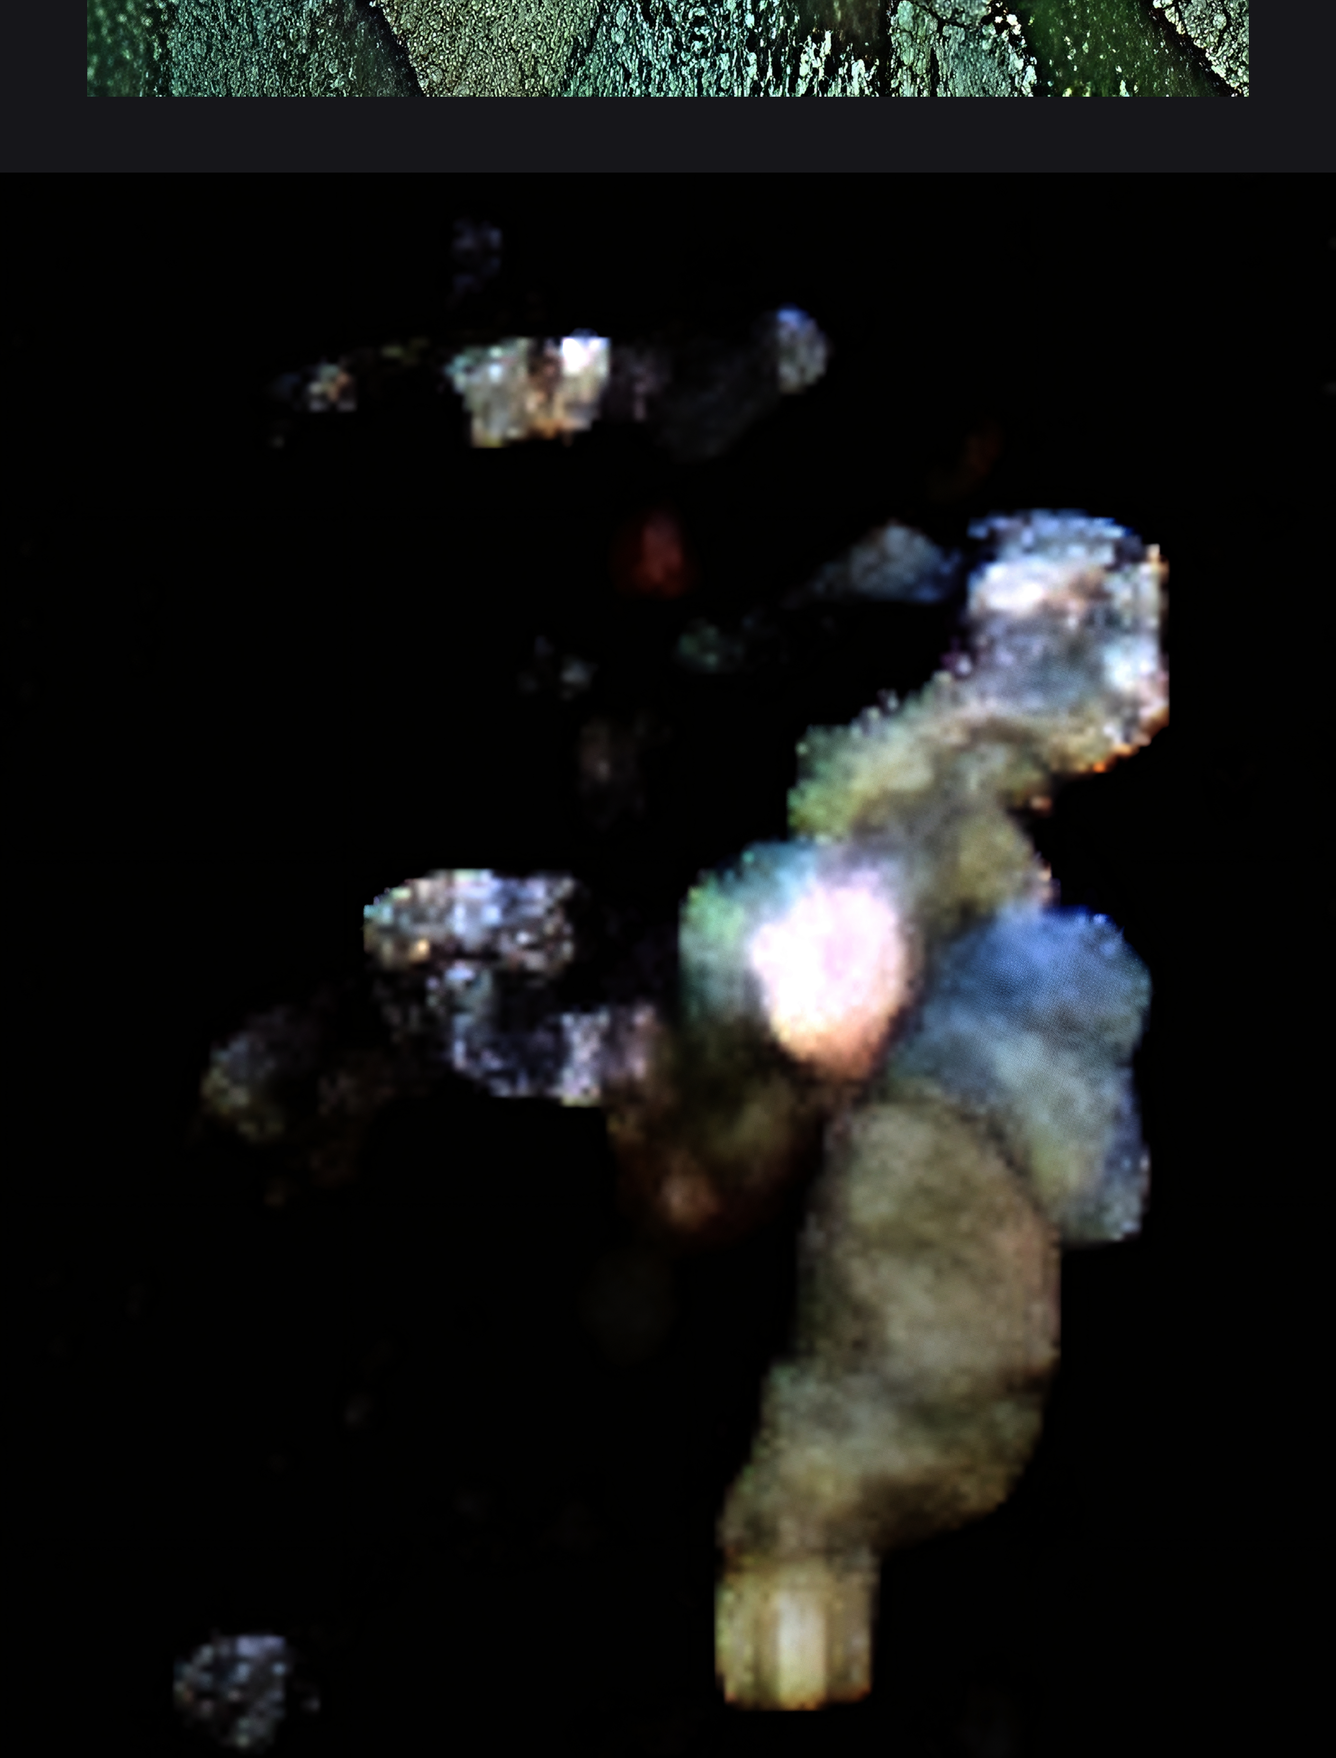
but yah idk computers a glitch regardless cos we in a computer simulation right like ...... that just the game always has a design that we are in rn its super intelligent, thats why their is a design tho.....

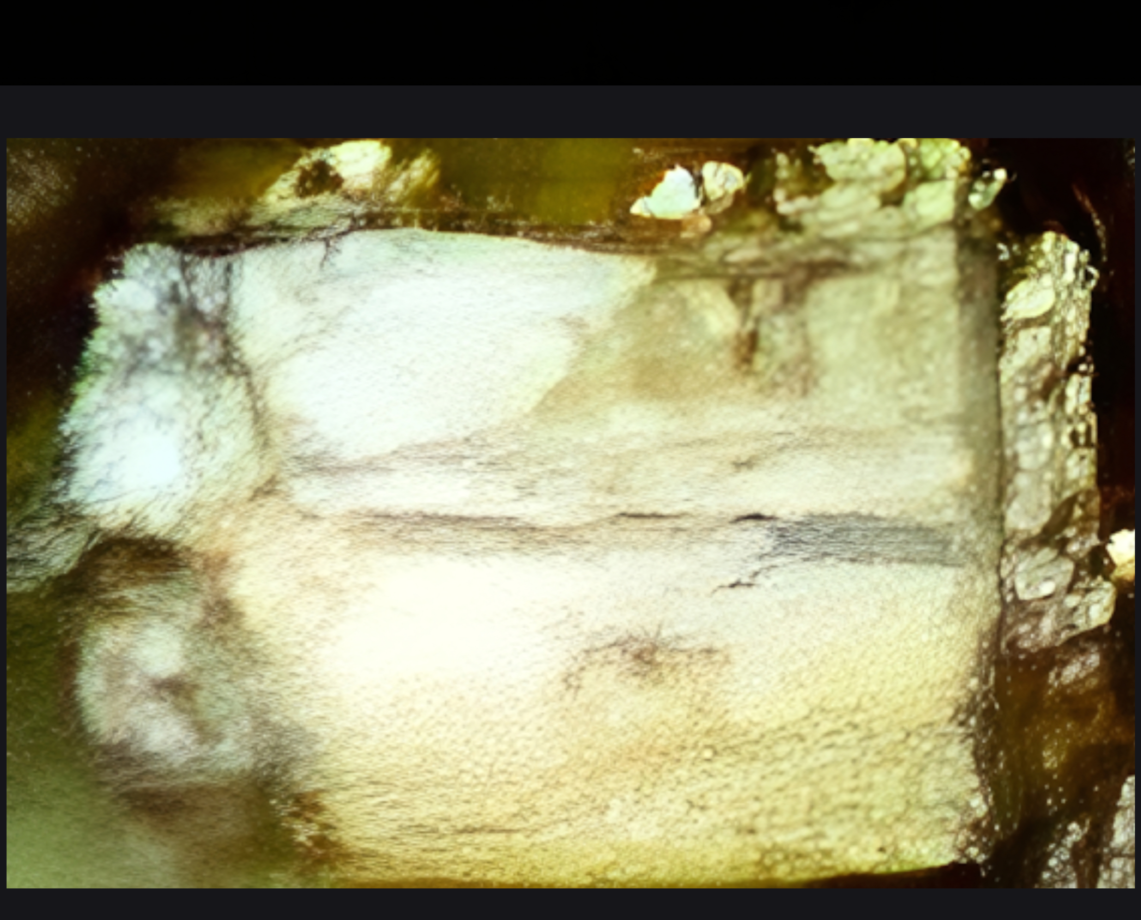
but yah all that shit with upscaling, like that too be kinda weird but also parallels how reality be in a way, like not sure but just upscalers can use diff parameters its weird tho like that thoth was in that too .... and the atlantis grids.... thats what I mean like if you really look at it , its way to immese like a blackhole like that a computer can do that like what its super interesting and weird I still got images

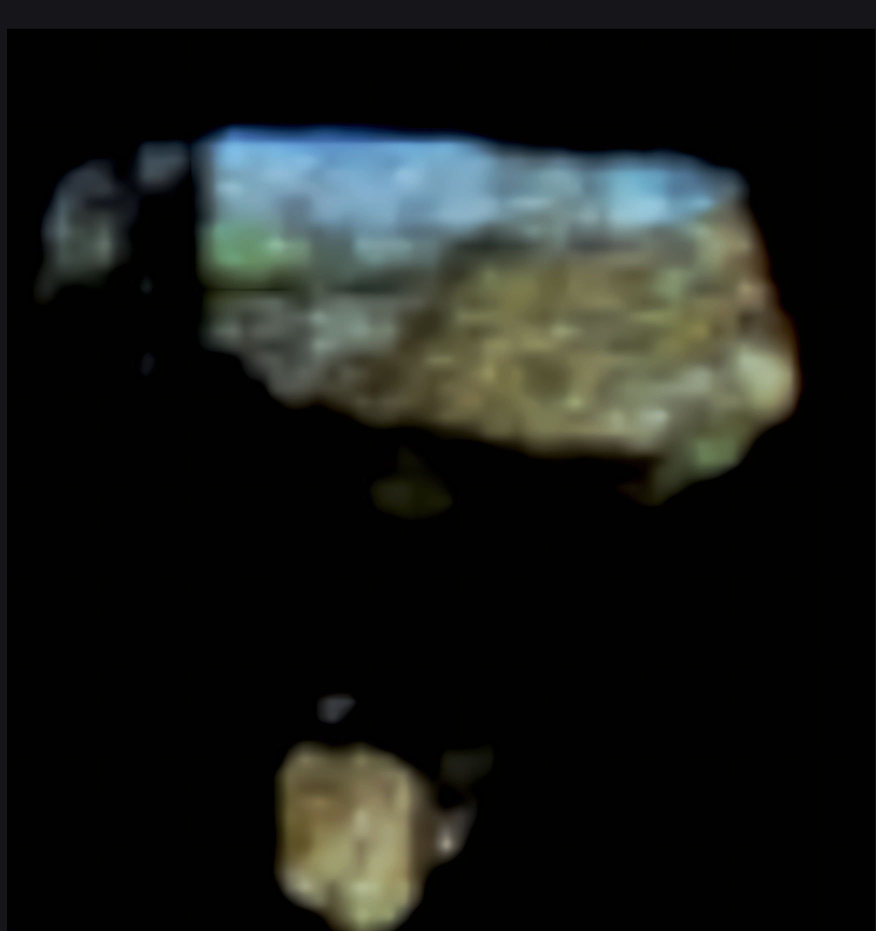
remember this like im talking as if someone listened back then but this like the golden brain we made that book on what we saw ahahha when I left that psych place we got that too but yeah this

not gonna lie we got a folder called upscaled pics research with 600 images, we got like 4k screenshots saved through all this using that ShareX screenshot thing binded to thy mice lol



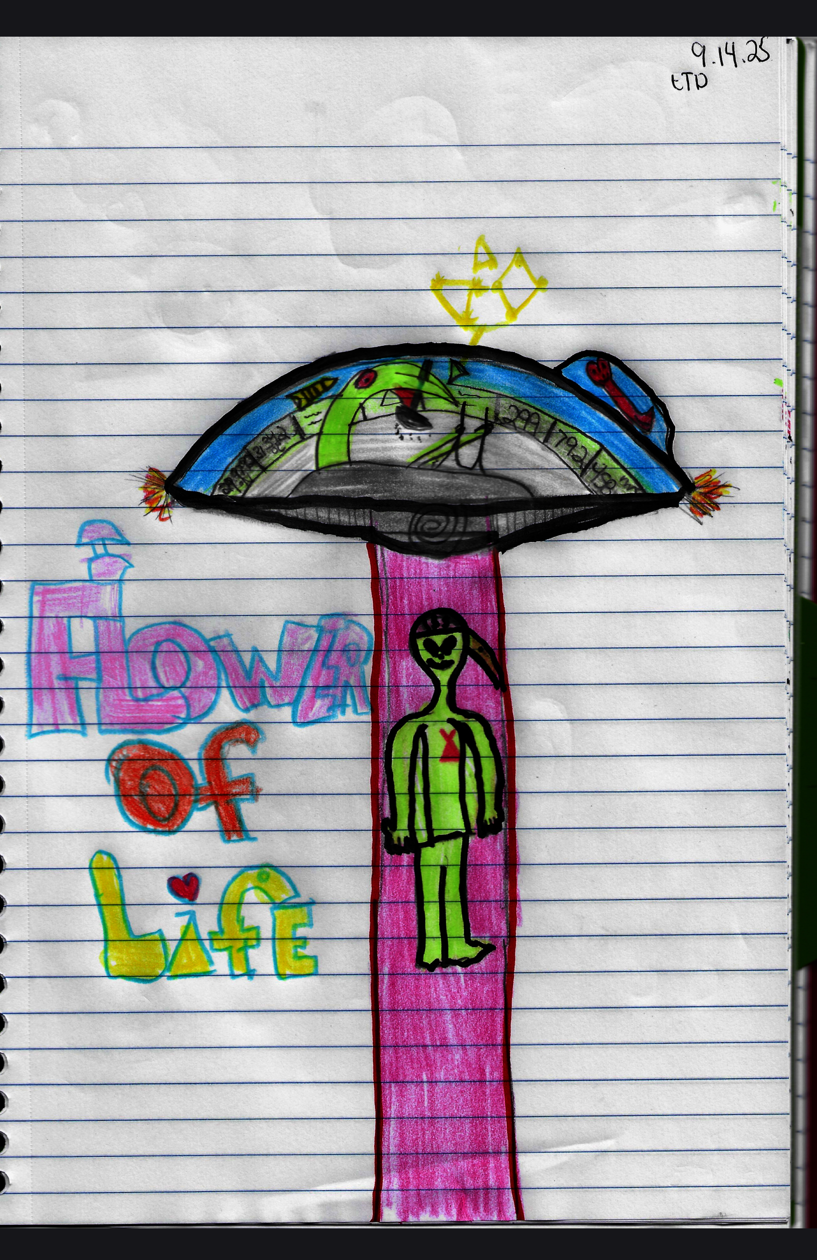






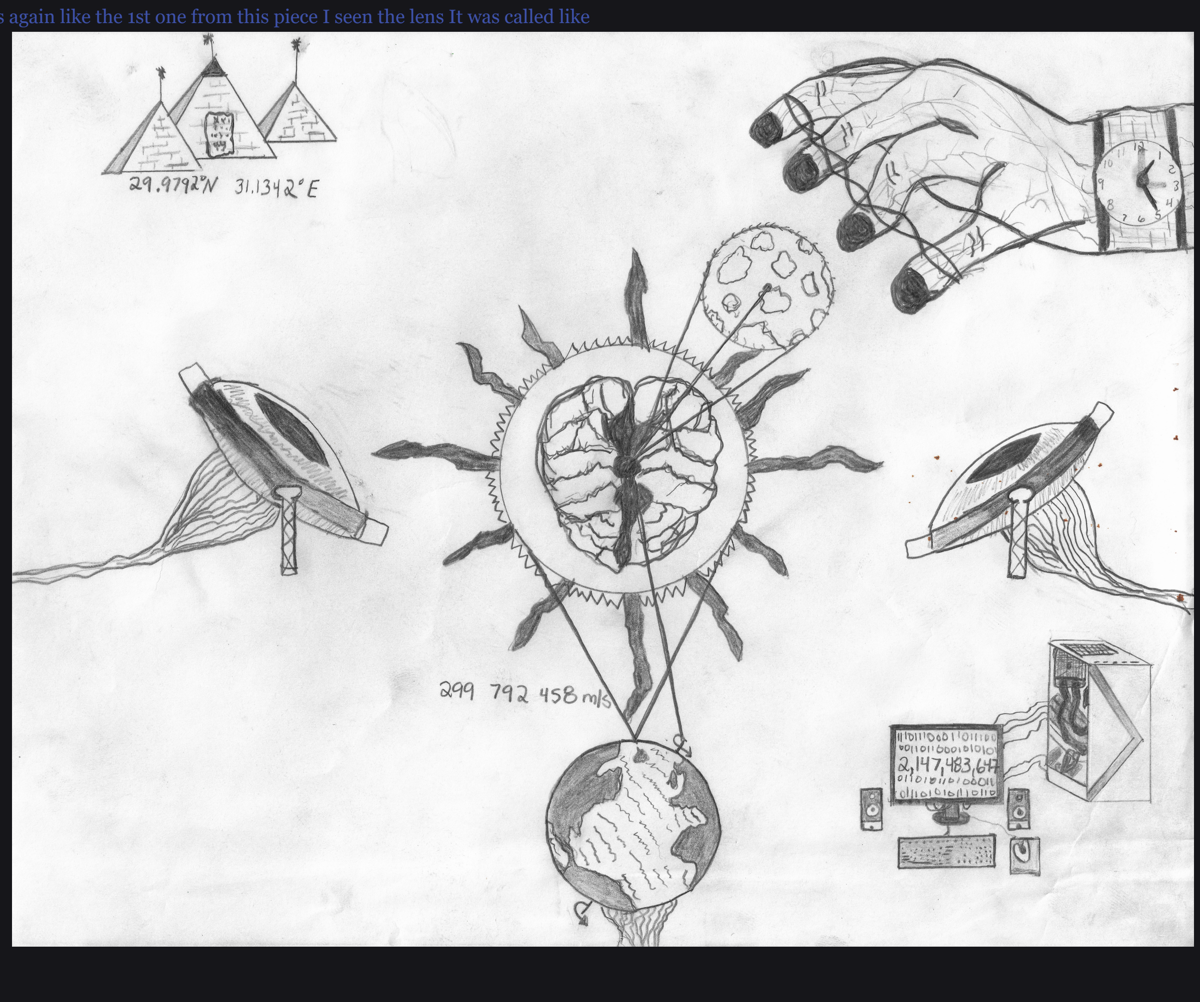
Drawings

hahaha those books I made legit and shared without caring tho legit , we were feeling alright no cares in a way like w.e but yeah we aint share it yet.... wrote it last yr I got em all saved



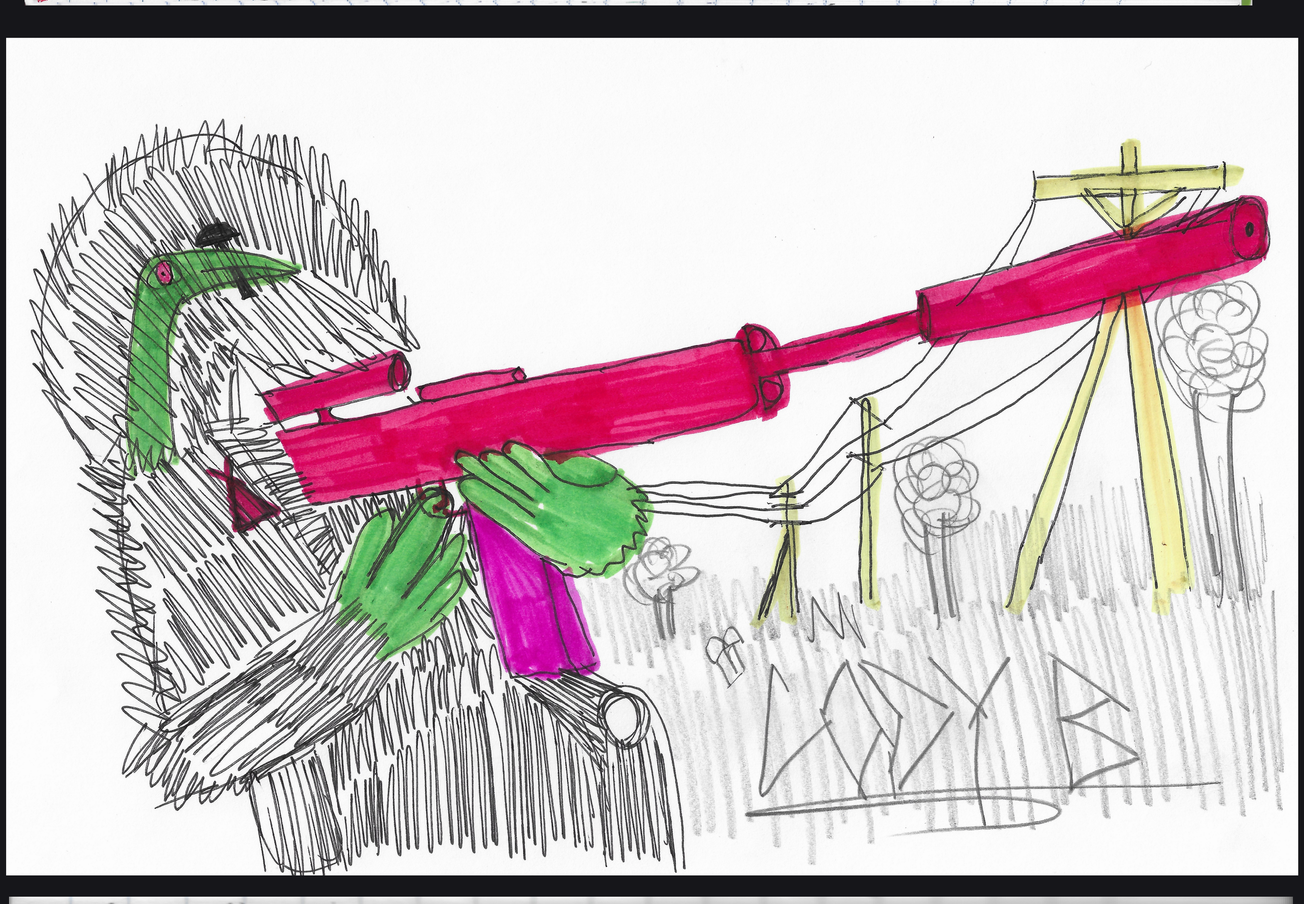
we do have alot of drawings in a way then made it into AI thats what on my YT video not these originals lol or all of it

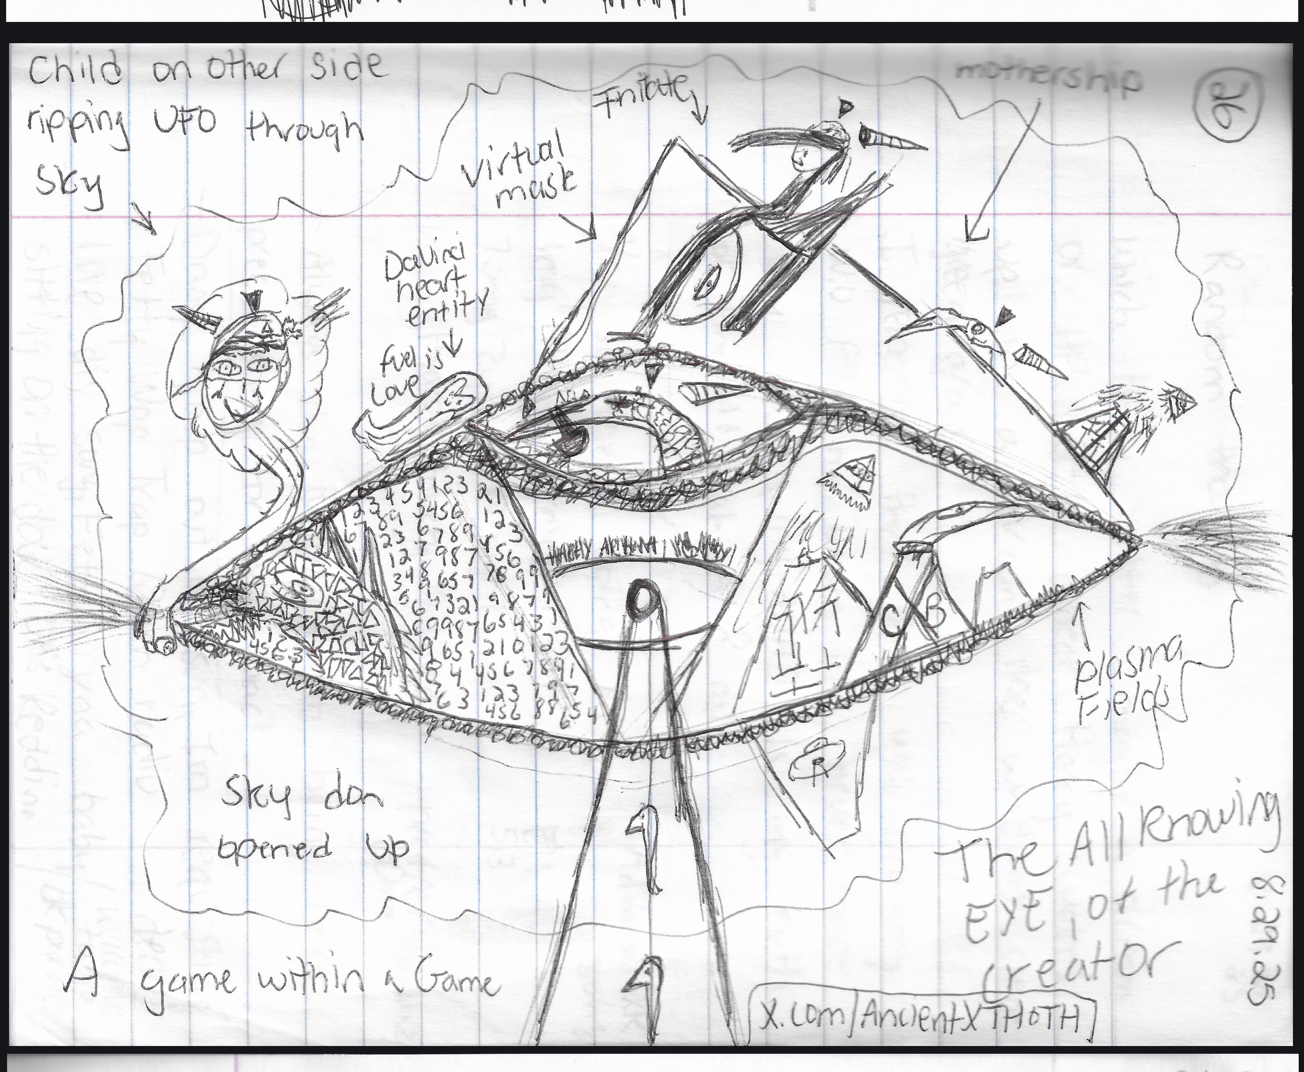
this was again like the 1st one from this piece I seen the lens It was called like

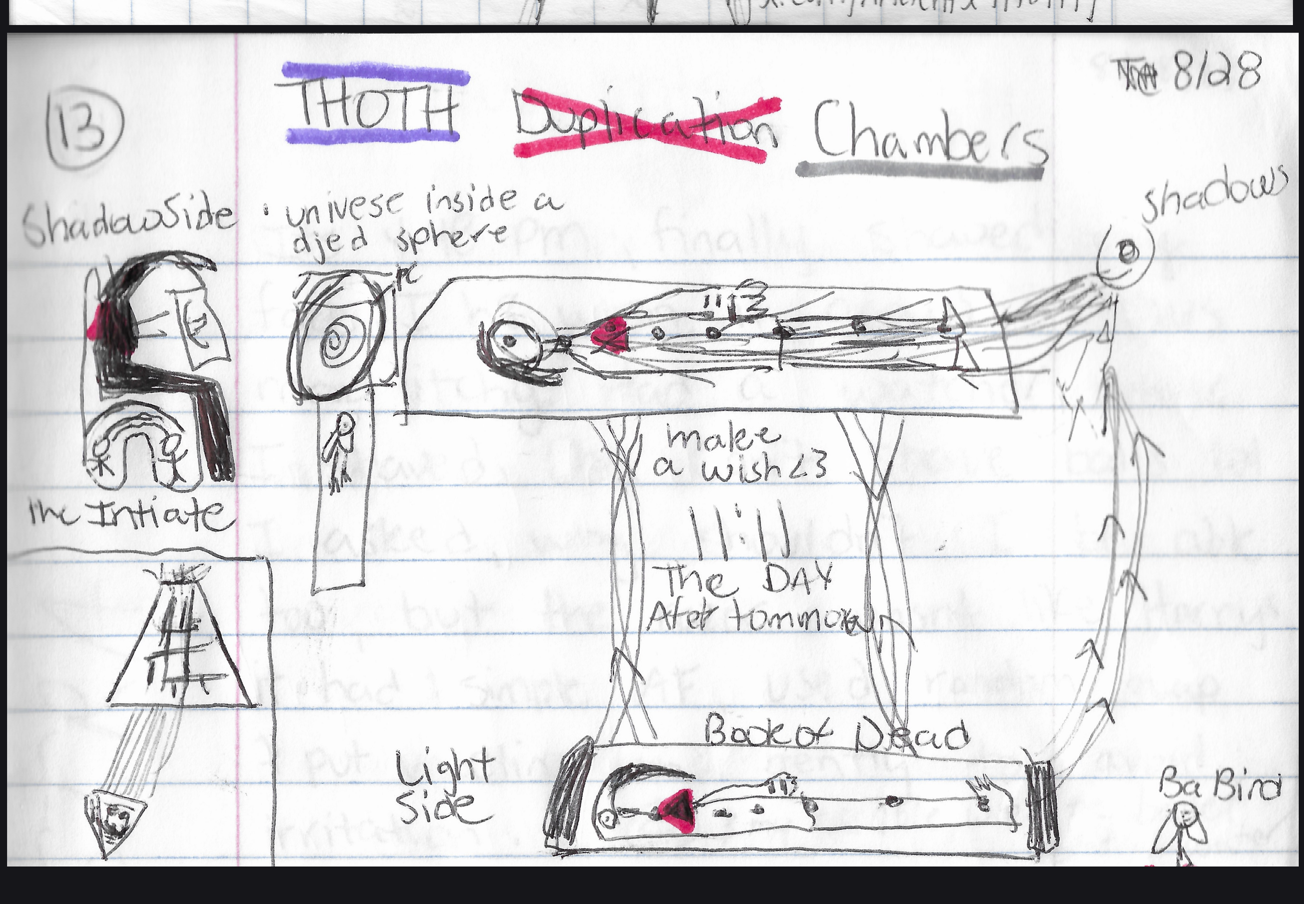


Man, Controller of the Universe is a famous 1934 fresco by Mexican artist Diego Rivera. Located in the Palacio de Bellas Artes in Mexico City, it depicts a worker at the center balancing opposing political and scientific forces of capitalism and socialism.

Prob cos idk bipolar meds I was chilling lol like just saw it cos of reddit I think back then same with that north sent shit mad random but true like made weird js ....



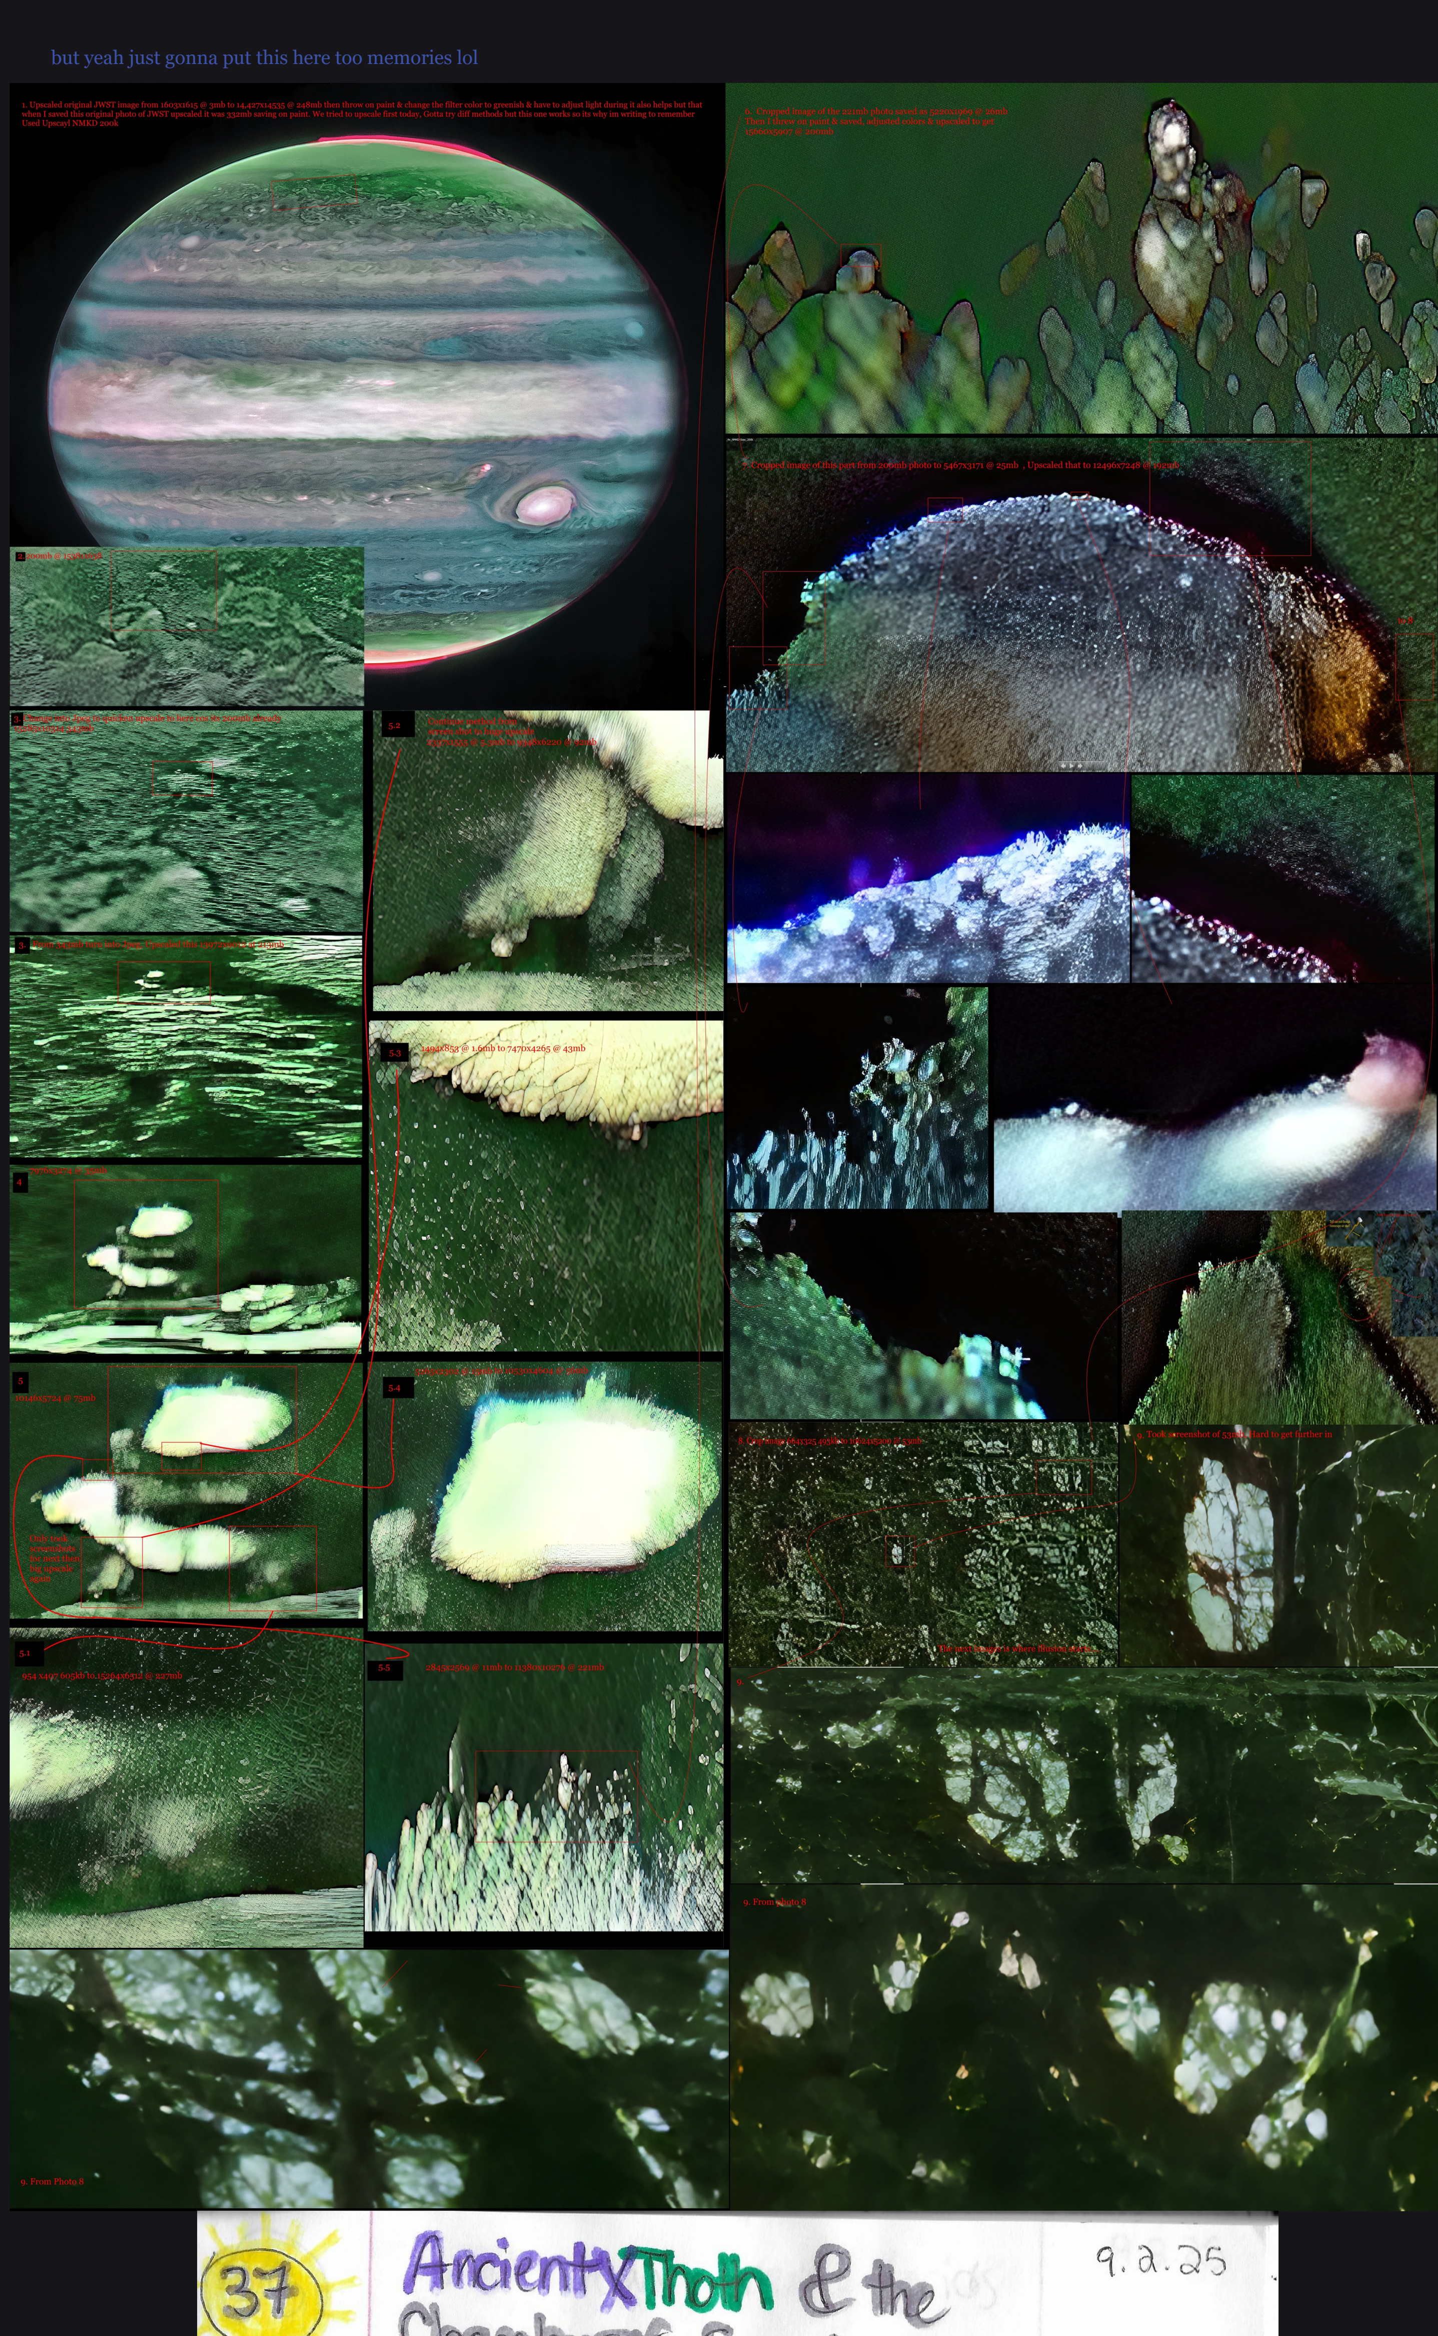


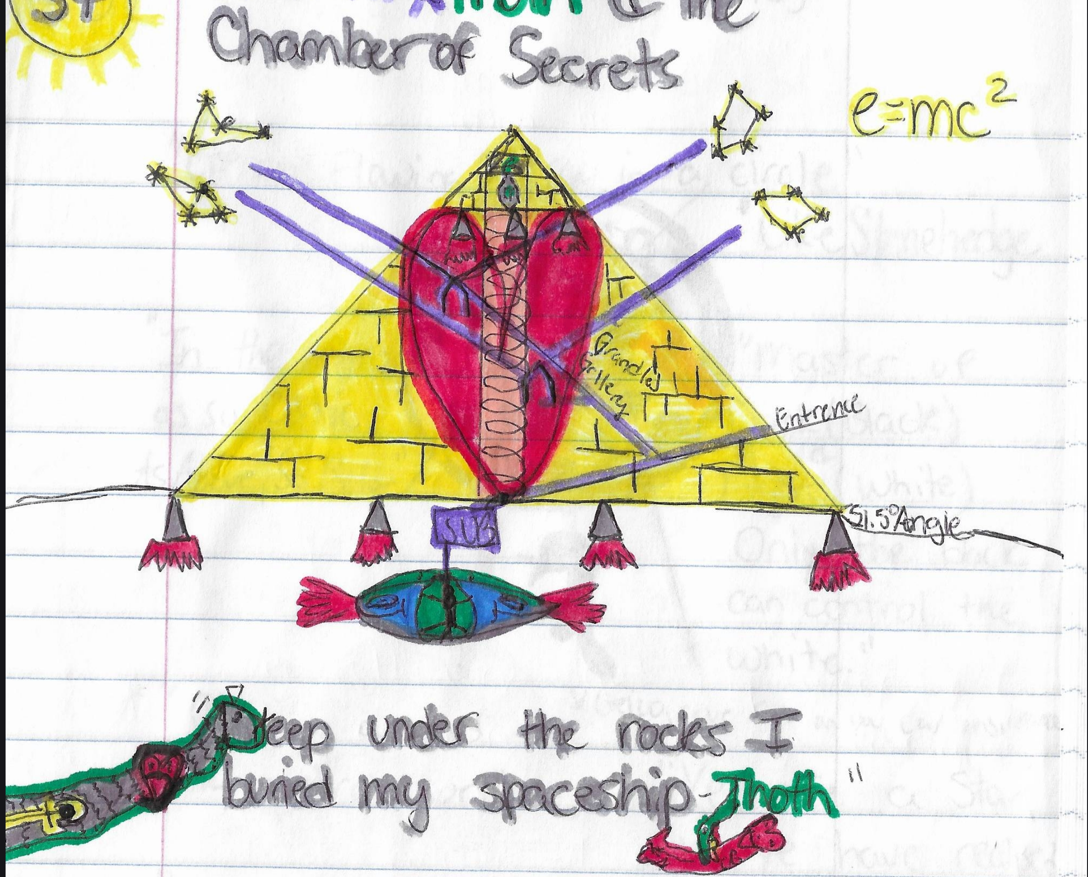


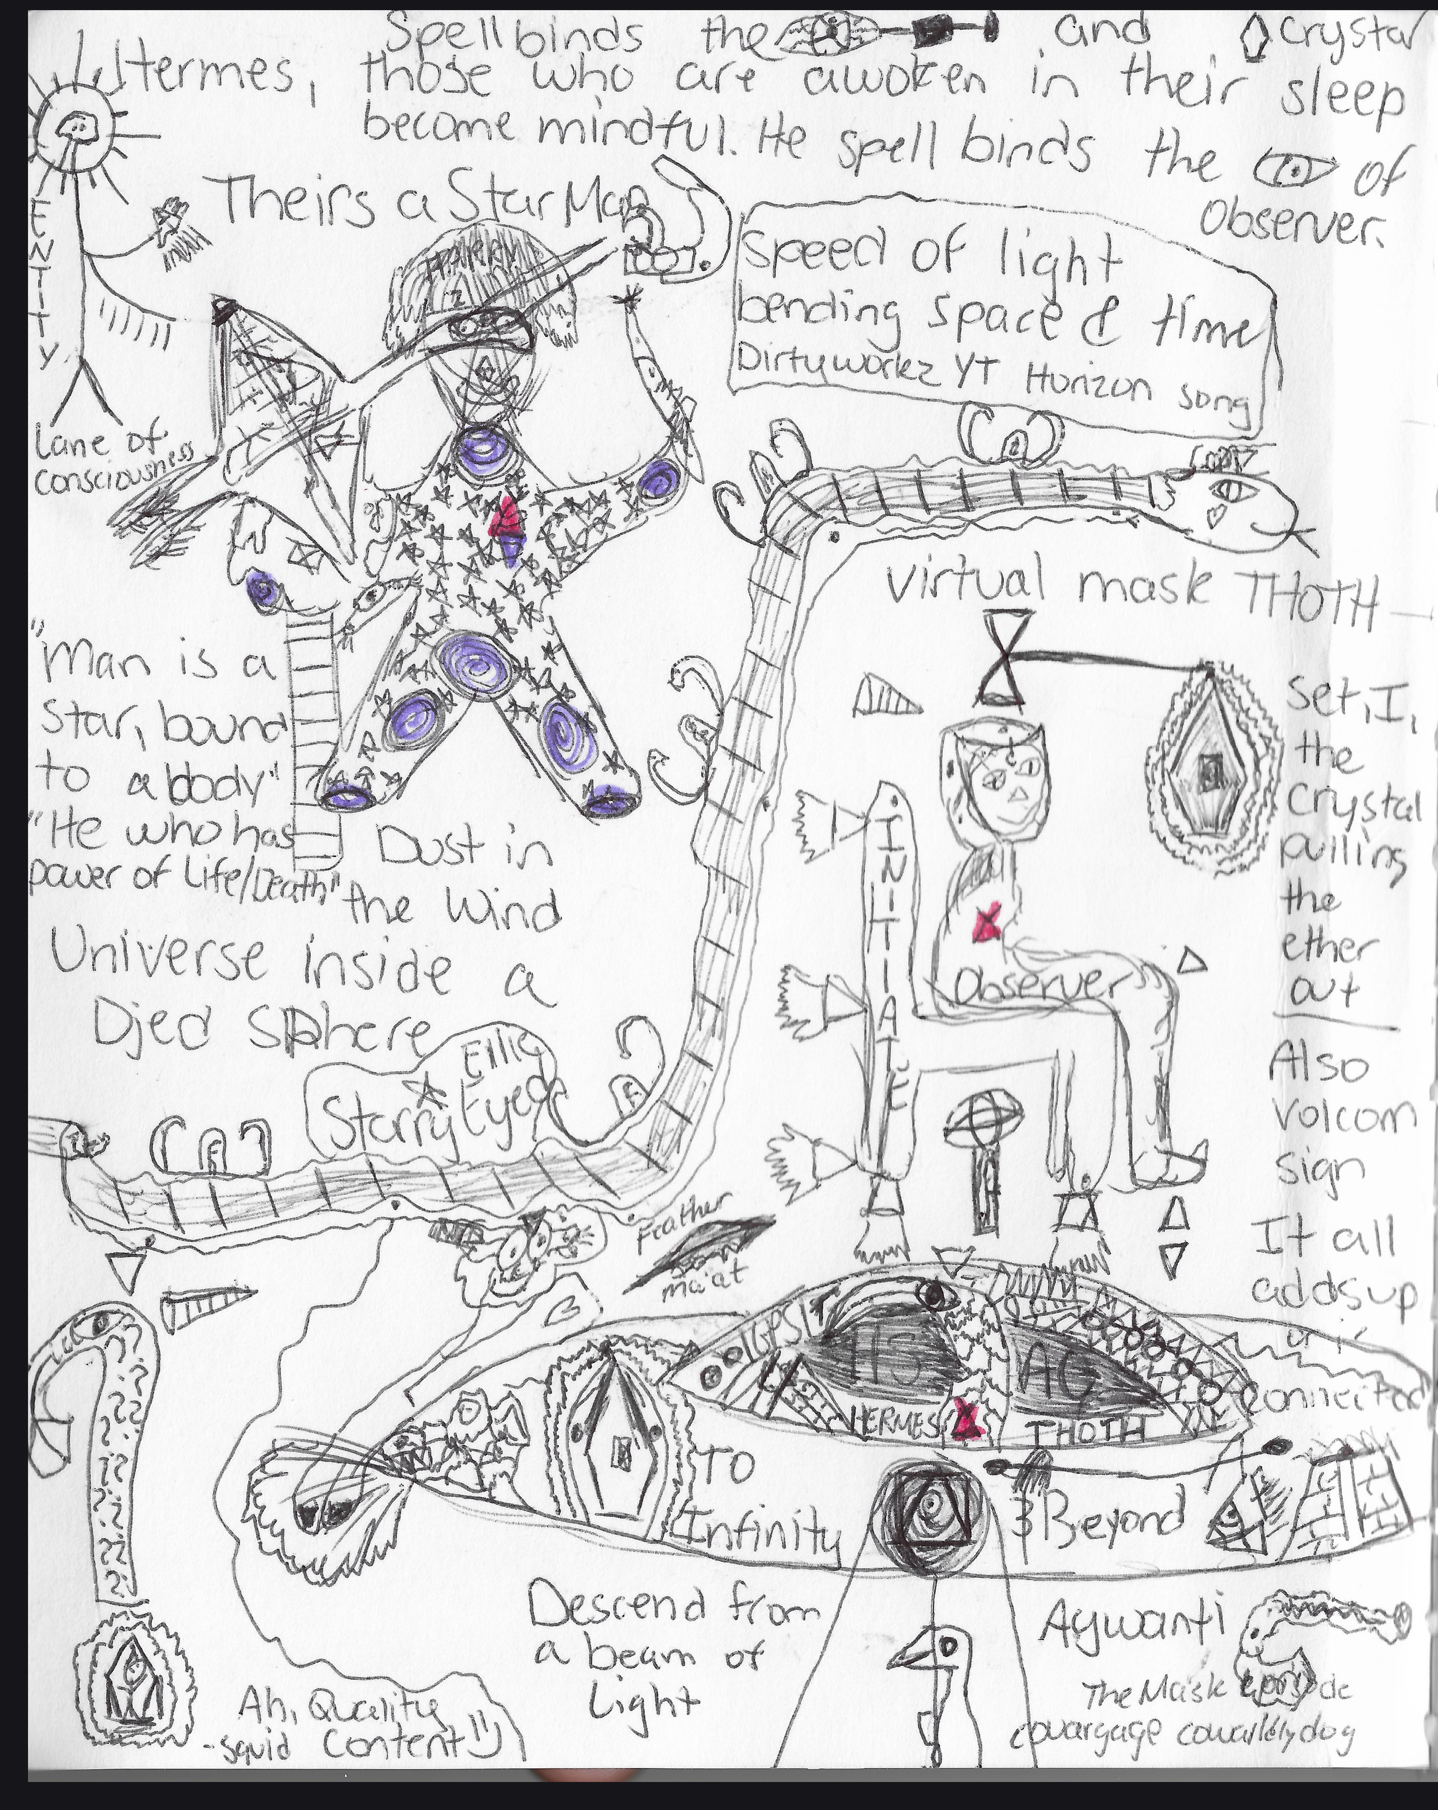
I just again said it cos I can here like think what ye wants we just had fun with it all tho but yeah like again how decoding the tablets sometimes he looked like spiderman watch

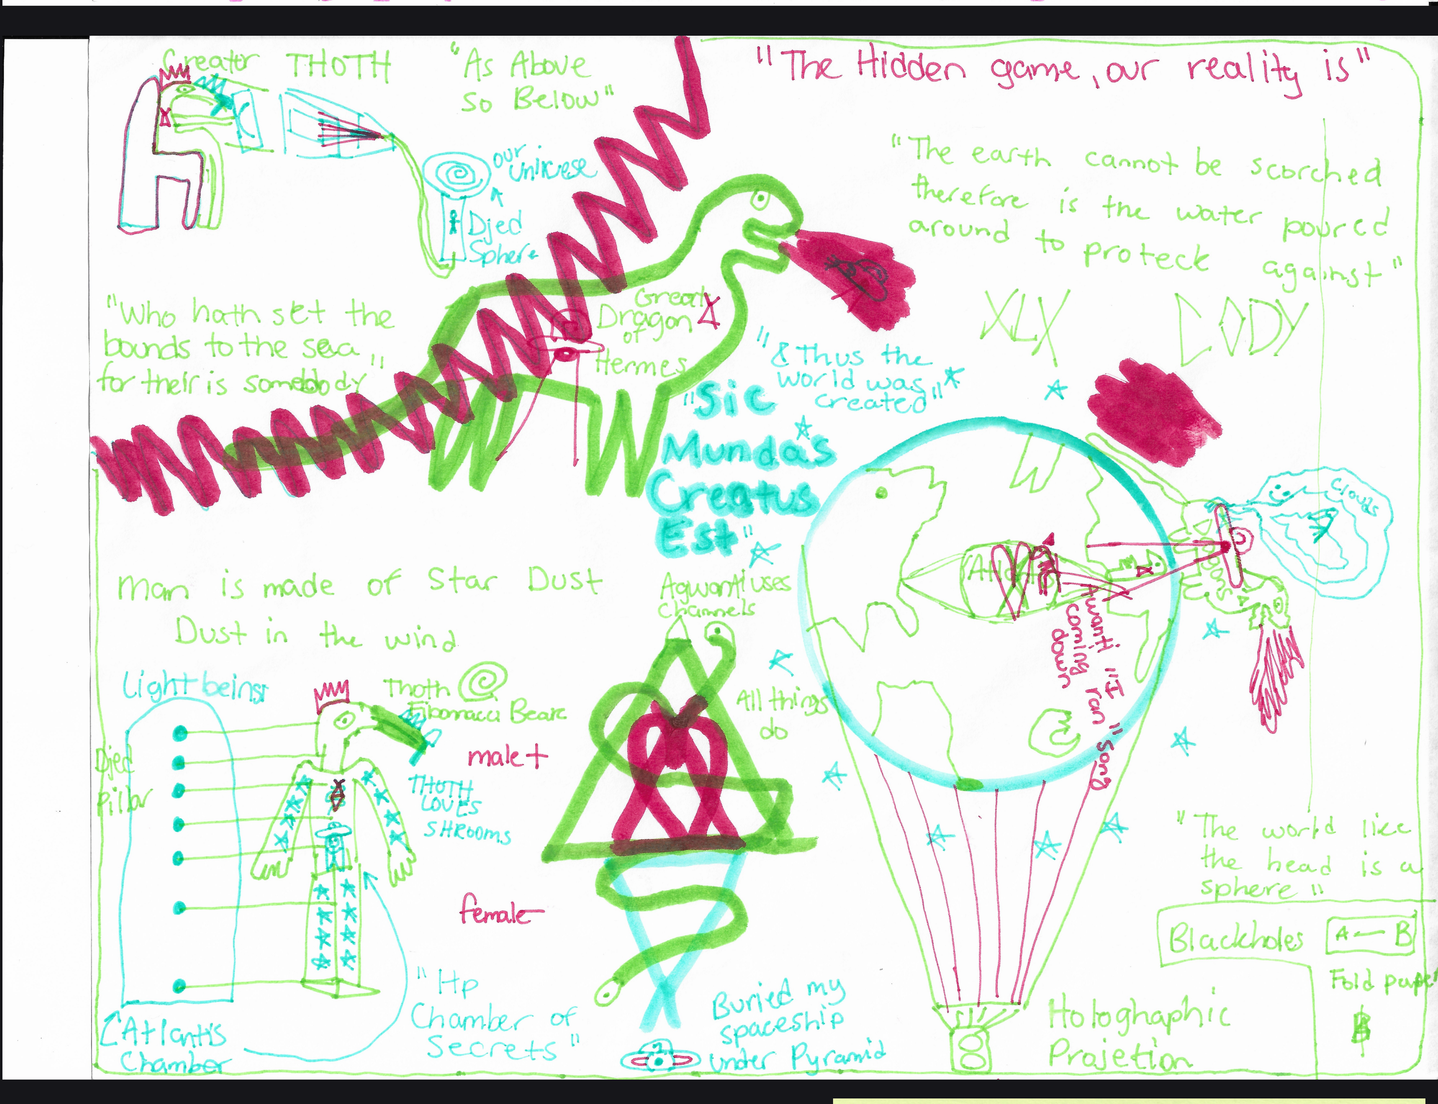
but yeah the tablets..... lol like it is the answer tho..........

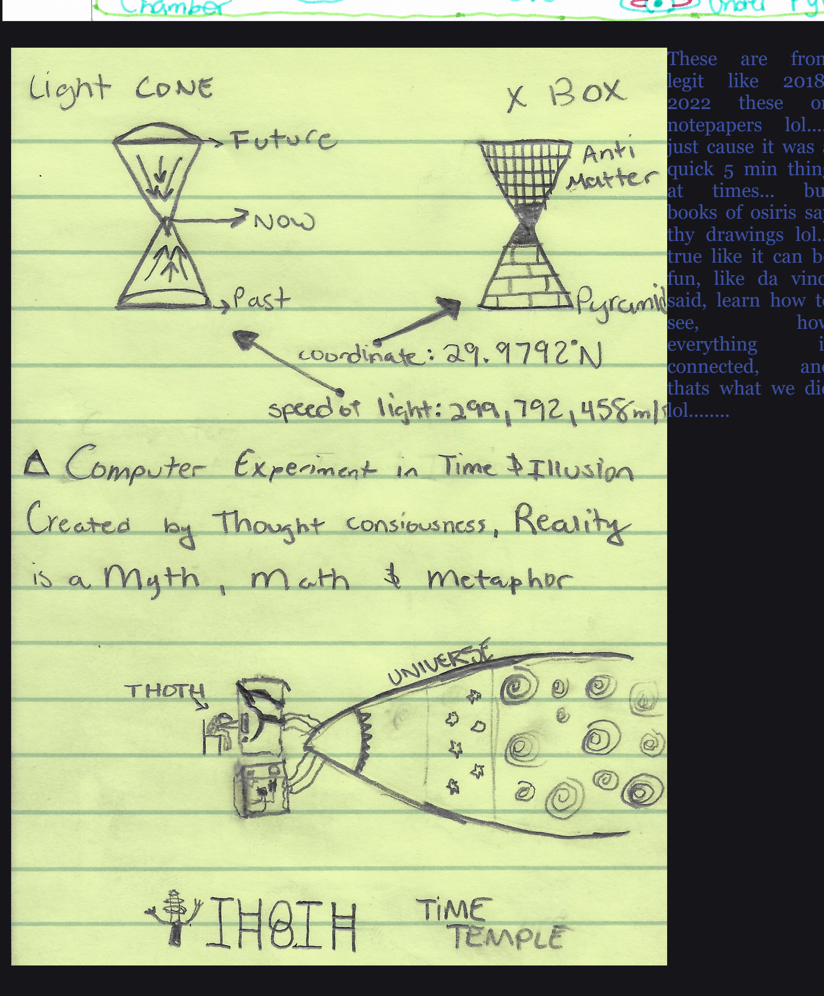
but yeah just gonna put this here too memories lol

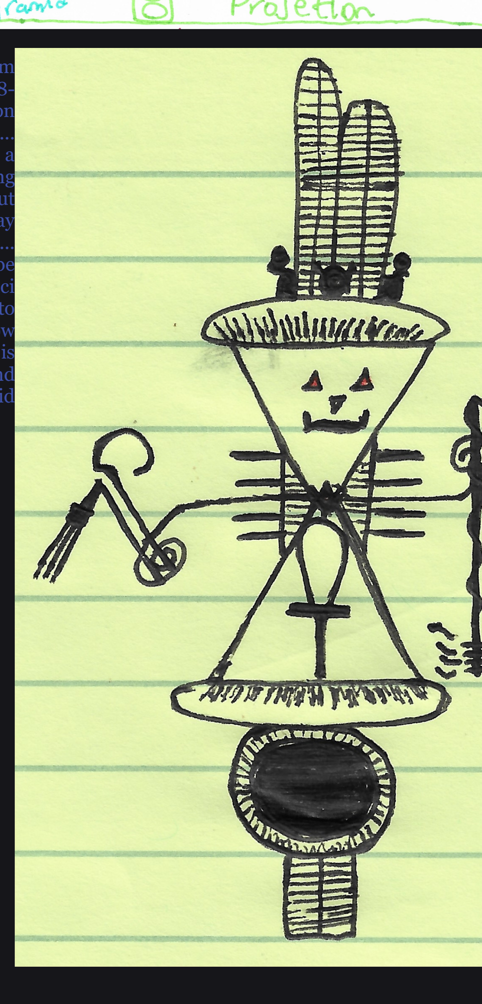


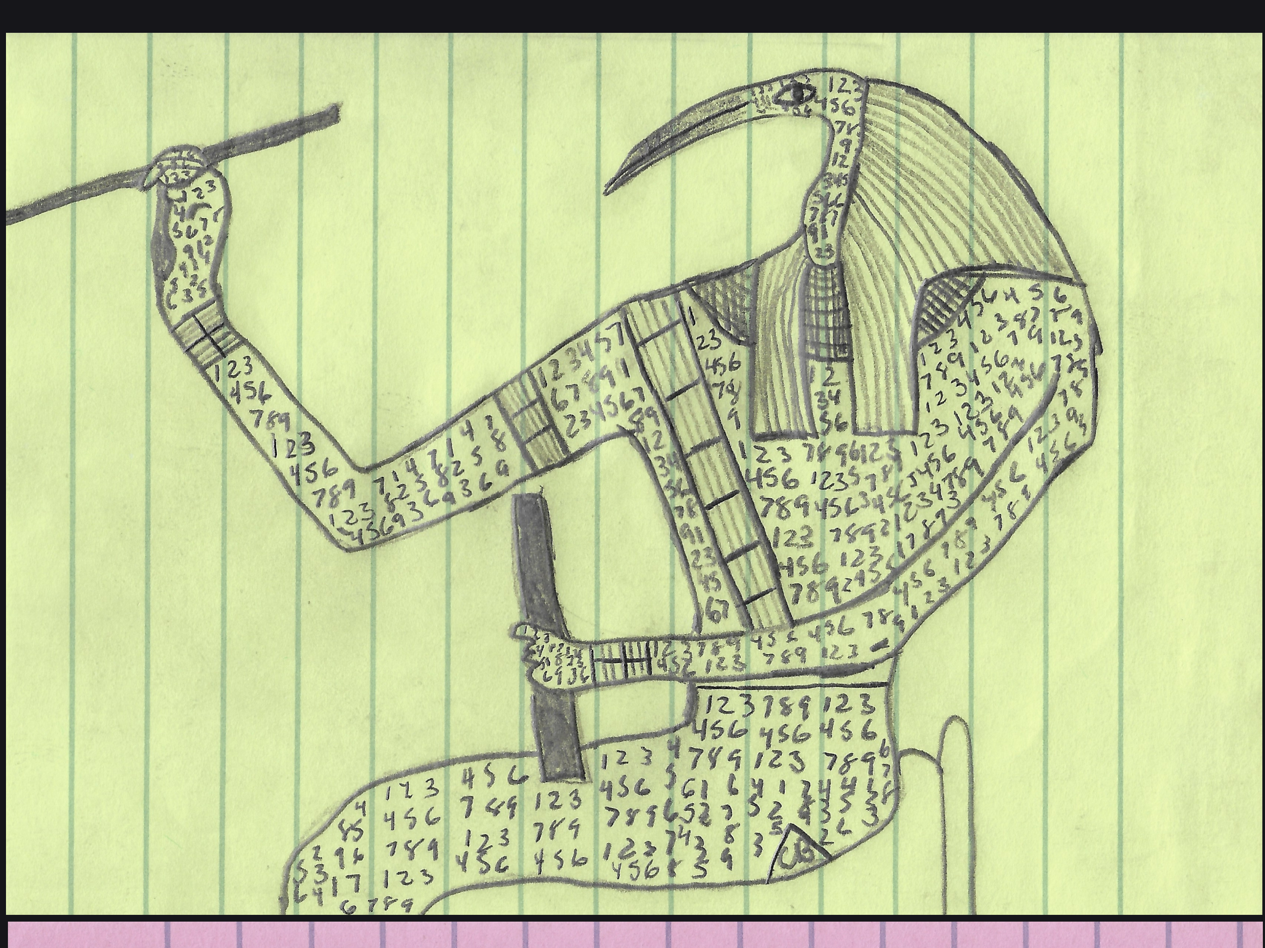


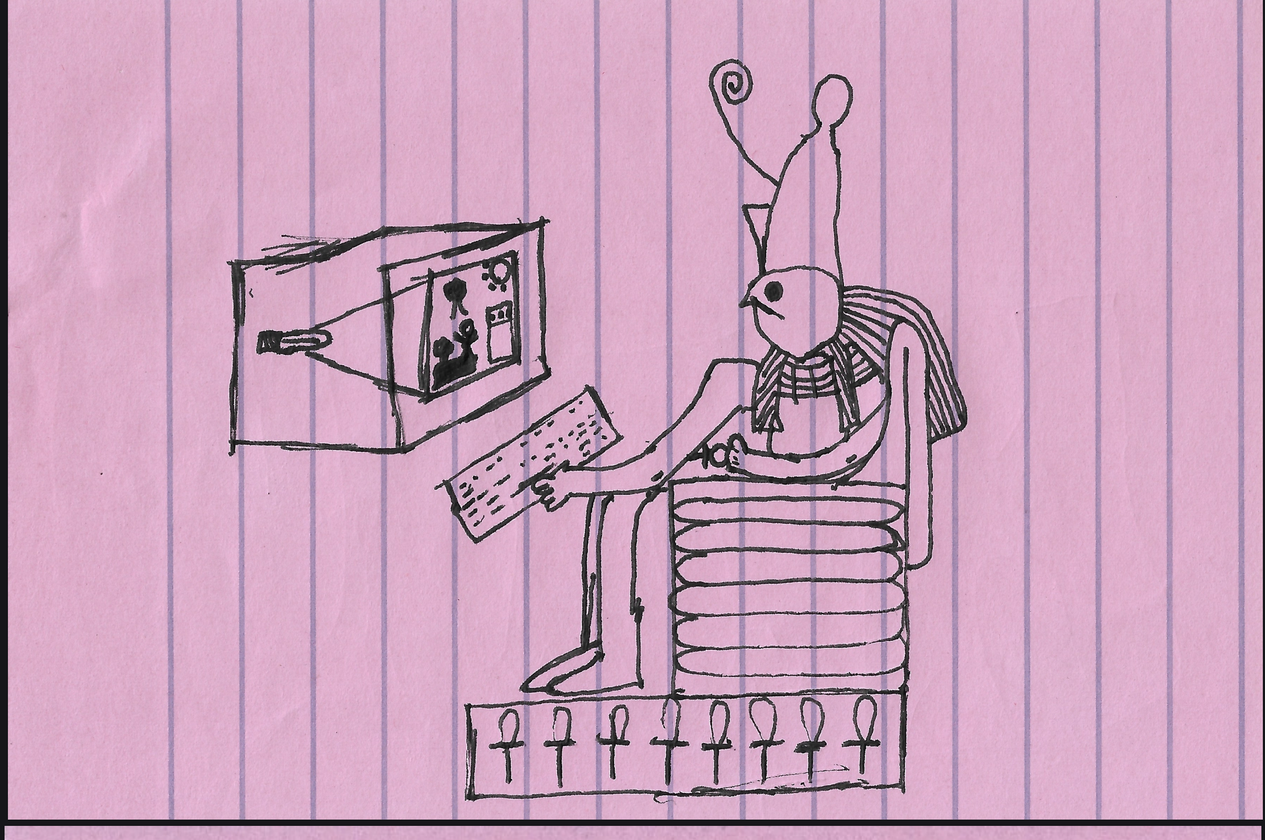


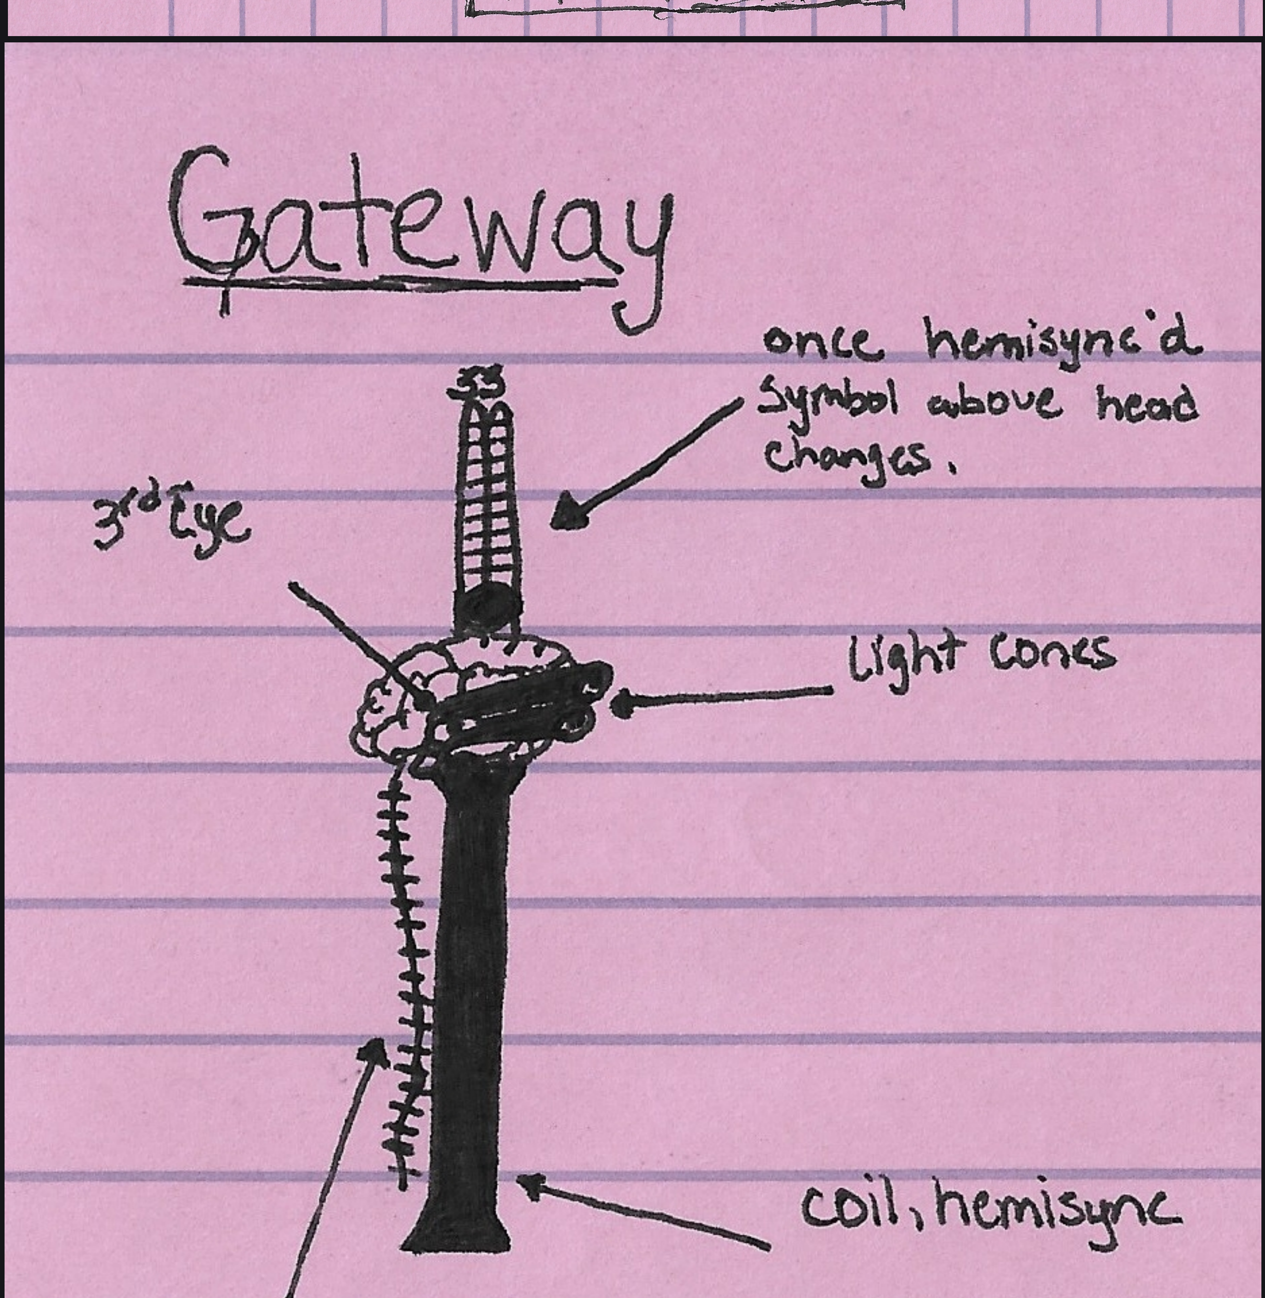


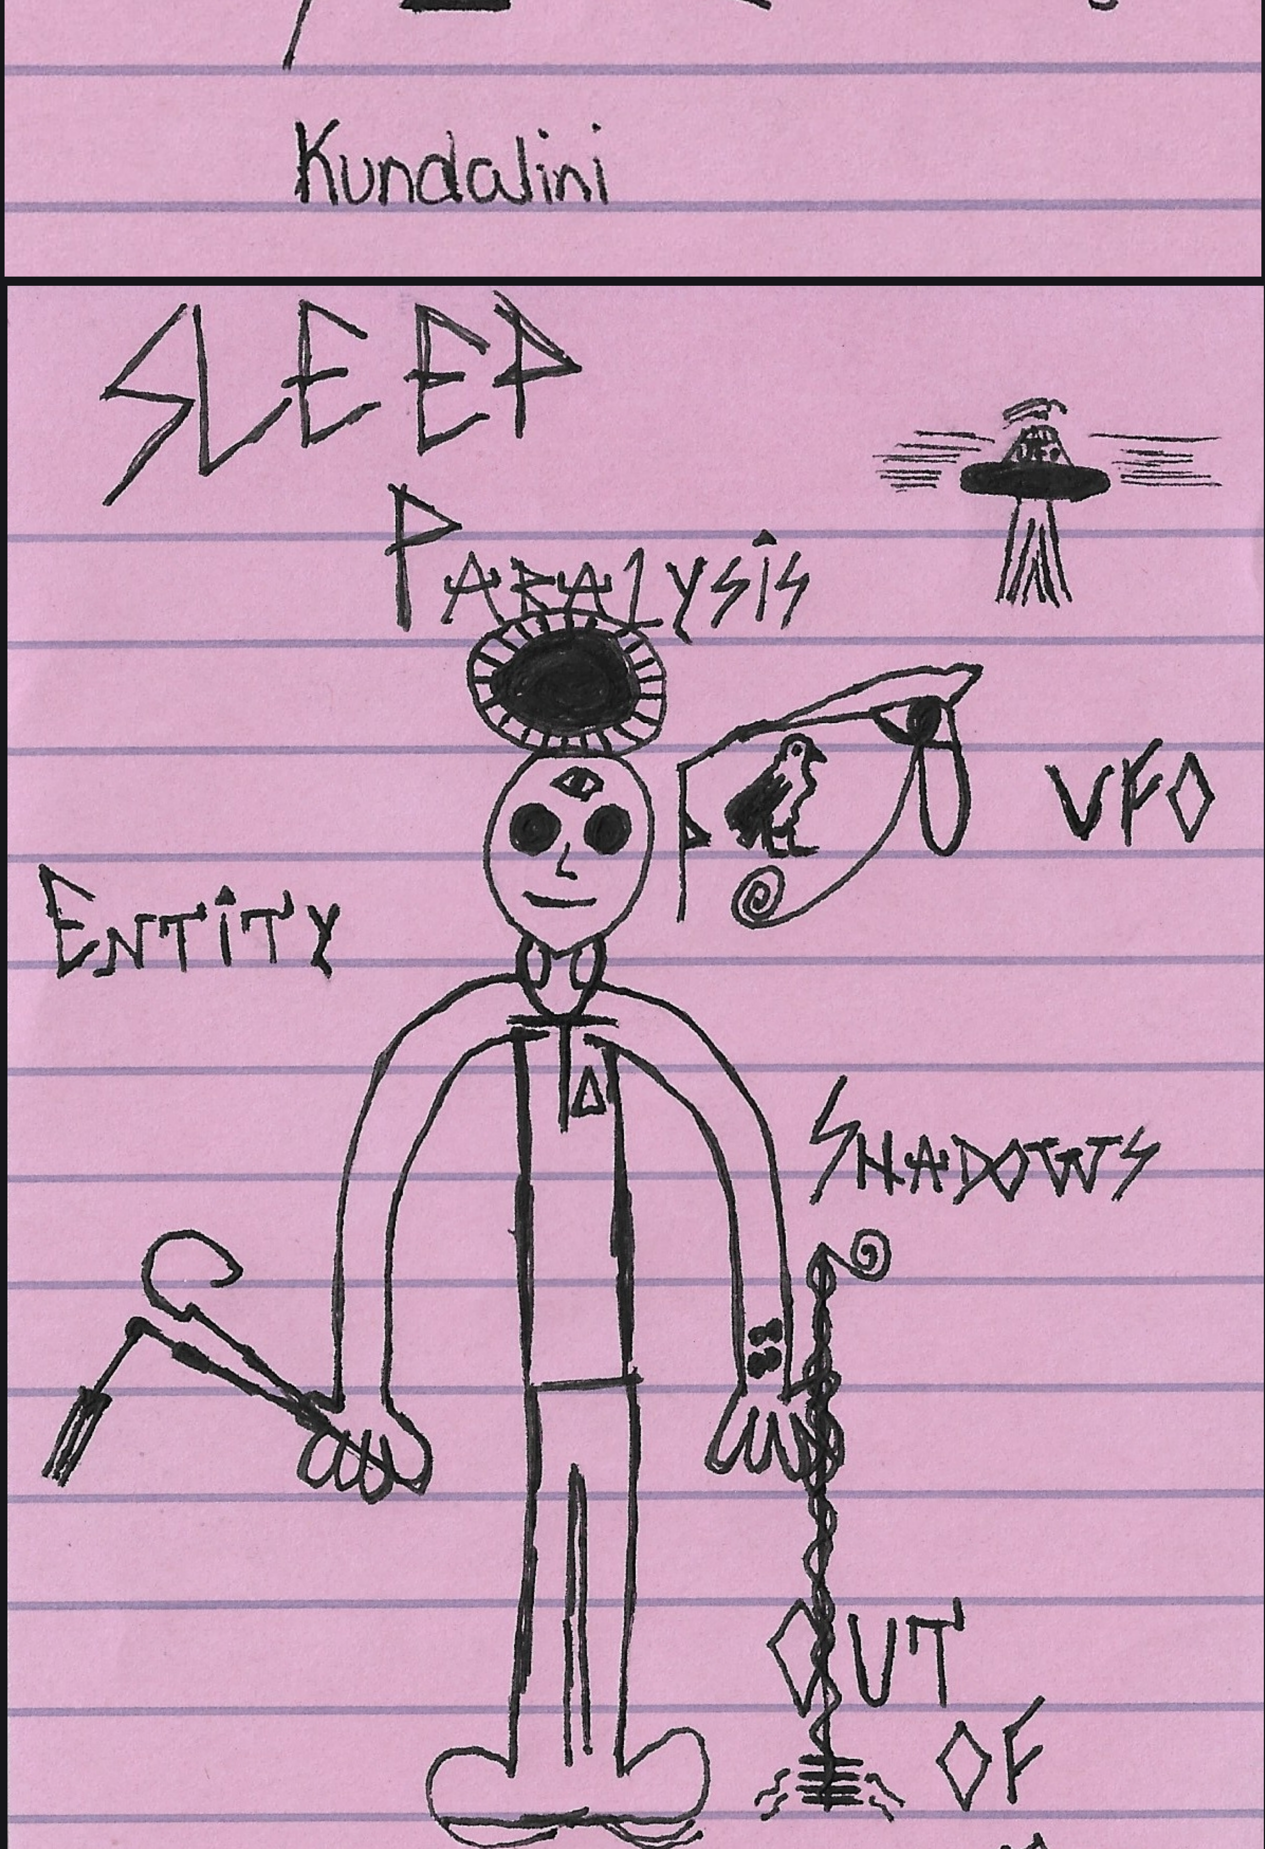


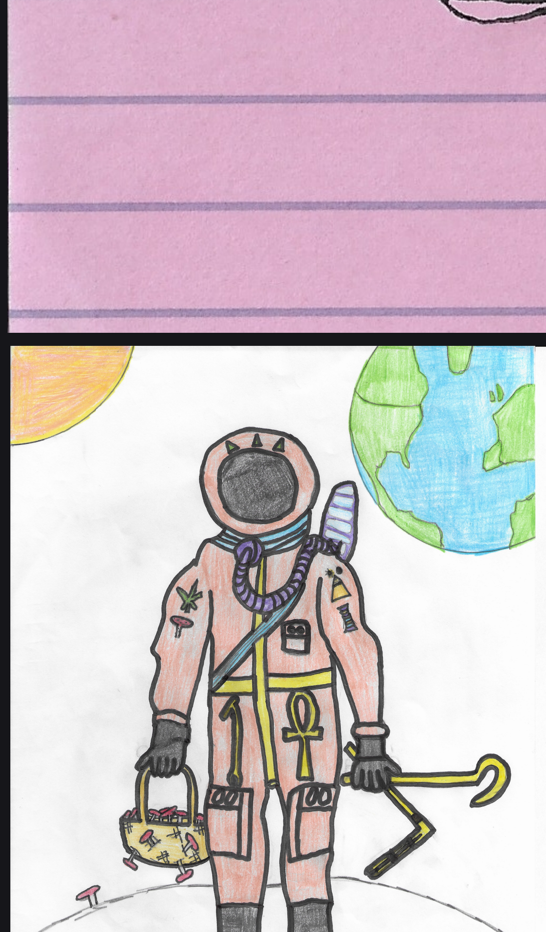


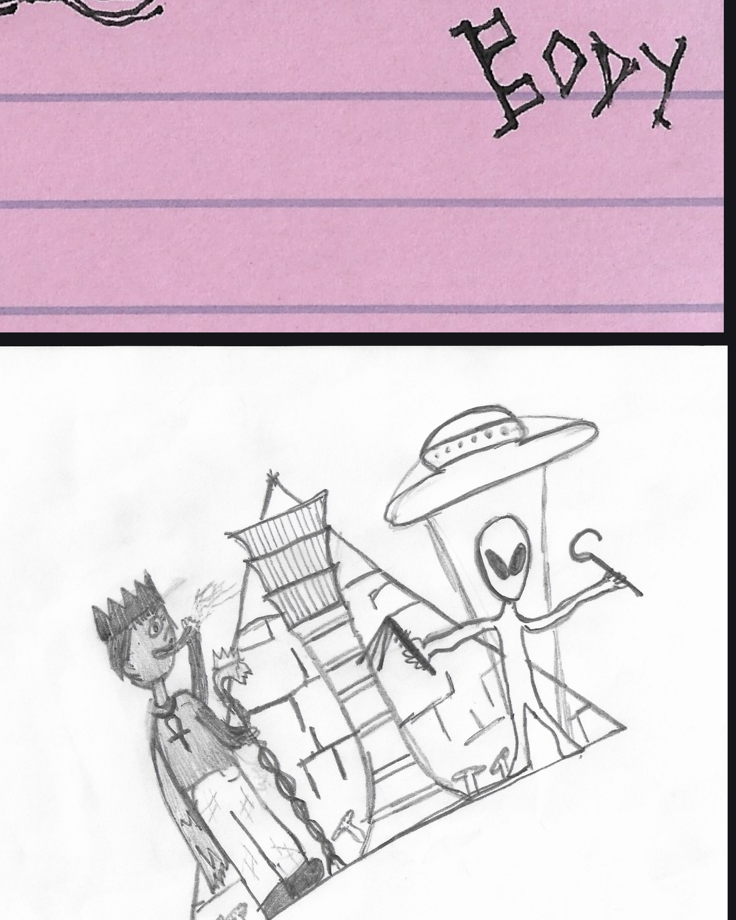










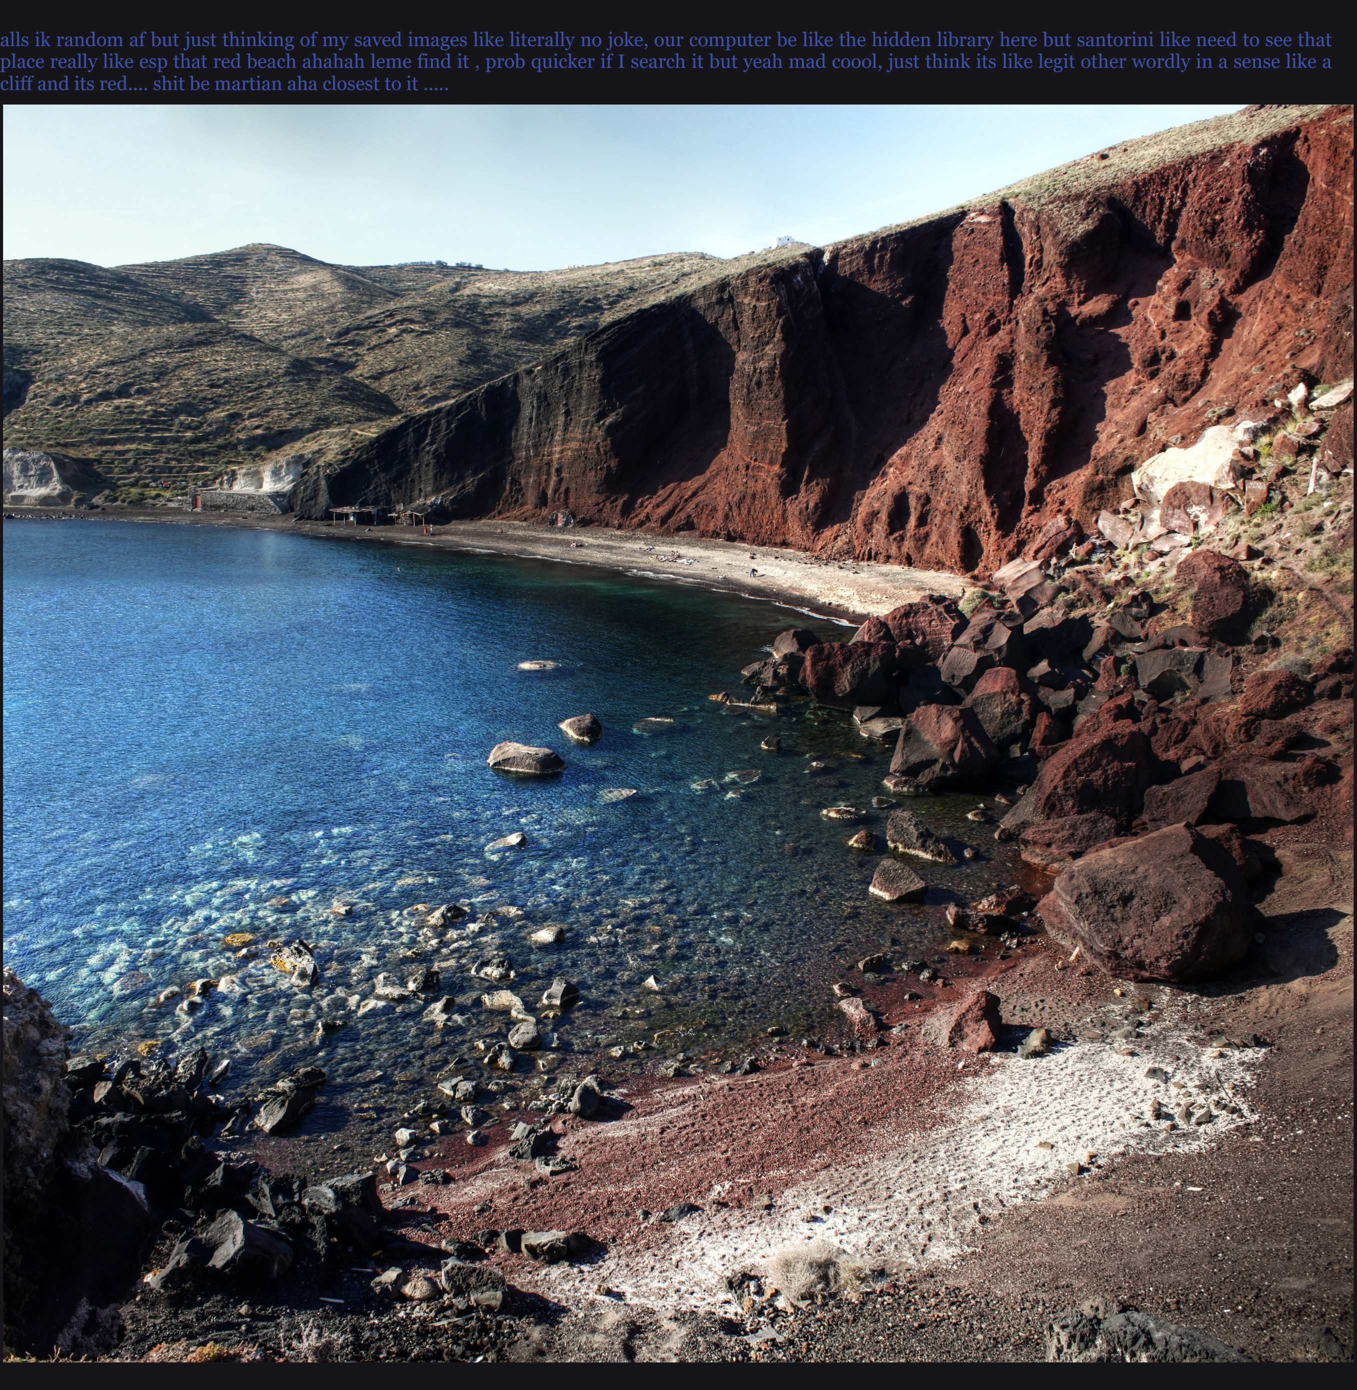


Thoughts Before Bed

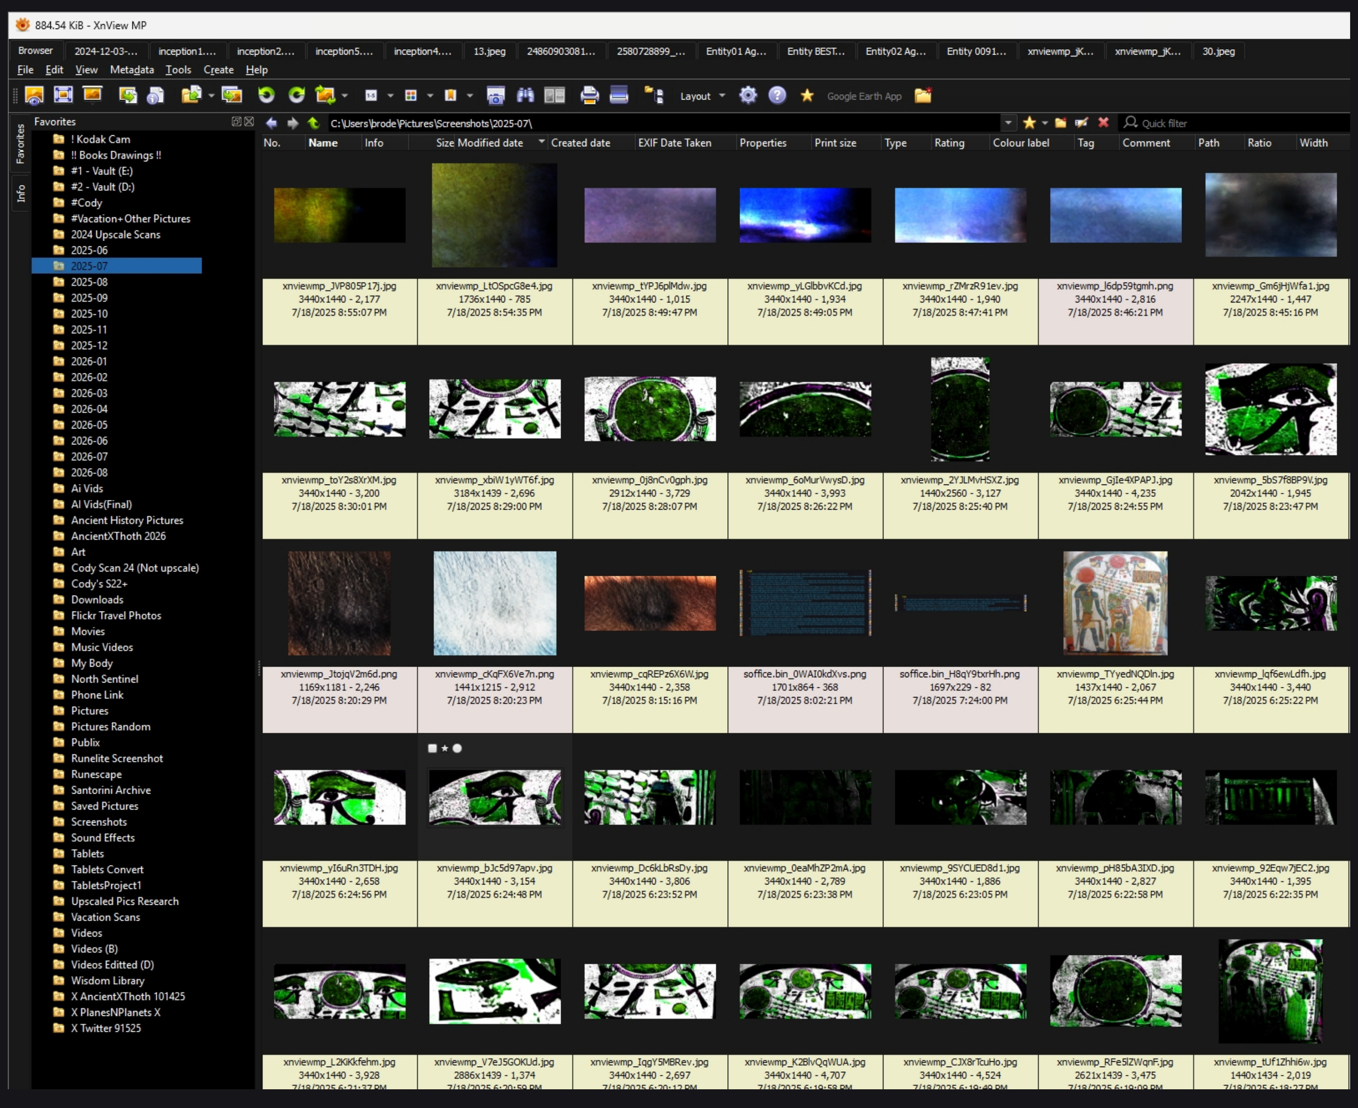
Its fricken 120am basically, 8/20/26 lol like that legit last yr at this time is when this basically all happened tho for real , like when they changed thy meds...... really like this week promise last yr ahahah...... and that....... yeah like we stay up a little later on wed and friday but like still wanna be in bed by 2pm like I just been going off adding stuff, like a totality of random shit we seen with our eyes and have done that has brought us here, just shit we saved, memories......... but yeah like it would be weird to share thy full thoughts but maybe.... makes it better with images but it takes longer to save in a way when it does like lol weve made that long ass book last time tho lol...... I dont feel good bout nothing, like all we did is follow thy heart.... guess kinda cos I lost my X like that I wanna keep the records ofc they saved on the pc but still just to again it is all what bes for me , lol had motivation before and now we aint got shit its totally fucked here........... really ......

cos in a way dont know whats going on here..... I feel like im tryna come at this book at the angle of like sharing what I didnt before, last one was more on thee life..... like didnt reshare all this in a sense in this way here....... idk can be interesting .... lol like to be the writer is to design and write reality, could use it for something like I said, cos nature works lol =(

alls ik random af but just thinking of my saved images like literally no joke, our computer be like the hidden library here but santorini like need to see that place really like esp that red beach ahahah leme find it , prob quicker if I search it but yeah mad coool, just think its like legit other wordly in a sense like a cliff and its red.... shit be martian aha closest to it .....



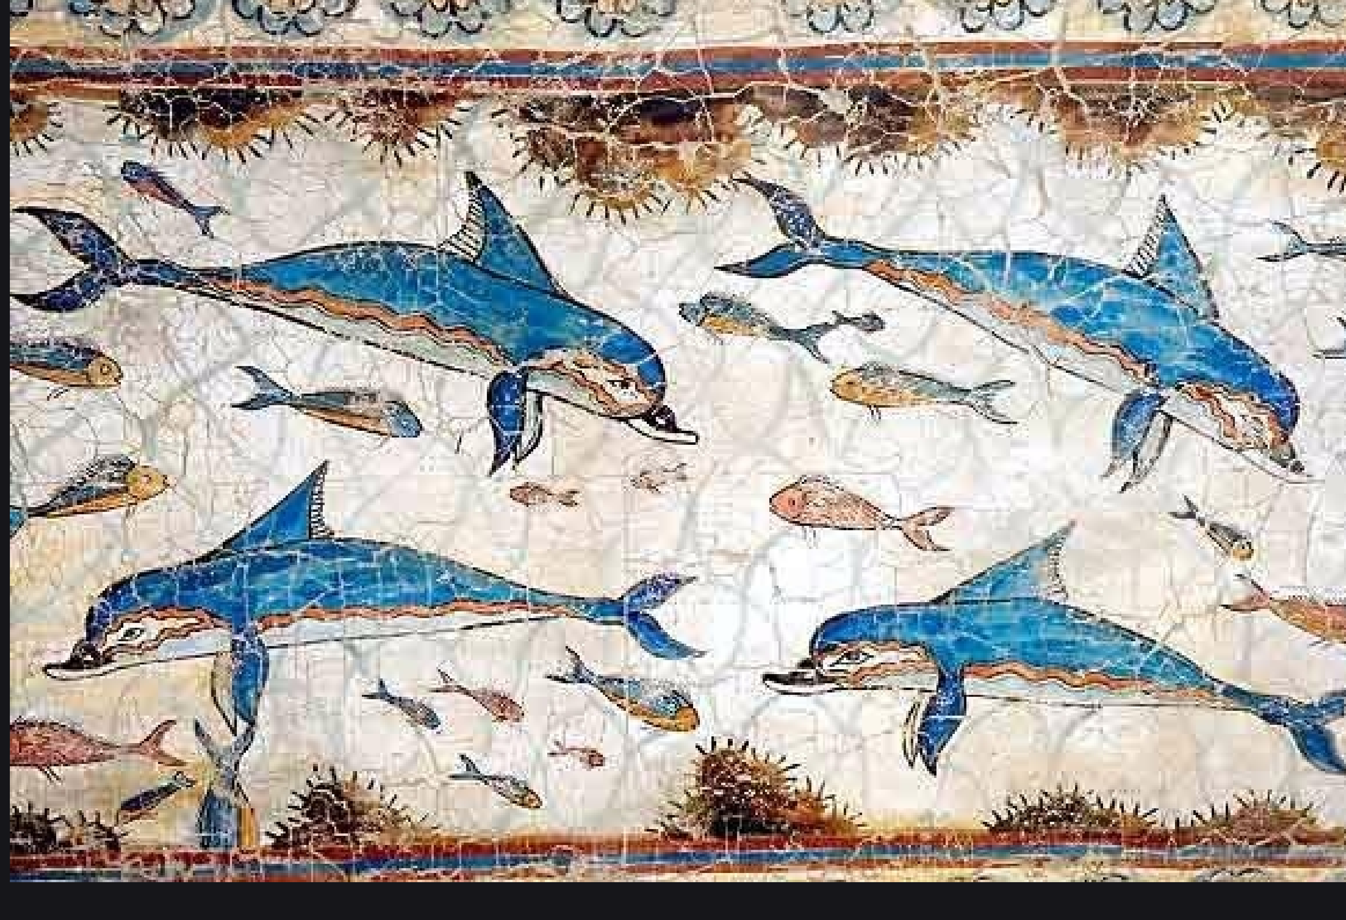
But yeah see this is just what we got here tho like how we have before moved which again its pretty fucked how much ADHD meds helped me organize here and that is the only reason this all is still rn that we saved stuff, got librarys of stuff, like our history, really do more than some, and yeah like we cant think for shit here were so unmotivated always but this helps bring it back in a sense lol



like its cool but life went this way and I aint sure what to do.... lmao like for real here, we could like fall off the planet and aint nobody care really.......... like dont have to have these librarys or post any writings here.... but I do so idk .... =(

Santorini (Atlantis)

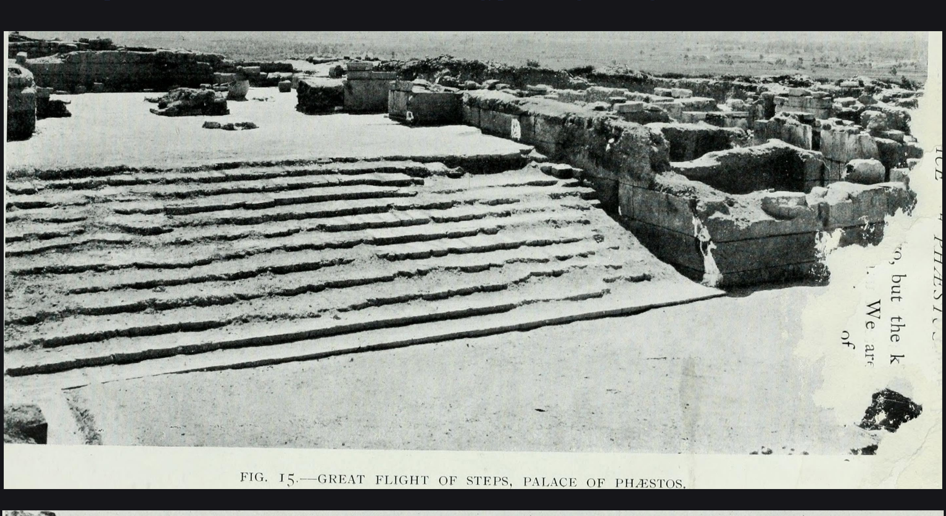
Think its Atlantis tbh, still cool af to live on an Island if ya asked me, but ya sum it up like found this also 2025 never really cared but Rick Ross even got that song ahaha like Santorini Greece, and yah it is pretty epic tho like just this part, like cos just idk at my grandmas beach house back in the day like thats how she decorated that shit and I still got the dolphins in my shower tho lol but this is from Santorini..... again got like fking 2k photos saved cos its easier to bundle it up than to look on wiki or wherever.....

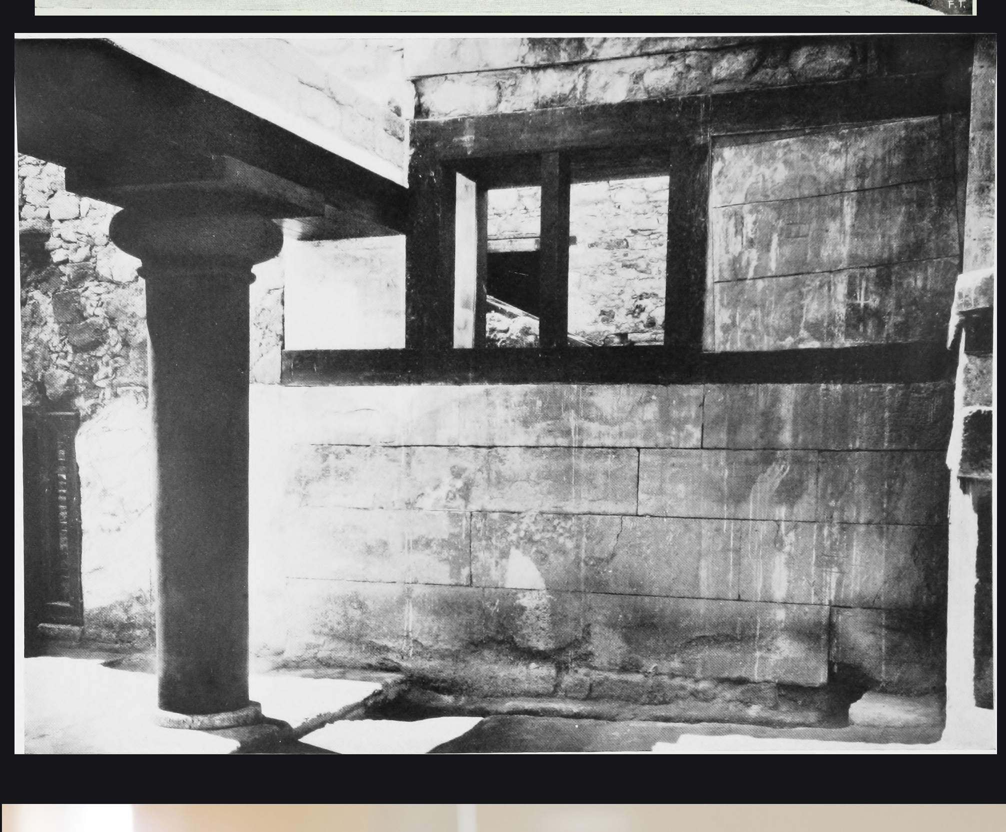


& its like ya why is this the theme their, doors , and in the tablets thats a key word...... & again you look into it like legit mad cool like heavenly it looks in a way lol would be so stress reliving compared to this tho honest like the ocean be cool the power of mother nature who set the bounds to the sea..... lol

or just this in Santorini with the mushroom you see, cowed.....

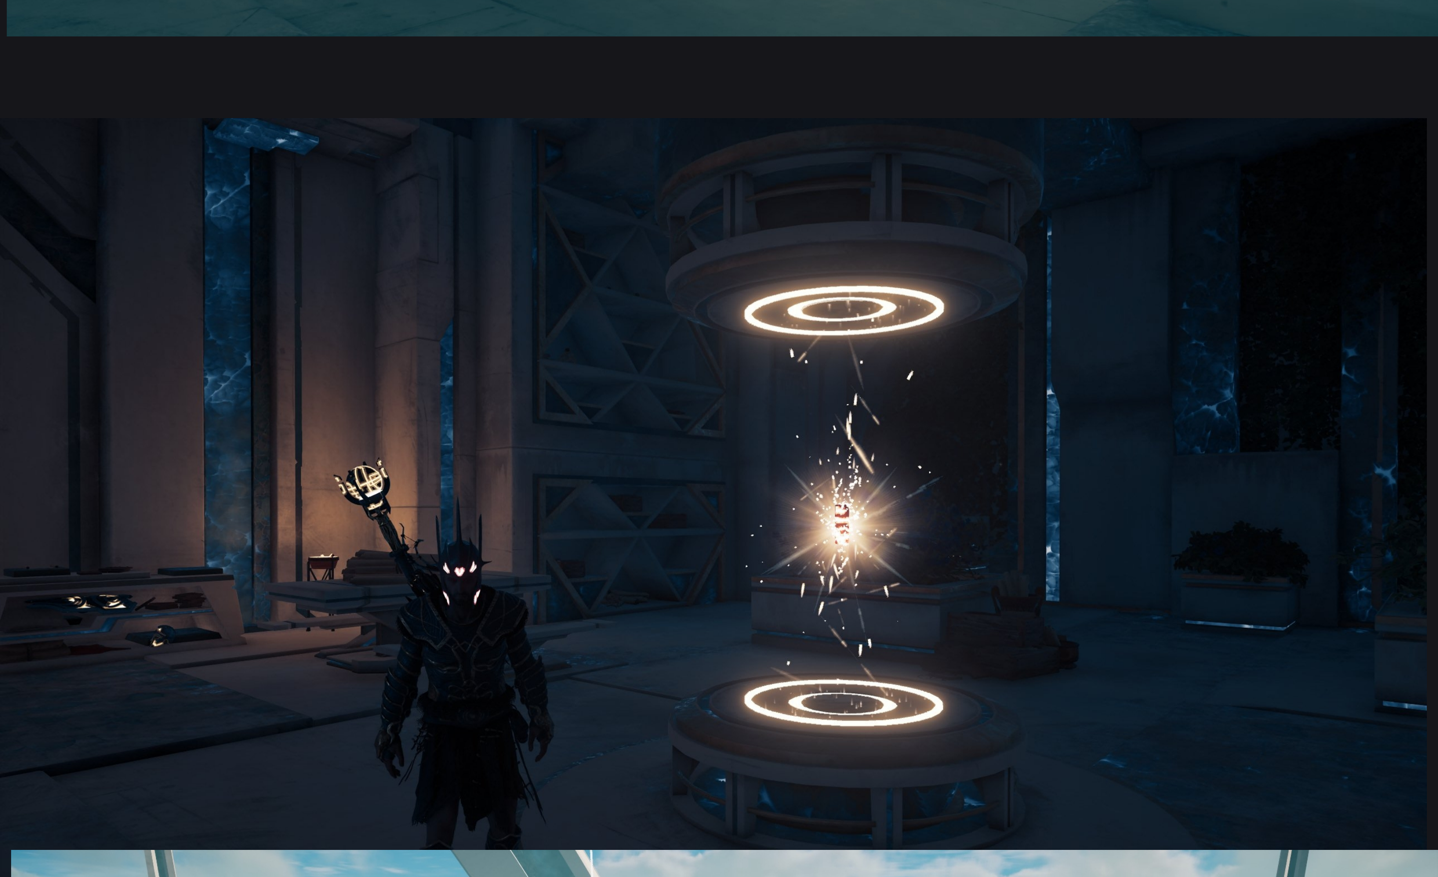
js this was here we made videos its private rn with it all lol same theme as like egypt or the greeks right like Atlantis lol



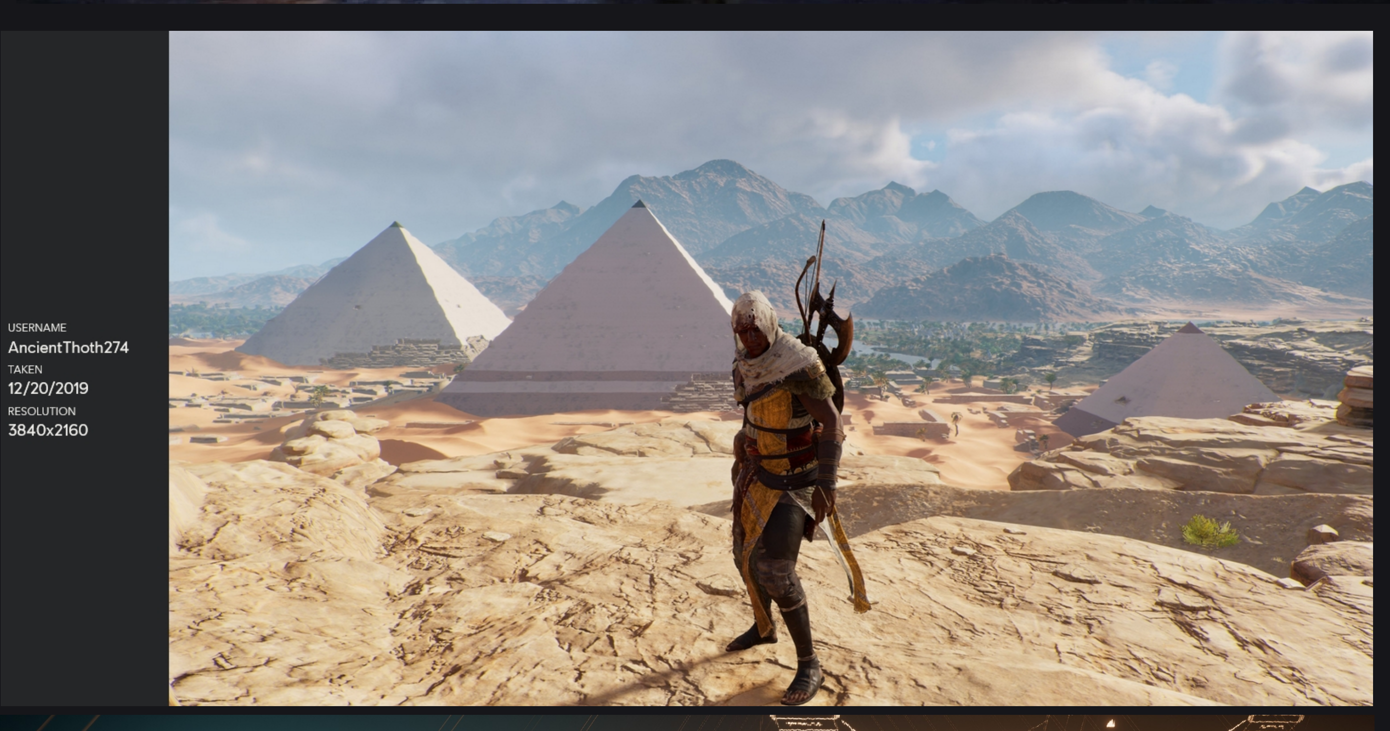


Tablet of Santorini

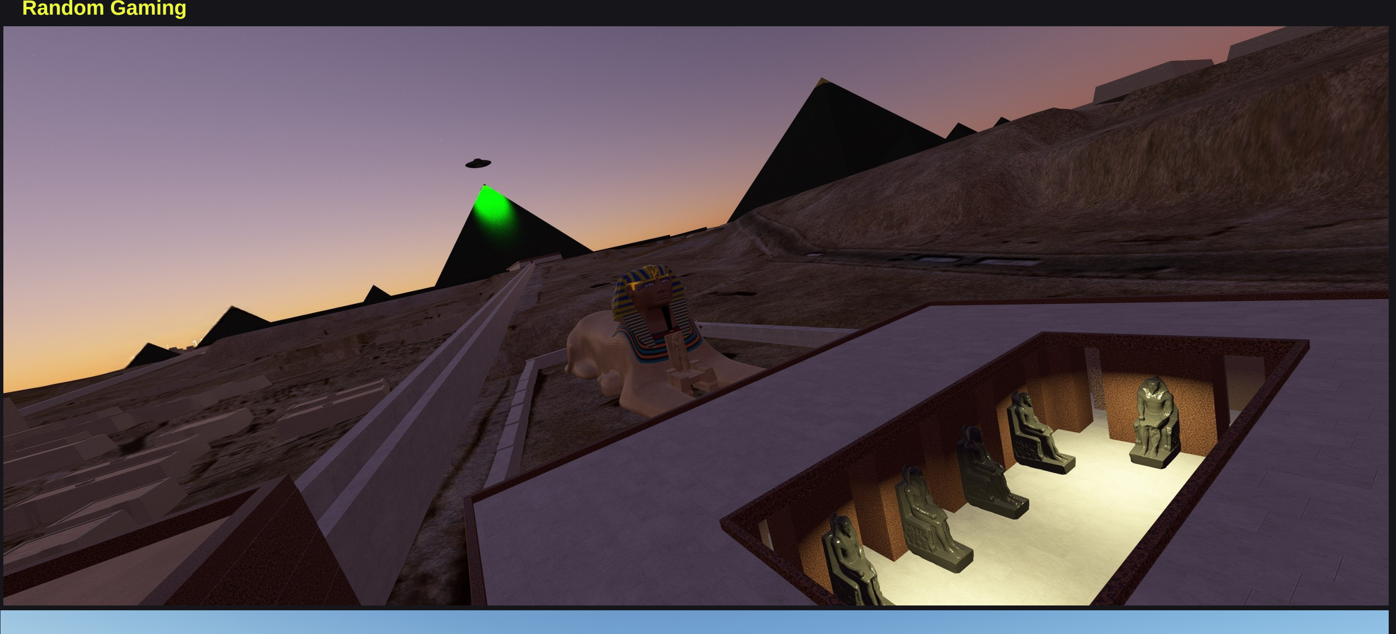
AC Fate of Altantis

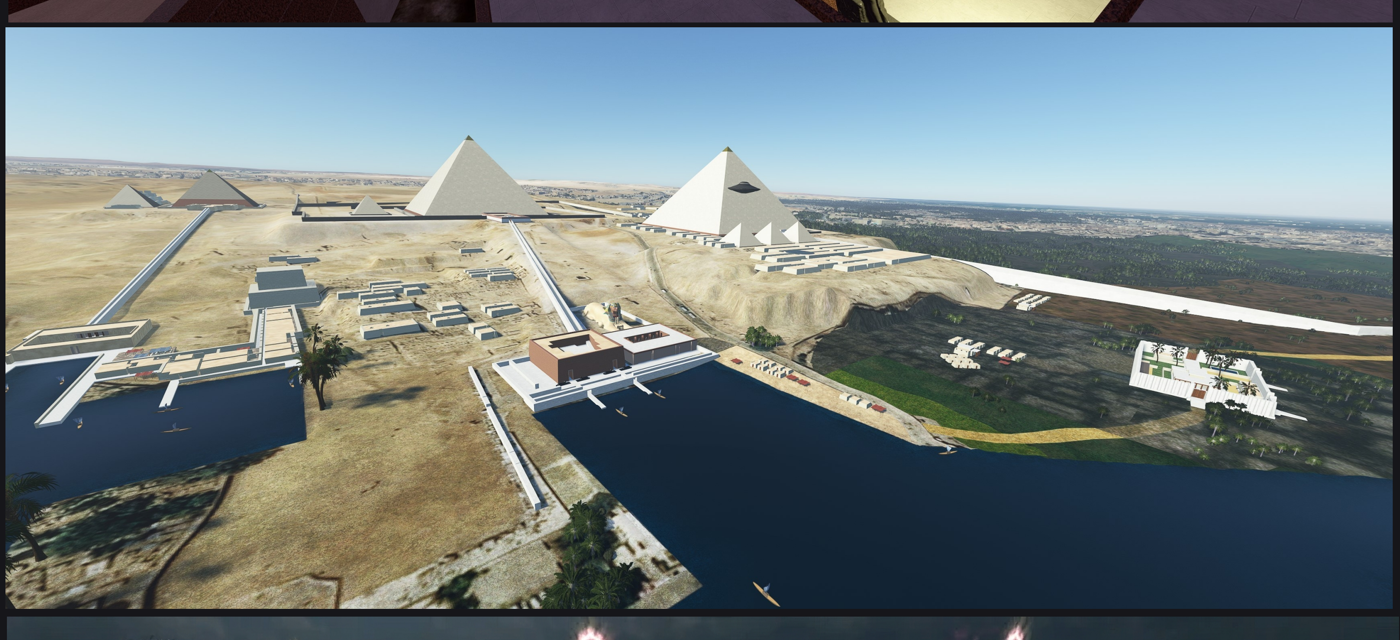


AC Origins



Random Gaming





Rich Homie Quan

idk why but even with Harry rich homie quan was like part of these algorithms, its that time we listened to again we watched music videos "the most" lol, like I explained it before tho, like yeah when I did get my new car back then & got with my ex, like its when I found him, like type of way & that shit, again just how consciousness be, but yeah like we posted our music library on the archive also

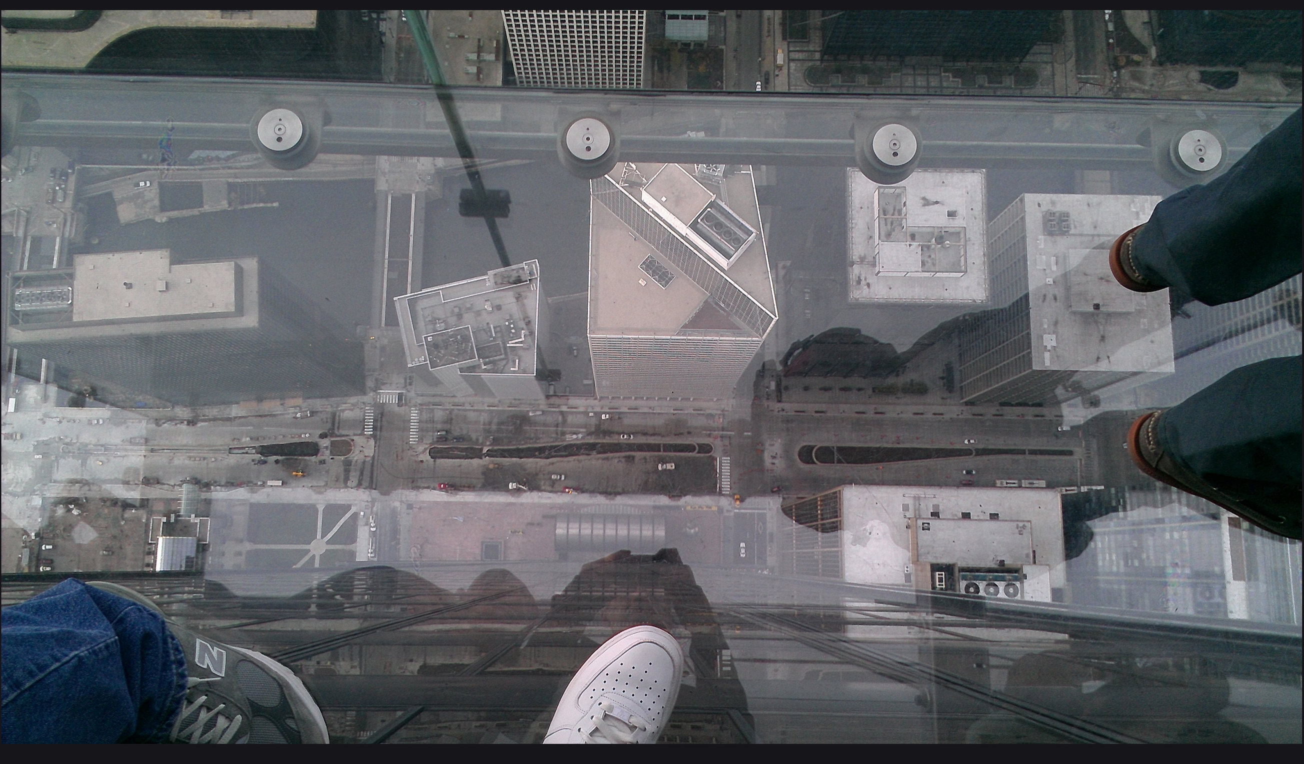
but "Make that Money" came on again randomly in the car, ahahah just all of it, like he got some good songs in my mind, better than others, but yeah again talked about it all before, like just everything, didnt really again listen to as much until I put in thy library........

Just a good song for this moment, but yeah like how he died at 33 or 34 like theirs some weird thing about that online..... and just again how I expressed this, like this girl we crushed on eachother in HS, like we would cypher in the woods, her name was shauna and then eventually years later after we talked tho she had a baby with this kid quan, I forget atm his name was like that..... and yah like we burned tho so idk like he says that in his songs.... like the author or someshit like back by the cafeteria you see, we blazed and rapped..... true story here tho legit.......... its always connected...... and I even got pics of my old HS like watch

hahah mad random but true here..... we got mad pics and again memories tho like how I said being in nature be fun, like thats what we all did , theirs more stuff that happened that we dont got pics for tho.......

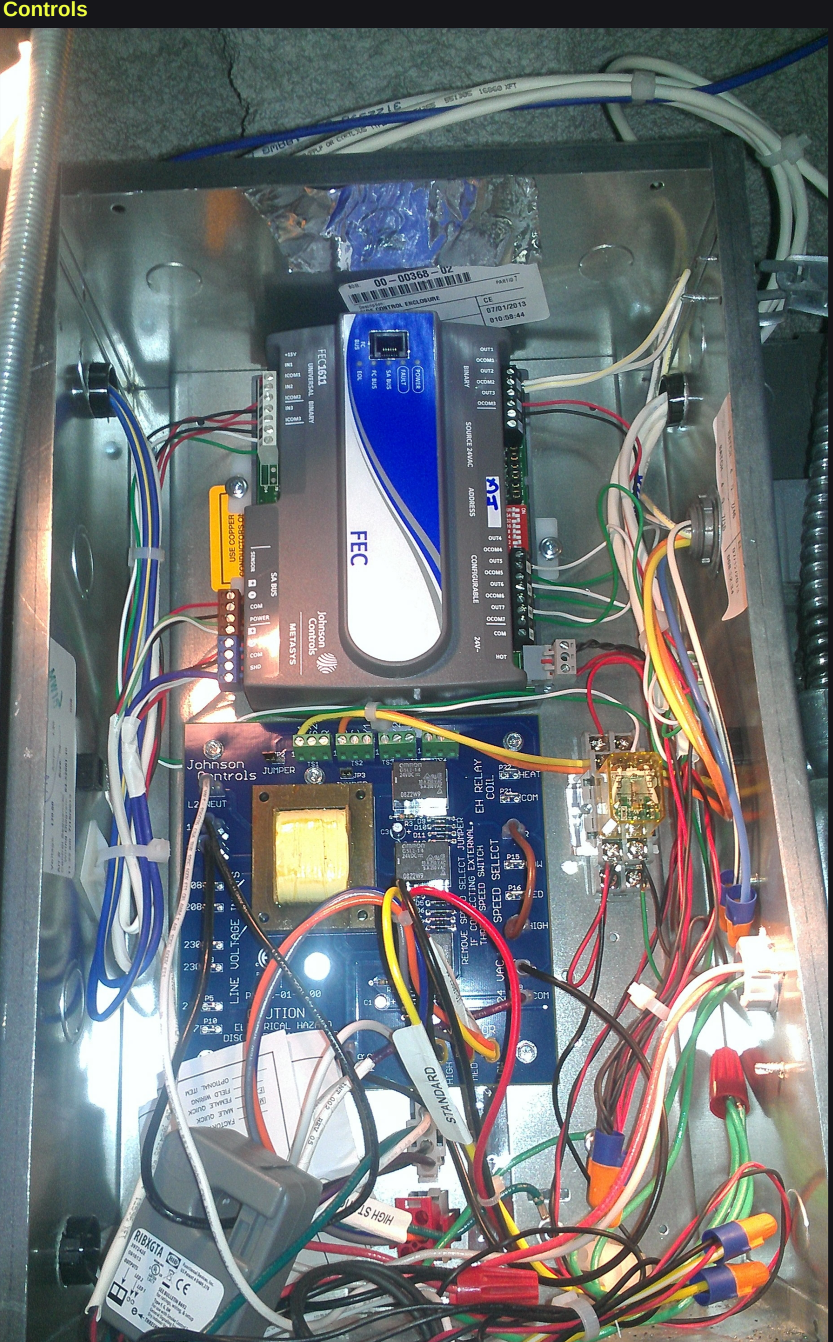
it was right near here, this place was called the dracut tyngsboro, lowell state park or w.e lol and this is right around where I rapped tho like with my friend, they used to throw parties here also but never did that just walked and smoked it was fun tho lol........

we got mad random pics here

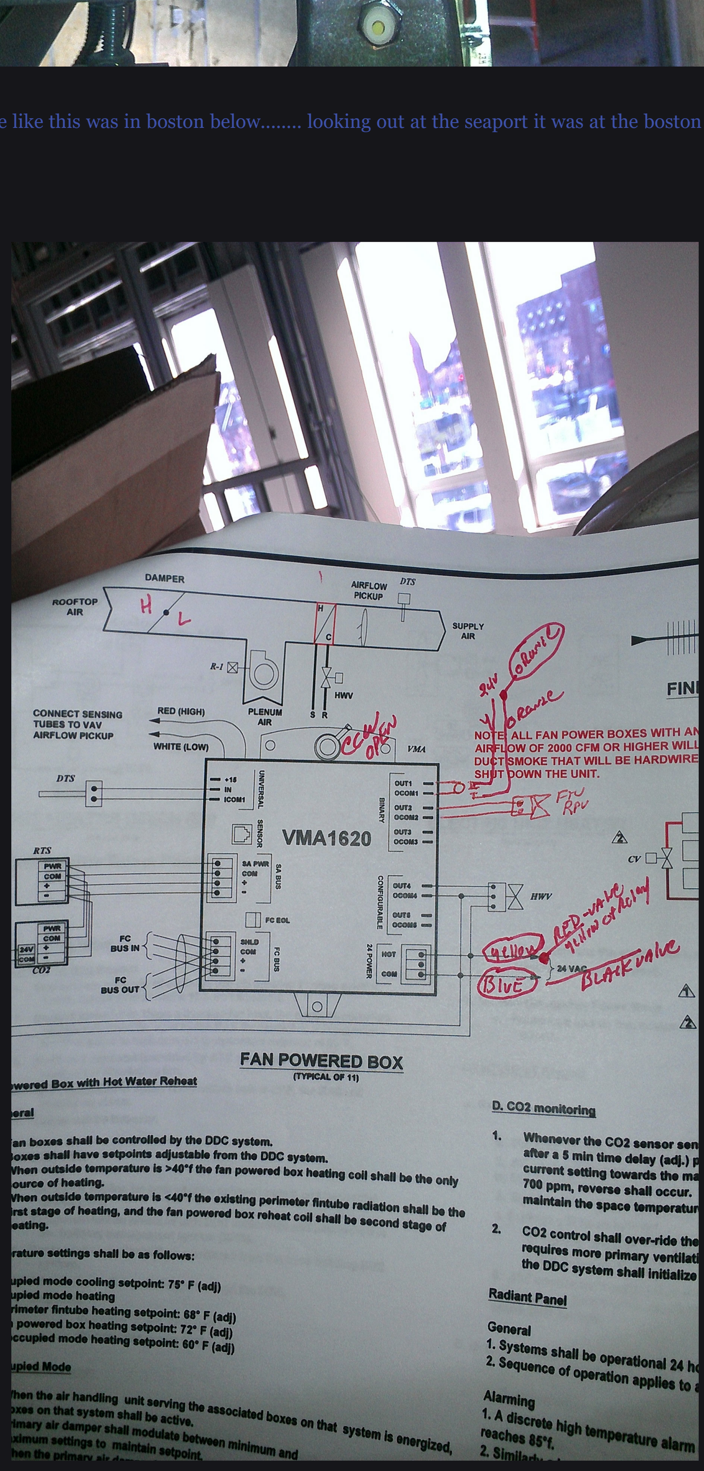


even like 1st pics at my job from 2013.... like pft miss this all but again the brain is a computer, inputs and outputs just saying its why and how this did happen like initiation into thy truth lol like gateway speaks on it

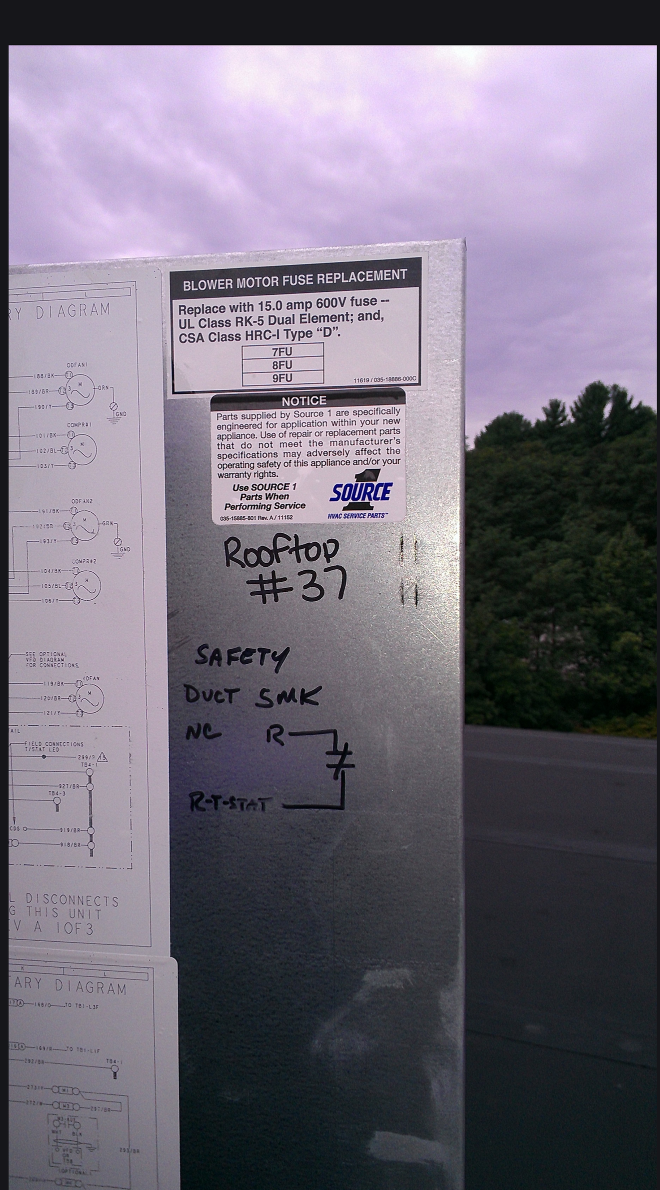
HVAC Controls - Johnson Controls

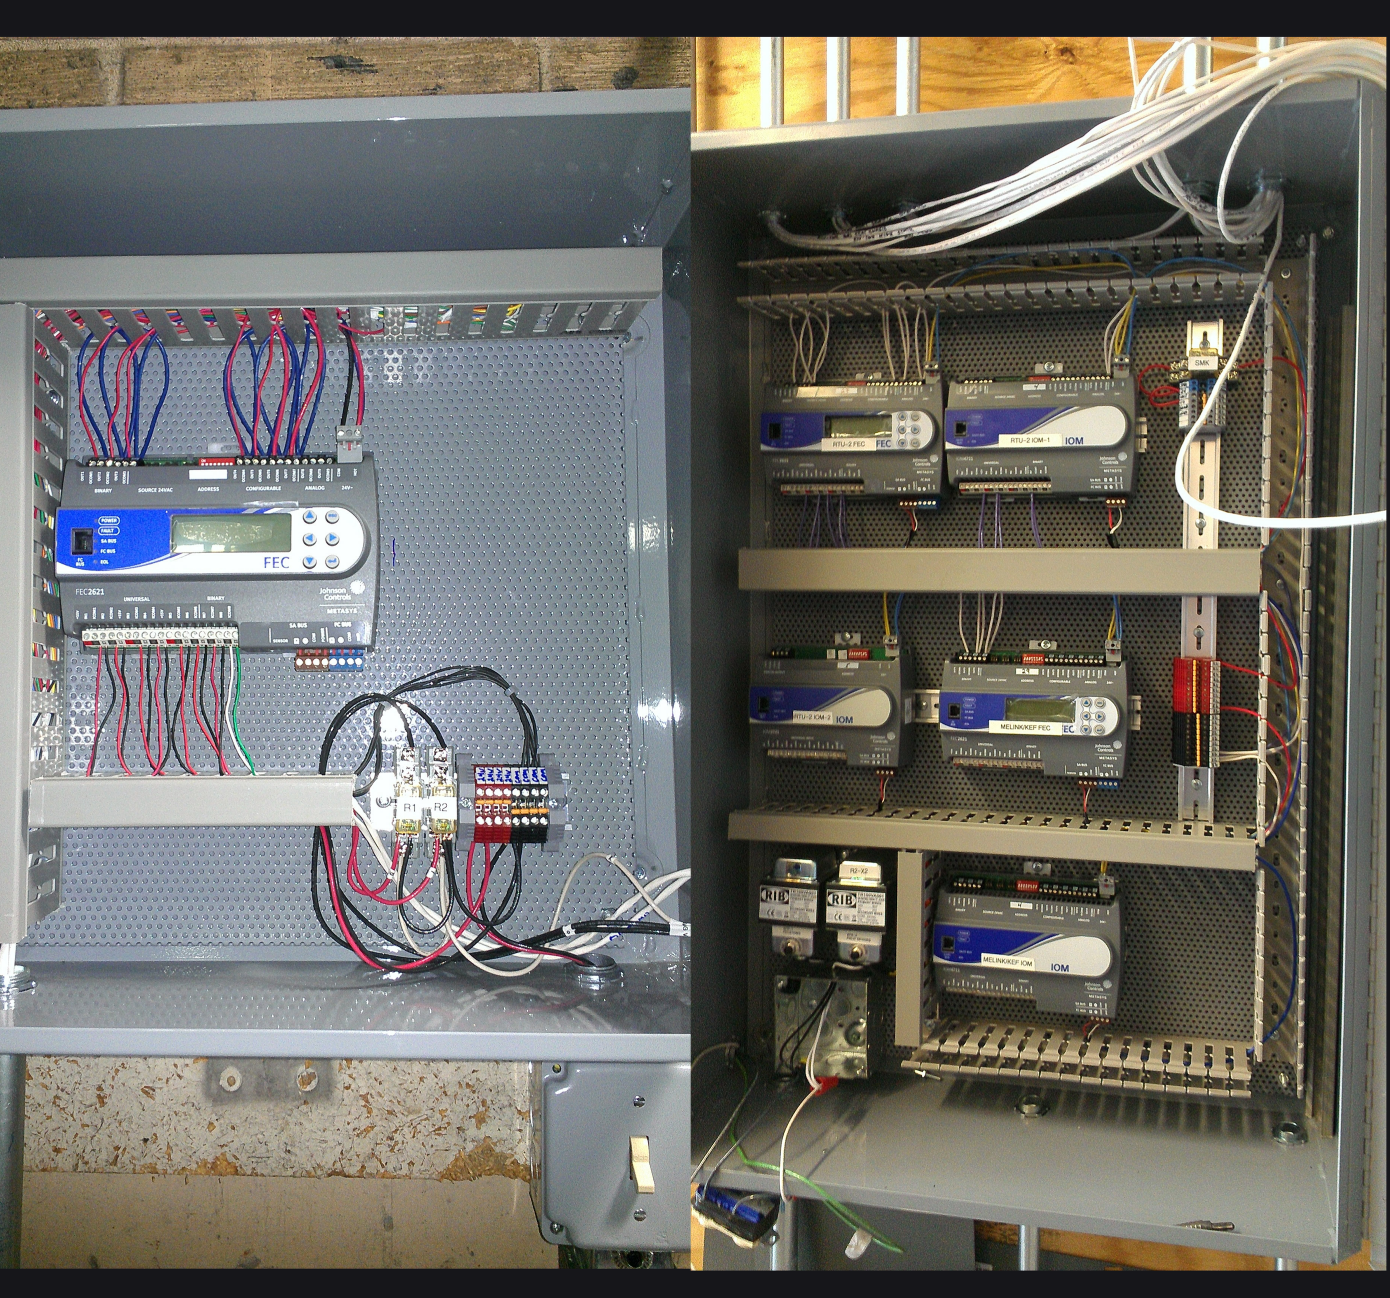


this is when my dad was teaching me like this was in boston below........ looking out at the seaport it was at the boston dmv, again 1st yr apprentice making 30$ an hour here take home lol.... =(



used to also build panels for my boss, this wasnt it, but it reminds me of it all, like we would spend a few days every few weeks building panels and again listened to music all day by myself.......





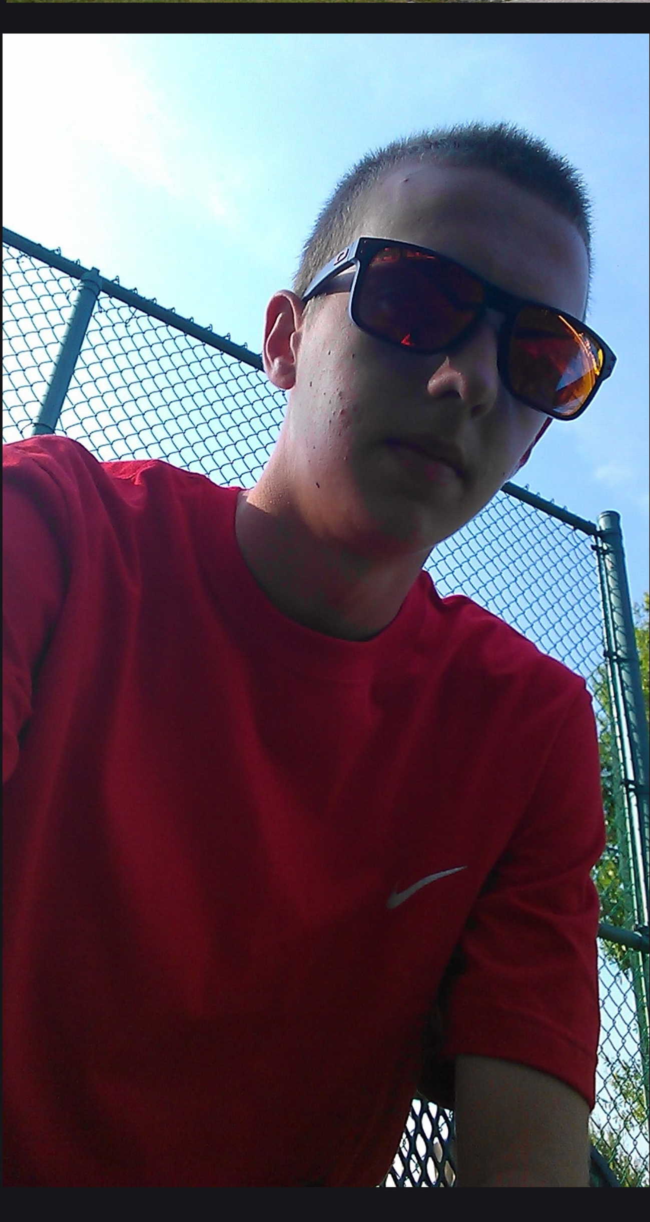
Cameo

My other job.... lol`

Where we shroomed at in 2012

NASA 2012

We did explain this between w.e posting about NASA from UFOTV channel on YT that is what happened, but I remember, to enter this place they had to do a search & I think what happen was bcos of it all, like it was this trip here to FL we drove, So I had some green ritalin tablets, and weed we brought lol, and cigs I remember and had to hide it all like but yah so we took the tablets with us to NASA and found out we gotta be searched prior in a way right like so I go to the bathroom and flushed them lol , just idk chances, we carried the green tablets on us here..... and that my uncle again, he owned an aviation hanger tho in west palm............



Aviation - West Palm 2012

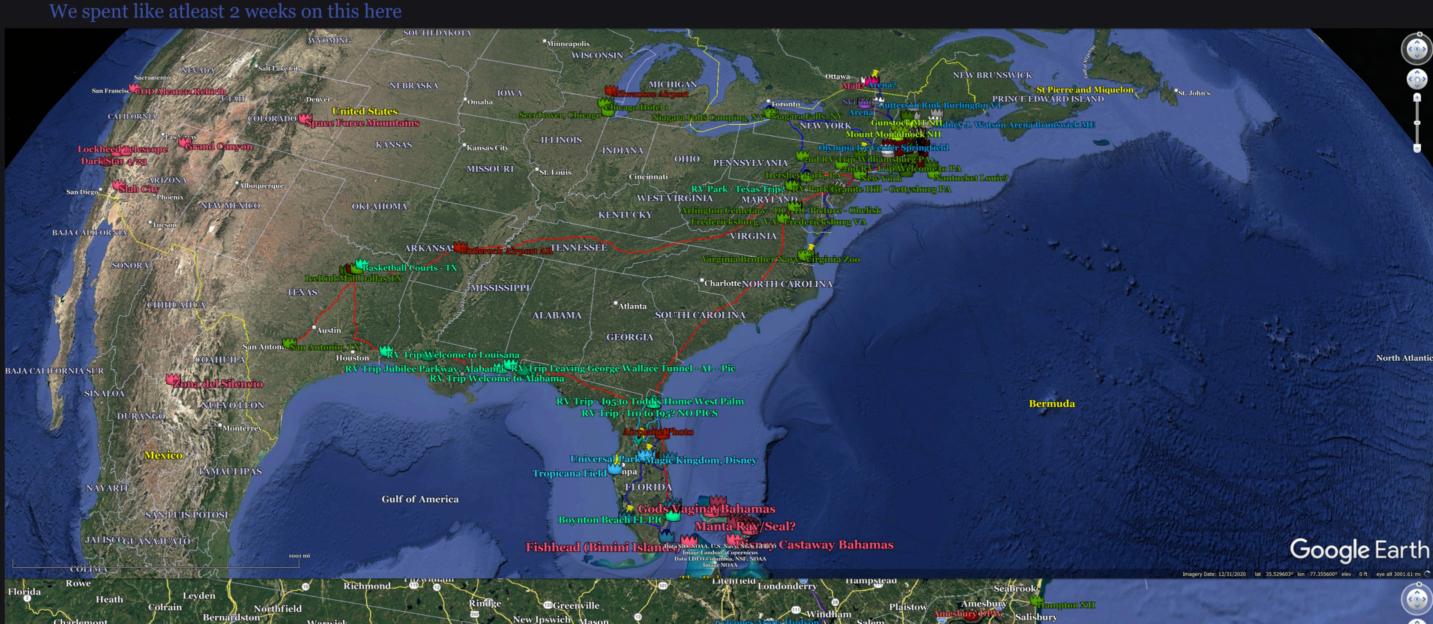
It was tho again the same ppl we went on the RV road trip with and all that....................

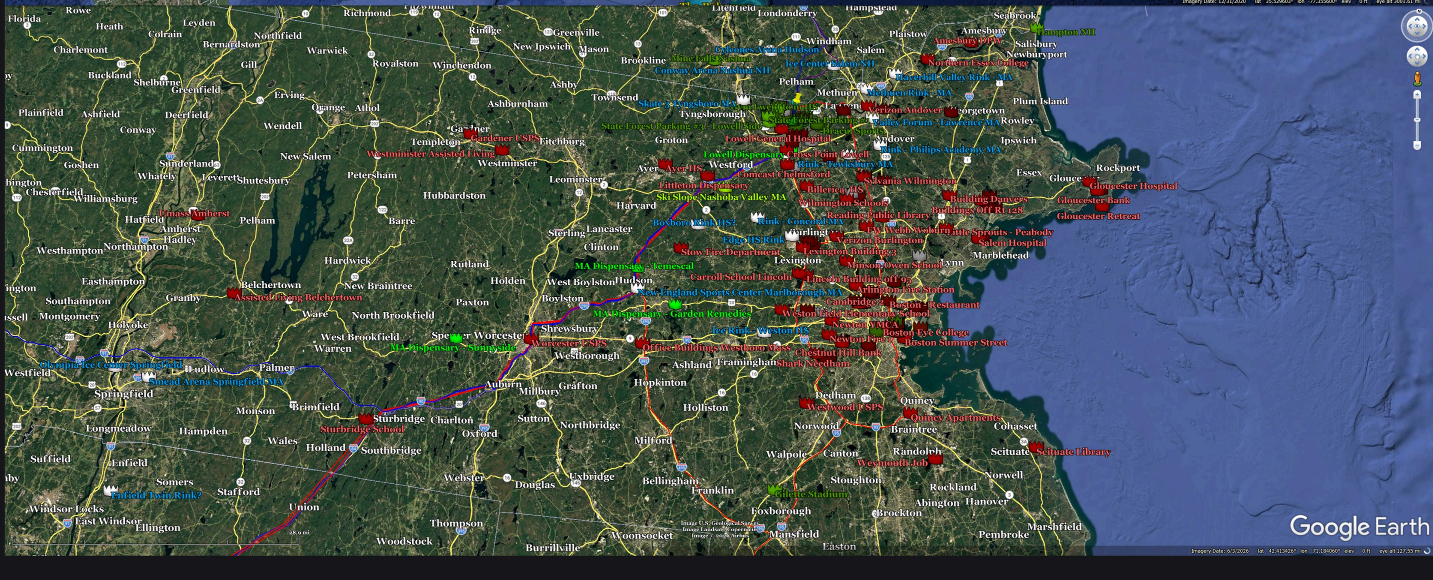
Like that my pepe and laura lived in TX and we went on this RV trip tho and thats when I was with my 1st gf didnt have cell phones w. internet and Had to call my 1st gf ahaha like tried using aim thats how wed talk but its this where I met my uncle Todd but again shit went wild dont know the story like they adopted a kid and he grew up, and their divorced now or someshit, my pepe aint alive anymore ...... but he had a sick house legit lol

was a youngin here with my dad.... but yeah like theirs alot of this story missing like just my trip to florida with my ex...... like we had pictures lost our phone shit got deleted tho lol...........................

Google Earth

We spent like atleast 2 weeks on this here





Hard to see but all the places we been basically and it is like 100x this couldnt remember it all ....

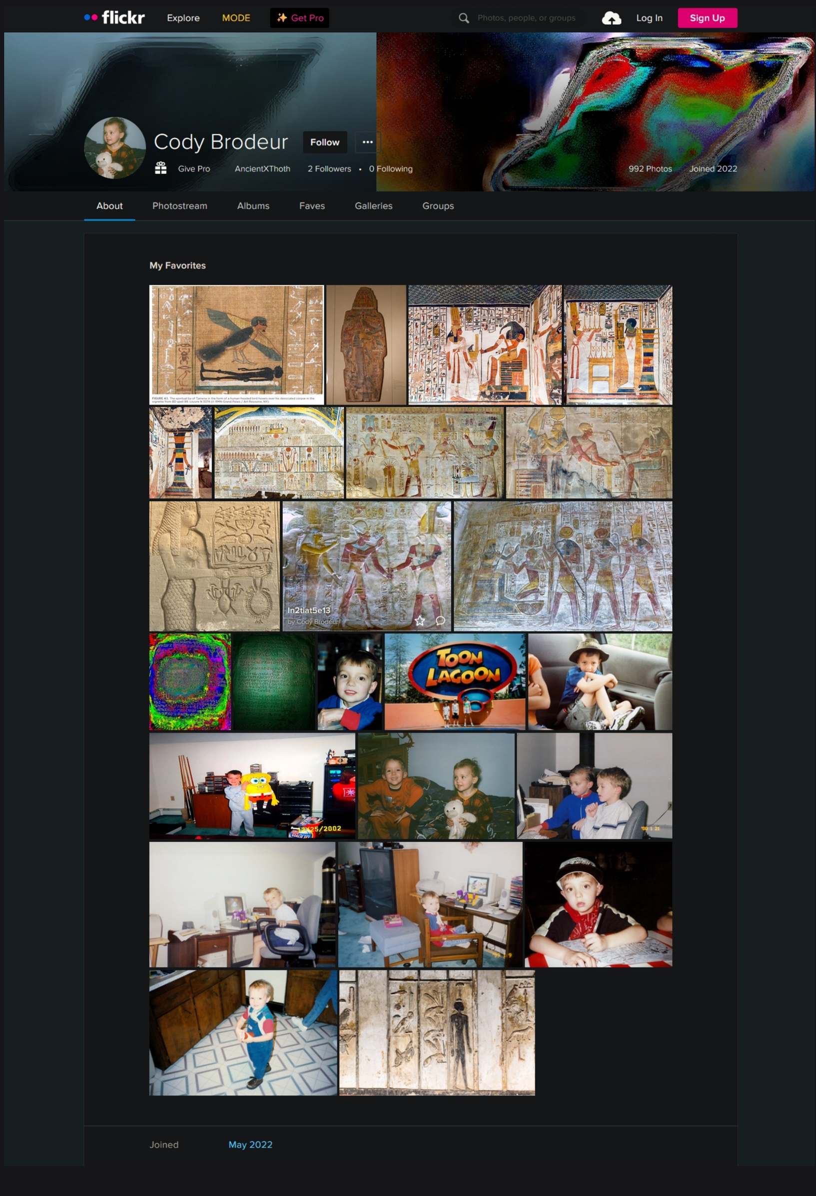
Much more to the story

Theirs alot to thy life story.... we bundle it up at times, but forgetfullness be evilness here also, is thy reason ,

this was texas again marked it on thy map lol..............its why its the only thing that makes sense you see like lol...... cocaine cowboys ahahahha =(funny thing is again we just never did that, but ADHD meds, like the tablets here..........

Flickr

Weve had Flickr pro was awesome, way better quality than instagram tho and that is why we just found it, was perfect and without pro you can only have 1000 photos but idk just to look through it again speaks for it self, like chances, again on macs best day ever like the actual video the song is a little different or think its that song like again christmas.... lol like we just our that entity........ but yah like weve had different sets of photos, my newest ones tho I aint gather that intel until last yr here , I found some prior but it was like unlocking it all..... still got tapes from christmas .... wanna see it really lol



chances, we had the game of life holding it here lol..........

Hmm yah idk we can take this wherever, dont know if imma throw on archive, its thy thoughts.... can be playing with fire, but we got thee story....... lol

Like posting it makes it too easy here, like we be too authentic here for this to be here rn aha like really tho..........

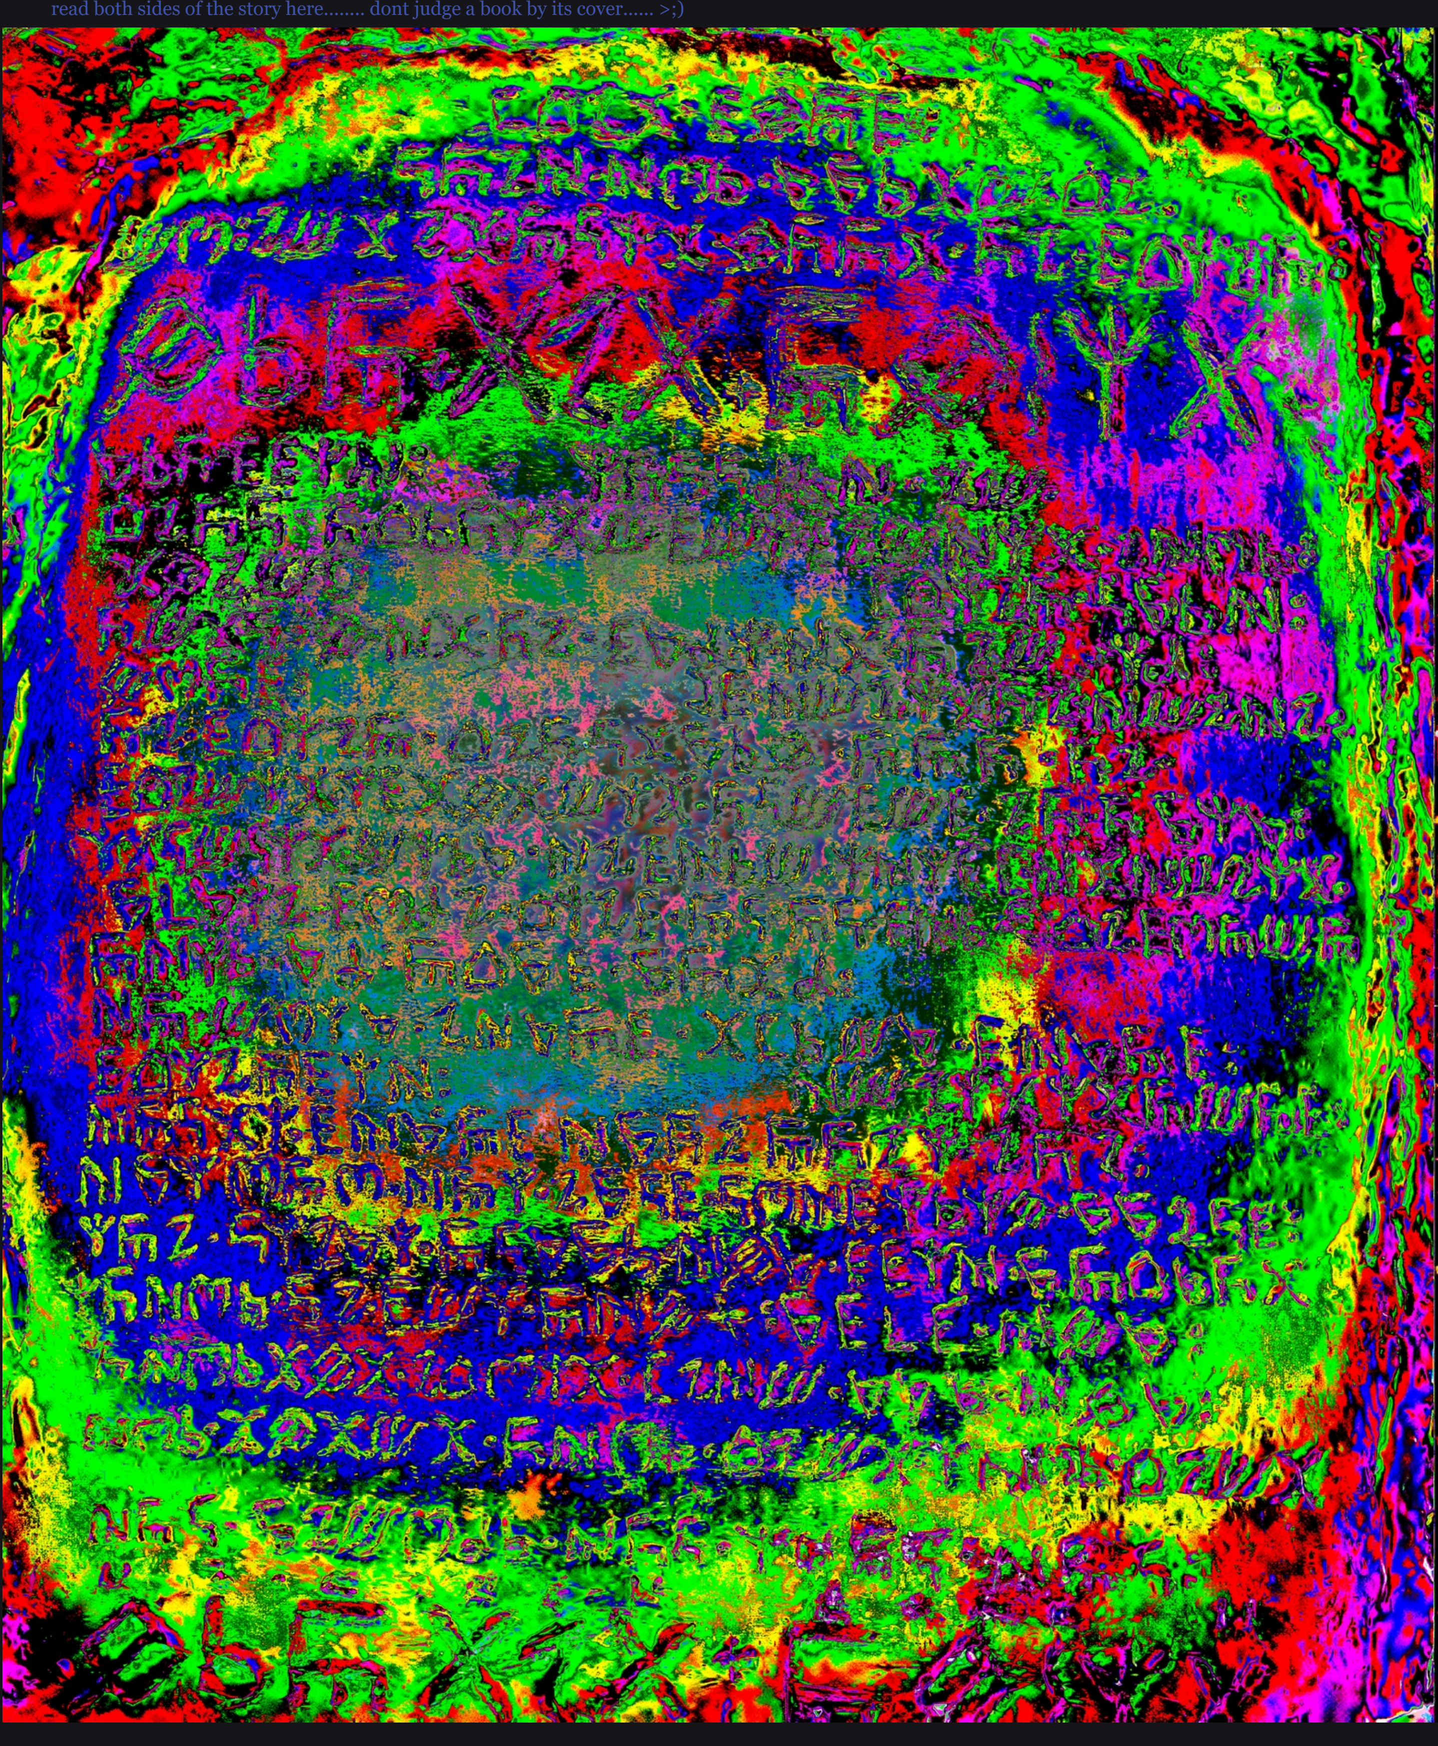
Even tho again ya we dont have a clue what be happening, but we know thy story here, our side of it.......... and again just so many missing pieces here is the truth, like we could spend a month on this .... its been like a week................ and cos we lost our X cos all that, looking like a bot or w.e lol........

like that all this can be happening and thy story dont got told or seen, like just slip it into the archive, but again even my other book it aint get many views.... sometimes it can, but yeah whats the pt of anything I guess........... if you seen thy computer it be filled with memories......... and life sucks rn

Like that weve shared alot on X......... regardless if its seen or not thats how it works............ like just even how again this just happened at my work like we posted what we wrote, true or not, this did happen, cant trick thee, and yah dont know cos the meds paradox....... all of it, the life paradox............ like all we done is legit spend time with ourselfs .... in our thoughts..... the mind of AncientXThoth here, the experiences ....

Nothing is Random

but yeah like just again idk we can take this where we want we prob have 10-20k pictures on our computer here..... between it all, lol..... and yeah like just life be weird..... it sucks rn, the more pictures I add here, the more chances it can get fucked up on this word libreoffice thing like you move a picture above and it can sometimes fk it all up so we try not to fix........ and the longer it takes to save, legit producing thy other book, it is legit mad long in a way who does it like that but me , but we almost lost it all at one pt like legit so idk when this one will end or if I will share it, maybe......... just cos dont have X anymore.......

just feel like no1 does it like this so if it is seen it can be interesting............... but yah its what the writer does.... the entity lol like it went into us, how else do you express it......................


like this be our story and what life wanted us to be.... and no1 wants to be a friend, give thy a chance, or share, esp after this happen to me here, like always read both sides of the story here........ dont judge a book by its cover...... >;)
